Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, and Atlanta, GA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 54, No. 161
Tuesday, August 22, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-NM-24-AD; Amdt. 39-6309]

Airworthiness Directives; British Aerospace Model DH/HS/BH/BAE 125 Series Airplanes, Equipped With Sundstrand Turbomach Titan Gas Turbine Auxiliary Power Units (APU), Model T-62T Series, Installed in the Aft Equipment Compartment of the Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to British Aerospace Model DH/HS/BH/BAe 125 series airplanes equipped with certain APU's, which would require a revision to the Airplane Flight Manual Supplement Limitations Section and the installation of a placard in the cockpit prohibiting the use of the APU during flight, except during an emergency. This amendment is prompted by an FAA inspection of the APU, installed in accordance with a certain Supplemental Type Certificate (STC), in which it was determined that this unit must be restricted to ground use only. This condition, if not corrected, could result in a fire in the equipment compartment, a puncture of the aft pressure bulkhead, and severance of the flight control cables.

DATES: Effective September 28, 1989.

ADDRESSES: This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Pasion, Standardization Branch, ANM-113; telephone (206) 431-2116. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations, to include a new airworthiness directive applicable to British Aerospace Model DH/HS/BH/BAe 125 series airplanes equipped with certain APU's, which requires a revision to the Airplane Flight Manual Supplement Limitations Section and the installation of a placard in the cockpit prohibiting the use of the APU during flight, was published in the **Federal Register** on April 28, 1989 (54 FR 18303).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter concurred with the proposed AD, but suggested that the wording of the required placard and AFM limitation be modified to allow the use of the APU during an emergency. The FAA concurs with this proposal, since the operation of the APU during an emergency, such as a dual generator failure, may enhance the continued safe flight and landing of the aircraft. The final rule has been revised to require wording of the placard and AFM limitation to read "OPERATION OF THE APU DURING FLIGHT IS PROHIBITED, EXCEPT DURING AN EMERGENCY."

Another commenter recommended that the proposed AD be withdrawn since the installation has had an excellent service record. With 15 years and over 1.5 million hours of operation, there has never been reported an uncontained APU failure which resulted in the severance of the control cables, or a fire or puncture of the aft pressure bulkhead. The FAA agrees that this statement is true. However, the FAA has determined that a potential hazard still exists and, by prohibiting the use of the APU during flight, the consequences of a uncontained rotor or fire in the aft equipment compartment will be minimized.

The same commenter also suggested that if the proposal is not withdrawn, it should be modified to allow pilot discretion for in-flight use during officially declared emergency conditions. The FAA concurs and, as discussed above, the final rule has been revised to permit use of the APU during emergency situations.

The third commenter objected to the proposed AD and requested its recision because proper installation of the APU is the responsibility of the installer, and this AD implies that the APU is deficient. Furthermore, the commenter suggested that the APU model be deleted from the AD and that reference to a generic APU on BAe Model 125 series airplanes should be used in lieu of reference to the specific APU model. The FAA does not concur with the suggestion that the proposal be withdrawn. It is not the intent of this AD action to imply that the APU, which has been approved under TSO C77, is deficient. It is the installation of the APU that is deficient and this AD addresses the improper installation of the APU. Further, the FAA does not concur with deleting the make and model of the APU from the applicability of the AD, since they are used in identifying those installations which are affected by this AD. If other installations with different APU models are found to be deficient, the FAA may mandate similar action.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule with the change noted above.

It is estimated that 120 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $4,800.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities, under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace: Applies to Model DH/HS/BH/BAe 125 series airplanes certificated in any category, equipped with Sundstrand Turbomach Titan Gas Turbine Auxiliary Power (APU) Unit, Model T–62T Series, installed in the aft equipment compartment of the airplane.

Note.—Installation of the subject APU's has been in accordance with, but are not limited to, the following Supplemental Type Certificates (STC): SA674CE, SA1196EA, SA1143EA, SA44ONE, SA4710SW, SA1176EA, SA1173EA, SA1923SW.

This AD applies to all Sundstrand Turbomach Titan APU installations in the aft equipment compartment. Compliance is required as indicated unless previously accomplished.

To prevent a fire in the aft equipment compartment, puncture of the aft pressure bulkhead, and severance of the control cables, due to an uncontained APU rotor failure, accomplish the following:

A. Within the next 10 days after the effective date of this AD:

1. Revise the Limitations Section in the FAA-approved Airplane Flight Manual (AFM) Supplement to include the following statement. This may be accomplished by inserting a copy of this AD in the AFM Supplement Limitations Section: "OPERATION OF THE APU DURING FLIGHT IS PROHIBITED, EXCEPT DURING AN EMERGENCY."

2. Install a placard next to the APU start switch in the cockpit to state: "OPERATION OF THE APU DURING FLIGHT IS PROHIBITED, EXCEPT DURING AN EMERGENCY."

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region, Transport Airplane Directorate.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM–113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of modifications required by this AD.

This amendment becomes effective September 28, 1989.

Issued in Seattle, Washington, on August 14, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89–19677 Filed 8–21–89; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89–NM–54–AD; Amdt. 39–6310]

Airworthiness Directives; British Aerospace Model BAC 1–11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model BAC 1–11 200 and 400 series airplanes, which would limit the number of operations at increased cabin pressure differential, and would require repetitive structural inspections of the fuselage, and repair or replacement, as necessary. This amendment is prompted by the determination that airplanes operating at increased cabin pressure differential are more likely to develop fatigue cracking earlier in their service lives than those airplanes operating at normal cabin differential pressures. This condition, if not corrected, could result in the inability of the airplane structure to carry required loads.

DATES: Effective September 28, 1989.

ADDRESSES: The applicable service information may be obtained from British Aerospace PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Standardization Branch, ANM–113; telephone (206) 431–1565. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations, to include a new airworthiness directive applicable to British Aerospace BAC 1–11 200 and 400 series airplanes, which limits the number of operations at increased cabin pressure differential, and requires repetitive structural inspections of the fuselage, and repair or replacement, as necessary, was published in the **Federal Register** on May 30, 1989 (54 FR 22909).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supported the rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 30 airplanes of U.S. registry will be affected by this AD, that it will take approximately 67 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $80,400.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities, under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the

regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace: Applies to Model BAC 1–11 200 and 400 series airplanes, Post-Modification PM2840 and PM3187, or PM4866 (excluding airplanes modified to PM5282, cabin freight door), certificated in any category. Compliance is required as indicated below, unless previously accomplished.

To ensure continued structural integrity, accomplish the following:

A. For airplanes modified for operation to a maximum of 7.75 pounds per square inch (psi) cabin pressure differential, as specified in British Aerospace Alert Service Bulletin 53–A–PM5922, Issue 1, dated January 27, 1987:

1. At or prior to the accumulation of 55,000 landings, or within 15 months after the effective date of this AD, whichever occurs later, perform the inspections specified in paragraph 2.1 of the service bulletin and repeat the inspections in accordance with paragraph 2.1.1 of the service bulletin at intervals shown in Table AA of the service bulletin.

2. At or prior to the accumulation of 60,000 landings, or within 30 days after the effective date of this AD, whichever occurs later, reduce the aircraft maximum cabin pressure differential to 7.5 psi by system modification, in a manner approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

B. For airplanes modified for operation at cabin pressure differentials above 7.75 psi up to a maximum of 8.2 psi, as specified in British Aerospace Alert Service Bulletin 53–A–PM5922, Issue 1, dated January 27, 1987:

1. For airplanes originally manufactured for operation at cabin pressure differentials above 7.75 psi, at or prior to the accumulation of the number of landings shown for initial inspection in the "NE period" column of Table AA in the service bulletin, or within 15 months after the effective date of this AD, whichever occurs later, perform inspections specified in paragraph 2.2.1 of the service bulletin and repeat the inspections as specified in paragraph 2.2.3 of the service bulletin at intervals shown in Table AA of the service bulletin.

2. For airplanes modifed for operation at cabin pressure differential above 7.75 psi after the airplane entered service, at or prior to the accumulation of the number landings shown for initial inspection in the "NE period" column (obtained using the inspection adjustment graph (page 6) of the service bulletin), in Table AA of service bulletin, or within 15 months after the effective date of this AD, whichever occurs later, perform initial inspections specified in paragraph 2.2.2 of the service bulletin. Repeat the inspections, as specified in paragraph 2.2.3 of the service bulletin, at intervals shown in Table AA of the service bulletin.

3. At or prior to the accumulation of 55,000 landings, or within 30 days after the effective date of this AD, whichever occurs later, reduce the aircraft cabin maximum operating pressure differential to 7.5 or 7.75 psi by modification as specified in paragraph 2.2.4 of the service bulletin, in a manner approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

4. For airplanes which have had the cabin pressure differential reduced form 8.2 psi to 7.75 psi as specified in paragraph 2.2.6 of the service bulletin, perform repetitive inspections at intervals specified in the "NE period" column in Table AA of the service bulletin.

5. At or prior to the accumulation of 60,000 landings, or within 30 days after the effective date of this AD, whichever occurs later, the airplane cabin maximum operating pressure differential must be reduced to 7.5 psi by modification as specified in paragraph 2.2.7 of the service bulletin, in a manner approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

6. For airplanes modified for 8.2 psi maximum cabin operating pressure differential and operated for a period in excess of any Table AA inspection threshold in the service bulletin, perform one additional inspection at or prior to the Table AA "NE period" column interval after limiting operation to 7.5 pounds per square inch, as specified in paragraph 2.2.5 of the service bulletin.

C. If defects are found during the inspections required by this AD, prior to further flight:

1. Replace with a serviceable part of the same part number; or

2. For damage within the limits specified in the BAC 1–11 Structural Repair Manual, repair in accordance with the Structural Repair Manual; or

3. Repair in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM–113.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective September 28, 1989.

Issued in Seattle, Washington, on August 14, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 50

Public Health Service Grant Appeals Procedures

AGENCY: Public Health Service, HHS.

ACTION: Final rule.

SUMMARY: The Department of Health and Human Services (HHS) revises 42 CFR part 50, subpart D, which establishes an informal procedure for the resolution of certain Public Health Service (PHS) grant and cooperative agreement disputes prior to their submission to the Departmental Appeals Board. A revision of these procedures is necessary in order to bring them into conformance with the Department's rules at 45 CFR part 16 (46 FR 43817, August 31, 1981) which established the requirements and procedures applicable to the Departmental Appeals Board with respect to disputes arising under certain departmental grant and cooperative agreement programs. The major changes consist of the addition of one adverse determination to which the procedure is applicable and the deletion of another in order to eliminate the possibility of confusion arising as a result of the different areas of jurisdiction which are currently reflected by the two sets of regulations.

EFFECTIVE DATE: September 21, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Theodore J. Roumel, Phone: 301/443-1874.

SUPPLEMENTARY INFORMATION: HHS published a Notice of Proposed Rulemaking (NPRM) with respect to the revision of the informal PHS appeal procedures on July 8, 1988 (53 FR 25631). Comments from the public were requested. A single commenter provided several comments, but only one was considered to be relevant to the proposed changes in the regulatory text. That comment pertained to proposed § 50.404(a)(4) which describes the appealable adverse determination being added to the PHS regulations by this revision. That paragraph appeared in the NPRM as follows:

> A denial of a noncompeting continuation award under the project period system of funding where the denial is for failure to comply with the terms of a previous award. This does not apply to denials that are due to the grantee's poor performance or to the unavailability of funds.

The commenter suggested that the last sentence of the above paragraph rendered the paragraph more restrictive than the corresponding provision in the Departmental appeal regulations (45 CFR part 16, appendix A, paragraph (C)(a)(3)) the language of which is identical to the first sentence of the proposed paragraph quoted above.

It was not the intent of PHS to add language which would be interpreted as more restrictive than that in the Departmental regulations. The intent was to add language which would provide clarification as to the scope of the subject provision. Since the added language appears to have caused confusion, it has been deleted. The PHS language with respect to this adverse determination now exactly reflects that in the HHS regulations. In all other respects, except for minor editorial changes, the final rule follows the language of the proposed rule.

Impact Analysis

Executive Order 12291: Executive Order 12291 requires that a regulatory impact analysis be prepared for major rules—defined in the Order as any rule that has an annual effect on the nationally economy of $100 million or more, or certain other specified effects. The Secretary certifies that these regulations are not major rules within the meaning of the Executive Order because they do not have an effect on the economy of $100 million or more or otherwise meet the threshold criteria.

Regulatory Flexibility Act of 1980: The Regulatory Flexibility Act (5 U.S.C. Ch. 6) requires the Federal Government to anticipate and reduce the impact of rules and paperwork requirements on small businesses. The Secretary has determined that this regulation will not have a significant economic impact on a substantial number of small entities and hereby certifies that an initial regulatory flexibility analysis is not required.

List of Subjects in 42 CFR Part 50

Administrative practice and procedure, Grant programs—health, Health care.

For the reasons set forth in the preamble, 42 CFR part 50, subpart D, is revised as set forth below:

Dated: April 12, 1989.

James F. Dickson,

Acting Assistant Secretary for Health.

Approved: August 4, 1989.

Louis W. Sullivan,

Secretary.

Subpart D—Public Health Service Grant Appeals Procedure

Sec.
50.401 What is the purpose of this subpart?
50.402 To what programs do these regulations apply?
50.403 What is the policy basis for these procedures?
50.404 What disputes are covered by these procedures?
50.405 What is the structure of review committees?
50.406 What are the steps in the process?

Authority: Sec. 215, Public Health Service Act, 58 Stat. 690 (42 U.S.C. 216); 45 CFR 16.3(c).

§ 50.401 What is the purpose of this subpart?

This subpart establishes an informal procedure for the resolution of certain postaward grant and cooperative agreement disputes within PHS.

§ 50.402 To what programs do these regulations apply?

This subpart applies to all grant and cooperative agreement programs, except block grants, which are administered by the U.S. Public Health Service, including those administered by the National Institutes of Health; the Health Resources and Services Administration; the Centers for Disease Control; the Agency for Toxic Substances and Disease Registry; the Alcohol, Drug Abuse, and Mental Health Administration; the Food and Drug Administration; the Indian Health Service; the Office of the Assistant Secretary for Health (OASH); and the PHS regional offices.

§ 50.403 What is the policy basis for these procedures?

The Secretary of Health and Human Services has established a Departmental Appeals Board for the purpose of providing a fair and flexible process for the appeal of written final decisions involving certain grant and cooperative agreement programs administered by constituent agencies of the Department. The regulatory provision which establishes the circumstances under which the Board will accept an appeal (45 CFR 16.3) provides, among other things, that the appellant must have exhausted any preliminary appeal process required by regulation before a formal appeal to the Departmental Board will be allowed. These regulations provide such an informal preliminary procedure for resolution of disputes within PHS in order to preclude submission of cases to the Departmental Appeals Board before PHS has had an opportunity to review decisions of its officials and to settle disputes with grantees.

§ 50.404 What disputes are covered by these procedures?

(a) These procedures are applicable to the following adverse determinations under PHS discretionary project grants and cooperative agreements (hereinafter both referred to as grants):

(1) Termination, in whole or in part, of a grant for failure of the grantee to carry out its approved project in accordance with the applicable law and the terms and conditions of such assistance or for failure of the grantee otherwise to comply with any law, regulation, assurance, term, or condition applicable to the grant.

(2) A determination that an expenditure not allowable under the grant has been charged to the grant or that the grantee has otherwise failed to discharge its obligation to account for grant funds.

(3) A determination that a grant is void.

(4) A denial of a noncompeting continuation award under the project period system of funding where the denial is for failure to comply with the terms of a previous award.

(b) A determination subject to this subpart may not be reviewed by the review committee described in § 50.405 unless an officer or employee of the agency, OASH, or the regional office has notified the grantee in writing of the adverse determination. The notification must set forth the reasons for the determination in sufficient detail to enable the grantee to respond and must inform the grantee of the opportunity for review under this subpart.

§ 50.405 What is the structure of review committees?

The head of each agency or his/her designee shall appoint review committees to review appeals of adverse determinations made by headquarters officials for programs under the jurisdiction of that agency. The Assistant Secretary for Health, or his/her designee, shall appoint review committees to review adverse determinations made by OASH officials and regional officials for programs under their jurisdiction. A minimum of three employees shall be appointed (one of whom shall be designated as chairperson) either on an ad hoc, case-by-case basis, or as regular members of review committees for such terms as may be designated. None of the members of the review committee reviewing any given appeal may be from the office of the responsible official whose adverse determination is being appealed (e.g., project officer, grants specialist, program manager, grants management officer).

§ 50.406 What are the steps in the process?

(a) A grantee with respect to whom an adverse determination described in § 50.404(a) above has been made and who desires a review of that determination must submit a request for such review to the head of the appropriate agency or his/her designee (or in the case of an OASH program or regional office determination, to the Assistant Secretary for Health or his/her designee) no later than 30 days after the written notification of the determination is received, except that if the grantee shows good cause why an extension of time should be granted, the head of the appropriate agency or his/her designee (or in the case of an OASH program or regional office determination, the Assistant Secretary for Health or his/her designee) may grant an extension of time.

(b) The request for review must include a copy of the adverse determination, must identify the issue(s) in dispute, and must contain a full statement of the grantee's position with respect to such issue(s) and the pertinent facts and reasons in support of the grantee's position. In addition to the required written statement, the grantee shall provide copies of any documents supporting its claim.

(c) When a request for review has been filed under this subpart with respect to an adverse determination, no action may be taken by the awarding agency, OASH, or regional office pursuant to such determination until the request has been disposed of, except that the filing of the request shall not affect any authority which the agency, OASH, or regional office may have to suspend assistance or otherwise to withhold or defer payments under the grant during proceedings under this subpart. This paragraph does not require the awarding agency, OASH, or regional office to provide continuation funding during the appeal process to a grantee whose noncompeting continuation award has been denied.

(d) Upon receipt of a request for review, the head of the agency or his/her designee (or, if the adverse determination was made in an OASH program or regional office, the Assistant Secretary for Health or his/her designee) will make a decision as to whether the dispute is reviewable under this subpart and will promptly notify the grantee and the office responsible for the adverse determination of this decision. If the head of the agency or his/her designee (or, if applicable, the Assistant Secretary for Health or his/her designee) determines that the dispute is reviewable, he/she will forward the matter to the review committee appointed under § 50.405.

(e) The agency, OASH, or regional office involved will provide the review committee appointed under § 50.405 with copies of all relevant background materials (including application(s), award(s), summary statement(s), and correspondence) and any additional pertinent information available. These materials must be tabbed and organized chronologically and accompanied by an indexed list identifying each document.

(f) The grantee shall be given an opportunity to provide the review committee with additional statements and documentation not provided in the request for review described in paragraph (b) of this section. This additional submission, which must be organized and indexed as indicated under paragraph (e) of this section, should provide only material that is relevant to the review committee's deliberation of the issues in the case.

(g) The review committee may, at its discretion, invite the grantee and/or the agency/OASH/regional office staff to discuss the pertinent issues with the committee and to submit such additional information as the committee deems appropriate.

(h) Based on its review, the review committee will prepare a written decision to be signed by the chairperson and each of the other committee members. The review committee shall send the written decision with a transmittal letter to the grantee and shall send a copy of both to the official responsible for the adverse determination. If the decision is adverse to the grantee's position, the transmittal letter must state the grantee's right to appeal to the Departmental Appeals Board under 45 CFR Part 16.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 88-218; RM-6232]

Radio Broadcasting Services; Statesboro, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Radio Statesboro, Inc., *See*, 53 FR 20656, June 6, 1988, substitutes Channel 261C2 for Channel 261A at Statesboro, Georgia, and modifies the license for Station WMCD(FM) to specify operation on the higher powered channel. Channel 261C2 can be allotted to Statesboro in compliance with the Commission's minimum distance separation requirements with a site restriction and can be used at its current transmitter site. The coordinates for this allotment are North Latitude 32–27–21 and West Longitude 81–46–27. With this action, this proceeding is terminated.

EFFECTIVE DATE: September 29, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88–218, adopted August 1, 1989, and released August 15, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

BILLING CODE 6712-01-M

Proposed Rules

Federal Register
Vol. 54, No. 161
Tuesday, August 22, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1405

Loans, Purchases and Other Operations

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The regulations at 7 CFR Part 1405 set forth the general provisions applicable to Commodity Credit Corporation (CCC) loans, purchases and other operations. The amendment made by this proposed rule would provide that CCC will participate in State loan agricultural loan mediation programs with respect to farm facility loans made in accordance with 7 CFR 1474.

DATE: Comments must be received on or before September 21, 1989, in order to be assured of consideration.

ADDRESS: Director, Cotton, Grain and Rice Price Support Division, USDA–ASCS, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: David Wolf, Program Specialist, Cotton, Grain and Rice Price Support Division, USDA–ASCS, P.O. Box 2415, Washington, DC 20013. Telephone: (202) 447–4704.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under United States Department of Agricultural (USDA) procedures implementing Executive Order 12291 and Departmental Regulation No. 1512–1 and has been classified as "not major." It has been determined that the provisions of this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises in domestic or export markets.

It has been determined that the Regulatory Flexibility Act is not applicable to the proposed rule since neither the Agricultural Stabilization and Conservation Service (ASCS) nor the Commodity Credit Corporation (CCC) is required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

CCC makes available nonrecourse price support loans to eligible producers under the provisions of the Agricultural Act of 1949, as amended, and the CCC Charter Act, as amended. These loans are nonrecourse in nature. Accordingly, it is proposed that CCC would not participate in State agricutural loan mediation programs with respect to such loans since these loans may be satisfied in full by forfeiture of the loan collateral to CCC without regard to the market value of the commodity. However, with respect to CCC farm facility loans, which are recourse loans made in accordance with 7 CFR Part 1474, CCC has generally renegotiated the terms and conditions of the loan in order to assist producers, to the extent practicable, to retain possession of the mortgaged facility. Therefore, it is proposed that CCC would participate in State agricultural loan medication programs with respect to loans made in accordance with 7 CFR Part 1474. Accordingly, it is proposed that 7 CFR Part 1405 be amended to provide that CCC would participate in such programs with respect to farm facility loans.

List of Subjects

Loan program/agriculture, Price support programs.

Accordingly, Title 7 of the Code of Federal Regulations is proposed to be amended to read as follows:

PART 1405—[AMENDED]

1. Authority citation for 7 CFR Part 1405 is revised to read as follows:

Authority: 15 U.S.C. 714b and 714c.

2. A new § 1405.4 is added to read as follows:

§ 1405.4 State loan mediation programs.

With respect to farm facility loans made in accordance with 7 CFR Part 1474, the Commodity Credit Corporation (CCC) will participate in mediations conducted pursuant to a State's agricultural loan mediation program under the same terms and conditions applicable to agricultural creditors generally and will cooperate in good faith in such mediations by complying with requests for information and analysis, and in presenting and exploring debt restructuring proposals whenever feasible, when that State is and remains a qualifying State as defined in 7 CFR 1946.2(b). CCC will not participate in such mediation programs with respect to commodity price support loans made in accordance with this title.

Signed at Washington, DC on August 15, 1989.

John A. Stevenson,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 89–19664 Filed 8–21–89; 8:45 am]

BILLING CODE 3410-05-M

Farmers Home Administration

7 CFR Parts 1900 and 1951

Administrative Offset

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its Administration Offset regulation. This proposed amendment permits administrative offset against amounts that would otherwise be paid by other Federal agencies, including retirement funds and pension payments, to delinquent FmHA borrowers and other entities indebted to the Agency. The objective is to inform the public of the procedures that will be used by FmHA to exercise administrative offset. The intended effect is to allow the Agency to collect amounts that would otherwise be paid to delinquent borrowers and other debtors.

DATE: Comments must be received on or before September 21, 1989.

ADDRESSES: Send comments, in duplicate, to the Office of the Chief, Directives and Forms Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348–S, 14th and Independence SW., Washington, DC 20250. All written comments will be available for public inspection during normal working hours at the above address.

FOR FURTHER INFORMATION CONTACT: Bob Nelson, Management Analyst, Farmers Home Administration, U.S. Department of Agriculture, Room 5505, South Agriculture Building, Washington, DC 20250, telephone (202) 475–4705.

SUPPLEMENTARY INFORMATION:

Comments Invited

FmHA will consider all aspects of its administrative offset regulations in this proceeding, and invites comments from interested persons on all factual matters, policy views and considerations, and legal arguments, relevant to the entirety of the subject of the Agency's use of administrative offset to collect debts owed to it and, as well, to the Agency's participation in administrative offsets initiated by other Federal agencies. Comments should not be limited to the specific proposals set out in this notice, since all issues concerning FmHA's use of administrative offset are within the scope of this proceeding. The Agency's final rule may be different from that set out in this proposal, depending on the comments received and on the Agency's internal deliberations.

General Information

The legislative history of the Debt Collection Act of 1982, 31 U.S.C. 3716, evidences public concern that Federal agencies were not taking sufficient action to collect debts owed to them. The Act was designed to facilitate the use of administrative offset, among other techniques, so as to permit agencies to remedy this problem. (See S. Rept. 97–378, 97th Cong. 1st Sess, 1983 U.S. Code, Cong. & Admin. News at p. 3377 *et seq.*)

While the central purpose of the Act was to reduce the amount of uncollected debts to the Government, the Act also requires Federal agencies to establish due process procedures for use in connection with administrative offsets. A situation frequently mentioned in the Congressional discussions on the Act was that of the unpaid student loan in which there had been no contract between the borrower and the Federal creditor agency for a period of several years. In this situation, notice and an opportunity to be heard before the agency took action would avoid surprise to the debtor, permit the debtor to raise any claims he or she might have of mistakes on the agency's part, such as the identity of the debtor and/or prior repayment of, or the amount, the debt. The General Accounting Office-Justice Department Federal Claims Collection Standards, 4 CFR 102.3, provide more detailed guidelines concerning the procedures that agencies must establish and use in connection with administrative offset.

FmHA intends to use the administrative offset procedures that it will establish through this rulemaking proceeding to collect all debts that may be owed to it in the future—including debts whose circumstances fit the Congressional model discussed above, and in which the debtor might have little reason to anticipate the use of administrative offset apart from the notice issued pursuant to these rules. The rules will be most frequently used, however, to recover losses on loan defaults on the Agency's farmer program and single-family housing loans. Because of the provisions of the Consolidated Farm and Rural Development Act, the Housing Act of 1949, and the Agency's regulations governing these programs, farmer and housing program borrowers will have received other notices concerning their overdue payments, and other notices concerning opportunities for debt servicing alternatives, before the Agency uses administrative offset as a collection tool. Thus, much of the procedure set out in these proposed rules may appear to duplicate the process that has already been given in connection with the indebtedness itself and hence legally unnecessary. (The Joint Standards state that agencies need not provide procedural rights in connection with administrative offset if the debtor has been provided those rights pursuant to other statutory or regulatory authority. 4 CFR 102.3(b)(2)(ii).)

Since these rules may also be used in situations other than defaults on farmer program and housing program loans, however, and since establishing different sets of rules to use in different circumstances would be administratively cumbersome, the Agency proposes to establish procedures that will satisfy the requirements of the Debt Collection Act and the Joint Standards even in situations in which the debtor has had no notice or process other than that set out in these proposed regulations.

FmHA is not now using administrative offset to collect debts owed to it, and does not intend to do so until it establishes final rules at the conclusion of this proceeding. The rules presently set out in the Agency's regulations (7 CFR 1951.104–107) were established in late 1986 and 1987 (see 51 FR 42820 *et seq.* (Nov. 28, 1986) and 52 FR 18543 *et seq.* (May 18, 1987)), and the Agency made some use of those regulations until December of 1987 to collect amounts owed to it. Use of administrative offset was less than it might otherwise have been because the Agency could not then accelerate most farmer program borrowers' accounts because of a then-pending injunction, which remained outstanding until February of 1989.

On November 23, 1987, suit was filed in the United States District Court in North Dakota (*Moseank, et al.* v. *Lyng, et al.*, Civil Action No. A1–87–196) complaining, among other things, that the Agency's administrative offset procedures were not in compliance with the Debt Collection Act and other governing law. Plaintiffs sought, among other things, to enjoin further use of the procedures. Since it seemed quite likely at that time that the use of administrative offset would have to be suspended in any event in the very near future because of the enactment of the Agricultural Credit Act of 1987, the Agency stipulated, on December 7, 1987, to refrain from using administrative offset in North Dakota for six months. The Agency thereupon unilaterally extended that policy to all other States by administrative directive. Both the stipulation and the directive were subsequently extended in effect up to and including the present time. Although the Agency's experience in using administrative offset is thus limited, FmHA has drawn two tentative conclusions from that experience that are reflected in changes to its existing rules set out in this proposal.

The first of these is that the use of "emergency" offset—i.e., offset without prior notice to the borrower—is unnecessary. While omitting prior notice is permitted by paragraph 102.3(b)(5) of the Joint Standards, the system of borrower servicing now established under the Consolidated Farm and Rural Development Act, pursuant to the amendments to that Act made by the Agricultural Credit Act of 1987, should permit the identification of instances in which administrative offset is warranted before an "emergency" arises. Moreover, in situations in which the debtor has not had other recent notice of the impending use of offset to collect a debt owed to the Agency, the proposed rules will provide better protection against mistaken use of the offset procedures. Thus the proposed rules

would no longer permit the use of administrative offset without prior notice to the borrower.

Secondly, the Agency's experience has been that only a minority of borrowers respond to a notice of intent to use administrative offset by requesting review or other process. (The Agency's experience in this respect is apparently shared by other Federal agencies. See Administrative Conferences of the United States Recommendation 87–9, *Dispute Procedures in Federal Agencies*, 5 CFR 305.87–9, and the report of consultant Martin B. White, *Offset Procedures under the Debt Collection Act of 1982*, underlying that recommendation. *Administrative Conference of the United States, 1987 Recommendations and Reports, Vol. II*, pp. 939–997.) The proposed rule precludes the use of notice, meetings, and other procedures to unduly postpone the use of offset when no colorable argument exists for so doing by allowing payments to be offset, subject to possible refund, during any administrative review of the decision. Therefore, the Agency tentatively concludes that including the opportunity for a face-to-face meeting with the decision maker as well as a right to make a written presentation, even in situations in which the debtor has had other recent meetings on the same debt, will not in practice create a substantial burden on decision-making officials. Thus the proposed rules provide an opportunity for a meeting with the decision maker, plus the opportunity for an appeal of the process used to initiate the administrative offset, in all cases.

The proposed rules do, however, provide for combining the meeting on offset with any meeting on other debt servicing matters which otherwise would be taking place. Neither the Act nor due process considerations seem to preclude the Agency from allowing the consideration of questions other than those pertaining to administrative offset. See, e.g., *Housing Authority of King County* v. *Pierce*, 701 F. Supp. 844, 850 (DC 1988).

The Debt Collection Act provides that the debtor should be given an opportunity to pay the debt in full before administrative offset is used (31 U.S.C. 3716(a)(4)). The Joint Standards also refer to this right, but subsection 102.3(b)(2)(i), appears to limit it to situations in which the debtor has established reasons why the use of offset would result in undue financial hardship or would be against equity and good conscience. The proposed regulations implement these instructions by giving a debtor the opportunity to make an offer to pay the debt within 30 days, and by including the possibility of obtaining a written agreement to pay the indebtedness, for which security may be required, when the agency has determined not to use administrative offset because of extreme hardship on the debtor.

FmHA is not entirely satisfied with this proposed treatment of this subject, as it applies to the use of offset to collect debts arising from defaults in paying program loans, and is very interested in receiving suggestions from the public on this point. This statutory provision was perhaps adopted with the long-overdue student loan (the situation mentioned in the legislative history and discussed above) in mind. In circumstances in which the debt may be small in relation to the debtor's total income, and in which the debtor may want to avoid suit as much as the agency, a written payment plan may well resolve the matter. In the case of FmHA's program loans, however, the situation may often be extremely different—especially in the case of FmHA's Farmer Program Loans. Before offset is used, the loan will have been accelerated and the borrower already offered a number of forms of debt servicing, including writing down both the principal and interest of the debt to the point at which the borrower can "cash flow". Offset will be initiated only after these forms of debt relief have not worked.

In this situation, it is highly unlikely that the borrow will be able to make an offer to repay the entirety of the debt that any reasonable Agency official could accept as credible. To hold out such an unreal possibility of avoiding offset to borrowers who have already unsuccessfully attempted to resolve their situation by using the Agency's more generous forms of debt relief—and who may be facing the loss of their farm and home through foreclosure—seems pointless and unfortunate. FmHA solicits suggestions on how to better resolve this issue in its rules.

The proposed additions to section 1900.51 of FmHA's rules governing administrative appeals, and proposed subsection 1951.104(i), provide for limited review of decisions to use administrative offset by FmHA's National Appeals Staff. This appeals staff, reporting to the Administrator independently of State officials, was established by FmHA in 1988 pursuant to the Agricultural Credit Act of 1987, enacted January 6, 1988. While the statutory jurisdiction of the National Appeals Staff extends only to adverse decisions under the Consolidated Farm and Rural Development Act—*i.e.*, to program loan decisions—and does not extend to decisions under other laws such as the Debt Collection Act, the agency has tentatively concluded that allowing debtors the right of appeal will assist in ensuring that administrative offsets are used only after the procedural protection proposed in these rules have been given. The review provided, however, is a limited one in that the hearing officers will confined their review to questions of compliance with the regulations and related matters. Decisions that are within the discretion of decisional officers—the decision on whether to decline to use administrative offset because of extreme hardship, for example—will not be reversible on appeal.

Since program borrowers will have been given other notices and opportunities for appeal on issues relating to the debt itself, the proposed appeal on administrative offset would not deal with those matters again, except where the debtor was not a program borrower and thus had not had another opportunity for administrative review of the agency's finding that a debt existed. See proposed § 1951.104(i). This distinction between the issues to be considered on a appeal of an administrative offset and the issues to be considered on the appeal of the agency's intention to accelerate a loan will become important in only a very few situations. Since the Agency ordinarily notifies a deliquent borrower of its intention to use administrative offset at the same time it advises the borrower that it intends to take adverse action—e.g., acceleration—on the underlying loan, the borrower will be able to raise any issues concerning the offset along with any issues concerning the debt itself in one meeting with the decisional official, and one administrative appeal.

In a more recent lawsuit on administrative offset quite similar to the *Moseanko* suit discussed earlier, entitled *Fitzner, et al.* v. *Yeuter*, et al., Case No. CV 6–89–240 (USDA, D, Minn.), filed on April 18, 1989, several farm borrowers seek to enjoin FmHA from using administrative offset to collect delinquent debts. One issue raised by this complaint is whether payments made by sister USDA agencies such as the Agricultural Stabilization and Conservation Service should be exempt from taking by administrative offset on the ground that taking such payments would, as the Joint Standards provide, "substantially interfere with or defeat the purposes of the program authorizing the payments * * *." 4 CFR 102.3(a)(2). FmHA has tentatively concluded, and here proposes (see proposed subsection 1951.103(e) to provide that payments that are like advance payments to a grantee or the payment of loan proceeds—e.g., the particular payment from the Soil Conservation Service with which the recipient is intended to cover the expenses of planting—would not be subject to offset, while payments representing rent would be so subject. It is FmHA's tentative conclusion that it should issue guidance for its field offices on which major Federal programs will be subject to offset, and the Agency solicits the views of interested members of the public on this idea, and on what other kinds of payments should be specifically included in these rules as being subject to, or not subject to, administrative offset.

Regulatory Reviews

This rule has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined "non-major." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

The programs to which this regulation may apply are listed in the Catalog of Federal Domestic Assistance under the following:

10.404	Emergency Loans
10.405	Farm Labor Housing Loans
10.406	Farm Operating Loans
10.407	Farm Ownership Loans
10.410	Low Income Housing Loans
10.411	Rural Housing Site Loans
10.414	Resource Conservation and Development Loans
10.415	Rural Rental Housing Loans
10.416	Soil and Water Loans
10.418	Water and Waste Disposal Systems for Rural Communities
10.419	Watershed Protection and Flood Prevention Loans
10.420	Rural Self-Help Housing Technical Assistance
10.421	Indian Tribes and Tribal Corporation Loans
10.422	Business and Industrial Loans
10.423	Community Facility Loans
10.428	Economic Emergency Loans
10.433	Housing Preservation Grants
10.434	Nonprofit Corporations
10.435	Agricultural Loan Mediation Program

Programs listed under numbers 10.404, 10.406, 10.407, 10.410, 10.417, 10.421, 10.428, and 10.435 are not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (7 CFR 3015, subpart V, 48 FR 29112, June 24, 1983.)

Programs listed under numbers 10.405, 10.411, 10.414, 10.415, 10.416, 10.418, 10.419, 10.420, 10.422, 10.423, 10.427, 10.433, and 10.434 are subject to the provisions of Executive Order 12372 (7 CFR 3015, Subpart V, 48 FR 29112, June 24, 1983; 49 FR 22675, May 31, 1984; 50 FR 14088, April 10, 1985.)

While delinquent debts owed to FmHA remain unpaid, FmHA must borrow money to operate which increases the Federal deficit. Increased Government borrowing causes interest rates to rise and reduces the availability of credit in the country. The Debt Collection Act of 1982 (31 U.S.C. 3701, 3711 and 3716–19), the Attorney General-Comptroller General's joint claims collection standards for agencies (4 CFR parts 101–105) and the Department of Agriculture's debt collection regulations (7 CFR parts 1 and 3) contain specific and detailed requirements which agencies of the Department must follow in order to collect.

List of Subjects

7 CFR Part 1900

Appeals, Credit, Loan programs—Housing and community development.

7 CFR Part 1951

Account servicing, Loan programs—Agriculture, Accounting, Credit, Low and moderate income housing loans—Servicing.

Therefore, Chapter XVIII, Title 7, Code of Federal Regulations is proposed to be amended as follows:

PART 1900—GENERAL

1. The authority citation for part 1900 is revised to read as follows:

Authority: 7 U.S.C. 1989; 31 U.S.C. 3701; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Adverse Decisions and Administrative Appeals

2. Section 1900.51 is amended in paragraph (b) by adding a new sentence at the end of the paragraph, and by adding a new paragraph (f) to read as follows:

§ 1900.51 General.

* * * * *

(b) * * * The provisions of this part also apply to appeals from decisions by FmHA under subpart C of part 1951 of this chapter to initiate administrative offsets.

* * * * *

(f) Administrative offsets initiated under Subpart C of Part 1951 of this chapter will not be stayed pending the hearing and any further review of the decision to initiate the offset.

* * * * *

PART 1951—SERVICING AND COLLECTIONS

Subpart C—Offsets of Federal Payments to FmHA Borrowers

3. The authority citation for Part 1951 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; CFR 2.70.

4. Section 1951.101 is revised to read as follows:

§ 1951.101 General.

The Federal Claims Collections Act of 1966 as amended by the Debt Collection Act of 1982 and the Deficit Reduction Act of 1984 authorizes Farmers Home Administration (FmHA) to use administrative, salary, and Internal Revenue Service (IRS) offsets to collect delinquent debts. Any money that is or may become payable from the United States to an FmHA borrower or other individual or entity indebted to the Agency may be subject to offset for the collection of a debt owed to FmHA. In addition, money may be collected from the debtor's retirement payments for delinquent amounts owed to FmHA if the debtor is an employee or retiree of a Federal agency, the U.S. Postal Service, the Postal Rate Commission, or a member of the U.S. Armed Forces or the Reserve. Amounts collected will be processed as regular payments and credited to the borrower's account. FmHA will process requests by other Federal agencies to offset amounts otherwise payable to FmHA in accordance with section 1951.102 of this subpart.

5. Sections 1951.102 through 1951.104 are added to subpart C to read as follows:

§ 1951.102 Standards and procedures for administrative offset against FmHA.

(a) Requests made by other Federal agencies to FmHA to offset moneys to be paid to FmHA debtors, including borrowers, contractors and grantees, must contain a written statement of the debt (including, where applicable, a separate statement of principal owed and overdue interest owed as of a given date, and the amount of interest currently running) owed by the debtor to the requesting agency, the due date of the debt, a description of the basis for the debt, and a certification that all of the applicable requirements of 31 U.S.C. 3716 and 4 CFR part 102 have been met. Requests for offset will be sent to the appropriate FmHA State Director.

(b) Upon receipt of a request satisfying the requirements of paragraph (a) of this section, FmHA will effect an administrative offset from moneys payable to the debtor, giving written notice to the debtor, unless the offset might result in substantial interference with, or defeat the purpose of FmHA's program. For example, where the payment sought to be offset is a loan, offset will not be made since the debtor would not be able to use the loan funds for the intended purpose. Similarly, where the payment sought to be offset is an advance payment under a contract to purchase goods, FmHA will not make the requested offset because the debtor would in all likelihood refuse to furnish the goods. However, where the payment is being made to compensate for past performance, the offset will be effected. For example, where the payment sought to be offset is for goods already furnished, the offset could be made without conflict with the purpose of the payment.

(c) If FmHA determines not to effect an offset, a written statement, including the reasons for the refusal, will be sent to the requesting agency and a copy of that statement will be sent to the debtor.

§ 1951.103 Standards for FmHA-initiated administrative offset.

(a) This section explains the procedures to be followed to use administrative offset to collect amounts owed by a debtor to FmHA from payments to be made to the debtor by another Federal agency or from retirement payments to be made to a Federal or military retiree.

(b) Before another Federal agency can be asked to offset any amount, the debtor must have been given at least 30-days notice, on FmHA Form Letter 1951–1, must have been afforded the rights set out in this section, and, if the debtor is an FmHA borrower, the borrower's account must have been accelerated. A delinquent amount does not have to be reduced to judgment or be undisputed before offset can be used, and the payment does not have to be covered by an FmHA security instrument.

(c) Offset will not be used, if, according to State law, the receipt of payments after acceleration has the effect of reinstating the debtor's account. A State supplement will be issued explaining whether offset can be used in each State. Sums received through the use of administrative offset are not considered "payments" as that term is used in 7 CFR 1955.15(d)(3) of subpart A of part 1955 of this chapter.

(d) Administrative offset will be used only where it is feasible. Administrative offset is not feasible where, for example, the cost to the Government of collecting by offset will exceed the amount collectible.

(e) Administrative offset will be used only where it is in the best interests of the Government. It will not be used where it would substantially interfere with, or defeat, the purpose of the paying Agency's program. Examples of this situation are listed in § 1951.103(b) of this subpart. As another example, FmHA will not offset the initial payment for planting expenses under the Conservation Reserve Program (CRP) since an offset would possibly result in the land not being planted for conservation purposes; conversely, it will offset subsequent CRP payment which represent rental income to the debtor. In general, income supplementation and enhancement program payments by ASCS will be subject to offset. The National Office will provide guidance to FmHA County Supervisors as needed on the kinds of payments under other major Federal programs that will not be subject to offset.

(f) The use of administrative offset is limited when debtors have filed for bankruptcy. Before administrative offset is sought for a debtor who is subject to a pending bankruptcy, guidance with respect to each particular case will be sought from the Office of the General Counsel. Debts of debtors which have been discharged in bankruptcy will not be subject to offset.

(g) FmHA will not use offset to collect a debt more than 10 years after the Government's right to collect the debt first accrued, unless facts material to FmHA's right to collect were not known and could not reasonably have been known by the FmHA official(s) charged with the responsibility of servicing the debtor's account until a time less than 6 years before the offset is initiated. Prior to collecting a claim by administrative offset after the 6 year period for bringing a civil action on the claim has expired, the loan servicing official will obtain the concurrence of the Office of the General counsel to pursue the offset.

(h) FmHA will not use administrative offset with respect to debts owed by any State or local government; nor with respect to debts arising under or payments made under the Social Security Act, the Internal Revenue Code of 1954 (IRS) debts may be offset under the IRS offset procedure in §§ 1951.121 through 1951.127 of this subpart), or the tariff laws of the United States.

§1951.104 Procedures for FmHA-initiated offset.

(a) The use of administrative offset will be initiated by giving notice to the debtor of the intention to use administrative offset. Such notice shall advise the debtors of their rights to:

(1) Inspect and copy their records;

(2) Avoid offset by paying the debt in full within 30 days;

(3) Present any reasons why administrative offset should not be used, including that the amount claimed to be owed is in error, that the use of administrative offset would create an extreme hardship, or that it would be unfair to the borrower for some other reason;

(4) Have a meeting with the decision-making officials, and

(5) Obtain administrative appeal of the decision to use administrative offset.

(b) The debtor will be given 7 calendar days after receipt of the notice to ask to inspect and/or copy his or her records, and 15 calendar days after receipt of the notice in which to:

(1) Make a written submission pursuant to paragraphs (a) (2) and (3) of this section, or

(2) Request a meeting at which the borrower can make such a submission and/or orally raise any matters relevant to the proposed use of administrative offset to collect the amount owed, or

(3) Request immediate administrative appeal of the decision to use administrative offset.

(c) When a debtor cannot, for a good reason, meet the time limits set out in this section, FmHA can, in its discretion, extend the time.

(d) FmHA Form Letter 1951–1 will be used to give the notice required by this section. Notice will be sent to the debtor, by certified mail, return receipt requested, at the debtor's last known address. A duplicate copy will be mailed to the debtor, on the same day,

OL
54
SS
1
6
1
AG
22
989
MI

by ordinary mail. The date of signing of the certified mail receipt will be used to compute the periods for response or, if the certified mail receipt is not signed and returned, the time frame will commence with the third day after the date on which the duplicate was sent.

(e) If the debtor responds by asking for a meeting, it will be scheduled as set forth in 1900–B, and the debtor will be promptly advised in writing of the date, time, and place. If the response also asks to inspect and/or copy records, the response will give the debtor an opportunity, within 5 working days after the receipt of the request, to inspect and/or copy those records. The letter will explain where the records are and when the debtor can inspect and/or copy them. The meeting will be scheduled not less than 3 working days after the date on which the debtor is allowed to inspect and/or copy his or her records. At the meeting the debtor will be given an opportunity to present any evidence or arguments as to why administrative offset should not be used.

(f) If the debtor asks to inspect and/or copy records, but does not ask for a meeting, the debtor should, at the time of record inspection and/or copying, again be offered for meeting so that he or she will have an opportunity to discuss the contents of those records, or any other relevant matter, before FmHA actually begins to use administrative offset. This offer may be made orally and will be documented in the debtor's case file.

(g) Extreme hardship or unfairness to the debtor in using administrative offset are matters that are within the discretion of the FmHA County Supervisor or other decision-making officials. The reasons for decisions on claims of extreme hardship or unfairness will be documented in the debtor's case file. Substantial medical expenses, or the lack of funds (other than those to be offset) for essential family living expenses, especially when the debtor's family includes dependent minor children, are examples of situations in which a decision not to use administrative offset may be justified. In its discretion, FmHA may, as a condition to declining to use administrative offset because of extreme hardship or unfairness, require the debtor to enter into a written agreement concerning payment of the indebtedness and can require adequate security for such agreement.

(h) FmHA will respond promptly to all written or oral requests or presentations made by debtors under this section. Decisions to be made after a meeting with a debtor will be made promptly, and will be promptly communicated in writing to the debtor. If a request not to use offset is denied, either in response to a written submission or to matters raised at a meeting, the letter communicating that decision will also advise the debtor of his or her rights to administrative appeal. Other Federal agencies will not be requested to offset amounts before FmHA has mailed or hand delivered a letter to the debtor communicating its decision in response to any matters raised at a meeting or in response to a submission in writing.

(i) Decisions to use administrative offset are appealable under subpart B of part 1900 of this chapter, and may be reversed only if they are inconsistent with law or regulations. If the debtor is not an FmHA borrower who has had other opportunity to appeal FmHA's determinations on the indebtedness itself, the appeal will include consideration of any issues concerning the debt that the debtor wishes to raise.

6. Section 1951.105 is revised to read as follows:

§ 1951.105 Procedures for taking funds by administrative offset.

(a) *Requesting administrative offsets.* Administrative offset requests to other Federal agencies will be initiated by completing FmHA Form Letter 1951–3 and sending it to any Federal agency likely to have money scheduled for payment to the debtor. The debtor, and the FmHA State Director, will be sent a copy of this form letter when it is sent to the other Federal agency.

(b) *Application of payments, refunds and overpayments for administrative offsets.* (1) Only amounts that are delinquent can be collected by offset. Therefore, if an FmHA Form Letter 1951–3 is submitted to another Federal agency which owes a debtor an amount in excess of the FmHA delinquency, the excess will be remitted to the debtor by the other Federal agency.

(2) Administrative offset payments will be processed in accordance with FmHA Instruction 1951–B, Collections, including depositing the payments in the Concentration Banking System or sending the payments to a wholesale lockbox bank. The offset payments will be applied to the debtor accounts as regular payments.

(3) Refunds of amounts offset, plus interest, will be made promptly, pursuant to the provisions of 7 CFR 1951.13(b) of subpart A of part 1951 of this chapter, if FmHA determines that an amount should not have been offset or that the debtor has won an administrative appeal. The ninety-day Treasury bill rate, as published in exhibit B to FmHA instruction 440.1, in effect on the date the amounts were offset by the creditor agency, will be used to calculate interest payable to the debtor.

(4) The County Supervisor will record all borrowers referred for and/or collected through administrative offset on Form FmHA 1951–16, Detail Report of Administrative Offset. The unpaid interest and unpaid principal amounts referred for offset should be reported only one time when first referred and obtained from FmHA Form Letter 1951–3. Form FmHA 1951–16 will be filed in operational file B. At the close of each quarter, the County Supervisor will consolidate the information reported on Form FmHA 1951–16 into Form FmHA 1951–17, Consolidated Report of Administrative Offset. The consolidated county report will be forwarded to the State Administrative Officer within 5 calendar days after the end of each quarter (e.g., October 5, January 5, April 5, and July 5). If there is no activity for the quarter, a negative report is required. Using Form FmHA 1951–17, the State Administrative Officer will consolidate the reports received from the County Offices. The consolidated state report will be forwarded to the Finance Office, mail code FC–360A, within 10 calendar days after the end of each quarter (e.g., October 10, January 10, April 10, and July 10). If there is no activity for the quarter, a negative report is required.

(c) *Cancellation of administrative offset.* FmHA will promptly cancel administrative offset requests by written notification to every other Federal agency from which administrative offset was requested if, because of debtor payments or any other reason, FmHA is no longer entitled to administrative offset from payments to be made to a debtor.

Dated: July 19, 1989.

Roland R. Vautour,

Under Secretary for Small Community and Rural Development.

[FR Doc. 89–19148 Filed 8–21–89; 8:45 am]

BILLING CODE 3410–07–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89–NM–135–AD]

Airworthiness Directives; Aerospatiale Model ATR42 Series Airplanes

AGENCY: Federal Aviation Administration (FAA); DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to all Aerospatiale Model ATR42 series airplanes, which would require modification or replacement of certain fuselage and wing structural components. This proposal is prompted by reports of cracking discovered during full-scale fatigue testing of the Model ATR42 airframe. This condition, if not corrected, could result in structural failure of the fuselage or wing.

DATES: Comments must be received no later than October 13, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM–103, Attention: Airworthiness Rules Docket No. 89–NM–135–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert McCracken, Standardization Branch, ANM–113; telephone (206) 431–1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Admnistrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–135–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

The Directive Générale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on Aerospatiale Model ATR42 series airplanes. During full-scale fatigue testing of the Model ATR42 airframe, cracking was discovered in the fuselage and wing. This condition, if not corrected, could result in structural failure of the fuselage or wing.

Aerospatiale has issued Service Bulletins ATR42–53–0004, Revision 3, dated May 25, 1989; ATR42–53–0023, Revision 2, dated May 25, 1989; ATR42–53–0031, Revision 1, dated May 20, 1989; ATR42–53–0042, dated May 3, 1989; ATR42–57–0010, Revision 1, dated May 20, 1989; ATR42–57–0021, Revision 1, dated May 20, 1989; and ATR42–57–0027, Revision 1, dated May 25, 1989; which describe procedures for modification or replacement of certain fuselage and wing structural components. DGAC France has classified these service bulleting as mandatory and has issued Airworthiness Directive 89–017–017(B)R1 addressing this subject.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would require modification or replacement of certain fuselage and wing structural components in accordance with the service bulletins previously described.

It is estimated that 50 airplanes If U.S. registry would be affected by this AD. The entire cost of the modifications and replacements required by this AD would be borne by the manufacturer; therefore, there is no cost impact on U.S. operators.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Aerospatiale: Applies to Model ATR42 series airplanes, certificated in any category. Compliance is required prior to the accumulation of 10,000 landings, or within the next 300 landings after the effective date of this AD, whichever occurs later, unless previously accomplished.

To prevent failure of structural components of the fuselage and wing, accomplish the following:

A. For airplane Serial Numbers 003 to 151: Reinforce fuselage frame 26, in accordance with Aerospatiale Service Bulletin ATR42–53–0042, dated May 3, 1989.

B. For airplane Serial Numbers 003 through 032, 034, and 035: Reinforce the fuselage secondary frames, in accordance with

BEST COPY AVAILABLE

Aerospatiale Service Bulletin ATR42-53-0023, Revision 2, dated May 25, 1989.

C. For airplane Serial Numbers 003 through 059: Perform a cold expansion of the outer wing skin attach fastener holes, in accordance with Aerospatiale Service Bulletin ATR42-57-0010, Revision 1, dated May 20, 1989.

D. For airplane Serial Numbers 003 through 071. Reinforce fuselage frames 24 and 28, in accordance with Aerospatiale Service Bulletin ATR42-53-0004, Revision 3, dated May 25, 1989.

E. For airplane Serial Numbers 003 through 084, 086, 087, and 089 through 093: Perform a cold expansion of attach holes and reinforce wing/fuselage junction fittings, in accordance with Aerospatiale Service Bulletin ATR42-53-0031, Revision 1, dated May 20, 1989.

F. For airplane Serial Numbers 003 through 119: Perform a cold expansion of the wing front and rear spar attach holes, in accordance with Aerospatiale Service Bulletin ATR42-53-0021, Revision 1, dated May 20, 1989.

G. For airplane Serial Numbers 003 through 151: Replace the wing center box, in accordance with Aerospatiale Service Bulletin ATR42-57-0027, Revision 1, dated May 25, 1989.

H. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

I. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirement of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 14, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89-NM-146-AD]

Airworthiness Directives; Aerospatiale Model ATR42-300 and ATR42-320 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Aerospatiale Model ATR42-300 and ATR42-320 series airplanes, which would require a one-time inspection of the main landing gear (MLG) actuator fitting bolt holes, and rework of the fitting surface and bolt replacement, if necessary. This proposal is prompted by reports of incorrect perpendicularity between the bolt hole axis and the fitting surface. This condition, if not corrected, could lead to failure of the landing gear actuator attachment fitting bolts, which could result in the inability to retract the landing gear and failure to achieve an adequate climb gradient.

DATES: Comments must be received no later than October 13, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-146-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert C. McCracken, Standardization Branch, ANM-113; telephone (206) 432-1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-146-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

The Direction Générale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on certain Aerospatiale Model ATR42-300 and ATR42-320 series airplanes. There has been one report of failure of the main landing gear actuator fitting attach bolts due to incorrect perpendicularity between the bolt hole axis and the fitting surface. Failure of the landing gear actuator fitting bolts could lead to inability to retract the main landing gear and failure to attain an adequate climb gradient.

Aerospatiale has issued Service Bulletin ATR42-53-0045, Revision 1, dated April 21, 1989, which describes procedures to inspect the MLG actuator fitting bolt holes for perpendicularity, elongation, and alignment between the bolt hole axis and fitting surface, and rework of the fitting surface and bolt replacement, if necessary. The French DGAC has classified this service bulletin as mandatory, and has issued Airworthiness Directive 89-067-020(B) addressing this subject.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the

United States, an AD is proposed which would require a one-time inspection of the MLG actuator fitting bolt holes for correct perpendicularity, elongation, and alignment between the bolt hole axis and the fitting surface, and rework of the fitting surface and bolt replacement, if necessary, in accordance with the service bulletin previously described.

It is estimated that 50 airplanes of U.S. registry would be affected by this AD, that it would take approximately 20 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $40,000.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Aerospatiale: Applies to Model ATR42-300 and ATR42-320 series airplanes, Serial Numbers 003 through 155, which have not been modified in accordance with Service Bulletin ATR42-0023, Revision 1, dated April 20, 1989, certificated in any category. Compliance is required within 90 days after the effective date of this AD, unless previously accomplished.

To prevent failure of the main landing gear (MLG) actuator fitting bolts due to an incorrect perpendicularity between the bolt hole axis and the fitting surface, accomplish the following:

A. Inspect the MLG actuator fitting bolt holes for correct perpendicularity, elongation, and alignment between the bolt hole axis and the fitting surface, in accordance with Aerospatiale Service Bulletin ATR42-53-0045, Revision 1, dated April 21, 1989.

1. If no discrepancies are found, reassemble in accordance with the service bulletin.

2. If discrepancies are found, prior to further flight, rework the fitting surface and replace the bolts in accordance with the service bulletin.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Standardization Branch, ANM-113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 14, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89-NM-147-AD]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which would require inspection, repair as necessary, and modification of certain fuselage skin lap joints in the fuselage lower lobe. This action is prompted by reports of cracking detected in the stringer 34 lap joint near the interface with the wing-to-body fairing. This condition, if not corrected, could result in an in-flight depressurization of the airplane.

DATES: Comments must be received no later than September 25, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-147-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Richard Yarges, Airframe Branch, ANM-120S; telephone (206) 431-1925. Mailing address: FAA Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–147–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

One operator of a Model 747 airplane has reported finding skin cracks at six countersunk fastener locations in the upper row of fasteners of the stringer 34 lap joint immediately forward of the wing-to-body fairing. The cracks were from 0.05 to 0.30 inches in length extending forward and aft, emanating from countersunk fastener holes. The airplane had accumulated 23,926 flight cycles at the time that the cracks were found (however, since the airplane was a short range version of the Model 747 and is operated at a reduced pressure differential, this is equivalent to about 20,000 normal flight cycles). In addition to this incident, a single crack 0.1 inch long was found at one fastener hole in the same location on a fatigue test article at the manufacturer's facility.

It was also noted during the investigation of this cracking incident that some airplanes, including the ones which have exhibited the cracking, did not have the correct fasteners installed in the affected skin joints. Eight of eighteen airplanes checked had countersunk fasteners installed in a location where the design specified protruding head fasteners. The premature cracking at the affected skin joint is attributed to the use of improper fasteners.

In addition, all Model 747 airplanes through line number 765, incorporate countersunk fasteners in the upper row of fasteners in the lap joint directly under the wing-to-body fairing where the fairing joins to the fuselage. Premature fatigue cracking can be expected at this location as well on airplanes which do not have adhesively bonded lap joints (airplane line numbers 201 and on), because the skin thickness is too thin to effectively support the use of countersunk fasteners in the upper row.

From the cracking detected in service and from fatigue life calculations, the FAA has determined that detectable fatigue cracking can be expected to develop on some airplanes at about 11,000 flight cycles if the fastener configuration is not modified to incorporate protruding head fasteners in the above mentioned areas. Undetected fatigue cracking could result in eventual rupture of the fuselage shell and in-flight depressurization of the airplane.

The FAA has reviewed and approved Boeing Alert Service Bulletin 747–53A2312, dated June 12, 1989, which describes inspection, repair, and modification procedures for the affected fuselage skin lap joints.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require inspection, repair if necessary, and modification of certain fuselage lap joints in the fuselage lower lobe, in accordance with the service bulletin previously described. In addition, operators would be required to submit a report of their inspection results to the FAA.

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB Control Number 2120–0056.

There are approximately 550 Model 747 series airplanes of the affected design in the worldwide fleet. It is estimated that 63 airplanes of U.S. registry would be affected by this AD, that it would take approximately 220 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The cost for parts necessary to modify the airplane is negligible. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $554,400.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained form the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 747 series airplanes, line numbers 201 through 765, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent rapid in-flight depressurization of the airplane cabin, accomplish the following:

A. Conduct a high frequency eddy current (HFEC) inspection of the lower lobe lap joints in the vicinity of the wing to body fairing, in accordance with Boeing Alert Service Bulletin 747–53A2312 dated June 12, 1989, at the following threshold, as applicable:

1. For airplanes that have accumulated less than 11,200 landings as of the effective date of this AD, prior to the accumulation of 11,600 landings or with the next 800 landings after the effective date of this AD, whichever occurs later.

2. For airplanes that have accumulated less than 11,200 and 15,200 landings as of the effective date of this AD, within the next 800 landings after the effective date of this AD, or prior to the accumulation of 15,500 landings, whichever occurs first.

3. For airplanes that have accumulated between 15,201 and 18,200 landings as of the effective date of this AD, within the next 300 landings after the effective date of this AD, or prior to the accumulation of 18,250 landings, whichever occurs first.

4. For airplanes that have accumulated more than 18,200 landings as of the affective date of this AD, within the next 50 landings after the effective date of this AD.

B. Repair any cracks detected, prior to further flight, in accordance with Boeing Alert

Service Bulletin 747–53A2312, dated June 12, 1989.

C. Within 10 days, after the completion of the inspection required by this AD, submit a written report of the location and quantity of all affected countersunk fasteners found, along with aircraft line number and the number of flight cycles, to the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. Prior to the accumulation of 11,000 landings or within the next 3,000 landings after the effective date of the AD, whichever occurs later, modify the airplane by replacing countersunk fasteners in the upper row of the lower lobe lap joints in the vicinity of the wing-to-body faring with protruding head fasteners, in accordance with the procedure described in Boeing Alert Service Bulletin 747–53A2312, dated June 12, 1989.

E. For the purpose of complying with the AD, the number of landings may be determined to equal the number of pressurization cycles where the cabin pressure differential was greater than 2.0 psi.

F. For Model 747SR airplanes only, based on continued mixed operation of lower cabin differentials, the inspection and modification compliance times specified in this AD may be multiplied by a 1.2 adjustment factor.

G. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Seattle Aircraft Certification Office.

H. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 14, 1989.

Darrell Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89–NM–140–AD]

Airworthiness Directives; Fokker Model F–28 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Fokker Model F–28 series airplanes, which would require a one-time inspection for cracks of the wing rear spar web plates, between Wing Stations 4790 and 5280, and repair, if necessary. This proposal is prompted by results of manufacturer's fatigue testing, which revealed cracks developing in the rear spar web plate inboard of Wing Station 5280. Undetected fatigue cracks could lead to reduced structural capability of the wing.

DATES: Comments must be received no later than October 13, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM–103, Attention: Airworthiness Rules Docket No. 89–NM–140–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Fokker Aircraft USA, Inc., 1199 N. Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Quam, Standardization Branch, ANM–113; telephone (206) 431–1978. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–140–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

The Rijksluchtvaartdienst (RLD), which is the airworthiness authority of the Netherlands, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on certain Fokker Model F–28 series airplanes. Fatigue testing by the manufacturer has revealed that cracks can develop in the rear spar web plate inboard of Wing Station 5280. These cracks can start in the holes of the rivets and bolts which attach the rear-spar-web plate to the lower girder. Undetected fatigue cracks could lead to reduced structural capability of the wing.

Fokker has issued Service Bulletin F28/57–84, dated April 7, 1989, which describes procedures for an external high-frequency eddy current inspection of the rear spar web plate between Wing Stations 4790 and 5280, and repair, if necessary. The RLD has classified this service bulletin as mandatory, and has issued Airworthiness Directive BLA No. 89–46 addressing this subject.

This airplane model is manufactured in the Netherlands and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would require a one-time inspection for cracks in the rear spar web plate between Wing Stations 4790 and 5280, and repair, if necessary, in accordance with the service bulletin previously described.

This is considered to be interim action. The manufacturer is currently attempting to determine the extent and nature of the addressed damage, and is developing an appropriate repetitive inspection schedule and/or modification that will preclude the need for repetitive inspections. Once these are developed, the FAA may consider further rulemaking to revise this AD to require additional necessary action.

It is estimated that 48 airplanes of U.S. registry would be affected by this AD, that it would take approximately 4 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $7,680.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of Power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Fokker: Applies to Model F–28 series airplanes, Serial Numbers 11003 through 11241, and 11991 and 11992, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent reduced structural capability of the wing due to fatigue cracks, accomplish the following:

A. Perform external high-frequency eddy current inspection of the rear spar web plate between Wing Stations 4790 and 5260, in accordance with Part 1 of Fokker Service Bulletin F28/57–84, dated April 7, 1989, and the following schedule:

1. For airplanes that have accumulated fewer than 45,000 landings, inspect within the next 2,000 landings after the effective date of this AD or prior to the accumulation of 35,000 landings, whichever occurs later.

2. For airplanes that have accumulated 45,000 landings or more but less than 55,000 landings, inspect within the next 1,000 landings after the effective date of this AD.

3. For airplanes that have accumulated 55,000 landings or more, inspect within 500 landings after the effective date of this AD.

B. If cracks are found, repair prior to further flight, in accordance with Part 2 of Fokker Service Bulletin F28/57–84, dated April 7, 1989.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Standardization Branch, ANM–113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Suite 500, Alexandria, Virginia 22314. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 14, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89–ANE–28]

Airworthiness Directives; IPECO P/N 3A090–0021–01–2 et al.; Crew Seats

In the matter of Airworthiness Directives; IPECO P/N 3A090–0021–01–2, 3A090–0022–01–2, 3A090–0021–02–2, 3A090–0022–02–2, 3A090–0019–01–1, 3A090–0020–01–1, 3A090–0015–01–1, 3A090–0016–01–1, 3A090–0025–01–1, 3A090–0026–01–1, 3A090–0053–01–1, 3A090–0054–01–1, 3A090–0027–01–1, 3A090–0028–01–1, 3A090–0055–01–1, 3A090–0056–01–1, 3A090–0017–01–1, 3A090–0018–01–1, 3A090–0065–01–1, 3A090–0066–01–1, 3A102–0003–01–1, 3A103–0003–01–1, 3A118–0003–01–1, and 3A118–0004–01–1, crew seats.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt an airworthiness directive (AD) that would require inspection and modification of certain IPECO crew seats. The proposed AD is needed to prevent failure of the seat back structure which could result in impairment of the pilots ability to control the aircraft.

DATE: Comments must be received on or before November 30, 1989.

ADDRESSES: Comments on the proposal may be mailed in duplicate to Federal Aviation Administration, New England Region, Office of the Assistant Chief Counsel, Attn: Rules Docket No. 89–ANE–28, 12 New England Executive Park, Burlington, Massachustts 01803, or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: Docket No. 89–ANE–28.

Comments may be inspected at the New England Region, Office of the Assistant Chief Counsel, Room 311, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

The applicable service bulletins may be obtained from IPECO Inc., 15201 South Prarie Avenue, Lawndale, California 90260, or may be examined in the Regional Rules Docket.

FOR FURTHER INFORMATION CONTACT: Terry Fahr, Boston Aircraft Certivication Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7103.

SUPPLEMENTARY INFORMATION: Interested persons are invited to

participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before any final action is taken on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments, in the Rules Docket at the address given above, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comments to Docket No. 89–ANE–28. The postcard will be date/time stamped and returned to the commenter.

The FAA has determined that the backs on certain IPECO TSO–C39a crew seats have failed due to cracking. Failure of the backs could result in impairment of the pilot's ability to control the aircraft. Since this condition is likely to exist or develop on other crew seats of the same type design, the proposed AD would require inspection and modification of these crew seats.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves approximately 750 seats with the labor and materials costs to be covered under warranty by IPECO. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

*Air transportation, Aircraft, Aviation safety, and Incorporation by reference.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration (FAA) proposes to amend part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive (AD):

IPECO: Applies to IPECO TSO–C39a crew seats, as follows:

Seat part number	Serial No. effectivity	Installed in but not limited to
3A090–0021–01–2	Up to and including 11009.	Boeing 737
3A090–0022–01–2		
3A090–0021–02–2		
3A090–0022–02–2		
3A090–0019–01–1	Up to and including 11115.	Boeing 737
3A090–0020–01–1		
3A090–0015–01–1	Up to and including 11143.	Boeing 757
3A090–0016–01–1		
3A090–0025–01–1	Up to and including 11054.	Boeing 757, 767
3A090–0026–01–1		
3A090–0054–01–1	Up to and including 11105.	Boeing 747–400
3A090–0054–01–1		
3A090–0027–01–1	Up to and including 11072.	Boeing 747
3A090–0028–01–1		
3A102–0003–01–1	Up to and including 11041.	Boeing 747–400
3A090–0055–01–1	Up to and including 11062.	Boeing 747–400
3A090–0056–01–1		
3A103–0003–01–1	Up to and including 11607.	Boeing 747–400
3A090–0017–01–1	Up to and including 10100.	Boeing 747
3A090–0018–01–1		
3A090–0065–01–1	Up to and including 11635.	Boeing 747–400
3A090–0066–01–1		
3A118–0003–01–1	Up to and including 11580.	Dehavilland DHC–7 and DHC–8
3A118–0004–01–1		

Compliance is required as indicated, unless already accomplished.

To prevent failure of the seat back structure, accomplish the following:

(a) Within the next 30 days after the effective date of this AD, unless already accomplished within the last 90 days and, thereafter, at intervals not to exceed 120 days from the last inspection, visually inspect the seat assembly as follows:

(1) Remove seat pan cushion and back cushion from the seat assembly. Adjust the lumbar mechanism to the fully up, fully back position. Recline seat back to full recline.

(2) by looking through the lightening holes in the pan and back structure with a flashlight, examine the base of the back structure in the area where it attaches to the reclining mechanism. This area can be identified by the bracket at the base of the back structure. Return the seat back to its upright position and also examine the base of the back structure from the rear of the seat.

(3) If any cracks or deformation of the seat back structure are found, replace the seat assembly with a serviceable unit before further flight.

(4) When the repairs and modifications required by paragraph (b) have been accomplished, the repetitive visual inspections may be terminated.

(b) Within the next 15 months after the effective date of this AD, perform the repairs and modifications of the IPECO seat assemblies in accordance with the following service bulletins (SB):

IPECO SB No.	Applicable IPECO seat part numbers.
A001–25–29	3A090–0021–01–2 3A090–0022–01–2 3A090–0021–02–2 3A090–0022–02–2
A001–25–30	3A090–0019–01–1 3A090–0020–01–1
A001–25–31	3A090–0015–01–1 3A090–0016–01–1
A001–25–32	3A090–0025–01–1 3A090–0026–01–1
A001–25–33	3A090–0053–01–1 3A090–0054–01–1
A001–25–34	3A090–0027–01–1 3A090–0028–01–1
A001–25–35	3A102–0003–01–1

IPECO SB No.	Applicable IPECO seat part numbers.
A001-25-36	3A090-0055-01-1 3A090-0056-01-1
A001-25-37	3A103-0003-01-1
A001-25-38	3A090-0017-01-1 3A090-0018-01-1
A001-25-39	3A090-0065-01-1 3A090-0066-01-1
A001-25-40	3A118-0003-01-1 3A118-0004-01-1

(c) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(d) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, an alternate method of compliance with the requirements of this AD or adjustments to the compliance time specified in this AD may be approved by the Manager, Boston Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Issued in Burlington, Massachusetts, on August 11, 1989.

Jack A. Sain,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[FR Doc. 89-19683 Filed 8-21-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 87-ANE-05]

Airworthiness Directives; Rolls-Royce plc (R-R) Viper Mk.521, Mk.522, and Mk.601 Model Turbojet Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt an airworthiness directive (AD) that would establish reduced low cycle fatigue (LCF) retirement lives for stage 5 and 6 high pressure compressor (HPC) rotor disks in certain R-R Viper engines. The proposed AD is needed to prevent LCF failure of the subject disks, and possible uncontained engine failure.

DATES: Comments must be received on or before October 30, 1989.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Federal Aviation Administration, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89-ANE-05, 12 New England Executive Park, Burlington, Massachusetts 01803, or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: Docket No. 87-ANE-05.

Comments may be inspected at the New England Region, Office of the Assistant Chief Counsel, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

FOR FURTHER INFORMATION CONTACT: Karen Grant, Engine Certification Branch, ANE-142, Engine Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7087.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before any final action is taken on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments, in the Rules Docket, at the address given above, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comments to Docket No. 87-ANE-05. The postcard will be date/time stamped and returned to the commenter.

The FAA has determined that the published LCF life limit for the stage 5 and 6 HPC rotor disks must be reduced from 14,225 cycles to 12,600 cycles. This determination is based on the findings of small cracks in the hirth coupling root radii of the stage 5 and 6 HPC rotor disks. Additional component rig testing accomplished by Rolls Royce has verified crack initiation in similar disks at life limits lower than originally predicted. Since this condition is likely to exist or develop on other engines of the same type design the proposed AD would require affected parts to be retired from service at or prior to reaching the reduced LCF life limit. Also, a removal from service schedule is provided for affected parts which are close to or at higher cycles than the reduced life limits.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves approximately 99 engines with an approximate total cost of $4,600.00 per engine. It has also been determined that few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected, since the proposed rule affects only operators using aircraft in which R-R Viper Mk.521, Mk.522, and Mk.601 turbojet engines are installed, none of which are believed to be small entities. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, and Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration (FAA) proposes to amend part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive (AD):

Rolls-Royce: Applies to Rolls-Royce plc (R-R) Viper Mk.521, Mk.522, and Mk.601 turbojet engines.

Compliance is required as indicated, unless already accomplished.

To prevent failure of high pressure compressor (HPC) stage 5 and 6 disks, accomplish the following:

(a) Remove from service, HPC stage 5 and 6 disks, with the following part numbers (includes all Modification Standards): Viper Mk.521: V.20492, V.20494, V.27430, V.27433, V.39638, V.39639, V.39642, V.39643, V.39677, V.39678, V.39681, V.39682, V.42057, V.42059, V.46180, V.46181, V.46182, V.46204, V.46205, and V.46206; Viper Mk.522: V.20492, V.20494, V.27430, V.27433, V.39638, V.39639, V.39642, V.39643, V.39677, V.39678, V.39681, V.39682, V.42057, V.42059, V.46180, V.46181, V.46182, V.46204, V.46205, and V.46206; Viper Mk.601: V.42057, V.42059, V.44768, V.44769, V.44780, V.44781, V.46182, and V.46206, as follows:

(1) Disks which have accumulated 12,500 or more cycles since new, on the effective date of this AD, within the next 100 cycles in service.

(2) Disks which have accumulated less than 12,500 cycles since new, on the effective date of this AD, at or prior to accumulating 12,600 cycles since new.

Notes: (1) This action establishes new life limits of 12,600 service cycles for the parts noted above. The new limits are published in Chapter 5 of the Viper Mk.521, Mk.522, and Mk.601 Maintenance and Shop Manuals.

(2) Reference Rolls-Royce plc (R-R) Service Bulletins; No. 72-A154 for Viper Mk.601, and No. 72-A372 for Viper Mk.521 and Viper Mk.522 engines.

(b) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(c) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, an alternate method of compliance with the requirements of this proposed AD or adjustments to the compliance times specified in this proposed AD, may be approved by the Manager, Engine Certification Office, ANE-140, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Issued in Burlington, Massachusetts, on August 10, 1989.

Jack A. Sain,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89-NM-142-AD]

Airworthiness Directives; Avions Marcel Dassault-Breguet Aviation (AMD-BA) Model Mystere Falcon 50 and 900 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to revise an existing airworthiness directive (AD), applicable to certain Avions Marcel Dassault-Breguet Aviation (AMD-BA) Model Mystere Falcon 50 and 900 series airplanes, which currently requires repetitive inspections of the main landing gear (MLG) door emergency release mechanism to detect broken or damaged unlocking pins, and replacement of the pins, if necessary. Broken or damaged unlocking pins, if not corrected, could prevent emergency extension of the MLG. This action would require installation of a modification of the emergency release mechanism of each MLG door uplock unit, which terminates the need for the repetitive inspections. This proposal is prompted by the development of new pin and lever which are not service life limited.

DATES: Comments must be received no later than October 13, 1989.

ADDRESSES: Send comments to the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-142-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168. The applicable service information may be obtained from Falcon Jet Corporation, Customer Support Department, Teterboro Airport, Teterboro, New Jersey 07608.

This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Robert McCracken, Standardization Branch, ANM-113; telephone (206) 431-1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-142-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

On February 24, 1989, the FAA issued AD 89-06-05, Amendment 39-6151 (54 FR 11163; March 17, 1989), applicable to Avions Marcel Dassault-Breguet Aviation (AMD-BA) Model Mystere Falcon 50 and 900 series airplanes, to require repetitive inspections of the main landing gear (MLG) door emergency release mechanism to detect broken or damaged unlocking pins, and replacement of the pins, if necessary. That action was promted by reports of the MLG door emergency unlocking pin breaking due to fatigue failure. This condition, if not corrected, could prevent emergency extension of the MLG.

Since issuance of that AD, the manufacturer has developed new pins and levers which are not service life limited. Avions Marcel Dassault-Breguet Aviation (AMD-BA) has issued Service Bulletin F50-208 (F50-32-18) Rev. 1, for the Model Falcon 50 series airplanes, and Service Bulletin F900-52 (F900-32-4) Rev. 1, for the Model Falcon 900 series airplanes, both dated July 25, 1989, which describes procedures for modification of the MLG manual emergency release mechanism of each MLG door uplock unit, which incorporates the improved pins and levers. The Direction Générale de L'Aviation Civile, which is the airworthiness authority of France, has classified both service bulletins as mandatory, and has issued Airworthiness Directive 89-041-007(B)R1 addressing this subject.

This airplane model is manufactured in France and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of these same type designs registered in the United States, an AD is proposed which would revise AD 89–06–05 to require modification of the MLG manual emergency release mechanism of each MLG door uplock unit, in accordance with the service bulletins previously described.

The service bulletins identify affected airplanes by serial numbers. These bulletins also specify that airplanes which have installed AMD–BA Modification F900 M1055B or M1055A (equipped with pins, Part Number FGFB793600180), and airplanes that have installed AMD–BA Modification M1596B or M1596A (equipped with pins, Part Number FGFB793600180) are affected. (The pins with that part number have a limited service life of 2,000 landings.) Accordingly, this proposal would revise the applicability of the existing AD by calling out those airplanes as listed in the service bulletins.

The FAA has determined that long term continued operational safety will be better assured by design changes to remove the source of the problem, rather than by repetitive inspections. Long-term inspections may not be providing the degree of safety assurance necessary for the transport airplane fleet. This, coupled with a better understanding of the human factors associated with numerous repetitive inspections, has led the FAA to consider placing less emphasis on inspections and more emphasis on design improvements. The proposed modification requirement is in consonance with that policy decision.

It is estimated that 171 airplanes of U.S. registry would be affected by this AD, that it would take approximately 12 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The estimated cost for parts is $645 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $192,375.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13. is amended by amending Amendment 39–6151 (54 FR 11163; March 17, 1989), AD 89–06–05, as follows:

Avions Marcel Dassault-Breguet Aviation (AMD–BA): Applies to Model Mystere Falcon 50 and 900 series airplanes, as listed in AMD–BA Service Bulletins F50–206, Rev. 1 and F900–52, Rev. 1 dated July 25, 1989, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent inability to open the main landing gear (MLG) door for MLG emergency extension, accomplish the following:

A. Prior to the accumulation of 1,000 landings on the MLG door emergency unlocking pin, or within 7 days after March 24, 1989 (the effective date of AD 89–06–05, Amendment 39–6151), whichever occurs later, verify the integrity of the MLG door emergency unlocking system by operating the manual opening system, in accordance with the instructions in the AMD–BA Falcon 50 or 900 series (as applicable) Maintenance Manual, Work Card 480.0, paragraph 3.

1. If the unlocking pin is broken or damaged, replace the pin with a serviceable pin of the same part number prior to further flight.

2. If the unlocking pin is not damaged, repeat the inspection prior to the accumulation of 2,000 landings. Replace broken or damaged pins in accordance with paragraph A.1., above.

B. Upon the accumulation of 2,000 or more landings on the MLG door emergency unlocking pin, repeat the inspection described in paragraph A., above, at intervals not to exceed 50 landings from last inspection. Replace broken or damaged pins in accordance with paragraph A.1., above.

C. Following the replacement of any unlocking pin with a new pin, repeat the inspection required by paragraphs A. and B., above, at the intervals specified. Replace broken or damaged pins in accordance with paragraph A.1., above.

D. Within 120 days after the effective date of this AD, modify the emergency release mechanism of each MLG door uplock unit in accordance with Service Bulletin AMD–BA/F900–52 (F900–32–4), Rev. 1, or AMD–BA/F50–32–4), Rev. 1 both dated July 25, 1989. Accomplishment of this modification constitutes terminating action for the inspections required by paragraphs A. through C. of this AD.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Standardization Branch, ANM–113.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Falcon Jet Corporation, Customer Support Department, Teterboro Airport, Teterboro, New Jersey 07608. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 14, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 89–ASO–36]

Proposed Revision of Transition Area, Lakeland, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revise the Lakeland, FL, Transition Area in the vicinity of the Plant City Municipal Airport. A new standard instrument approach procedure (SIAP) has been developed to Runway 9 based on the Plant City nondirectional radio beacon (NDB). The radius of the transition area around the Plant City Municipal Airport would be increased from 5 to 6.5 miles and an arrival area extension would be added west of the airport. The additional controlled airspace is required for protection of instrument flight rule (IFR) aircraft executing the NDB Runway 9 SIAP to the Plant City Municipal Airport. Also, minor corrections would be made to the geographic position coordinates of the Bartow Municipal, Lakeland Municipal, and Winter Haven's Gilbert Airports.

DATES: Comments must be received on or before: October 6, 1989.

ADDRESSES: Send comments on the proposal in triplicate to:

Federal Aviation Administration, ASO–530, Manager, Airspace and Procedures Branch, Docket No. 89–ASO–36, P.O. Box 20636, Atlanta, Georgia 30320

The official docket may be examined in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–ASO–36." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO–530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Lakeland, FL, transition area to enlarge the area around the Plant City Municipal Airport and add an arrival area extension west of the airport. This action is necessary to provide controlled airspace for protection of IFR aircraft executing a recently developed Runway 9 SIAP based on the Plant City NDB. Also, minor corrections would be made to the geographic position coordinates of Bartow Municipal, Lakeland Municipal, and Winter Haven's Gilbert Airports. Section 71.181 of part 71 of the Federal Aviation Regulations was republished in FAA handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C 1348(a), 1354(a), 1510; Executive order 10854; 49 U.S.C. 106(g) (Rev. Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. § 71.181 is amended as follows:

Lakeland, FL [Revised]

That airspace extending upward from 700 feet above the surface within an 6.5-mile radius of Lakeland Municipal Airport (latitude 27°59'18" N, longitude 82°00'56" W); within a 7-mile radius of Bartow Municipal Airport (latitude 27°56'36" N, longitude 81°47'02" W); within a 6.5-mile radius of Plant City Municipal Airport (latitude 28°00'0" N, longitude 82°09'40" W); within 3 miles each side of the 266° bearing from the Plant City NDB (latitude 28°00'06" N, longitude 82°09'23" W), extending from the 6.5-mile radius area to 8.5 miles west of the NDB; within a 6.5-mile radius of Winter Haven's Gilbert Airport (latitude 28°03'25" N, longitude 81°45'25" W); within 2.5 miles each side of the Lakeland VORTAC 071° radial, extending from the 6.5-mile radius area to the Winter Haven's Gilbert Airport 6.5-mile radius area.

Issued in East Point, Georgia, on August 9, 1989.

Don Cass,

Acting Manager, Air Traffic Division, Southern Region.

[Airspace Docket No. 89–ASO–35]

Proposed Designation of Transition Area, Greensboro, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate the Greensboro, GA, Transition Area. A Standard Instrument Approach Procedure (SIAP) has been developed to serve the Greene County Airpark Airport based on the Greensboro Nondirectional Radio Beacon (NDB). In order to provide controlled airspace for Instrument Flight Rules (IFR) aeronautical operations, it is necessary to lower the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the airport. Concurrent with publication of the SIAP, the operating status of the airport would change from Visual Flight Rules (VFR) to IFR.

DATE: Comments must be received on or before: October 6, 1989.

ADDRESS: Send comments on the proposal in triplicate to:

Federal Aviation Administration, ASO-530, Manager, Airspace and Procedures Branch, Docket No. 89-ASO-35, Atlanta, Georgia 30320

The official docket may be examined in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-35." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR part 71) to designate the Greensboro, GA, Transition Area. This action would lower the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the Greene County Airpark Airport. A new NDB SIAP has been developed for the airport and the additional controlled airspace is necessary for protection of IFR aeronautical operations. If this action is approved, the operating status of the airport would change from VFR to IFR concurrent with publication of the SIAP. Section 71.181 of part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Rev. Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Greensboro, GA, [New]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Greene County Airpark Airport (latitude 33°35'57"N, longitude 83°08'13" W); within three miles each side of the 072° bearing from the Greensboro NDB (latitude 33°35'41" N, longitude 83°08'27" W), extending from the 6.5-mile radius area to 8.5 miles east of the NDB.

Issued in East Point, Georgia, on August 9, 1989.

Don Cass,

Acting Manager, Air Traffic Division, Southern Region.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[EE-128-86]

RIN 1545-AK41

Minimum Coverage Requirements

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to minimum coverage requirements of section 410(b) of the Internal Revenue Code of 1986.

DATES: The public hearing will be held on November 20, 1989, beginning at 10:00 a.m. Outlines of oral comments must be delivered by November 6, 1989.

ADDRESS: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue Service, Attn: CC:CORP:T:R [EE-128-86], Room 4429, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Felicia A. Daniels of the Regulations Unit, Assistant Chief Counsel (Corporate), Room 4429, 1111 Constitution Avenue NW., Washington, DC 20224, telephone 202-566-3935 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 410(b) of the Internal Revenue Code of 1986. The proposed regulations appeared in the Federal Register for May 18, 1989 (54 FR 21437).

The rules of 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Monday, November 6, 1989, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers thereto.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

31 CFR Part 103

Office of the Assistant Secretary (Enforcement)

Proposed Amendment to the Bank Secrecy Act Regulations Relating to Identification Required to Purchase Bank Checks and Drafts, Cashier's Checks, Money Orders and Traveler's Checks

AGENCY: Department Offices, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: Section 6185(b) of title VI of the Anti-Drug Abuse Act of 1988, Public Law 100-690, November 18, 1988, prohibits financial institutions from issuing or selling cashier's checks, traveler's checks, money orders and bank checks in amounts of $3,000 or more in currency unless the financial institution verifies and records the identity of the purchaser as the Secretary of the Treasury shall prescribe in regulations. This is in addition to Treasury's authority in 31 U.S.C. 5313 to prescribe reports on domestic coins and currency. Treasury is proposing that financial institutions record this identifying information and maintain a chronological log or logs.

DATE: Comments are due on October 23, 1989.

ADDRESS: Comments should be sent to Amy G. Rudnick, Director, Office of Financial Enforcement, Department of the Treasury, Room 4320, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Kathleen A. Scott, Attorney Advisory, Office of the Assistant General Counsel (Enforcement), (202) 566-9947.

SUPPLEMENTARY INFORMATION: Section 6185(b) of title VI of the Anti-Drug Abuse Act of 1988 added a new section 5325 to the Bank Secrecy Act:

Section 5325 Identification Required to Purchase Certain Monetary Instruments

(a) *In General.* No financial institution may issue or sell a bank check, cashier's check, traveler's check, or money order to any individual in connection with a transaction or group of such contemporaneous transactions which involves United States coins or currency (or other such monetary instruments as the Secretary may prescribe) in amounts or denominations of $3,000 or more unless—

(1) The individual has a transaction account with such financial institution and the financial institution—

(A) Verifies that fact through a signature card or other information maintained by such institution in connection with the account of such individual; and

(B) Records the method of verification in accordance with regulations which the Secretary of the Treasury shall prescribe; or

(2) The individual furnishes the financial institution with such forms of identification as the Secretary of the Treasury may require in regulations which the Secretary shall prescribe and the financial institution verifies and records such information in accordance with regulations which such Secretary shall prescribe.

(b) *Report to Secretary Upon Request.* Any information required to be recorded by any financial institution under paragraph (1) or (2) of subsection (a) shall be reported to the Secretary of the Treasury at the request of such Secretary.

(c) *Transaction Account Defined.* For purposes of this section, the term "transaction account" has the meaning given to such term in section 19(b)(1)(C) of the Federal Reserve Act.

The legislative history indicates that Congress clearly felt that there was a need for this provision, because money launderers commonly purchase bank checks, cashier's checks, money orders and traveler's checks for amounts under $10,000. The House Committee Report noted that the only identification records required for persons who conduct currency transactions in amounts under $10,000 are those needed to open an account, thus permitting nonaccountholders to conduct currency transactions below $10,000 without having to identify themselves. The Committee indicated that it expected affected financial institutions to be "fully cooperative and responsive to this law enforcement effort." H. Rep. No. 100-716, 100th Cong., 2d Sess. 7.

Advance Notice of Proposed Rulemaking

On December 23, 1988 (53 FR 51846), Treasury published an Advance Notice of Proposed Rulemaking to solicit comments from the public on how best to implement this provision. In the Advance Notice, Treasury suggested that the best way to implement this new identification requirement might be by requiring a chronological log of the purchase of bank checks, cashier's checks, money orders and traveler's checks. One hundred fifty-six (156) comments were received from the public, primarily affected financial institutions, on how best to put this provision into effect.

Proposed Amendment

The comments covered a wide range of issues. Treasury has considered these ideas in formulating the regulation being proposed today. Treasury is proposing that a new section, "Purchases of bank checks and drafts, cashier's checks, money orders and traveler's checks" be added to the Bank Secrecy Act regulations, 31 CFR part 103. The section would require that all financial institutions subject to the Bank Secrecy Act regulations maintain a monthly chronological log or logs of their sales of bank checks and drafts, cashier's checks, money orders and traveler's checks to customers who purchase these instruments with currency in amounts of $3,000–$10,000 inclusive. If the purchaser has a transaction account (as that term is defined in § 103.11(p)) with the financial institution where the transaction is being conducted, the following information would be required on the log:

(1) The name of the purchaser;

(2) The number of the purchaser's account;

(3) The date of purchase;

(4) The branch where the purchase occurred; and

(5) The type(s), serial number(s), and the dollar amount of each of the instrument(s) purchased in currency.

In addition, the financial institution would be required to verify that the individual is an accountholder, either through a signature card on file or other record at the financial institution, if the accountholder's identity was verified at the time the account was opened, or at any subsequent time, and that information was recorded on the signature card or other file or record. The method of verification used shall be noted on the log, such as "checked computerized customer file system", or "checked signature card #124–890."

If the accountholder's identity was not verified previously, then the accountholder must be treated as a nonaccountholder for purposes of verification of identity only. The financial institution in that case shall verify the accountholder's name and address by examination of a document that contains the name and address of the purchaser and normally is acceptable within the banking community as a means of identification when cashing checks for nondepositors, and shall record that specific identifying information on the log (*e.g.*, State of issuance and number of driver's license). Because a credit card normally does not contain a name and address of the credit card holder, a credit card alone generally would not be an adequate form of identification. The financial institution then may add that identifying information to its records so that the accountholder need not be required to produce identification for subsequent purchases of these instruments.

If the purchaser is a nonaccountholder, then the financial institution shall record the following information on the log:

(1) The name and address of the purchaser;

(2) The social security number of the purchaser, or if the person is an alien without a social security number, the purchaser's alien identification number;

(3) The date of birth of the purchaser;

(4) The date of purchase;

(5) The branch where the purchase occurred;

(6) The type(s), serial number(s) and dollar amount of the instrument(s) being purchased;

(7) For cashier's checks and bank checks or drafts, the payees on the instrument(s) purchased;

(8) The amount of the purchase in currency; and

(9) If the individual is purchasing the instrument for a third person, the name of the person on whose behalf the instrument is being purchased and the account number of that third party if the third person is an accountholder at the institution. If the third person is not an accountholder, then the name, address and social security number, taxpayer identification number or alien identification number of the third party shall be noted on the log.

In addition, for all nonaccountholders, the financial institution shall verify the purchaser's name and address by examination of a document that contains the name and address of the purchaser and normally is acceptable within the banking community as a means of identification when cashing checks for nondepositors, and record that specific identifying information on the log (*e.g.*, State of issuance and number of driver's license). Again, because of credit card normally does not contain a name and address of the credit card holder, a credit card alone generally would not be an adequate form of identification.

Contemporaneous purchases of the same or different types of instruments totaling $3,000 or more would be treated as one purchase. Contemporaneous means originating, existing or happening at the same time. In addition, Treasury is using its general Bank Secrecy Act authority under 31 U.S.C. 5313 to propose that multiple purchases during the same business day by the same person be treated as one purchase if an individual employee, officer, director or partner of the financial institution has knowledge that the purchases have taken place or there is knowledge on the part of the financial institution's computer system that the purchases have taken place. Financial institutions do not have to purchase new hardware or software computer system to comply with this requirement. They may, but are not required, to change any of their computer programs or manual systems presently in place.

The financial institution may keep a single centralized chronological log or it may maintain individual chronological logs by branch. A separate chronological log for each type of instrument sold or issued also is permissible. If the financial institution maintains individual logs by branch, the financial institution must send those logs to a central location by the fifteenth day after the end of the calendar month for which the log was compiled. The logs need not be integrated with each other; they merely must be kept in one place. This will make it easier for both the financial institution and the Treasury Department when it requests information from the financial institution about its sales of these instruments.

Finally, the proposed regulation states that the Treasury Department may request the information at any time. The financial institution must provide the information, whether the log is at the central location or still is at the branch, even though the information is not required to be forwarded to the centralized location until fifteen days after the close of the calendar month.

Need for a Log

Treasury considered alternatives types of logs suggested in the comments to the Advance Notice. These alternatives included compiling a quarterly or yearly report, keeping the information on a copy of the instrument, or requiring a new standardized form. After considering these alternatives, Treasury decided to propose that financial institutions maintain a chronological log or logs by institution or branch because this alternative provided the most effective method of keeping the information required by the Secretary under section 5325 in one place, and easily accessible by both the financial institution and the Treasury Department. At the same time, it permits some flexibility for the financial institutions. Recording the information only on a copy of the instrument itself in many instances would force a financial institution to sift through thousands of documents from its many branches in order to comply with a request for the information from the Treasury Department. Also, while financial institutions may maintain copies of some of the money orders, traveler's checks, bank checks or drafts or cashier's checks they sell or issue, they do not maintain copies of all the noted instruments they sell or issue, and, indeed, may keep different kinds of records for each of the instruments included. A quarterly or yearly report also was rejected because the information would not be as readily accessible by Treasury as a monthly log. Finally, Treasury rejected the idea of requiring financial institutions to use a standardized form because it believes that financial institutions should be given some flexibility in the way the information is recorded and the format of the required information. Thus, each financial institution would be free to develop its own standardized form for internal use, if it so desired.

Treasury wishes to minimize any delay in the completion of transactions or the holding up of customer lines while the financial institution completes a log entry. The required information may be noted on a copy of the instrument or other record associated with the instrument, and later transferred to a log after the purchase is concluded, at the end of the day, or, if kept at a branch, at the end of the month before the logs are sent to the centralized location. For example, many banks sell cashier's checks and require the purchaser to fill out an application prior to issuing the check. The required information could be noted on the application. After the customer leaves, the information could than be transferred to the log. Or, if it is a branch bank that maintains its own log and sends its logs to a centralized location, it could prepare the log at the end of the month prior to forwarding it to the bank's centralized location.

Financial institutions should be aware, however, that Treasury has the right to request this information at any time. Thus, if Treasury requests information on sales of these instruments at an institution that records the information initially on another type of record and then transfers it to a log at a later date, the financial institution will have to be able to retrieve that information at any time after the purchase, even if it is not entered yet on the log.

For those financial institutions that keep branch log or logs, the logs may be kept at the branch during the calendar month. The logs must be sent to the financial institution's centralized location within fifteen (15) days after the end of the month.

The logs of purchases do not need to be formatted in any particular way, as long as all the required information is contained on the log. Some financial institutions may choose to maintain logs with the name of the branch, the date of purchase, and/or the type of instrument at the top of each page of the log; if so, then that information does not need to be repeated for each individual purchase.

In addition, financial institutions may maintain separate logs for each different type of instrument. The logs need not be integrated, at the branch level or at the centralized level, as long as the logs are all kept in one centralized place at the financial institution. For financial institutions that have branches all over the country, such as a telegraph or traveler's check company or a national securities dealer, the financial institution may centralize the logs by State, as opposed to one place for the entire country. However, a list of all such locations must be made available to the Treasury Department upon request.

Instruments and Transactions Covered

Treasury is proposing that purchases of all types of official bank checks and drafts be included in the identification requirement not just those that a bank may officially label "bank check" or "cashier's check." Foreign drafts, so-called "New York" drafts and Treasurers checks all are types of bank checks and, hence, they specifically are included within the requirements of this section.

In addition, in reliance on Treasury's authority in 31 U.S.C. 5313, the proposed regulation would cover all types of currency used to purchase these instruments, not just "United States coin and currency" as noted in section 5325. This would conform the proposed regulation more closely to the present definition of "currency" in the Bank Secrecy Act regulations, 31 CFR 103.11(d), and would close a potential loophole whereby purchasers could circumvent the requirements of this section merely by using foreign currency to purchase these instruments. Financial institutions should note that proposed regulation is applicable only to currency purchases of these instruments, and does not include debits to accounts or purchases with checks.

The proposed regulation is applicable to all contemporaneous purchases of all types of the instruments listed in the proposed regulation. Contemporaneous means occurring in the same period of time. This means that currency purchases totaling between $3,000 and $10,000 inclusive that occur at the same time of the same type of instrument (*e.g.*, two $2,500 currency purchases of traveler's checks) would be included as well as purchases that occur at the same time of different types of instruments totaling between $3,000 and $10,000 inclusive (*e.g.*, a $5,000 currency purchase of a $2,500 cashier's check and $2,500 in traveler's checks).

In addition, Treasury is using its authority under 31 U.S.C. 5313 to propose that the regulation also cover currency purchases of instruments totaling between $3,000 and $10,000 inclusive within the course of a business day if a financial institution has knowledge that this has occurred. Treasury feels that this is necessary to avoid easy evasion of the identification requirement by those who simply lower their purchases to below $3,000 and continue to make repeated purchases of these instruments in currency during the course of a business day at the same financial institution. This proposal does not require a financial institution to purchase computer systems, or purchase additional hardware or software systems for their existing computers in order to comply. If the financial institution does not have a computer or manual system that would capture that information, the financial institution instead will have to rely on the knowledge of individual employees, officers, directors or partners of multiple purchases.

For example, if a customer goes to different counters in the financial institution in order to purchase multiple bank checks or drafts, cashier's checks, money orders or traveler's checks and an employee at the financial institution knows that the customer is purchasing or has purchased several different types of instruments at different windows during one business day, those transactions must be aggregated and the identification requirement complied with if the total purchases are $3,000 or more in currency. This knowledge may come about because an employee sends the customer to several windows in order to make the purchases, or assists in making the different purchases for the customer while the customer waits. There also may be situations where an employee observes a customer come into the financial institution more than once during one business day and make currency purchases totaling between $3,000 and $10,000 inclusive of several of these instruments. Because the employee in that situation has knowledge of the multiple transactions, the financial institution must obtain identification before completing the last transaction.

Exemptions Prohibited

Some commenters to the Advance Notice of Proposed Rulemaking requested that Treasury permit exemptions to the identification requirements in certain instances. Treasury will not permit any exemptions to the requirements. The exemptions to the Bank Secrecy Act reporting requirements that now exist generally are for transactions affecting accounts. Transactions that would be subject to this identification requirement are currency purchases of these instruments and generally will not affect any account. Treasury sees no need to expand the exemption privilege in this instance.

Identification Requirements

In identifying accountholders, a financial institution will be permitted to check its records or files, including its computer system, to verify that the person conducting the purchase indeed is an accountholder and to note the method of verification, *e.g.*, "checked computerized customer file records" or "checked signature care #123–67". However, the financial institution may rely on its record, file or computer system only if the accountholder's identification was verified at the time the account was opened, or at any subsequent time thereafter, and that information was recorded in the financial institution's filed or records. Thus, in order to rely on the system, a financial institution must have verified the identity of the accountholder at the time the account was opened, or at any other subsequent time, by examination of a document containing a name and address, normally acceptable within the banking community as a means of identification when cashing checks for nondepositors (such as a driver's license), and record that specific identifying information used in verifying the customer's identity in the financial encourages financial institutions that open accounts for customers to verify the identity of the person at the time the account is opened.

If a financial institution has not identified its accountholders at the time the account is opened or at any subsequent time, then it must follow the procedures required for identifying nonaccountholders, which are similar to the requirements of 31 CFR 103.27. This means that the financial institution must examine a document that contains the name and address of the purchaser and that normally is acceptable within the banking community as a means of identification when cashing checks for nondepositors, and record that specific identifying information on the log (*e.g.*, State of issuance and number of a driver's license.) As noted above, because a credit card normally does not contain the card holder's name and address, a credit card alone generally will not be a sufficient means of identifying the purchaser. Once the financial institution does obtain identifying information, however, it may add this information to the signature card or other record and may rely upon it in the future. The financial institution does not have to obtain the other information required for purchases by nonaccountholders, such as social security numbers or dates of birth.

In addition, because Treasury is aware that many money launderers hire others to make these purchases for them, Treasury is using its authority under 31 U.S.C. 5313 in order to require instruments for another person with $3,000 to $10,000 inclusive in currency, the financial institution must record the name and account number of that third party, or if the third party is not an accountholder, then the financial institution will record the name, address and the social security number, taxpayer identification number or alien identification number of the third person.

Treasury notes that not all financial institutions offer transaction accounts within the definition in section 103.11. Indeed, most nonbank financial institutions, such as check cashers and sellers of money orders, do not. Therefore, Treasury expects that most nonbank financial institutions will have to use the nonaccountholder identification procedures whenever they sell bank checks or drafts, cashier's checks, money orders or traveler's checks to purchasers doing so with $3,000 to $10,000 inclusive in currency.

Miscellaneous Issues

The record retention period for these records would be five years which is the same retention period for all Bank Secrecy Act records. 31 CFR 103.38(d).

Some commenters to the Advance Notice suggested that there may be Right to Financial Privacy Act problems with these logs in that the logs might contain information on purchasers other than those covered by the regulation, for example, currency purchases of these instruments totaling less than $3,000. Treasury notes that to the extent that a financial institution adds extraneous material to the log, it is the financial institution's responsibility either to delete the information not required by the regulation prior to providing the information to Treasury or to assume any risk in including the information. Treasury notes that recording this information for purchases over $10,000 and providing the information to Treasury upon request does not violate the Right to Financial Privacy Act, because that information already is required to be reported to the Treasury Department on a Currency Transaction Report pursuant to § 103.22.

Some commenters to the Advance Notice asked how this requirement would interact with the reporting requirements of section 103.22. For example, if a person makes a $6,000 currency deposit to his checking account and at the same time purchases a $7,000 cashier's check with $7,000 in currency, financial institutions wondered whether they would be required to file a Currency Transaction Report and maintain a record of the purchase of the cashier's check. Under 31 CFR 103.22(a), the financial institution would be required to file a Currency Transaction Report because the transaction involves currency in excess of $10,000. In addition, the financial institution would be required to record the information necessary to complete the log. This is because the reporting and recordkeeping regulations are separate requirements and both requirements must be observed.

Treasury believes that the information required by the new regulation will be useful in identifying individuals who conduct currency transactions to evade the reporting requirements by purchasing instruments below $10,000. This information is useful to law enforcement officials who are conducting money laundering and other investigations. In addition, it is believed that by requiring identification for purchases at $3,000 and above, money laundering will be deterred.

Treasury encourages financial institutions to report suspicious activity by persons that the financial institution believes may be taking actions to evade the reporting requirements of § 103.22 or the identification requirements of this regulation. Some examples of activity that might be considered suspicious include a reluctance on the part of the customer to produce identification, a customer taking back part of the currency to reduce the purchase to below $3,000, or a customer coming into the same institution on consecutive or near-consecutive business days, as observed by the financial institution employee, and purchasing bank checks, cashier's checks, traveler's checks or money orders in amounts of less than $3,000. *See* BSA Administrative Ruling 88–1, dated June 22, 1988, printed at 53 FR 40062 (October 13, 1988). Financial institutions do not want to be abused by the money laundering or the tax evader; Treasury urges financial institutions to know their customers to avoid becoming involved inadvertently in illegal activity.

Finally, financial institutions should note that they do not have to institute any new procedures or change their present procedures to comply with this requirement until a Final Rule is effective.

Submission of Comments

Treasury requests comments from all interested persons concerning the proposed amendments. While Treasury welcomes comments on all aspects of the proposal, it particularly is interested in receiving comments on the following issues:

—What procedures do financial institutions follow now in issuing or selling bank checks or drafts, cashier's checks, money orders or traveler's checks? To what extent are the procedures different if the purchaser is an accountholder as opposed to a nonaccountholder?

—Do financial institutions have restrictions on the number or amounts of instruments that they will sell to a customer, either an accountholder or nonaccountholder, on one business day for currency?

—How long, from the date the final regulation is issued, will financial institutions need to implement this regulation?

All comments received before the closing date will be carefully considered. Oral comments must be reduced to writing and submitted to Treasury to receive consideration. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future action. The Treasury Department will not recognize any materials or comments, including the name of any person submitting comments, as confidential. Any material not intended to be disclosed to the public should not be included in comments. All comments submitted will be available for public inspection during the hours that the Treasury Library is open to the public. The Treasury Library is located in Room 5030, 1500 Pennsylvania Ave., NW., Washington, DC 20220. Appointments must be made to view the comments. Persons wishing to view the comments submitted should contact Dorothy Lane of the Office of Financial Enforcement at (202) 566–8022.

Executive Order 12291

This proposed rule, if adopted as a final rule, is not a major rule for purposes of Executive Order 12291. It is not anticipated to have an annual effect on the economy of $100 million or more. It will not result in a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions. It will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or foreign markets. A Regulatory Impact Analysis therefore is not required.

Regulatory Flexibility Act

It is hereby certified under section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The collections of information contained in this Notice of Proposed Rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collections of information and the burden estimate should be directed to the Office of Financial Enforcement at the address noted above or to the Office of Management and Budget, Paperwork Reduction Project (1505–0063), Washington, DC 20503.

The collections of information in this regulation are required and authorized by 31 U.S.C. 5313 and 31 U.S.C. 5325. This information is required by Treasury to identify persons purchasing bank checks and drafts, cashier's checks, money orders and traveler's checks with currency between $3,000 and $10,000 inclusive. This information will be used to detect and deter money laundering and other criminal, tax and regulatory violations. The likely respondents/recordkeepers are financial institutions who sell or issue bank checks or drafts, cashier's checks, money orders or traveler's checks to persons who purchase these instruments with between $3,000 and $10,000 inclusive.

Estimated number of recordkeepers: 30,000.

Estimated average annual burden per recordkeeper: 7.5 hours.

Estimated record retention period per recordkeeper: 5 years.

Estimated total annual recordkeeping burden: 225,000 hours.

Estimated number of respondents: 5,000.

Estimated hours per response: .33 hour.

Estimated annual frequency of responses: 1.

Estimated total annual response burden: 1,650 hours.

Drafting Information

The principal author of this document is the Office of the Assistant General Counsel (Enforcement). However, personnel from other offices participated in its development.

List of Subjects in 31 CFR Part 103

Authority delegations (Government agencies), Banks and banking, Currency, Foreign banking, Investigations, Law enforcement, Reporting and recordkeeping requirements, Taxes.

Proposed Amendment

For the reasons set forth below in the preamble, it is proposed to amend 31 CFR Part 103 as set forth below:

PART 103—FINANCIAL RECORDKEEPING AND REPORTING OF CURRENCY AND FOREIGN TRANSACTIONS

1. The authority citation for Part 103 would continue to read as follows:

Authority: Pub. L. 91–508, Title I, 84 Stat. 1114 (12 U.S.C. 1730d, 1829b and 1951–1959); and the Currency and Foreign Transactions Reporting Act, Pub. L. 91–508, Title II, 84 Stat. 1118, as amended (31 U.S.C. 5311–5326).

2. It is proposed to add after section 103.27 a new § 103.28 to read as follows:

§ 103.28 Purchases of bank checks and drafts, cashier's checks, money orders and traveler's checks.

(a) Each financial institution shall maintain a chronological log for each calendar month on which shall be recorded the following information for each issuance or sale of bank checks or drafts, cashier's checks, money orders or traveler's checks to any individual purchaser which involves currency in amounts of $3,000–$10,000 inclusive:

(1) If the purchaser has a transaction account with the financial institution:

(i)(A) The name of the purchaser;

(B) The number of the purchaser's account;

(C) The date of purchase;

(D) The branch where the purchase occurred;

(E) The type(s) of instrument(s) purchased;

(F) The serial number(s) of each of the instrument(s) purchased; and

(G) The dollar amount of each of the instrument(s) purchased in currency.

(ii) In addition, the financial institution shall verify that the individual is an accountholder, either through a signature card or other file or record at the financial institution, if the accountholder's name and address were verified at the time the account was opened, or at any subsequent time, and that information was recorded on the signature card or other file or record. The method of verification used shall be noted on the log. If the accountholder's identity has not been verified previously, then the financial institution shall verify the accountholder's identity by examination of a document that contains the name and address of the purchaser and normally is acceptable within the banking community as a means of identification when cashing checks for nondepositors, and shall record the specific identifying information on the log (*e.g.*, State of issuance and number of driver's license).

(2) If the purchaser does not have a transaction account with the financial institution:

(i)(A) The name and address of the purchaser;

(B) The social security number of the purchaser, or if the purchaser is an alien and does not have a social security number, then the alien identification number;

(C) The date of birth of the purchaser;

(D) If the individual is purchasing the instrument(s) on behalf of another person, the name of the person on whose behalf the instrument is being purchased and the account number of that third party; if there is no account number, then the name, address and social security number, taxpayer identification number, or alien identification number of such person;

(E) The date of purchase;

(F) The branch where the purchase occurred;

(G) The type(s) of instrument(s) purchased;

(H) The serial number(s) of each of the instrument(s) purchased;

(I) The dollar amount of each of the instrument(s) purchased;

(J) The payee(s) on each of the instrument(s) purchased (for cashier's checks and bank checks and drafts); and

(K) The amount of the purchase in currency.

(ii) In addition, the financial institution shall verify the purchaser's name and address by examination of a document that contains the name and address of the purchaser and normally is acceptable within the banking community as a means of identification when cashing checks for nondepositors, and shall record the specific identifying information on the log (*e.g.*, State of issuance and number of driver's license).

(b) Contemporaneous purchases of the same or different types of instruments totaling $3,000 or more shall be treated as one purchase. Multiple purchases during one business day totaling $3,000 or more shall be treated as one purchase if an individual employee, director, officer, or partner of the financial institution has knowledge that these purchases have occurred.

(c) The financial institution may maintain a single centralized chronological log or it may maintain separate chronological logs by branch. A financial institution also may keep a separate chronological log for each type of instrument sold. If the financial institution maintains a separate chronological log or logs for each branch, all of the branch logs for a calendar month must be sent to a centralized location by the fifteenth (15th) day after the end of the calendar month for which the log was compiled. Financial institutions with branches in more than one State may centralize the logs by State. A list of the centralized locations and branches shall be available to the Secretary upon request.

(d) Chronological logs shall be retained by the financial institution for a period of five years.

(e) The chronological logs shall be available to the Secretary upon request at any time.

Dated: August 4, 1989.

Salvatore R. Martoche,

Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

POSTAL SERVICE

39 CFR Parts 775, 776

Amendments to Environmental Procedures and Procedures for Floodplain Management and Protection of Wetlands

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: The purpose of the proposed amendments to part 775 is to clarify, update, and in some respcts extend the situations in which the Postal Service does not prepare environmental assessments under its facilities program. The revised exclusions draw on experiences over the past five years with numerous facility projects and accommodate new acquisition techniques such as advance site acquisitions.

Certain changes are also proposed in the Postal Service's facility planning procedures for floodplains and wetlands (part 776), but these changes are not intended to change the scope or level of review required.

DATES: Written comments must be received by September 21, 1989.

ADDRESS: Written comments must be sent to Director, Office of Facilities Planning and Management, Facilities Department, U.S. Postal Service, 475 L'Enfant Plaza West, SW., Room 4126, Washington, DC 20260-6420. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in Room 4130 at the above address.

FOR FURTHER INFORMATION CONTACT: Edward Wandelt, (202) 268-3135.

SUPPLEMENTARY INFORMATION: The United States Postal Service conducts environmental reviews for proposed facility actions through procedures outlined in 39 CFR 775, Environmental Procedures. These procedures define the types of facility projects for which the Postal Service prepares environmental assessments. Regulations concerning floodplains and wetlands appear in 39 CFR 776.

The categories of projects for which an environmental assessment is normally not done (referred to as categorical exclusions in § 775.4(b)) are being revised in order to clarify, update, and extend them.

Section 775.4(b)(1) is being replaced with new § 775.4(b)(1) and § 775.4(b)(5) to accommodate new real estate techniques such as landbanking and advance acquisition of sites. Advance site acquisition is used in "tight" real estate markets or to take advantage of real estate opportunities. Landbanking is used to acquire land in high-growth areas, where a future need for facilities is anticipated but specific needs or projects have not been identified. The revised criteria do not provide for environmental assessments for advance site acquisition and acquisition of land under landbanking procedures because the process of acquisition does not have environmental impacts. However, any plan for us or disposal of such land would be subject to applicable review requirements under this section.

New § 775.4(b)(2) is added, and the first part of § 775.4(b)(3) is amended to account for length of occupancy. Also, the former test for exclusion that there be no "enlarged occupancy" is changed to require that there be no "significant" change in the use of the property. Under proposed § 775.4(b)(2) those buildings acquired through purchase, lease, or exchange under 50,000 net interior square feet with occupancy of more than 90 days would not require an environment assessment. Under proposed § 775.4(b)(3) leasing buildings of any size for occupancy of 90 days or less would not require an environmental assessment. Temporary occupancies are viewed as not having environmental impacts of a nature warranting an environmental assessment.

Current § 775.4(b)(2) is renumbered § 775.4(b)(4) and amended to propose that the expansion or improvement of an existing postal facility would not involve an environmental assessment unless the gross square footage is to be increased 30,000 square feet or more. The revision conforms this threshold with that for the construction of a new building and reflects postal experience that renovation projects below this threshold do not involve significant environmental impacts.

The second part of current § 775.4(b)(3) is renumberd § 775.4(b)(10) and amended to refer to planned postal uses, instead of the size of the operation.

Current § 775.4(b)(4) is renumbered § 775.4(b)(7).

Current § 775.4(b)(5) is renumbered § 775.4(b)(9) and amended to provide an exclusion for disposal of improved real estate either through sale or outlease involving under 30,000 net interior square feet.

Section § 775.4(b)(6) is amended to provide that routine protection and maintenance of properties are excluded unless they alter the configuration of the building.

Current § 775.4(b)(7) is renumbered § 775.4(b)(15).

An exclusion is being proposed as new § 775.4(b)(8) for obtaining, granting, disposing, or changing easements, licenses and permits, and similar interests, since no environmental impacts have been associated with these actions.

Current § 775.4(b)(8) is renumbered § 775.4(b)(13) and amended to add an exclusion for the procurement or disposal of mail handling equipment. Experience has shown that the procurement and disposal of mail handling equipment does not involve environmental impacts.

Current § 775.4(b)(9) is renumbered § 775.4(b)(14).

An exclusion is proposed as new § 775.4(b)(11) for the extension, renewal, renegotiation, or termination of existing lease agreements. Again, experience has shown that these actions do not create environmental impacts.

An exclusion is proposed as new § 775.4(b)(12) for joint development and/or joint-use projects involving construction under 30,000 net interior square feet. Experience has shown that the degree of impacts does not differ whether construction within this limit is for ownership or lease.

Section § 775.6(a)(1)(ii) is being amended to make reference to a set of internal review procedures for assisting in the determination of extraordinary circumstances, which, if found, would lead to a preparation of an environmental assessment. In addition, § 775.6(b)(3) would be changed to make it clear that under appropriate circumstances, continued control of competing sites for purposes of this regulation could be accomplished by advance acquisition.

In the EIS evaluation process, the reference to "worst-case" analysis of alternatives in § 775.8(b)(6) would be replaced with a requirement to evaluate alternatives based on reasonably foreseeable future conditions. This change is made to be consistent with changes made in regulations of the Council on Environmental Quality. See 40 CFR 1502.22(b).

The Postal Service's planning process for facilities projects no longer requires the preparation of studies entitled "Site Planning Report" and "Economic Analysis Report," the names used in part 776. Changes are proposed to require that the same information be collected and analysis performed, and the same determinations made, without specifying the names of the analytical documents. Other changes would conform the regulations more closely to Executive Orders on floodplains and wetlands.

In view of the above considerations, the Postal Service proposes to amend 39 CFR parts 775 and 776 as follows:

List of Subjects in 39 CFR Parts 775 and 776

Environmental Assessments, Environmental Impact Statements, Floodplain Management and Protection of Wetlands Procedures.

PART 775—ENVIRONMENTAL PROCEDURES

1. The authority citation for Part 775 continues to read as follows:

Authority: 39 U.S.C. 401; 42; 42 U.S.C. 4331 *et seq.*; 40 CFR 1500.4(p).

2. Section 775.4(b) is revised to read as follows:

§ 775.4 Typical classes of action.

* * * * *

(b) *Categorical exclusions.* The classes of action in paragraphs (b) (1) through (15) of this section normally do not require either an environmental assessment or an environmental impact statement. However, the responsible official must be alert to unusual conditions that would require an environmental assessment or an environmental impact statement notwithstanding the applicability of a categorical exclusion to particular action.

(1) New construction, Postal Service owned, including site acquisition by any method, or Postal Service leased, of less than 30,000 net interior square feet.

(2) Acquisition by purchase, lease, or exchange, of existing buildings containing less than 50,000 net interior square feet with occupancy of greater than 90 days where planned postal uses do not differ significantly from past uses of the site.

(3) Lease of existing buildings of any size for occupancy of 90 days or less.

(4) Expansion or improvement of an existing facility where the expansion does not exceed 30,000 net interior square feet.

(5) Acquisition of unimproved real property not connected to specific facility plans or when necessary to protect the interests of the Postal Service in advance of final project approval. This categorical exclusion applies only to the acquisition. Any subsequent use of the property for a facility project must be considered under this part without regard to ownership of the real property.

(6) Routine actions normally conducted to protect and maintain properties and which do not alter the configuration of the building.

(7) Repair to, or replacement-in-kind of, building equipment or components (e.g., electrical distribution, HVAC systems, doors, windows, roofs, etc.).

(8) Obtaining, granting, disposing, or changing of easements, licenses and permits, rights-of-way and similar interests.

(9) Disposal through sale or outlease of unimproved real property of any size or improved real estate under 30,000 net interior square feet.

(10) Purchase of Postal Service occupied leased property where planned postal uses do not differ significantly from past uses of the site.

(11) Extension, renewal, renegotiation, or termination of existing lease agreements.

(12) Joint development and/or joint-use projects involving construction under 30,000 net interior square feet.

(13) Procurement or disposal of motor vehicles not involving a substantial increase in the concentration of vehicles in a geographic impact area. Procurement or disposal of mail handling equipment.

(14) Postal rate or mail classification actions.

(15) Postal facility function changes not involving construction, the relocation of a substantial number of employees, or a substantial increase in the number of motor vehicles at a facility.

3. In § 775.6, in the introductory text of paragraph (b)(3), add after the word "sites," the following: "(including advance acquisition, if necessary, and

where authorized by postal procedures),"; revise paragraphs (a)(1)(ii) and (b)(3)(ii) to read as follows:

§ 775.6 Environmental evaluation process.

(a) * * *

(1) * * *

(ii) The action is not affected by extraordinary circumstances which may cause it to have a significant environmental effect. This part of the determination may be supported by completion of an environmental checklist (referred to as a level I environmental review in the Handbook RE–6) for certain types of categorical exclusions.

* * * * *

(b) * * *

(3) [Amended]

* * * * *

(ii) The continued control of specified competing sites, (including advance acquisition, if necessary, and where authorized by postal procedures) chosen to preserve environmental or other options, and

* * * * *

§ 775.8 [Amended]

4. In § 775.8(b)(6), remove the second sentence and insert in its place the following: "There must be included in the statement an analysis of alternatives based on reasonably foreseeable conditions in the future and an indication of the probability or improbability of their occurrence."

PART 776—FLOODPLAIN MANAGEMENT AND PROTECTION OF WETLANDS PROCEDURES

5. The authority citation for part 776 continues to read as follows:

Authority: 39 U.S.C. 401.

§ 776.4 [Amended]

6. In § 776.4, remove paragraphs (c) and (d).

§ 776.5 [Amended]

7. In § 776.5, remove the word "locating" from the introductory text of paragraph (i) and insert in its place "constructing"; and revise the heading and text of paragraphs (a) and (d), the heading and introductory text of paragraph (e), paragraph (e)(1), the introductory text of paragraph (f), paragraph (f)(1), paragraph (f)(4), paragraph (f)(5), and paragraph (h) to read as follows:

§ 776.5 New construction.

(a) *Construction of floodplain/wetland.* During the evaluation of contending sites for a proposed project, information concerning impacts on wetlands and floodplains will be collected and considered. If use of a site would require construction in a floodplain or wetland, the site may be considered only when there is no practicable alternative site.

* * * * *

(d) *Site planning.* During site evaluation, a determination must be made whether any of the identified site alternatives would require construction in, or appear to have an impact on, a floodplain or wetland. This information will be included as part of any required Environmental Assessment.

(e) *Analysis of alternatives.* If any of the site alternatives identified under paragraph (d) of this section would involve construction within a floodplain or wetland, an analysis of alternatives must be prepared, and must include:

(1) Alternate sites as identified in the site planning process;

* * * * *

(f) *Reevaluation.* If, after consideration of information and analyses produced under paragraphs (b), (d), and (e) of this section, and (if required) review through an Environmental Assessment or Environmental Impact Statement, the determination is that there appears to be no practicable alternative to locating in a floodplain or wetland, a final reevaluation of alternatives must be conducted. The Facilities Service Center Director is responsible for this reevaluation. To facilitate this reevaluation, the following data must be submitted to the Facilities Service Center Director:

(1) A summary of reasons why the rejected alternatives and alternative sites, if any, were considered impracticable.

* * * * *

(4) Documentation from the site evaluation and planning process.

(5) The Environmental Assessment or Environmental Impact Statement, if either was required.

* * * * *

(h) If the Facilities Service Center Director determines that there is not a practicable alternative to constructing in a floodplain or wetland, the appropriate Postal Service organization is so advised. The Director may provide instructions for mandatory measures to be accomplished during design and construction to minimize harm to the floodplain or wetland.

(i) [Amended]

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Region II Docket No. 91; FRL–3633–3]

Approval and Promulgation of Implementation Plans; Revision to the State of New Jersey Implementation Plan for Ozone

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This notice announces that the Environmental Protection Agency is proposing to approve a revision to the New Jersey State Implementation Plan (SIP) for ozone. This revision was prepared by the New Jersey State Department of Environmental Protection pursuant to a SIP commitment to reduce ozone levels in the State of New Jersey, as required under Section 110 and Part D of the Clean Air Act. Today's notice proposes to incorporate into the New Jersey SIP a revised regulation, New Jersey Administrative Code 7:27, Subchapter 16 "Control and Prohibition of Air Pollution by Volatile Organic Substances," which will reduce violatile organic compound emissions resulting from the refueling of motor vehicles at certain gasoline stations in the State of New Jersey.

COMMENTS: Comments must be received by September 21, 1989.

ADDRESSES: All comments should be addressed to:

William J. Muszynski, P.E., Acting Regional Administrator, Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278.

Copies of the SIP revision are available at the following addresses for inspection during normal business hours:

Environmental Protection Agency, Air Programs Branch, Room 1005, 26 Federal Plaza, New York, New York 10278

New Jersey State Department of Environmental Protection, Division of Environmental Quality, Bureau of Air Pollution Control, 401 East State Street, CN027, Trenton, New Jersey 08625

FOR FURTHER INFORMATION CONTACT: Raymond Werner, Acting Chief, Air Programs Branch, Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278, (212) 264–2517

SUPPLEMENTARY INFORMATION:

Background

In its most recent comprehensive State Implementation Plan (SIP) revision for ozone, which was submitted to the Environmental Protection Agency (EPA) on September 26, 1983 and approved by EPA on November 8, 1983 (48 FR 51472), the State of New Jersey committed to adopt a number of measures to control the emissions of volatile organic compounds (VOCs) into the ambient air. These control measures included source categories covered by EPA's Control Techniques Guidelines (CTGs), larger sources not covered by a CTG, as well as, control measures considered by New Jersey as reasonably available and those considered as "extraordinary." These measures would provide additional VOC emission reductions needed to attain the National Ambient Air Quality Standard (NAAQS) for ozone. One of these control measures is "Stage II Vapor Controls," the subject of this notice.

Whenever gasoline is transferred or stored, gasoline vapors can be released to the atmosphere. The collection and control of these fugitive gasoline vapors at storage facilities, terminals, and the loading of gasoline service station tanks is called Stage I vapor controls. Because emissions due to this bulk loading and unloading of gasoline are controlled at every point during its shipment (i.e., from storage and loading facilities to the tank truck, and from the tank truck to the service station storage tank), the control of the emissions due to the refueling of vehicles at gasoline service stations is the remaining uncontrolled link in the fuel distribution system.

State Submittals

On February 22, 1988, the New Jersey Department of Environmental Protection (NJDEP) submitted to EPA adopted revisions to Chapter 27, Title 7 of the New Jersey Administrative Code (N.J.A.C. 7:27) Subchapter 16 "Control and Prohibition of Air Pollution by Volatile Organic Substances" (Subchapter 16), which New Jersey had adopted and made effective as of February 22, 1988. On April 18, 1988 the State submitted information on test procedures which will be used to determine compliance with the revised provisions of Subchapter 16.

These revisions add to Subchapter 16 requirements for the control of gasoline vapors resulting form the refueling of vehicle fuel tanks at gasoline service stations. When vehicle fuel tanks are refilled, the air inside the tank is displaced and forced out into the atmosphere. This air is heavily saturated with gasoline vapors which are VOCs that contribute to the ozone nonattainment problem.

The control systems required under Subchapter 16, known as Stage II controls, are those that NJDEP determines are capable of capturing at least 95 percent of this vapor laden air before it enters the atmosphere. The vapor control system must be approved by the NJDEP and must be composed of equipment that has been certified by the California Air Resources Board (CARB). In addition, it must be designed to prevent overfilling and spillage of gasoline.

Subchapter 16 applies to any existing gasoline service station whose average monthly throughput, between September 1, 1986 and August 31, 1987, exceeds 10,000 gallons. It also applies to all new stations regardless of gasoline throughput. Each station owner must maintain records of the gasoline throughput. For each station required to be controlled a permit to construct a Stage II system must be submitted to and approved by the NJDEP. After construction of its system, a service station must pass mandatory pressure and blockage tests.

The schedule for service stations to comply with the Stage II provisions are dependent on the stations throughput. Those stations with an average monthly throughput of 40,000 gallons or greater must be in compliance by December 30, 1988. Those stations with an average monthly throughput of less than 40,000 gallons and exceeding 10,000 gallons must be in compliance by December 29, 1989. Stations constructed after February 21, 1988 regardless of throughput, must be in compliance prior to dispensing gasoline.

The NJDEP has identified the test methods that it will use to ensure compliance with its Stage II requirements. Pressure and blockage tests are required for all stations installing Stage II control systems and are included as conditions on the permit to contruct. Efficiency testing can be done using the CARB test procedure, "Test Procedure for Determining the Efficiency of Gasoline Vapor Recovery Systems at Service Stations."

Section 16.10 contains a general variance provision which permits the Commissioner of the New Jersey Department of Environmental Protection to accept alternate controls when a facility is unable to comply because of technical infeasibility. Variances adopted by the State become applicable only if approved by EPA as a SIP revision.

It is important to note that the State did not meet the schedule for implementing this measure that it committed to in its 1983 SIP revision. On November 17, 1987, it was ordered by the U.S. District Court, District of New Jersey in the case of the *American Lung Association, et al. v. Thomas H. Kean, Governor of New Jersey, et al.,* to implement Stage II. The compliance schedule contained in Section 16.3 conforms to the Court ordered schedule.

Finding

EPA finds that the adoption of Stage II controls in Subchapter 16 meets New Jersey's SIP commitment. The design of the Stage II program submitted by the State is substantially equivalent to the program committed to in the SIP, both in nature and emission reductions. The VOC reductions associated with this regulation are a necessary part of New Jersey's program to attain the ozone standards. EPA is, therefore, proposing to approve the revisions to Subchapter 16 of the N.J.A.C. 7:27 effective February 21, 1988 as it relates to Stage II controls. EPA further notes that experience with Stage II controls in other states has shown it to be a technologically feasible and an effective means of reducing VOC emissions.

EPA is soliciting public comments on its proposed action. Comments will be considered before taking final action. Interested parties may participate in the federal rulemaking procedure by submitting written comments to the address noted at the beginning of today's notice.

This notice is issued as required by section 110 of the Clean Air Act, as amended. The Administrator's decision regarding the approval of this plan revision is based on its meeting the requirements of Section 110 of the Clean Air Act and 40 CFR Part 51.

Under 5 U.S.C. Section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

40 CFR Part 52

[FRL–3633–2]

Approval and Promulgation of State Air Quality Plans; Massachusetts; Withdrawal of Proposed Approval of RACT for the Non-CTG Processes at General Electric Co., Pittsfield, MA

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule, withdrawal.

SUMMARY: EPA is withdrawing a proposed action, published on January 31, 1989 (54 FR 4838), to approve a revision to the Massachusetts State Implementation Plan (SIP). The Massachusetts Department of Environmental Protection (DEP) has formally withdrawn the SIP revision request which would have imposed reasonably available control technology (RACT) on certain processes at the General Electric Company's facility in Pittsfield, Massachusetts.

FOR FURTHER INFORMATION CONTACT: Nam Nguyen at (617) 565–3249 or FTS 835–3249.

SUPPLEMENTARY INFORMATION: On January 31, 1989, EPA published a notice of proposed rulemaking (54 FR 4838) proposing to approve a request from the Massachusetts Department of Environmental Protection (DEP), formerly called the Department of Environmental Quality Engineering, to revise the Massachusetts State Implementation Plan (SIP). The DEP's SIP revision consisted of a plan approval imposing reasonably available control technology (RACT) on three operations at the General Electric Company in Pittsfield (G.E. Pittsfield) that are not otherwise subject to RACT under Massachusetts SIP regulations developed pursuant to EPA's Control Technique Guidelines (CTGs).

The Massachusetts' SIP includes regulation 310 CMR 7.18(17) which requires RACT on sources which emit 100 TPY more of volatile organic compounds (VOCs) from non-CTG processes. At the time DEP originally submitted its proposed RACT plan for G.E. Pittsfield, that facility had existing non-CTG processes which emitted more than 100 TPY of VOCs as defined by the Massachusetts SIP:

PRE-RACT POTENTIAL LEVELS (TPY)

Large transformer group	15.0
Military ordnance division	10.6
Plastic business group	[1] 477.3
	[1] 502.9

[1] 444 of which consist of methylene chloride.

On March 6, 1989, the DEP submitted new information regarding the Plastic Business Group. Since the time of DEP's SIP revision request, G.E. Pittsfield physically modified the laminating resins process of the Plastic Business Group thereby becoming subject to the Massachusetts SIP regulation for new source review. Massachusetts issued a federally enforceable permit to G.E. Pittsfield imposing best available control technology (BACT) requirements on the Plastic Business Group's laminating resins process which are more stringent than the proposed RACT requirements for that process. BACT applies under the Massachusetts SIP for any change in emissions due to a modification. Lowest achievable emission rate (LAER) requirements did not apply because the increase in VOC emissions from the modification was less than 40 TPY. Moreover, Massachusetts has revised its definition of VOC to exclude methylene chloride in accordance with the EPA recommended definition of VOC. Therefore, the VOC emissions from existing non-CTG processes at G.E. Pittsfield now total less than 100 TPY:

PRE-RACT POTENTIAL LEVELS (TPY)

Large transformer group	15.0
Military ordnance division	10.5
	25.6

As the applicability threshold for RACT under SIP regulation 310 CMR 7.18(17) is 100 TPY and G.E. Pittsfield's existing non-CTG processes' potential VOC emissions are less than 100 TPY, the DEP does not have to submit a source-specific SIP revision imposing RACT on the non-CTG processes at G.E. Pittsfield. Accordingly, on June 30, 1989, the DEP withdrew its SIP revision, and EPA is hereby withdrawing its proposed action to approve that revision.

Dated: August 14, 1989.

Paul G. Keough,
Acting Regional Administrator, Region I

National Oceanic and Atmospheric Administration

50 CFR Part 662

[Docket No. 90775–9175]

Northern Anchovy Fishery, Preliminary Determination

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of preliminary determination.

SUMMARY: NOAA announces the estimated spawning biomass and preliminary determination of harvest quotas for the northern anchovy fishery in the exclusive economic zone (EEZ) for the 1989–90 fishing season. The harvest quotas have been determined by application of the formulas in the Northern Anchovy Fishery Management Plan (FMP) and its implementing regulations. Those regulations require this announcement to be made on or about July 1 each year. The optimum yield is set at 4,900 metric tons plus an unspecified amount for use as live bait; there is no U.S. harvest quota for reduction fisheries. There is no allocation for joint venture processing, nor for total allowable level of foreign fishing.

DATES: Comments must be received on or before September 5, 1989.

ADDRESSES: Comments should be addressed to E.C. Fullerton, Director, Southwest Region, NMFS, 300 South Ferry Street, Terminal Island, CA 90731.

FOR FURTHER INFORMATION CONTACT: James J. Morgan, Fisheries Management and Analysis Branch, Southwest Region, NMFS, 213–514–6667.

SUPPLEMENTARY INFORMATION: In consultation with the California Department of Fish and Game and the NMFS Southwest Fisheries Center, the Director of the Southwest Region has made a preliminary determination that the spawning biomass of the central subpopulation of northern anchovy, *Engraulis mordax*, is estimated to be 214,000 metric tons (mt). The biomass estimate is derived from, and is equivalent to, the Egg Production Method measurement, but is based on the Stock Synthesis Model.

Regulations implementing the FMP state that there will be no reduction fishery when the estimated spawning biomass is less than 300,000 mt. The Regional Director has made the following preliminary determinations for the 1989–1990 fishing season by applying the formulas in the FMP and in 50 CFR 662.20 of the implementing rules:

1. The total U.S. harvest quota or optimum yield (OY) of northern anchovy is 4,900 mt plus an unspecified amount for use as live bait.

2. The total U.S. harvest quota for reduction purposes is zero. There is no reduction harvest allocation when the spawning biomass is below 300,000 mt; therefore, there will be no reduction fishery during the 1989–1990 fishing season.

3. The U.S. harvest allocation for non-reduction fishing (i.e., fishing for anchovy for use as dead bait and direct human consumption) is 4,900 mt.

4. The domestic annual processing capacity (DAP) is 1,468 mt. The FMP states that this amount is the maximum level of reduction plus non-reduction processing during the previous 3 years.

5. There is no U.S. harvest limit for the live bait fishery.

6. The amount allocated to joint venture processing (JVP) is zero because there is no history of, nor are there applications for, joint ventures.

7. Domestic annual harvest capacity (DAH) is 1,468 mt. This is the sum of DAP and JVP.

8. The total allowable level of foreign fishing (TALFF) is zero. When the spawning biomass is below 300,000 mt, there is no allocation for foreign fishing.

Information obtained through the peak spawning period of January-February shows two major factors that serve to explain this year's estimate:

1. Low temperatures during and preceding the spawning season reduce sexual maturity and spawning. The mean temperature for January-February, 1989 was 12.5° C; the mean temperature since 1960 is 14.3° C. Only 5 percent of 1-year-old anchovies are expected to be sexually mature and actively spawning at 12.5° C.

2. There is an apparently large 1988 year class recruiting to the 1989 population, although virtually none of this large year class spawned during the January-February period.

As a result of the above, there is an estimated total biomass of 984,000 mt and a spawning biomass of 214,000 mt. The low spawning biomass is primarily due to the effects of cold water and is not due to recruitment failure or over-fishing.

Classification

This action is authorized by 50 CFR part 662 and complies with Executive Order 12291.

Animal and Plant Health Inspection Service

[Docket No. 89-137]

Availability of Environmental Assessment and Finding of No Significant Impact Relative to Issuance of a Permit To Field Test Genetically Engineered Tobacco Plants

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that an environmental assessment and finding of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of a permit to Iowa State University, to allow a field test in the State of Iowa of genetically engineered tobacco plants, modified to express a bacterial chloramphenicol acetyl transferase enzyme in order to confer resistance to the antibiotic, chloramphenicol, on these plants. The assessment provides a basis for the conclusion that the field testing of these genetically engineered tobacco plants will not present a risk of introduction or dissemination of a plant pest and will not have any significant impact on the quality of the human environment. Based upon this finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

ADDRESS: Copies of the environmental assessment and finding of no significant impact are available for public inspection at Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Dr. Quentin B. Kubicek, Biotechnologist, Biotechnology Permit Unit, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 841, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–7612. For copies of the environmental assessment and finding of no significant impact, write Ms. Linda Gordon at this same address. The environmental assessment should be requested under accession number 89–097–01.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article can be introduced in the United States. The regulations set forth procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

Iowa State University at Ames, Iowa, has submitted an application for a permit for release into the environment, to field test genetically engineered tobacco plants modified to express a bacterial chloramphenicol acetyl transferase enzyme in order to confer resistance to the antibiotic chloramphenicol. The field trial is to take place in Ames, Iowa.

In the course of reviewing the permit application, APHIS assessed the impact on the environment of releasing the tobacco plants under the conditions described in the Iowa State University application. APHIS concluded that the field testing will not present a risk of plant pest introduction or dissemination and will not have any significant impact on the quality of the human environment.

The environmental assessment and finding of no significant impact, which are based on data submitted by Iowa State University, as well as a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the enviromental impacts associated with conducting the field testing.

The facts supporting APHIS's finding of no significant impact are summarized below and are contained in the environmental assessment.

1. A gene which has the effect of making tobacco plants express a bacterial chloramphenicol acetyl transferase enzyme has been inserted into a tobacco chromosome. In nature, the genetic material contained in a chromosome of these plants can only be transferred to another sexually compatible plant by cross-pollination. In this field test trial, the inserted gene cannot spread to any other sexually compatible plant by cross-pollination because the field test plot is located at a sufficient distance from any sexually compatible plant with which these experimental tobacco plants could successfully cross-pollinate.

2. Neither the proteinase inhibitor II promoter or terminator signal sequence, the chloramphenicol acetyl transferase gene itself, nor the chloramphenicol acetyl transferase gene derived product confer on tobacco any plant pest characteristic.

3. The potato variety (Russett Burbank), from which the proteinase inhibitor II promoter and terminator signal sequences were obtained, is not a plant pest.

4. The chloramphenicol acetyl transferase gene does not provide the genetically engineered tobacco plants with any measurable selective advantage over nongenetically engineered tobacco plants in its ability to be disseminated or to become established in the environment.

5. The plasmid vector used to transfer the chloramphenicol acetyl transferase gene into the tobacco chromosome has been evaluated for its use in this experiment. The plasmid vector, although derived from the DNA of a tumor inducing (Ti) plasmid with known plant pathogenic potential, has been disarmed; that is, genes that are necessary for pathogenicity have been removed from the plasmid vector. The plasmid vector has been tested and shown to be not pathogenic to any susceptible plant.

6. The vector agent *Agrobacterium tumefaciens*, a phytopathogenic bacterium, was used to deliver the vector DNA and the chloramphenicol acetyl transferase gene into tobacco plant cells. The vector agent has been demonstrated by *in vitro* and *in vivo* assays to be eliminated and no longer associated with any genetically engineered tobacco plant or seed.

7. Horizontal movement by infectious transfer or transposition of any of the introduced genes or DNA sequences is not known to be possible. The plasmid vector acts by delivering the gene to the tobacco genome where it is stably inserted into the tobacco chromosomal DNA. The plasmid vector cannot replicate independently of its vector agent and does not survive alone in any plant. No mechanism of horizontal movement is known to exist in nature to move an inserted gene from a chromosome of a genetically engineered plant to any other organism.

8. The size of the field test trial plot is small (50 feet by 120 feet). The plot will be located on a research farm which will provide good security. The level of physical containment has been found to be adequate to prevent an accidental release or dissemination in the environment.

The environmental assessment and finding of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4331 *et seq.*), (2) Regulations of the Council on Environmental Quality Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1509), (3) USDA Regulations Implementing NEPA (7 CFR Part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381–50384, August 28, 1979, and 44 FR 51272–51274, August 31, 1979).

Done in Washington, DC, this 17th day of August 1989.

Larry B. Slagle,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 89–19718 Filed 8–21–89; 8:45 am]

BILLING CODE 3410–34–M

Forest Service

Outfitter and Guide Fees

AGENCY: Forest Service, USDA.

ACTION: Notice; adoption of final policy.

SUMMARY: The Forest Service gives notice of adoption of a final policy to adjust the minimum fees required for outfitter and guide services on National Forest System lands for inflation. The fees will be adjusted every 3 years based on the Implicit Price Deflator Index, published every February in the "Economic Report of the President" to Congress. This action ensures that fees accurately reflect fair market value as required by law and regulation.

EFFECTIVE DATE: This policy is effective October 23, 1989. The first adjustment in minimum fees will occur in March 1990 and reflected in billings for annual permits sent out at that time.

FOR FURTHER INFORMATION CONTACT: John Shilling, Recreation Management Staff, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090–6090. (202)–382–9426.

SUPPLEMENTARY INFORMATION: In 1984, the Forest Service adopted changes in its policy for managing special use permits for individuals or organizations conducting outfitting and guiding activities on the National Forests, including adoption of a new fee system.

When the new fee system was adopted in 1984, the minimum fair market value fee of an outfitting and guide permit was set at $50 and the charge for reserved use of a site at $100. The new fee system did not, however, allow for adjustment of fees to compensate for inflation. Office of Management and Budget Circular A–25 specifies that, "Where federally owned resources or property are leased or sold, a fair market value should be obtained."

The Forest Service decided to give notice and opportunity to comment on adjustment of minimum fees after a November 1988 meeting with representatives of the North American Outfitters Association and the National Forest Recreation Association, who expressed concern about the timeliness of the proposal.

On March 23, 1989, the Forest Service published for comment in the Federal Register (54 FR 11982) a proposed amendment to Forest Service Special Uses Management Handbook 2709.11 (Chapter 30, Fees Determination) to adjust minimum fees for outfitting and guiding on National Forest System lands for inflation. Under the proposed amendment, beginning March, 1990, the minimum fees for permits and for reserved use of a site would be adjusted based on the change in the Implicit Price Deflator. These fees would be adjusted every 3 years using 1984 as a base year.

Summary of Public Comments

The Forest Service received 9 letters commenting on the proposed amendment; 2 letters from outfitter associations and 7 letters from individual outfitters. Comments from respondents and Agency response follow.

One respondent felt that adjusting fees based on a broad economic indicator rather than on conditions occurring in the outfitting industry is unfair. The Agency chose the Implicit Price Deflator Index as the most comprehensive and reliable economic indicator available and believes it is fair to apply a uniform index to all permittees. Outfitting industry conditions would be difficult, if not impossible, to quantify with any reliability due to the variety of outfitter business sizes, types of operation, seasonal nature of operations and variability of local economic conditions. Accordingly, the agency is retaining the Implicit Price Deflator Index as the basis for adjustment of fees in the final policy.

Most respondents opposed any fee increase. While adjustment of minimum fees will result in increases as long as inflation continues, the Agency is not increasing fees in real terms. The current minimum fees were established with full consultation and input from the outfitting industry in 1984 and continues to enjoy the support of the industry as a fair and equitable fee system. In order to keep the fees consistent with the 1984 policy and to reflect fair market value as required by law and regulation, the fees must be adjusted occasionally for inflation. Failure to adjust minimum fees for the effects of inflation would, over time, result in a government subsidy of outfitter and guide service not enjoyed by other permittees who pay fees for use of National Forest System lands and would clearly be inconsistent with Federal policy on fee charges.

One respondent suggested that fees should be adjusted when individual permits are renewed (which may be as infrequently as every five years) instead of every three years as the amendment reads. We disagree. To be fair to all permittees, the adjustment interval period must be independent of the permit renewal period so that the adjustment occurs for all permittees at the same time. The agency selected three years instead of a longer interval in order to avoid a large cumulative increase in fees. The Implicit Price Deflator Index would not change significantly enough over a shorter period than three years to warrant the time spent on more frequent adjustments.

Final Policy

Having considered the comments and suggestions received on the proposed policy, the Forest Service has concluded that the proposed policy should be adopted without change. The policy as it will be issued to Forest Service employes in the Forest Service Special Uses Handbook reads as follows:

Fee Calculation and Collection

Beginning with fees due after March 1990, adjust the minimum annual fee for outfitting/guiding use every 3 years based on the Implicit Price Deflator Index, using 1984 as a base year.

Fee for Site Reservation

Beginning with fees due after March 1990, adjust the minimum annual reservation fee for each site every 3 years based on the Implicit Price Deflator Index, using 1984 as a base year.

Dated: July 27, 1989.

George M. Leonard,

Associate Chief.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of Initiation of Countervailing Duty Administrative Reviews.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various countervailing duty orders. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: August 22, 1989.

FOR FURTHER INFORMATION CONTACT: Holly Kuga, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce ("the Department") has received timely requests, in accordance with § 355.22(a)(1) of the Department's regulations, for administrative reviews of various countervailing duty orders.

Initiation of Reviews

In accordance with § 355.22(c), of the Department's regulations, we are initiating administrative reviews of the following countervailing duty orders. We intend to issue the final results of these reviews no later than July 31, 1990.

Countervailing duty proceedings—	Periods to be reviewed
European Communities:	
Sugar C–406–046	1/1/88–12/31/88
Uruguay:	
Leather Wearing Apparel C–355–001	1/1/88–12/31/88

Antidumping Duty Proceedings and Firms

We received no requests for review of antidumping duty orders and findings with July anniversary dates.

Interested parties must submit applications for administrative protective orders in accordance with § 355.34(b) of the Department's regulations.

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and § 355.22(c) of the Commerce Department's countervailing duty regulations published in the **Federal Register** on December 27, 1988 (53 FR 52306) (to be codified at 19 CFR 355.22(c)).

Dated: August 14, 1989.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

[A–122–808]

Initiation of Antidumping Duty Investigation: Limousines From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce (the "Department"), we are initiating an antidumping duty investigation to determine whether imports of limousines from Canada are being, or are likely to be, sold in the United States at less than fair value. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of limousines from Canada materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before September 7, 1989. If that determination is affirmative, we will make a preliminary determination on or before January 2, 1990.

EFFECTIVE DATE: August 22, 1989.

FOR FURTHER INFORMATION CONTACT: Michael Ready or Louis Apple, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377–2613 or (202) 377–1769, respectively.

SUPPLEMENTARY INFORMATION:

The Petition

On July 24, 1989, we received a petition filed in proper form by Southampton Coachworks, Ltd. In compliance with the filing requirements of § 353.12 of the Department's revised regulations (54 FR 12772, March 28, 1989) (to be codified at 19 CFR 353.12), petitioner alleges that imports of limousines from Canada are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, the U.S. industry. Petitioner also alleges that critical circumstances exist with respect to this merchandise.

Petitioner has stated that it has standing to file the petition because it is an interested party, as defined under section 771(9)(E) of the Act, and because it has filed the petition on behalf of the U.S. industry producing the product that is subject to this investigation. If any interested party, as described under paragraphs (C), (D), (E), (F), or (G) of section 771(9) of the Act, wishes to register support for, or opposition to, this petition, please file written notification with the officials cited in the "**FOR FURTHER INFORMATION CONTACT**" section of this notice.

Under the Department's regulations, any producer or reseller seeking exclusion from a potential antidumping duty order must submit its request for exclusion within 30 days of the date of the publication of this notice. The procedures and requirements regarding the filing of such requests are contained in section 353.14 of the Department's regulations.

United States Price and Foreign Market Value

Petitioner based United States Price (USP) for limousines on a price list for U.S. distributors of limousines from Canada. Petitioner's Foreign Market Value (FMV) for limousines is based on a price list for Canadian distributors of

limousines. The margins put forth by petitioner range from 19.36 percent to 24.35 percent. Petitioner adjusted upward the USP to include delivery cost because the price list for Canadian distributors included the cost of delivery while the price list for U.S. distributors did not. However, because it is the Department's practice to use ex-factory prices in its fair value comparisons, we recalculated the margins to range from 21.14 percent to 25.20 percent.

Initiation of Investigation

Under section 732(c) of the Act, the Department must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of an antidumping duty investigation, and whether the petition contains information reasonably available to the petitioner supporting the allegations.

We examined the petition on limousines from Canada and found that the petition meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether imports of limousines from Canada are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination by January 2, 1990.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS subheadings. The HTS subheadings are provided for convenience and U.S. Customs Service purposes. The written description remains dispositive.

The products covered by this investigation are limousines, which are defined as extended wheelbase and expanded seating capacity motor vehicles principally designed for the transport of persons, of a cylinder capacity exceeding 1,500 cubic centimeters, and having spark-ignition internal combustion reciprocating piston engines of six or more cylinders (gasoline-engine powered). The vehicles are built on Lincoln Town Car, Mercury Grand Marquis, Cadillac Brougham or any other six or eight cylinder gasoline engine powered chassis. The vehicle is cut in half and the wheelbase is extended, thereby providing additional rear seating capacity, area and comforts. The sheet metal work is formed to complement the original design of the base car. The vehicles are used by private individuals, corporations and limousine services. Limousines are currently provided for under the following HTS subheadings: 8703.23.00.75, 8703.24.00.75 and 9802.00.50.40. Prior to January 1, 1989, limousines were classifiable under items 806.2040, 692.1015 and 692.1030 of the *Tariff Schedules of the United States Annotated* (TSUSA).

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonproprietary information. We will allow the ITC access to all privileged and business proprietary information in the Department's files, provided the ITC confirms in writing that it will not disclose such information either publicly or under administrative protective order without the written consent of the Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by September 7, 1989, whether there is a reasonable indication that imports of limousines from Canada materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will be terminated; otherwise, the investigation will proceed according to the statutory and regulatory time limits.

This notice is published pursuant to section 732(c)(2) of the Act.

Dated: August 14, 1989.

Lisa B. Barry,

Acting Assistant Secretary for Import Administration.

[FR Doc. 89–19637 Filed 8–21–89; 8:45 am]

BILLING CODE 3510-DS-M

[C–122–809]

Initiation of Countervailing Duty Investigation; Limousines From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether producers or exporters in Canada of limousines, as described in the "Scope of Investigation" section of this notice, receive benefits which constitute subsidies within the meaning of the countervailing duty law. We are notifying the U.S. International Trade Commission (ITC) of this action, so that it may determine whether imports of limousines from Canada materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, we will make our preliminary determination on or before October 17, 1989.

EFFECTIVE DATE: August 22, 1989.

FOR FURTHER INFORMATION CONTACT: Kay Halpern or Roy Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377–0192 and (202) 377–5414.

SUPPLEMENTARY INFORMATION:

The Petition

On July 24, 1989, we received a petition in proper form from Southampton Coachworks, Ltd., of Farmingdale, New York. This petition is filed on behalf of the U.S. industry producing limousines. In compliance with the filing requirements of section 355.12 of the Commerce Regulations (19 CFR 355.12), the petition alleges that producers and exporters of limousines in Canada receive subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act).

Since Canada is a "country under the Agreement" within the meaning of section 701(b) of the Act, title VII of the Act applies to this investigation, and the ITC is required to determine whether imports of the subject merchandise from Canada materially injure, or threaten material injury to, the U.S. industry.

Petitioner has alleged that it has standing to file the petition. Specifically, petitioner has alleged that it is an interested party as defined under section 771(9)(C) of the Act and that it has filed the petition on behalf of the U.S. industry producing the products that are subject to this investigation. If any interested party as described under paragraphs (C), (D), (E), or (F) of section 771(9) of the Act wishes to register support of or opposition to this petition, please file written notification with the

Commerce officials cited in the "**FOR FURTHER INFORMATION CONTACT**" section of this notice.

Initiation of Investigation

Under section 702(c) of the Act, we must make the determination on whether to initiate a countervailing duty proceeding within 20 days after a petition is filed. Section 702(b) of the Act requires the Department to initiate a countervailing duty proceeding whenever an interested party files a petition, on behalf of an industry, that (1) alleges the elements necessary for the imposition of a duty under section 701(a), and (2) is accompanied by information reasonably available to the petitioner supporting the allegations. We have examined the petition on limousines from Canada and have found that most of the programs alleged in the petition meet these requirements. Therefore, we are initiating a countervailing duty investigation to determine whether Canadian producers or exporters of limousines, as described in the "Scope of Investigation" section of this notice, receive subsidies. However, we are not initiating an investigation for certain programs because the petition failed to allege the elements necessary for the imposition of a duty or in some instances failed to provide the necessary supporting information. If our investigation proceeds normally, we will make our preliminary determination on or before October 17, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item number(s). The HTS item numbers are provided for convenience and U.S. Customs Service purposes. The written description remains dispositive.

The product covered by this investigation is limousines, which are defined as extended wheelbase and expanded seating capacity motor vehicles principally designed for the transport of persons, of a cylinder capacity exceeding 1,500 cubic centimeters, and having spark-ignition internal combustion reciprocating piston engines of six or more cylinders (gasoline-engine powered). The vehicles are built on Lincoln Town Car, Mercury Grand Marquis, Cadillac Brougham or any other six or eight cylinder gasoline engine powered chassis. The vehicle is cut in half and the wheelbase is extended, thereby providing additional rear seating capacity, area and comforts. The sheet metal work is formed to complement the original design of the base car. The vehicles are used by private individuals, corporations and limousine services. Limousines are currently provided for under the following HTS subheadings: 8703.23.00.75, 8703.24.00.75 and 9802.00.50.40. Prior to January 1, 1989, limousines were classifiable under items 806.2040, 692.1015 and 692.1030 of the *Tariff Schedules of the United States Annotated (TSUSA).*

Allegations of Subsidies

Petitioner lists a number of practices by the Government of Canada and the provincial governments of Ontario and Quebec which allegedly confer subsidies on producers or exporters of limousines. We are initiating an investigation of the following programs:

- Investment Tax Credits (ITCs) over and above the basic rate of seven percent
- Regional Development Incentive Program (RDIP) and Industrial and Regional Development Program IRDP)
- Loans under the Enterprise Development Program (EDP)
- Promotional Projects Program (PPP)
- Program for Export Market Development (PEMD)

We are not initiating an investigation of the programs listed below. Section 702(b) of the Act requires the Department to initiate a countervailing duty proceeding whenever an interested party files a petition on behalf of an industry that (1) alleges the elements necessary for the imposition of a duty under section 701(a), and (2) is accompanied by information reasonably available to the petitioner supporting the allegations. All the programs listed below were alleged to confer domestic subsidies. The elements which must be alleged for a domestic subsidy program are (1) specificity (*i.e.*, the program is limited to a specific enterprise or industry or group of enterprises or industries), and (2) provision of a countervailable benefit (*i.e.*, a subsidy paid or bestowed directly or indirectly on the manufacturer, producer or exporter of any class or kind of merchandise). For upstream subsidies, the initiation threshold is higher. Under section 701(e) of the Act, the Department must have reasonable grounds to believe or suspect that an upstream subsidy, as defined in section 771A of the Act, is being paid or bestowed upon merchandise under investigation. For the programs listed below, the requirements of section 702(b) or 701(e) of the Act were not fulfilled in the petition.

1. Provision of Subsidized Electric Energy by Hydro-Quebec

Petitioner alleges that a countervailable benefit is conferred on Canadian Limousine Manufacturers in the form of low-cost electric energy. Specifically, petitioner alleges that Hydro-Quebec, a provincially-owned power company, is being subsidized and that the subsidy passes through the limousine manufacturer's supplier of electricity, Ontario Hydro, to limousine manufacturers. Under section 701(e) of the Act, whenever the Department has reasonable grounds to believe or suspect that an upsteam subsidy is being paid or bestowed, the Department must investigate whether an upstream subsidy has in fact been paid or bestowed. The provisions of section 771A(a) of the Act define an upstream subsidy as:

> Any subsidy described in section 771(5)(B)(i), (ii), (iii), or (iv) by the government of a country that—(1) is paid or bestowed by that government with respect to a product (hereinafter referred to as an "input product") that is used in the manufacture or production in that country of merchandise which is the subject of a countervailing duty proceeding; (2) in the judgment of the administering authority bestows a competitive benefit on the merchandise; and (3) has a significant effect on the cost of manufacturing or producing the merchandise.

Because pettioner has not made a formal upstream subsidy allegation covering each of the elements listed above, we are not initiating on this program.

2. Other Investment Tax Credits

Petitioner alleges that a variety of investment tax credits provide a benefit to producers or exporters of limousines in Canada. As noted above, we are initiating an investigation on additional tax credits over and above the basic rate of seven percent, which are tied to certain regions of Canada. However, we are not initiating an investigation on the basic rate for investment in "qualified property," "certified property," and transportation and construction equipment. Petitioner argues that we must make a determination of whether the basic rate is limited to specific industries on a *de facto* basis. In *Final Affirmative Countervailing Duty Determination: Certain Fresh Atlantic Groundfish from Canada* (51 FR 10041,

March 24, 1986) (*Groundfish*), we determined that the basic rate of seven percent is not countervailable because it is not limited to a specific enterprise or industry or group of enterprises or industries. Absent the provision of new evidence, or an allegation of changed circumstances, we have no basis upon which to re-initiate an investigation of this type of investment tax credit.

3. EDP Loan Guarantees and Grants

Availability of loan guarantees and grants through the Enterprise Development Program was investigated in Groundfish. We determined that the provision of loan guarantees and grants under this program was not limited to a specific enterprise or industry or group of enterprises or industries. Absent the provision of new evidence, or an allegation of changed circumstances, we have no basis upon which to re-initiate an investigation of the provision of loan guarantees and grants under this program.

4. Federal Expansion and Development/Northern Ontario (FEDNOR)

FEDNOR is a federal economic development program which provides grants covering up to 35 percent of eligible capital costs. The program is targeted to promote the economy of northern Ontario. Petitioner provided no evidence to show that potential respondents are located in northern Ontario. Therefore, we are not initiating an investigation of this program.

The petitioner has alleged certain other subsidies. However, these allegations were not submitted in proper form. If allegations in proper form are submitted in the future, we will consider whether or not to include them in our investigation.

Allegation of Critical Circumstances

Petitioner alleges that critical circumstances exist with respect to imports of limousines from Canada. Petitioner claims that the products concerned benefit from export subsidies that are inconsistent with the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade, and that imports have been massive over a relatively short period. We will determine whether critical circumstances exist with respect to these imports in our preliminary and final determinations.

Notification of ITC

Section 702(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all non-privileged and non-proprietary information. We will also allow the ITC access to all privileged and business proprietary information in our files, provided it comfirms that it will not disclose such information, either publicly or under administrative protective order without the written consent of the Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by September 7, 1989, whether there is a reasonable indication that imports of limousines materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, this investigation will terminate; otherwise, this investigation will continue according to the statutory procedures. This notice is published pursuant to section 702(c)(2) of the Act.

Lisa B. Barry,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

ACTION: Notice of issuance of an Export Trade Certificate of Review, Application No. 89–00011.

SUMMARY: The Department of Commerce has issued an Export Trade Certificate of Review to Northwest Gourmet Foods, Inc. (NGF). This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: Douglas J. Aller, Director, Office of Export Trading Company Affairs, International Trade Administration, (202) 377–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing title III are found at 15 CFR part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a Certificate in the Federal Register. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Members (in addition to the applicant): Peter M.R. Fretwell.

Export Trade

1. *Products and Services.* All products and services.

2. *Export Trade Facilitation Services (as they relate to the export of Products and Services):* Consulting; financing; export licensing; shipping; transportation; taking title to goods; providing information on exporting mechanics to potential exporters; matching buyers with sellers; placing marine, casualty, war, and political risk insurance; coordinating the shipment of products; processing documentation; and providing market research.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

NGF, when conducting business under the name Northwest Gourmet Foods, Inc., or other registered business names, is certified to:

1. Enter into exclusive and non-exclusive agreements with individual Suppliers to act as the Supplier's export intermediary, whereby NGF may establish export prices, quantities, territories, and customer restrictions for Products and/or Services for the Export Markets. "Exclusive" means that NGF may agree not to represent any competitors of the Supplier without the Supplier's authorization, and the Supplier may agree not to otherwise sell, directly or indirectly, into Export Markets in which NGF serves the Supplier.

2. Enter into exclusive and/or non-exclusive agreements with Export Intermediaries. "Exclusive" means that NGF may agree to deal in Products and/or Services only through that Export Intermediary, and that Export Intermediary may agree not to represent anyone other than NGF in the sale of Products and/or Services.

3. Enter into exclusive and/or non-exclusive agreements with individual foreign buyers to act as their Purchasing Agent. "Exclusive" means that NGF may

agree to deal in Products and/or Services only through that individual foreign buyer, and that individual foreign buyer may agree not buy those Products and/or Services from anyone other than NGF.

4. Respond to sales opportunities in Export Markets by:

a. Contacting individual Suppliers of the Products and/or Services involved in the sales opportunity;

b. Inviting the Suppliers to provide independent price quotes for the Products and/or Services (to which NGF may add its own markup);

c. Entering into an agreement with individual Suppliers for which NGF submits a response to the sales opportunity;

d. Taking title to Products from Suppliers and shipping them to the buyer at NGF's quoted export price.

A copy of the certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Dated: August 15, 1989.

Douglas J. Aller,

Director, Office of Export Trading Company Affairs.

[FR Doc. 89–19760 Filed 8–21–89; 8:45 am]

BILLING CODE 3510-DR-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: August 23, 1989.

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–6828. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority. Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories in Group I and the Group II limit are being adjusted, variously, for swing, carryforward and recrediting of carryforward not used.

A description of the textile and apparel categories in terms of HTS numbers is available in the Correlation: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 50276, published on December 14, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 6, 1988 issued to you by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1989 and extends through December 31, 1989.

Effective on August 23, 1989, the directive of December 6, 1988 is amended further to adjust the limits for the following categories, as provided under the terms of the current bilateral textile agreement between the Governments of the United States and the People's Republic of China:

Category Levels	Adjusted twelve-month limit [1]
Group I	
237	1,348,468 dozen
239	2,477,329 kilograms
300/301	2,717,703 kilograms
333	41,757 dozen
335	333,775 dozen
347/348	2,131,079 dozen
Group II	
330, 332, 349, 353, 354, 359–0 [2], 431, 432, 439, 459, 630, 632, 633, 643, 644, 653, 654 and 659–0 [3] as a group.	109,486,034 square meters equivalent

[1] The limits have not been adjusted to account for any imports exported after December 31, 1988.

[2] In Category 359–0, all HTS numbers except 6103.42.2025, 6103.49.3034, 6104.62.1020, 6104.69.3010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010 in Category 359–C; and 6103.19.2030, 6103.19.4030, 6104.12.0040, 6104.19.2040, 6110.20.1022, 6110.20.1024, 6110.20.2030, 6110.20.2035, 6110.90.0044, 6110.90.0046, 6201.92.2010, 6202.92.2020, 6203.19.1030, 6203.19.4030, 6204.12.0040, 6204.19.3040, 6211.32.0070 and 6211.42.0070 in Category 359–V.

[3] In Category 659–0, all HTS numbers except 6103.23.0055, 6103.43.2020, 6103.49.2000, 6103.49.3038, 6104.63.1020, 6104.69.1000, 6104.69.3014, 6114.30.3040, 6114.30.3050, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.4015, 6211.33.0010, 6211.33.0017 and 6211.43.0010 in Category 659–C; 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5060, 6505.90.6060, 6505.90.7060 and 6505.90.8060 in Category 659–H; and 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020 in Category 659–S.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcement of Requests for Bilateral Consultations With the Government of Bangladesh on Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Products

August 15, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on categories on which consultations have been requested, call (202) 377–3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Article 3 of the Arrangement Regarding International Trade in Textiles.

On July 30, 1989, the Government of the United States requested consultations with the Government of Bangladesh regarding textile products in Categories 351/651 and 847, produced or manufactured in Bangladesh.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations with Bangladesh, the Committee for the Implementation of Textile Agreements may later establish limits for the entry and withdrawal from

warehouse for consumption of textile products in Categories 351/651 an 847, produced or manufactured in Bangladesh and exported during the twelve-month period which began on July 30, 1989 and extends through July 29, 1990, at levels of 206,298 dozen for Categories 351/651 and 228,956 dozen for Category 847.

Summary market statements concerning these categories follow this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Categories 351/651 and 847, or to comment on domestic production or availability of products included in these categories, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room H3100, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning Categories 351/651 and 847. Should such a solution be reached in consultations with the Government of Bangladesh, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the Correlation: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1989).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Bangladesh—Market Statement

Pajamas and Other Nightwear (Category 351/651)

July 20, 1989.

Summary and Conclusions

U.S. imports of pajamas and other nightwear (Category 351/651) from Bangladesh reached 206,298 dozen during the year ending April 1989, nearly 4 times the 56,988 dozen imported a year earlier. During the first four months of 1989, imports of pajamas and other nightwear (Category 351/651) from Bangladesh reached 59,608 dozen, almost 4 times the amount imported in the first four months of 1988. Imports from Bangladesh were 44,559 dozen in 1987 and 163,229 dozen in 1988.

The sharp and substantial increase in Category 351/651 imports from Bangladesh is disrupting the U.S. market for pajamas and other nightwear.

U.S. Production and Market Share

U.S. production of pajamas and other nightwear including infants has been on the decline since 1983, falling from 22,836,000 dozen in 1983 to 19,933,000 dozen in 1985, a 13 percent decline. U.S. production of pajamas and other nightwear declined from 17,078,000 dozen in 1986 to 14,093,000 dozen in 1988, a decline of 18 percent. The domestic manufacturers' share of the pajamas and other nightwear market dropped from 77 percent in 1986 to 71 percent in 1988.

U.S. Imports and Import Penetration

U.S. imports of pajamas and other nightwear (Category 351/651) more than doubled, increasing from 2,611,000 dozen in 1982 to 5,770,000 dozen in 1988. Imports continue to increase in 1989, up 12 percent in the first four months of 1989 over the same period in 1988. The ratio of imports to domestic production increased 10 percentage points in just two years, increasing from 31 percent in 1986 to 41 percent in 1988.

Duty-Paid Value and U.S. Producers' Price

Approximately 68 percent of Category 351/651 imports from Bangladesh during the first four months of 1989 entered under HTSUSA number 6207.21.0030—men's cotton nightshirts and pajamas, other than of yarn dyed fabric; 6207.22.0000—men's or boys' man-made fiber nightshirts and pajamas, other than of yarn dyed fabric; 6208.21.0020 women's cotton nightshirts and pajamas, other than of yarn dyed fabric. These nightshirts and pajamas entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable nightshirts and pajamas.

Bangladesh—Market Statement

Vegetable fiber, Other than Cotton, and Silk-Blend Trousers, Slacks and Shorts (Category 847)

July 28, 1989

Import Situation and Conclusion

U.S. imports of vegetable fiber (other than cotton) and silk-blend trousers, slacks and shorts (Category 847) from Bangladesh reached 228,956 dozen during the year ending April 1989, almost 6 times the 39,281 dozen imported a year earlier. During the first four months of 1989 imports of Category 847 from Bangladesh reached 159,455 dozen, over 7 times the 21,912 dozen imported during the same period in 1988 and almost double Bangladesh's imports for all of calendar year 1988.

Virtually all of the imports of trousers, slacks and shorts in Category 847 are of vegetable fiber, other than cotton, and compete directly with domestically produced cotton trousers, slacks and shorts (Category 347/348). The U.S. market for cotton trousers, slacks and shorts (Category 347/348) is being disrupted by imports.

Category 347/348 imports from Bangladesh have been under restraint since February 1, 1986. The sharp and substantial increase of Category 847 imports from Bangladesh is causing further disruption in the U.S. cotton trousers, slacks and shorts market.

Import Penetration and Market Share

U.S. production of cotton trousers, slacks and shorts (Category 347/348) fell 15 percent in 1988 to its lowest level in 13 years. The ratio of imports to production in Category 347/348 increased to 84 percent in 1988. The share of the cotton trousers, slacks and shorts market held by domestic manufacturers dropped to 54 percent in 1988.

U.S. imports of vegetable fiber, other than cotton, and silk-blend trousers, slacks and shorts (Category 847)—adjusted for 1987 overshipments—increased 38 percent from 1,653,741 dozen in 1987 to 2,287,800 dozen in 1988. When imports of the directly competitive Category 847 are included in the market analysis, the import to production ratio jumps to 94 percent and the domestic manufacturers' share of the market falls to 52 percent.

Duty-Paid Value and U.S. Producers Price

Approximately 95 percent of Category 847 imports from Bangladesh in the first four months of 1989 entered under HTS number: 6204.69.9040—women's and girls' trousers, breeches and shorts subject to other than cotton, wool or man-made fiber restraints. These trousers entered the U.S. at duty-paid landed values below U.S. producers' prices for directly competing cotton garments.

BILLING CODE 3510-DR-M

DEPARTMENT OF ENERGY

Procurement and Assistance Management Directorate; Determination of Noncompetitive Financial Assistance

AGENCY: Department of Energy (DOE).

ACTION: Notice.

SUMMARY: DOE announces that pursuant to 10 CFR 600.7(b)(2), it intends to renew on a noncompetitive basis a grant to the Council of Great Lakes Governors (CGLG) to organize and carry out a Regional Biomass Program in the Great Lakes Area of the Northern Tier States. The grant renewal will continue the project through August 31, 1990. The estimated amount is $290,000.

Procurement Request No.: 05-89OR21390.001.

Project Scope: This grant renewal is to continue a Regional Biomass Program in the Great Lakes Area of the Northern Tier States. The primary purpose is to implement biomass research and development, technology utilization, and technology transfer on a regional basis in the manner which will maximize the participation of the public and private sectors of each state. CGLC has the unique capability to equally represent all of the states in the Great Lakes subregion and involve the appropriate private and public interest groups in the states. CGLC is an existing, regionally organized consortium with background experience in management of similar activities. Eligibility for this award is, therefore, restricted to CGLG.

FOR FURTHER INFORMATION CONTACT: Lynda H. McLaren, Research Management Branch, Research & Laboratory, Waste Management Division, U.S. Department of Energy, Oak Ridge, TN 37831–8621 (615–576–1763).

Peter D. Dayton,

Director, Procurement and Contracts Division, Oak Ridge Operations.

Invention Available for License

The Department of Energy hereby announces that U.S. Patent No. 4,722,201, entitled "Acoustic Cooling Engine" is available for license, in accordance with 35 U.S.C. 207–209. For further information concerning licensing of the invention, please contact Robert J. Marchick, Office of the Assistant General Counsel for Patents, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

A copy of the U.S. patent may be obtained, for a modest fee, from the U.S. Patent and Trademark Office, Washington, DC 20231.

Issued in Washington, DC, on August 14, 1989.

Eric J. Fygi,

Acting General Counsel.

BILLING CODE 6450-01-M

Advisory Committee on Nuclear Facility Safety; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Advisory Committee on Nuclear Facility Safety.

Date & Time: Wednesday, September 6, 1989, 8:30 a.m. to 10:00 p.m.; Thursday, September 7, 1989, 8:30 a.m. to 3:00 p.m.

Place: U.S. Department of Energy, Savannah River Site—Main Entrance, Building 703–41A, Rainbow Conference Rooms, Aiken, South Carolina.

Contact: Wallace R. Kornack, Executive Director, ACNFS, S–2, 1000 Independence Avenue SW., Washington, D.C. 20585, Telephone: 202/586-1770.

Purpose of the Committee: The Committee was established to provide the Secretary of Energy with advice and recommendations concerning the safety of the Department's production and utilization facilities, as defined in section 11 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2014).

Tentative Agenda

September 6, 1989

8:30 a.m., Chairman John F. Ahearne Opens Meeting Review of Reactor Restart Plan
Noon: Lunch
1:00 p.m., Review of Reactor Restart Issues
5:30 p.m., Meeting Adjourned until 8:00 p.m.
8:00 p.m.–10:00 p.m., Public Comment Session

September 7, 1989

8:30 a.m., Status Report on Waste Isolation Pilot Plant Subcommittee Reports
Noon, Lunch
1:00 p.m., Review of Selected Technical Issues
3:00 p.m., Meeting Ends

Public Participation: This meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Wallace R. Kornack at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: The transcript of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room, IE–190, Forrestal Building, 1000 Independence Ave., SW., Washington, DC, between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on August 16, 1989.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

BILLING CODE 6717-01-M

[Project No. 943–025]

Public Utility District No. 1 of Chelan County, WA; Availability of Environmental Assessment

August 16, 1989.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing (OHL) has reviewed the proposal for constructing the Similkameen River fish rearing facility for the Rock Island Project in Okanogan County, Washington. This facility is part of the mitigation defined in the Rock Island settlement agreement that was adopted by order of the Commission dated January 18, 1989, for the Rock Island Project. The staff of OHL's Division of Project Compliance and Administration has prepared an environmental assessment (EA) for the proposed action. In the EA, staff concludes that approval of construction of the proposed fish rearing facility would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Determinations Under the Natural Gas Policy Act for OCS Leases

Issued: August 16, 1989.

On September 27, 1983, the Federal Energy Regulatory Commission (Commission) issued Order No. 336 under Docket Nos. RM83–3 and RM81–12 (48 FR 44,508 September 29, 1983). In that order, the Commission amended its regulations relating to filing requirements for well category applications under the Natural Gas Policy Act of 1978 (NGPA). The determination process for natural gas produced from a new lease, i.e., a lease entered into on or after April 20, 1977, on the Outer Continental Shelf (OCS), and qualifying as new natural gas under section 102 of the NGPA, was amended in two respects. First, the Commission eliminated the requirement that a determination be made for each well producing gas from a new OCS lease. Second, in lieu of filing an application for each well, the Commission now permits the grant of a new OCS lease to constitute the requisite jurisdictional agency determination that the gas is produced from a new OCS lease.

Under the revised procedures, the U.S. Department of Interior, Minerals Management Service (MSS), must file within 60 days of the grant of the lease notice of determination which includes the lease number, the area and block number, and the date on which the OCS lease was issued by the Secretary of the Interior. The determination is subject to Commission review in the same manner as other jurisdictional agency determinations.

On July 25, 1989, the Commission received notice from MMS, Central Gulf of Mexico, that 5321 leases were issued as a result of OCS sale 118 for the Central Gulf of Mexico on March 15, 1989. Gas produced from the following leases has been determined to be gas produced from a new OCS lease under NGPA section 102:

Effective Date 04–01–89 Lease Nos. OCS–GX

BILLING CODE 6717-01-M

[Docket No. CP89–1889–000]

ANR Pipeline Co.; Request Under Blanket Authorization

August 8, 1989.

Take notice that on August 1, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89–1889–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to transport natural gas for Chevron U.S.A., Inc. (Chevron), a marketer of natural gas, under ANR's blanket certificate issued in Docket No. CP88–532–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR proposes to transport on an interruptible basis up to 3,000 dt equivalent of natural gas on a peak day, 3,000 dt equivalent on an average day and 1,086,000 dt equivalent on an annual basis for Chevron. ANR states that it would perform the transportation service for Chevron under ANR's Rate Schedule ITS. ANR indicates that it would transport the gas from receipt points in Louisiana, Oklahoma, and the offshore Louisiana and Texas gathering areas, to delivery points located in Iowa.

It is explained that the service commenced June 1, 1988, under the automatic authorization provisions of Section 284.223 of the Commission's Regulations, as reported in Docket No. ST89-4149. ANR indicates that no new facilities would be necessary to provide the subject service.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP88-44-013 and RP85-58-026]

El Paso Natural Gas Co.; Compliance Filing

August 15, 1989.

Take notice that on August 10, 1989, El Paso Natural Gas Company ("El Paso") tendered for filing pursuant to part 154 of the Federal Energy Regulatory Commission's ("Commission") Regulations Under the Natural Gas Act, Fourth Revised Sheet No. 210, Fifth Revised Sheet No. 212, Fifth Revised Sheet No. 213, and Second Revised Sheet No. 214, for inclusion in its FERC Gas Tariff, First Revised Sheet No. 1, in compliance with the Commission's order issued July 11, 1989 at Docket Nos. RP88-44-005 and RP85-58-018.

El Paso states that in compliance with the July 11, 1989 order, El Paso is submitting the tariff sheets to reinstate the 10,000,000 dth per year minimum annual purchase volume requirement in Rate Schedule ABD-L which will consequently return Gas Company of New Mexico ("GCNM") to Rate Schedule ABD-S since GCNM purchases less then 10,000,000 dth from El Paso annually. In connection therewith, El Paso also filed tariff sheets eliminating GCNM's Billing Determinants from Rate Schedule ABD-L.

El Paso respectfully requests, pursuant to § 154.51 of the Commission's Regulations, that waiver of the notice requirements of § 154.22 of the Commission's Regulations be granted, to the extent necessary, so as to permit the tendered tariff sheets to become effective July 1, 1988, the same date El Paso initially revised Rate Schedule ABD-L.

Copies of the filing were served upon all interstate pipeline system sales customers of El Paso and interested state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before August 22, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 8121-003]

Warren B. Nelson; Withdrawal of Intervention and Dismissal of Appeal

August 14, 1989.

By order issued November 18, 1988,[1] the Director, Office of Hydropower Licensing (Director), issued a license to Warren B. Nelson for the Deer Creek Project No. 8121. On December 19, 1988, Idaho Power Company (Idaho Power) filed a timely appeal of the Director's order.

Idaho Power contends in its appeal that the conclusion that the power to be produced by this project is needed is erroneous. However, on January 24, 1989, the United States Court of Appeals for the District of Columbia Circuit rejected similar arguments regarding need for power from a licensed project raised by Idaho Power in another proceeding involving a project in Idaho.[2] On April 24, 1989 Idaho Power filed a notice of withdrawal of its motion to intervene in the Project No. 8121 proceedings, stating that the issue it had raised in these proceedings had been resolved by the above-referenced court opinion and that, in light of the opinion, Idaho Power's intervention in the Project No. 8121 proceedings was no longer appropriate.

Pursuant to Rule 216(b) of the Commission's Rules of Practice and Procedure,[3] the withdrawl of any pleading is effective 15 days after notice of the withdrawal is filed, unless the withdrawal is opposed or the decisional authority disallows the withdrawal. No objections to Idaho Power's withdrawal were filed within 15 days of the filing date of the withdrawal. Conseauently, Idaho Power's withdrawal of intervention became effective on May 10, 1989.

Since Idaho Power is no longer an intervenor in or a party to the proceedings in Project No. 8121, its appeal in these proceedings are accordingly dismissed.

Lois D. Cashell,

Secretary.

[Docket No. RP89-33-000]

Northern Border Pipeline Co.; Informal Technical Conference

August 15, 1989.

Take notice that at 10:00 a.m. on September 6, 1989, there will be an informal technical conference in the above-captioned cause in the offices of the Commission, 810 1st Street, NE., Washington, DC 20426. It is the intent of the parties to discuss at this time any outstanding discovery requests, the general status of the proceeding, and any future procedures thought necessary. All parties may at their option attend, but mere attendance will not serve to make one a party to the proceeding. A person must formally apply for party status pursuant to the Commission's Regulations.

Lois D. Cashell,

Secretary.

[Docket No. CP89-1849-000]

Northern Natural Gas Co., Division of Enron Corp.; Request Under Blanket Authorization

July 31, 1989.

Take notice that on July 21, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP89-1849-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to realign certain volumes to accommodate natural gas deliveries for Peoples Natural Gas, Division of Utilicorp United Inc. (Peoples), under the blanket certificate issued in Docket No. CP82-401-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern proposes to realign certain CD-1 entitlement volumes among existing delivery points at communities to be served by Peoples. Northern further stated that it is proposing, at People's request, to increase firm entitlements for six communities served by Peoples and to decrease firm entitlements for three communities served by Peoples. Northern advises that the proposed realignment of entitlements would not affect the total level of firm sales service provided by Northern to Peoples. Attached hereto is an appendix A which reflects the proposed change in entitlements.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA89-8-000]

Ozona Residue Systems Co.; Petition for Adjustment

August 15, 1989.

Take notice that on April 27, 1989, Ozona Residue Systems Company (Ozona) filed with the Federal Energy Regulatory Commission a petition for adjustment under Rule 1104 of the Commission's rules of practice and procedure and section 502(c) of the Natural Gas Policy Act of 1978 NGPA requesting, alternatively, (a) an order finding that Ozona is engaged solely in "gathering" and is therefore not subject to the Commission's Natural Gas Act jurisdiction; (b) approval of Ozona's proposed tariff on the grounds that the rate complies with §§ 284.123(b)(1)(ii) of the Commission's regulations; or (c) an adjustment allowing Ozona to use its proposed tariff for NGPA Section 311 transportation to avoid alleged special hardship and inequity.

The procedures applicable to the conduct of this adjustment proceeding are found in subpart K of the Commission's rules of practice and procedure. Any person desiring to participate in this adjustment proceeding must file a motion to intervene in accordance with the provisions of subpart K. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register.**

BILLING CODE 6717-01-M

[Docket No. FA86-83-002]

Public Service Company of Colorado; Filing

August 14, 1989.

Take notice that on July 24, 1989, Public Service Company of Colorado (PSC) tendered for filing its compliance report in compliance with the Settlement Agreement filed in this docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before August 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP88-68-000 et al.

Transcontinental Gas Pipe Line Corp.; Offers of Settlement and Notice Granting Shortened Comment Period

August 14, 1989.

In the matter of Docket Nos. RP88-68-000, RP87-7-012, RP87-7-000, RP89-122-000, RP89-123-000, RP89-163-000, TA88-1-29-000, TA88-4-29-000, TQ88-1-29-000, TA88-5-29-000, TQ89-1-29-000, TQ-2-29-000, TQ89-4-29-000, TA89-1-29-000, CP89-1915-000, CP89-1916-000, CP74-33-013, CP84-335-022, CP61-194-000, CP63-228-000, G-2432-000.

Take notice that on August 11, 1989, Transcontinental Gas Pipe Line Corporation (Transco) filed an Offer of Settlement in the captioned proceedings which is applicable to Transco's Rate Schedules G and OG customers, which are Signatory Parties to the Offer of Settlement. This Offer of Settlement generally tracks the comprehensive August 7, 1989 Offer of Settlement filed in these dockets by Transco and most of its larger customers. However, in addition, this Offer of Settlement includes a rate modification which Transco states is required by the historic rate design for Transco's smaller customers.

On August 11, 1989, Transco and National Fuel Gas Supply Corporation (National Fuel) filed an Offer of Settlement with the following major elements:

(1) Article I incorporates the terms and conditions of the August 7 Offer of Settlement except as modified by the terms of the revised Offer of Settlement;

(2) Article II provides that National Fuel elects to become a Settling Party as to Transco's Order No. 500 filings;

(3) Article III provides that National Fuel will permanently convert 100 percent of its firm sales service with Transco to long-term Rate Schedule FT firm transportation service;

(4) Article IV provides that the Commission shall approve the flow-through of all transportation rates and charges billed to National Fuel pursuant to the revised Offer of Settlement.

Transco states that the two Offers of Settlement, together with all attachments thereto, have been served pursuant to Rule 602(d)(1) upon all participants listed on the offical service lists in the captioned proceedings on file with the Commission, and upon all persons who were required to be served with Transco's rate filings which initiated several of the captioned proceedings.

Any persons not already parties to these proceedings which desire to file comments regarding the Offers of Settlement and the certificate authorizations sought in connection with the Offers of Settlement should, on or before August 21, 1989, file such comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 602(f)), together with a motion to intervene in accordance with the requirements of the Commission's Regulations under the Natural Gas Act (18 CFR 157,10 and 385.214).

In order to coordinate the procedural schedule for comments on the Offers of Settlement with the schedule previously established concerning comments on the August 7, 1989 settlement, and with the date for motions to intervene established above, initial comments on the Offers of Settlement should be filed on or before August 21, 1989, and reply comments should be filed on or before August 28, 1989.

Office of Fossil Energy

[FE Docket No. 89-28-NG]

Western Energy, Inc.; Order Granting Blanket Authorization To Export Natural Gas to Mexico

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of an order granting blanket authorization to export natural gas to Mexico.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it has issued an order granting Western Energy, Inc. (WEI), blanket authorization to export natural gas from the United States to Mexico. The order issued in FE Docket No. 89-28-NG authorizes WEI to export up to 54.75 Bcf of gas for short-term and spot market sales over a two-year period beginning on the date of the first delivery.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on August 14, 1989.

Constance L. Buckley,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

Agency Information Collection Activities Under Office of Management and Budget Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 US.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATE: Comments must be submitted on or before September 21, 1989.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: TSCA Inspection-Related Forms (EPA ICR #0163.03; OMB #2070-0007). This is a request for reinstatement of a previously approved collection.

Abstract: To verify compliance with the Toxic Substance Control Act, section 11 authorizes EPA to inspect establishments used to manufacture, process, or store chemicals. EPA uses various forms, which are the subject of this collection request, to ensure that the Agency conducts inspections legally.

Burden Statement: The public reporting burden for this collection of information is estimated to vary from 5 to 30 minutes per response. This estimate included the time for reviewing instructions, and completing and reviewing the collection of information.

Respondents: Chemical manufacturers, processors, and storers.

Estimated No. of Respondents: 5700.

Estimated Total Annual Burden on Respondents: 1754 hours.

Frequency of Collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223), 401 M Street SW., Washington, DC 20460,

and,

Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place NW., Washington, DC. 20530.

Dated: August 10, 1989

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATE: Comments must be submitted on or before September 21, 1989.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202-382-2740).

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: NSPS for Steel Plants: Electric Arc Furnaces and Argon-Oxygen Decarburazation Vessels (Subpart AA and AAa). Information requirements. (EPA ICR No. 1060.05; OMB No. 2060-0038). (This is a reinstatement of a previously approved ICR).

Abstract: Sources must notify EPA of construction, modification, start-up, shutdown, malfunction, date and results of initial performance test. Owners/operators of affected facilities must install a continuous monitoring device to measure opacity, keep records of flow rate data and pressure data, and submit quarterly or semiannual reports of excess opacity, high fan motor amperage, and low flow rates. Electric Arc Furnaces subject to Subpart AA must also keep daily records of time and duration of each tap and charge. EPA uses these data to ensure compliance.

Burden Statement: The estimated average public burden for this collection of information is 25 hours for reporting and 310 hours for recordkeeping per respondent. This estimate includes all aspects of the information collection including time for reviewing instructions, and gathering and maintaining the data needed.

Respondents: Owners of steel plants/Operators of electric arc furnaces.

Estimated No. of Respondents: 48.

Estimated Total Annual Burden on Respondents: 17,333 hours.

Frequency of Collection: Semiannually.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch, 401 M Street, SW., Washington, DC 20460,

and,

Nicolas Garcia, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place SW., Washington, DC 20503 (Telephone (202) 395-3084).

Dated: August 9, 1989.

Paul Lapsley,

Director, Information and Regulatory Systems Division.

Agency Information Collection Activities Under Office of Management and Budget Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATE: Comments must be submitted on or before September 21, 1989.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: Monitoring Potential Arsenic Exposure Levels in Wood Treatment Plants (EPA ICR #1289.02; OMB #2070-0081). This submission requests reinstatement for a previously approved collection.

Abstract: According to the provisions of a final EPA position document, facilities that use inorganic arsenic to pressure treat wood must either monitor work areas for airborne concentrations of inorganic arsenic or provide employees with respirators. In addition, facilities must maintain records of monitoring results and submit them annually to EPA. The Agency uses these records to evaluate the effectiveness of the monitoring program and for enforcement purposes.

Burden Statement: The public reporting burden for this collection of information is estimated to average 50 minutes per response for non-monitoring plants and to vary from 17 to 19 hours per response for those who must monitor. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Arsenical wood treatment plants.

Estimated No. of Respondents: 165.

Estimated Total Annual Burden on Respondents: 578 hours.

Frequency of Collection: Annually.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223), 401 M Street, SW., Washington, DC 20460

and,

Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place, NW., Washington, DC 20530.

OMB Responses to Agency PRA Clearance Requests

EPA ICR # 1502.01; EPA's Asbestos-Related Supplement to the Department of Energy's Commercial Buildings Energy Consumption Survey; was appproved 07/12/89; OMB # 2070–0104; expires 10/12/89.

Dated: August 10, 1989.

Paul Lapsley,

Director, Information and Regulatory Systems Division.

[FRL-3631-8]

Decisions Pursuant to the Clean Water Act

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of availability of decisions and notice of opportunity for public comment and petition.

SUMMARY: EPA, Region IX, has issued its decisions on the lists of waters, point sources, and pollutants submitted by the State of Arizona pursuant to section 304(1). Copies of these decisions can be obtained from the contract person identified below. EPA is accepting comments from the public on its proposals to modify the lists submitted by Arizona, and is accepting petitions from the public to list additional waters.

ADDRESS: Comments and petitions should be mailed to the following address: Ken Greenberg (W–5–1), Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, CA 94105.

FOR FURTHER INFORMATION CONTACT: Ken Greenberg at the address given above, or by telephone at (415) 974–9748.

SUPPLEMENTARY INFORMATION: Section 304(1) of the Clean Water Act as amended by the Water Quality Act of 1987 requires every State to develop lists of impaired waters, identify certain point sources and amounts of pollutants causing toxic impact, and to develop individual control strategies for each point source.

EPA is proposing to modify the lists of waters, sources, and pollutants submitted by Arizona. EPA is requesting comments from the public on these proposed additions and deletions. Comments are due by December 29, 1989, and should be sent to the address given above.

Pursuant to section 304(1)(3), EPA is accepting petitions from the public to make further additions to waters listed under section 304(1). Petitions must be received no later than December 29, 1989, and should be addressed to Harry Seraydarian, Director, Water Management Division, EPA, Region IX, 215 Fremont Street, San Francisco, CA 94105. A copy of the petition should also be sent to the contact person named above. The petition should identify and describe the water proposed to be listed with sufficient detail so that EPA is able to determine the location and boundaries of the water. The petition must also identify the list or lists for which the waterbody qualifies, and contain supporting information or data to show that the water satisfies the criteria for listing.

The records documenting EPA's decisions regarding the submittal from the State of Arizona are on file and may be inspected at the EPA, Region IX, office between the hours of 9 a.m. and 4 p.m., Monday through Friday except holidays. To make arrangements to examine these records, contact the person named above.

Following the close of the comment period, EPA will consider the comments and petitions received and will provide a written response no later than June 4, 1990. This response to comments will be made available to the public in the same manner as today's notice.

Arizona did not submit any individual control strategies. Therefore, EPA will prepare the required individual control strategies, in cooperation with the State of Arizona, after EPA has taken final action on the lists.

Dated: August 7, 1989.

Keith Takata,

Acting Director, Water Management Division.

BILLING CODE 6560-50-M

[FRL-3633-8]

Public Water Supply Supervision Program; Program Revision for the State of South Carolina

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that the State of South Carolina is revising its approved State Public Water Supply Supervision Primary Program. South Carolina has adopted (1) drinking water regulations for eight volatile organic chemicals that correspond to the National Primary Drinking Water Regulations for eight volatile organic chemicals promulgated by EPA on July 8, 1987 (52 FR 25690) and (2) public notice regulations that correspond to the revised EPA public notice requirements promulgated on October 28, 1987 (52 FR 41534). EPA has determined that these two sets of State program revisions are no less stringent than the corresponding Federal regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

All interested parties are invited to request a public hearing. A request for a public hearing must be submitted September 21, 1989 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made September 21, 1989, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective September 21, 1989.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing. (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing. (3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Office of Environmental Quality Control, Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201; and

Regional Administrator, Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365.

FOR FURTHER INFORMATION CONTACT: Carla E. Pierce, EPA, Region IV, Drinking Water Section at the Atlanta address given above; telephone 404/347–2913, (FTS) 257–2913.

(Sec. 1413 of the Safe Drinking Water Act, as amended, (1986); and 40 CFR 142.10 of the National Primary Drinking Water Regulations)

Dated: August 14, 1989.

Lee A. Dehihns III,

Acting Regional Administrator.

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of thse issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

3. If there is any non-standardized issue in this proceeding, the full text of the issue and the applicants to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M Street NW., Washington, DC 20037. (Telephone (202) 857–3800).

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

Appendix I (Roswell, Georgia)

1. To determine whether Sonrise Management Services, Inc. is an undisclosed party to the application of D (JBI).

2. To determine whether D (JBI's) organizational structure is a sham.

3. To determine whether D (JBI) violated Section 1.65 of the Commission's Rules, and/or lacked candor, by failing to timely report the designation of character issues against other applicants in which one or more of its partners has an ownership interest and/or the dismissal of such ownership interest and/or the dismissal of such applications with unresolved character issues pending.

4. To determine, from the evidence adduced pursuant to Issues 1 through 3 above, whether D (JBI) possesses the basic qualifications to be a licensee of the facilities sought herein.

Appendix II (Wichita Falls, TX)

1. To determine whether Sonrise Management Services, Inc. is an undisclosed party to the application of C (Wrangler).

2. To determine whether C (Wrangler's) organizational structure is a sham.

3. To determine whether C (Wrangler) violated Section 1.65 of the Commission's Rules, and/or lacked candor, by failing to report the designation of character issues against other applicants in which one or more of its partners has an ownership interest and/or the dismissal of such ownership interest and/or the dismissal of such applications with unresolved character issues pending.

4. To determine, from the evidence adduced pursuant to Issues 1 through 3 above, whether C (Wrangler) possesses the basic qualifications to be a licensee of the facilities sought herein.

Appendix III (Richmond Hill, GA)

Additional Issue Paragraphs

1. To determine whether Sonrise Management Services, Inc. is an undisclosed party to the application of D (Georgia).

2. To determine whether D's (Georgia) organizational structure is a sham.

3. To determine whether D (Georgia) violated Section 1.65 of the Commission's Rules, and/or lacked candor by failing to report the designation of character issues against other applicants in which one or more of its partners has an ownership interest.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Gulfway and EMC/JSS Cross Space Charter & Sailing Agreement; Filing

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–011141–008.

Title: Gulfway.

Parties: Lykes Bros. Steamship Co., Inc., Hapag Lloyd AG, Sea-Land Service, Inc., P&O Containers (TFL) Ltd., Deppe Linie GMBH, Gulf Container Line (GCL), BV Compagnie Generale Maritime (CGM), Nedlloyd Lijnen BV South Atlantic Cargo Shipping, N.V. Euro-Gulf International, Inc.

Synopsis: The proposed modification would clarify the parties' ability to discuss and agree upon their separate service contracts in the Agreement trade. It does not authorize joint service contracts and adherence to any agreement reached would be voluntary.

Agreement No.: 232–011204–001.

Title: EMC/JSS Cross Space Charter & Sailing Agreement.

Parties: Evergreen Merchant Marine Corporation (Taiwan) Ltd., Johnson Scanstar ("JSS").

Synopsis: The proposed modification would reduce the minimum space allocated to JSS on each sailing.

By Order of the Federal Maritime Commission.

Dated: August 16, 1989.

Joseph C. Polking,

Secretary.

[FR Doc. 89–19686 Filed 8–21–89; 8:45 am]

BILLING CODE 6730-01-M

Port of Portland and City of Long Beach; Terminal Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200275.

Title: Port of Portland Terminal Agreement.

Parties: Port of Portland (Port) Nippon Yusen Kaisha, Ltd. (NYK).

Synopsis: The Agreement provides NYK preferential use of a container yard (approx. 10 acres), a vessel berth and two container cranes located at Terminal 6, Port of Portland. The Port will perform all terminal stevedoring and other services required in the movement of containers and cargo on or over the premises. In consideration, NYK will use Terminal 6 for a minimum of 17 vessel calls per year for its Far East Express Service and guarantees the Port a minimum throughput of 18,000 containers in any of their Pacific Northwest services. Also, in lieu of the Port's Tariff rates for wharfage and dockage, NYK will pay the Port specific per container wharfage and dockage rates based on its volume at Terminal 6.

Agreement No.: 224–010736–003.

Title: City of Long Beach Terminal Agreement.

Parties: City of Long Beach (City), Long Beach Container Terminal, Inc. (LBCT).

Synopsis: The agreement amends the basic agreement (Agree No. 224–010736). The City assigns to LBCT: an exclusive preferential assignment of an office building at Berth 640, Pier A; and, a nonexclusive preferential assignment of the remainder of the terminal areas at Berths 3–4 and Berths 6–10, Pier A. The Agreement also provides for a new compensation formula and describes the improvements to be made by the City to the areas assigned.

By Order of the Federal Maritime Commission.

Dated: August 16, 1989.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing of the Federal Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than September 5, 1989.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Mr. Ulysses G. Auger,* Washington, DC; to acquire up to 15 percent of each class of common stock of James Madison Limited, Washington, DC, and thereby indirectly acquire Madison National Bank, Washington, DC; United National Bank of Washington, Washington, DC; Madison Bank of Maryland, Silver Spring, Maryland; and Madison National Bank of Virginia, McLean, Virginia.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *William G. Barron,* Owensboro, Kentucky; to acquire 14.07 percent of the voting shares of Indiana United Bancorp, Greensburg, Indiana, and thereby indirectly acquire The Peoples Bank, Portland, Indiana, and Union Bank and Trust Co., Greensburg, Indiana.

C. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *River Valley Bancshares, Inc. Employee Stock Ownership Trust,* Lewistown, Missouri; to acquire 24.25 percent of the voting shares of River Valley Bancshares, Inc., Lewistown, Missouri, and thereby indirectly acquire Lewistown State Bank, Lewistown, Missouri.

D. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Gail K. Mathisen,* Chanhassen, Minnesota; to acquire an additional 40.95 percent of the voting shares of St. James Bancorp, Inc., Chanhassen, Minnesota, as the result of a stock redemption, and thereby indirectly acquire Citizens State Bank of St. James, St. James, Minnesota, and Jackson State Bank, Minnesota.

2. *John C. Mithun,* Wayzata, Minnesota, to acquire 13.23 percent; Lewis M. Mithun, Wayzata, Minnesota, to acquire 26.46 percent; and Raymond O. Mithun, Jr., Wayzata, Minnesota, to acquire 26.46 percent of the voting shares of R.O.M. Financial Services, Inc., Wayzata, Minnesota, and thereby indirectly acquire State Bank of Chanhassen, Chanhassen, Minnesota.

E. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Willie E. Bewer,* Bowie, Texas; to acquire 100 percent of the voting shares of Ryan Bancshares, Inc., Ryan, Oklahoma, and thereby indirectly acquire First State Bank, Ryan, Oklahoma.

F. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Charles R. Wiggins,* Liberty, Texas, and Hillary G. Wiggins, Liberty, Texas; to each acquire 29.19 percent of the voting shares of First Liberty National Bancshares, Inc., Liberty, Texas, and thereby indirectly acquire First liberty National Bank, Liberty, Texas.

G. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Bay Commercial Services Employee Stock Ownership Plan,* San Leandro, California; to acquire 2.61 percent of the voting shares of Bay Commercial Services, San Leandro, California, and thereby indirectly acquire Bay Bank of Commerce, San Leandro, California.

Board of Governors of the Federal Reserve System, August 16, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Center Banks Inc., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than September 8, 1989.

A. **Federal Reserve Bank of New York** (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Center Banks Incorporated,* Skaneateles, New York; to become a bank holding company by acquiring 100 percent of the voting shares of Skaneateles Savings Bank, Skaneateles, New York.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Alliance Bancorporation and Trimpe's Inc.,* Lisbon, Iowa; to become a bank holding company by acquiring 100 percent of the voting shares of Lisbon Bank and Trust Company, Lisbon, Iowa.

2. *Peoples Financial Corp. of Illinois, Inc.,* Kewanee, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of Peoples National Bank of Kewanee, Kewanee, Illinois.

3. *Prairie State Bancorp, Inc.,* Danforth, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of Farmers State Bank of Danforth, Danforth, Illinois.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Blue Valley Ban Corp,* Leawood, Kansas; to become a bank holding company by acquiring 100 percent of the voting shares of Bank of Blue Valley, Overland Park, Kansas.

2. *H. Pat Henson Company,* Maysville, Oklahoma; to acquire 90.8 percent of the voting shares of Peoples State Bank, Blair, Oklahoma, which engages in the sale of life and accident and health insurance directly related to credit extended by Peoples State Bank.

D. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *East Texas Financial Corporation,* Kilgore, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens Bank, Kilgore, Texas.

Board of Governors of the Federal Reserve System, August 16, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

FEDERAL TRADE COMMISSION

[Docket No. 9214]

Lee M. Mabee, Jr., M.D.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Sioux Falls, S.D. physician from conspiring to interfere with the operation of the Medical School's OB/GYN department or faculty, or from preventing or restricting competition in the provision of OB/GYN care in the Sioux Falls, S.D., area.

DATE: Comments must be received on or before October 23, 1989.

ADDRESS: Comments should be directed to: FTC/Office of the Secretary, Room 159, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Michael McNeely, FTC/S–3308, Washington, DC 20580. (202) 326–2904.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's Rules of Practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period

BEST COPY AVAILABLE

of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

The agreement herein, by Lee M. Mabee, Jr., M.D., hereafter referred to as Respondent, and Counsel for the Federal Trade Commission, is entered into in accordance with the Commission's Rule governing consent order procedures. In accordance therewith the parties hereby agree that:

1. Respondent is a licensed physician and doing business under and by virtue of the laws of the State of South Dakota, with his office and principal place of business located at the address listed in the complaint attached hereto.

2. Respondent has been served with a copy of the complaint issued by the Federal Trade Commission charging him with a violation of Section 5 of the Federal Trade Commission Act and has filed an answer to the complaint denying the charges.

3. Respondent admits all the jurisdictional facts set forth in the complaint attached hereto.

4. Respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the Order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

5. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it will be placed on the public record for a period of sixty days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify Respondent, in which event it will take such action as it may consider appropriate, or issue and serve its decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and, except to the extent described in Paragraph Three of this agreement, does not constitute an admission by Respondent that the facts as alleged in the complaint are true or that the law has been violated as alleged in the complaint.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to Respondent, (1) issue its decision containing the following Order to cease and desist in disposition of this proceeding, and (2) make information public in respect thereto. When so entered, the Order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The Order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to Order to the address of the Respondent as stated in the complaint shall constitute service. Respondent waives any right he may have to any other manner of service. The complaint may be used in construing the terms of the Order, and no agreement, understanding, representation, or interpretation not contained in the Order or the agreement may be used to vary or contradict the terms of the Order.

8. Respondent has read the complaint and Order contemplated hereby. He understands that when the Order has been issued, he will be required to file one or more compliance reports showing he has fully complied with the Order. Respondent further understands he may be liable for civil penalties in the amount provided by law for each violation of the Order after it becomes final.

Order

I

For purposes of this Order, the following definitions shall apply:

A. "Respondent" means Lee M. Mabee, Jr., M.D.

B. "Medical School" means University of South Dakota School of Medicine.

C. "OB/GYN Center" means any medical facility or program established to provide obstetrical or gynecological care, research or education.

II

It is ordered, That the Respondent shall forthwith, directly, indirectly, or through any corporate or other device, in connection with the provision of health care services in or affecting commerce, as "commerce" is defined in section 4 of the Federal Trade Commission Act, as amended, cease and desist from entering into, attempting to enter into, organizing, continuing or acting in furtherance of any agreement or combination, either express or implied, with any physician(s), to refuse or threaten to refuse to deal with, or otherwise coerce, any person or entity for the purpose or with the effect of interfering with the operation of the academic or clinical programs of the Medical School's obstetrical/gynecological ("OB/GYN") department or faculty, or of preventing or restricting competition from any person or entity for the provision of OB/GYN care in the Sioux Falls, South Dakota, area, including but not limited to any agreement or combination to:

(1) Refuse or threaten to refuse to serve on the faculty of the Medical School;

(2) Make joint demands or joint decisions as to any term or condition for serving on the faculty of the Medical School;

(3) Refuse, or threaten to refuse, to refer patients to, receive referrals of patients from or provide any other form of professional cooperation to, any physician, based on his or her affiliation or prospective affiliation with the Medical School, or with any OB/GYN center, or on his or her treatment of, or attempts to attract, private patients;

(4) Interfere in a coercive manner with any attempt by the Medical School to recruit physicians to work in the Sioux Falls area, or to negotiate jointly with the Medical School concerning any term or condition with respect to its recruitment or hiring of such physicians;

(5) Refuse or threaten to refuse to admit patients to any hospital or other medical facility, based on the relationship of the hospital or facility with the Medical School, or based on the actual or prospective operation or funding, in whole or part, of any OB/GYN center by the hospital or facility; or

(6) Coerce the Medical School, any physician, or any other entity to eliminate, limit or restrict advertising for OB/GYN services in the Sioux Falls area.

Provided that nothing in this Order shall prohibit Respondent from entering into an agreement or combination with any physician with whom Respondent practices medicine in partnership or in a professional corporation, or who is employed by the same person as Respondent.

III

It is further ordered, That:

A. Respondent shall, within thirty (30) days after this Order becomes final, mail a copy of this Order and of the complaint in this proceeding to the Administrator, the Chairman of the Board of Directors, and the chief officer of the medical staff of Sioux Valley Medical Center and McKennan Hospital, in Sioux Falls.

B. Respondent shall, within sixty (60) days after service of this Order, and at any time the Commission, by written notice, may require, file with the Commission a report, in writing, setting forth in detail the manner and form in which Respondent has complied with this Order.

C. If Respondent, at any time, discontinues his present business or employment, he shall promptly notify the Commission of such discontinuance. In addition, for a period of seven (7) years after this Order becomes final, Respondent shall promptly notify the Commission whenever he enters into any new business or employment whose activities involve the provision of OB/GYN services in the Sioux Falls area. Each such notice shall include Respondent's new business address and a statement of the nature of the business or employment in which Respondent is newly engaged as well as a description of Respondent's duties and responsibilities in connection with the business or employment. The expiration of the notice provision of this paragraph shall not affect any other obligation arising under this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from a physician practicing in Sioux Falls, South Dakota. The agreement would settle charges by the Commission that the physician, along with eleven other physicians in Sioux Falls, violated section 5 of the Federal Trade Commission Act by, among other things, concertedly refusing to teach residents in the University of South Dakota School of Medicine's (the "Medical School") residency program in obstetrics and gynecology in order to force the Medical School to limit the provision of obstetrical/gynecological care by members of its full-time faculty in competition with the physician. The other eleven physicians have previously signed a consent agreement with the Commission in *Certain Sioux Falls Obstetricians*, C–3241 (Oct. 11, 1988).

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

The Commission issued a complaint against Dr. Mabee on July 20, 1988. According to the complaint, the Medical School operates an obstetrics/gynecology ("OB/GYN") residency program in Sioux Falls and other locations in South Dakota. The Medical School has a full-time faculty of physicians employed by the school, including several physicians specializing in OB/GYN. In addition to teaching and conducting research, the full-time faculty engages in the practice of medicine through the Medical School's practice plan. The school depends to a large extent on a clinical faculty made up of private practitioners to teach both medical students and residents.

The complaint alleges that in 1985 the medical school expanded its OB/GYN residency program in Sioux Falls and was planning a further expansion, including hiring additional full-time faculty. According to the complaint, this expansion raised the prospect of increasing competition in Sioux Falls between the medical school's full-time OB/GYN faculty and the local private OB/GYN practitioners. In addition, the complaint alleges that the increased number of residents being trained in Sioux Falls would increase competition in the provision of OB/GYN care.

The complaint alleges that Dr. Mabee and all eleven other OB/GYNs in private practice in Sioux Falls, South Dakota, participated in a conspiracy to restrict competition from the full-time faculty and residents involved in the Medical School's OB/GYN residency program. For instance, Dr. Mabee and the other OB/GYNs, several of whom were on the Medical School's clinical faculty, signed a letter to the Medical School and the hospitals in Sioux Falls stating that they would not support the OB/GYN residency program. After the end of the school year, when their contracts expired, none of the private OB/GYNs in Sioux Falls participated in OB/GYN resident teaching. According to the complaint, the letter and other collective actions were an attempt by the private OB/GYNs in Sioux Falls to use their control over clinical faculty services needed by the Medical School to force it to limit competition with them. In furtherance of the conspiracy, the complaint alleges that the private OB/GYNs made numerous joint demands on the Medical School to limit competition from the OB/GYN residency as conditions of their participation in the residency program, and took other actions to restrict competition from the residency. In addition, the complaint alleges that the collective actions of the OB/GYNs significantly hindered the operation of the residency program and threatened its accreditation.

The complaint further alleges that the conduct of Dr. Mabee and the other OB/GYNs in Sioux Falls constitutes an unlawful conspiracy to eliminate or limit competition in the provision of OB/GYN care. It alleges that the purposes or effects of the combination or conspiracy have been to restrict competition for the provision of OB/GYN care and OB/GYN instruction among OB/GYNs in the Sioux Falls area, and thereby to deprive consumers of the benefits of competition.

The Proposed Consent Order

Part I of the order contains definitions of terms used in the order.

Part II of the order describes the conduct that the order prohibits. The order prohibits respondent from agreeing or combining with any physician to refuse, or threaten to refuse, to deal with any person for the purpose or with the effect of interfering with the operation of the Medical School's OB/GYN department or faculty, or of preventing or restricting competition in the provision of OB/GYN care in the Sioux Falls, South Dakota, area. Subsections (1) through (6) of Part II list several examples of the conduct that is prohibited by the order, including agreements or combinations to: (a) Refuse to serve on the faculty of the Medical School, (b) make joint demands on the Medical School, (c) refuse to refer patients to Medical School faculty, or receive referrals from Medical School faculty, (d) interfere in a coercive manner with recruiting by the Medical School for its full-time faculty, (e) refuse to admit patients to any hospital based on the relationship of the hospital with the Medical School, and (f) coerce the Medical School or any other person to limit advertising for OB/GYN services.

However, the order does not prohibit Dr. Mabee from engaging in concerted conduct with any physician with whom he practices medicine in partnership, or who is employed by the same employer as Dr. Mabee.

Part III of the order contains provisions relating to compliance with the order.

The purpose of this analysis is to facilitate public comment on the proposed order, and is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

This proposed consent order has been entered into for settlement purposes only and does not constitute an admission by the respondent that the law has been violated as alleged in the complaint.

Donald S. Clark,
Secretary.

BILLING CODE 6750-01-M

[File No. 882 3248]

Nutronics Corp., et al.; Proposed Consent Agreement with Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a Longmont, Co. manufacturer of the Alter-Brake System (ABS) to have competent and reliable scientific research to substantiate its increased fuel-saving claims, and to cease misrepresenting that its ABS device has been approved by the government for sale to the public.

DATE: Comments must be received on or before October 23, 1989.

ADDRESS: Comments should be directed to: FTC/Office of the Secretary, Room 159, 6th St. and Pa. Ave., NW., Washington DC 20580.

FOR FURTHER INFORMATION CONTACT: Claude C. Wild, III, Denver Regional Office, Federal Trade Commission, 1405 Curtis Street, Suite 2900, Denver, Co. 80202–2393. (303) 844–2271.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(6)(ii) of the Commission's Rule of Practice (16 CFR 4.9(b)(6)(ii)).

The Federal Trade Commission having initiated an investigation of certain acts and practices of Nutronics Corporation and Gary Kelsay (hereafter sometimes referred to as "proposed respondents") and it now appearing that proposed respondents are willing to enter into an agreement containing an order to cease and desist from use of the acts and practices being investigated.

It is hereby agreed, By and between Nutronics Corporation, by its duly authorized officers, Gary Kelsay, and their attorney, and counsel for the Federal Trade Commission that:

1. Nutronics Corporation is a corporation organized and existing under the laws of the State of Nevada. It is qualified to do business in the State of Colorado as a foreign corporation with its office and principal place of business located at 700 Weaver Park Rd., Suite A, Longmont, Colorado 80501.

2. Gary Kelsay is President and CEO of proposed corporate respondent Nutronics Corporation. He formulates, directs and controls the acts and practices of said corporate respondent.

3. Proposed respondents admit all of the jurisdictional allegations set forth in the attached draft complaint.

4. Proposed Respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

5. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, both it and the draft complaint will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the attached draft complaint.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, in disposition of the proceeding, and without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the attached draft complaint and its decision containing the following order to cease and desist, and (2) make information public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order, to proposed respondents' address as stated in this agreement, shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order of the agreement may be used to vary or contradict the terms of the order.

8. Proposed respondents have read the proposed complaint and order. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered, That respondents Nutronics Corporation and Gary Kelsay, their successors and assigns, and their officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, labeling, offering for sale, sale or distribution of the "Alter Break System" or any other "automobile retrofit device" (as that term is defined in section 511 of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 2011), in or affecting commerce (as that term is defined in the Federal Trade Commission Act), do forthwith cease and desist from:

a. Misrepresenting, directly or by implication, that the government has approved such device for sale to the public; or

b. Misrepresenting, directly or by implication, that any person or entity has confirmed that such device increases gas mileage, unless such person or entity has, in fact, confirmed that such device increases gas mileage in the stated percentages.

II

It is further ordered, That respondents, their successors and assigns, and their officers, agents, representatives and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, labeling, offering for sale, sale or distribution of any automobile retrofit device in or affecting commerce do forthwith cease and desist from representing, directly or by implication, that any such device will or may improve fuel economy when installed in an automobile, truck, recreational vehicle, or other motor vehicle, unless at the time of making such representation respondents possess and rely upon competent and reliable scientific evidence that substantiates the representation; *Provided, however,* That:

(a) With respect to such representation, "competent and reliable" scientific evidence means tests, demonstrations, research, studies, surveys or other evidence conducted and evaluated in an objective manner by persons qualified to do so, using procedures generally accepted in the profession to yield accurate and reliable results. Respondents may use tests such as the then current Environmental Protection Agency Federal Test Procedure, 40 CFR Part 86, or Highway Fuel Economy Test, 40 CFR Part 600, or other tests of equivalent competency or reliability;

(b) When making any such representation, any material limitation on the applicability of the representation to certain vehicles, including but not limited to any limitation regarding the number of cylinders a vehicle must have in order for it to benefit from use of an automobile retrofit device, and any limitation regarding the minimum number of miles a vehicle must be driven before the represented benefits can be expected, shall be clearly and conspicuously disclosed.

III

It is further ordered, That respondents, their successors and assigns, and their officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, labeling, offering for sale, sale or distribution of any automobile retrofit device in or affecting commerce shall clearly and conspicuously display the following disclaimer when making any representation, directly or by implication, of improved fuel economy or performance through the use of any such device: "Reminder: The actual fuel savings or level of performance attained may vary, depending on the kind of driving you do, how you drive, and the condition of your car."

It is further ordered, That respondents, their successors and assigns, and their officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, labeling, offering for sale, sale or distribution of any automobile retrofit device in or affecting commerce do forthwith cease and desist from making any fuel savings claims which use the phrase "up to" or words of similar import unless the maximum level of savings or performance claimed can be achieved by an appreciable number of consumers, and, further, in any instances where consumers could not reasonably foresee the major factors or conditions affecting the maximum level of savings or performance, cease and desist from failing to disclose clearly and prominently the class of consumers who can achieve the maximum level of savings or performance.

V

It is further ordered, That respondents, their successors and assigns, and their officers, agents, representatives and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, labeling, offering for sale, sale or distribution of any automobile retrofit device in or affecting commerce do forthwith cease and desist from making any claim regarding the length of time required to realize fuel savings equivalent to the cost of such automobile retrofit device, unless such claim is substantiated by results pursuant to Part II of this Order.

VI

It is further ordered, That respondents, their successors and assigns, shall, for three (3) years from the date any representation covered by this Order is disseminated, maintain and make available to the Federal Trade Commission for inspection and copying the following records:

(1) Dissemination schedules for all advertisements, sales promotional materials, and post-purchase materials containing the representation;

(2) All materials that were relied upon to substantiate the representation; and

(3) All tests, demonstrations, research, studies, surveys, or other evidence in respondents' possession or control that contradict, qualify, or call into question such representation or the basis upon which respondents relied for such representation.

VII

It is further ordered, That the respondents shall distribute a copy of this order without delay to all present and future personnel, agents, or representatives having sales, advertising or policy responsibilities with respect to the subject matter of this order, and shall secure from each such person a signed statement acknowledging receipt of this order.

VIII

It is further ordered, That each respondent shall notify the Commission of any discontinuance of its present business and/or affiliation with any new business or employment for a period of three (3) years from the effective date of this order. Such notice shall include the respondent's new business address and a statement of the nature of the business or employment in which the respondent is newly engaged, as well as a description of respondent's duties and responsibilities in connection with such business or employment. The expiration of the notice provision of this paragraph shall not affect any other obligation arising under this order.

IX

It is further ordered, That the corporate respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the order.

X

It is further ordered, That respondents shall, within sixty (60) days after service of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with this order.

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission ("Commission") has accepted an agreement to a proposed consent order from Nutronics Corporation, of Longmont, Colorado, and its president and principal shareholder, Gary Kelsey (hereinafter jointly referred to as "respondents").

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

Respondents manufacture and distribute a retrofit device called the Alter-Break System ("ABS"). The ABS disengages the alternator during period of acceleration, thereby momentarily decreasing the load on the engine. Respondents claim that fuel savings and increased engine performance will result from this decreased engine load.

A complaint prepared for issuance by the Commission together with the proposed consent order references the following six claims made by respondents and alleges that they are false and misleading: (1) That the ABS increases gas mileage from 12-28%; (2) That the ABS, through increased fuel economy, "will pay for itself in only a few months;" (3) That the ABS has been endorsed by the Department of Energy; (4) That the ABS has been endorsed by the Department of Commerce; (5) That the Department of Energy has conducted scientific tests on the ABS which substantiate a gas mileage increase of 24%; and (6) That the Department of Commerce has conducted scientific tests on the ABS which substantiate a gas mileage increase of 24%. In addition, it is alleged that at the time the claims were being made, respondents also misrepresented, directly or by implication, that they possessed and relied upon a reasonable basis for the claims.

The proposed consent order ("Order") is designed to prevent respondents from making any statistical fuel savings claims for the ABS unless they possess competent and reliable scientific evidence to support the claims. In addition to this general restriction, the Order: (1) Prevents respondents from making fuel savings claims using the phrase "up to," or words of similar import unless an appreciable number of consumers can achieve the maximum stated level of fuel savings or performance; (2) prevents respondents from making unsubstantiated claims that the device, through increased fuel savings, will pay for itself within a certain time period; and (3) requires the respondents to display a specified disclaimer along with any fuel savings or performance claims.

Additionally, the Order prevents respondents from misrepresenting, directly or by implication, that any governmental agency has approved the ABS system for sale to the public or that the government has confirmed the fuel savings claims being made.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Donald S. Clark,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Family Support Administration

[Transmittal No. 87-45]

Aid to Families With Dependent Children AFDC) Program; Hearing for the New York Disapproval of the State's Proposed State Plan Amendment

AGENCY: Family Support Administration, Department of Health and Human Services.

ACTION: Notice of hearing.

SUMMARY: By designation of the Family Support Administration, a member of the Departmental Appeals Board will hold a hearing pursuant to 45 CFR part 213 concerning the Family Support Administration's disapproval of a State Plan amendment submitted by New York.

EFFECTIVE DATE: The hearing will be held at 11:00 a.m. on September 22, 1989 at the Jacob Javitz Federal Building, Room 305A, 26 Federal Plaza, New York, New York 10278.

REQUESTS TO PARTICIPATE: Request to participate as a party must be submitted to the Departmental Appeals Board in the form specified at 45 CFR 213.15(b)(2) September 6, 1989. Requests to participate as *amicus curiae* must be submitted to the Departmental Appeals Board in the form specified at 45 CFR 213.15(c)(1) before the commencement of the hearing.

FOR FURTHER INFORMATION CONTACT: Sara Anderson, Staff Attorney, Departmental Appeals Board, Department of Health and Human Services, Room 635-F, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, telephone: (202) 475-0344.

SUPPLEMENTARY INFORMATION: Notice of hearing is hereby given as set forth in the following letter, which has been sent to the New York Department of Social Services on July 31, 1989.

Ms. Ilene R. Bergman, Assistant Counsel, Bureau of Deferrals and Disallowances, 40 North Pearl Street, 10-C, Albany, New York 12243,
and,
Ms. Elizabeth Dusaniwskyj, Regional Counsel, Region II, Department of Health and Human Services, Room 3908, 26 Federal Plaza, New York, New York 10278.

Counsel:

This letter is in response to the June 28, 1989 request for reconsideration filed by the New York Department of Social Services (State) in which it seeks reconsideration of the Family Support Administration's (FSA) disapproval of the State's proposed State Plan amendment submitted as Transmittal No. 87-45.

In the proposed amendment to the State's plan for implementing Title IV-A of the Social Security Act under the Aid to Families with Dependent Children (AFDC) program, the State sought to validate the preexistent Emergency Assistance Rehousing Program (EARP), which provides for bonus payment to landlords, as of January 1, 1988, via its inclusion in the State Plan.

Pursuant to 45 CFR 213.21, I have designated Donald F. Garrett, a Departmental Appeal Board Member, to preside at the hearing, which will be conducted under the procedures in 45 CFR part 213. Pursuant to 45 CFR 201.4, a hearing has been scheduled to be held at 11:00 A.M, September 22, 1989 in Room 305A, Jacob Javitz Federal Building, 26 Federal Plaza, New York, New York 10278. A verbatim transcript will be taken.

The issues to be considered at the hearing include:

1. Whether the State Plan amendment violates the regulatory requirement that the needs of an AFDC family are to be determined on an "objective" basis (45 CFR 233.20(a)(1)(i)).
2. Whether the State Plan amendment violates the requirement that special need items be considered for all applicants and recipients requiring them (45 CFR 233.20(A)(2)(v)).
3. Whether the State Plan amendment violates the equitable treatment provisions at 45 CFR 233.10(a).
4. Whether section 1119 of the Act demonstrates that Congress had not intended for Title IV-A funds to be used to reimburse states for assistance to landlords, especially for such amounts as are involved in EARP.

A copy of this letter will appear as a Notice in the **Federal Register** and any person wishing to request recognition as a party will be entitled to file a petition

pursuant to 45 CFR 213.15(b) with the Department Appeals Board within 15 days after that notice has been published. A copy of the petition should be served on each party of record at that time. The petition must explain how the issues to be considered at the hearing have caused them injury and how their interest is within the zone of interests to be protected by the governing Federal regulations at 45 CFR 213.15(b)(1). In addition, the petition must concisely state (i) petitioner's interest in the preceeding, (ii) who will appear for petitioner, (iii) the issues on which petitioner wishes to participate, and (iv) whether petitioner intends to present witnesss in accordance with 45 CFR 213.15(b)(2). Any party may, within 5 days of receipt of such petition, file comments thereon; the presiding officer will subsequently issue a ruling on whether and on what basis participation will be permitted.

Any interested person or organization wishing to participate as *amicus curiae* may also file a petition with the Board, which shall conform to the requirements at 45 CFR 213.15(c)(1).

Any further inquires, submissions, or correspondence regarding this matter should be filed in an original and two copies with Mr. Garrett at the Departmental Appeals Board, Room 637-D, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, where the record in this matter will be kept. Each submission must include a statement that a copy of the material has been sent to the other party, identifying when and to whom the copy was sent. For convenience please refer to Board Docket No. 89-143.

Sincerely,

Catherine Bertini,

Acting Assistant Secretary

Dated: August 15, 1989

Catherine Bertini,

Acting Assistant Secretary, Family Support Administration.

BILLING CODE 4150-04-M

Health Resources and Services Administration

Program Announcement for Retention Program for Health Professions Schools With Individuals From Disadvantaged Backgrounds Grant

The Health Resources and Services Administration announces that applications for Fiscal Year 1990 Retention Program for Health Professions Schools With Individuals From Disadvantaged Backgrounds Grants are being accepted under the authority of section 787A of the Public Health Service Act as established by Public Law 100-607.

Section 787A authorizes a supplemental grant program to award grants to schools of medicine, schools of osteopathic medicine, dentistry, veterinary medicine, optometry, podiatric medicine, pharmacy, or public health that demonstrate sufficient graduation of students from disadvantaged backgrounds. Such an institution will be eligible for funds under this section if it can demonstrate graduation of students from disadvantaged backgrounds at rates that are at least 90 percent of the graduation rate for nondisadvantaged students.

The Administration's budget request for Fiscal Year 1990 does not include funding for this program. Applicants should be advised that this program announcement is a contingency action being taken to ensure that should funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the programs as well as to provide for even distribution of funds throughout the fiscal year. This notice regarding applications does not reflect any change in this policy.

Formulas determining eligibility and reward levels are specified in the legislative authority. All applicant institutions meeting the eligibility requirements as provided by section 787A shall receive an equitable portion of appropriated funds. To be eligible for a grant, an institution must have a disadvantaged graduate figure, as defined below, which exceeds the nondisadvantaged graduate figure.

The amount awarded to each eligible institution shall be determined by: Dividing the total amount of available funds by the number of disadvantaged students who graduated from eligible institutions during the preceding fiscal year. This quotient is then multiplied by the number of students from disadvantaged backgrounds who graduated from the eligible institution during the preceding fiscal year to determine the amount of the grant.

Definitions

As used in this notice: *Disadvantaged graduate figure* is the quotient obtained by dividing the numbes of students from disadvantaged backgrounds who graduate from the institution as a part of such class by the number of students from disadvantaged backgrounds who matriculated into the same class at the institution.

Nondisadvantaged graduate figure is 90 percent of the quotient obtained by dividing the number of nondisadvantaged graduates from an institution as part of a class by, the number of nondisadvantaged students who matriculated into the same class at that institution.

Individual from a disadvantaged background means an individual who (a) comes from an environment that has inhibited the individual from obtaining the knowledge, skills and abilities required to enroll in and graduate from a health professions school or (b) comes from a family with an annual income below a level based on low income thresholds according to family size, published by the U.S. Bureau of the Census, adjusted annually for changes in the Consumer Price Index and adjusted by the Secretary for use in all health professions programs, 42 CFR 57.1804(b)(2).

The following income figures determine what constitutes a low income family for purposes of the Retention Program for Health Professions Schools With Individuals From Disadvantaged Background Grants for Fiscal Year 1990:

Size of parents family [1]	Income level [2]
1	$7,900
2	10,300
3	12,300
4	15,700
5	18,500
6 or more	20,800

[1] Includes only dependents listed on Federal income tax forms.

[2] Rounded to $100 adjusted gross income for calendar year 1988.

Grants awarded to eligible applicants may be used by the grantee institution for the following purposes:

(1) *Financial aid.* Financial aid services (including direct student aid in the form of traineeships) for disadvantaged students who enrolled at the grantee health professions school, to complete their education; and

(2) *Retention.* Activities designed to help student participants from disadvantaged backgrounds, who have been accepted to, or are enrolled in health professions schools, to complete their education. Such activities may include tutorial assistance, counseling, and assistance in adjusting to the environment of the school.

Requests for application materials and questions regarding grants policy should be directed to: Grants Management Officer, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C–22, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6857.

Completed applications should be mailed to the Grants Management Officer at the above address.

Questions regarding programmatic aspects of this grant program should be directed to: Chief, Analysis and Evaluation Branch, Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8A–09, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–3680.

The application deadline is October 4, 1989. Applications shall be considered as meeting the deadline if they are either:

(1) Received on or before the deadline date; or

(2) Postmarked on or before the deadline, and received in time for review. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Applications received after the deadline will be returned to the applicant.

The standard application form and general instructions PHS 6025–1, HRSA Competing Training Grant Application has been approved by the office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060. The supplemental instructions have been submitted for OMB approval.

This program is not listed in the *Catalog of Federal Domestic Assistance.* Applications submitted in response to this announcement are not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs, (as implemented through 45 CFR part 100).

Dated July 25, 1989.

John H. Kelso,

Acting Administrator.

Office of Human Development Services

Federal Council on the Aging; Meeting

Agency Holding the Meeting: Federal Council on the Aging.

Time and Date: Meeting begins at 9:00 a.m. and ends at 5:00 p.m. on Wednesday, August 30, 1989, and begins at 9:00 a.m. and ends at 4:30 p.m. on Thursday, August 31, 1989.

Place: On Wednesday, Augsut 30, Lewis Room, The Holiday Inn-Capitol, 550 C Street, SW., Washington, DC., from 9:00 a.m. to 5:00 p.m., and Thursday, August 31, Lewis Room The Holiday Inn-Capitol, from 9:00 a.m.—4:30 p.m.

Status: Meeting is open to the public.

Contact Persons: Barbara Forte, Room 4280, Wilbur Cohen Federal Building, 245–2451.

The Federal Council on the Aging was established by the 1973 Amendments to the Older Americans Act of 1965 (Pub. L. 93–29, 42 U.S.C. 3015) for the purpose of advising the President, the Secretary of Health and Human Services, the Commissioner on Aging and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to the Federal Advisory Committee Act (Pub.L. 92–453, 5 U.S.C. App. 1, Section 10, 1976) that the Council will hold its August quarterly meeting on August 30 & 31, 1989, from 9:00 a.m.—5:00 p.m. and from 9:00 a.m.—4:30 p.m. respectively, in the Lewis Meeting Room of the Holiday Inn-Captitol Hotel, 550 C Street, SW., Washington, DC. 20024. On August 30, the Council will open its regular meeting and then proceed with a Forum on Education and Employment for Women and the Elderly.

The agends for a Forum on Education and Employment for Women and the Elderly is as follows: Witnesses before the Council will include: Jane Marden, Director of Consumer Affairs, American Gas Association; Anita Stowell, American Association of Retired Persons; Representatives from the Edison Electric Institute, and the U.S. Department of Labor.

The rest of the two-day meeting will include discussion of Current Projects, Committee Reports, Agenda Projects and other matters as they relate to the aging population.

Dated: August 15, 1989.

Ingrid Azvedo,

Chairperson, Federal Council on the Aging.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UT–060–09–4320–08]

Management Framework Plan; Price River Resource Area Plan; UT

AGENCY: Bureau of Land Management, Moab, Interior.

ACTION: Decision Record—Plan amendment for Price River Resource Area Plan, Emery County, Utah.

SUMMARY: This decision record advises the public that the Bureau of Land Management (BLM) has amended an existing Management Framework Plan.

SUPPLEMENTARY INFORMATION: An amendment to the Price River Resource Area Management Framework Plan (MFP) was signed by the Utah State Director on July 17, 1989. In the original MFP, approved September 2, 1983, there was a resource allocation conflict between domestic livestock and wild bighorn sheep in six grazing allotments. The conflict was resolved in favor of the existing domestic livestock grazing permits. This decision precluded augmentation of bighorn sheep population. The grazing preference on four of the six allotments was relinquished by the grazing permittees after a negotiated settlement with the Utah Division of Wildlife Resources. Relinquishment of the grazing permits eliminated the domestic sheep/wild sheep conflict and rendered portions of the MFP meaningless.

The plan amendment provides the four allotments; Bighorn, Elliott Mountain, River, and Pack Trail be managed for wild land values, including bighorn sheep, riparian, and recreation. Grazing of domestic livestock is limited to trailing and recreational pack stock. The amendment provides for the same management of the Last Chance and Price River South allotments should the grazing preference be relinquished or otherwise lost on these allotments during the life of the plan. Scope of the amendment is limited to forage allocation. The area affected by this amendment is located in northeastern Emery County, Utah. The area encompasses approximately 123,500 acres of public land and 13,000 acres of state and private lands. The allotments are mostly within the Desolation Canyon (UT–068A) and Turtle Canyon (UT–067) Wilderness Study Areas.

The plan amendment and accompanying environmental assessment and Finding of No Significant Impact are available for public inspection at the Price River Resource Area. For further information, contact Mark Bailey, Price River Resource Area Manager, 900 North 700 Est, Price, Utah 84501 or call (801) 637–4584. Persons who have participated in the planning process may protest the amendment to the Director, Bureau of Land Management. Protests must be in accordance with 43 CFR 1610.5–2 and

must be filed within thirty days of the publication of this notice.

James M. Parker,

Utah State Director.

[AZ–020–9–4212–14; AZA–23855 through AZA–23861]

Realty Action; Competitive Sale of Public Land in Yavapai County, Arizona

The Bureau of Land Management will offer seven tracts of land for public sale. These tracts are located near Wickenburg, Arizona. The sale of these tracts is consistent with Section 203 of the Federal Land Policy and Management Act of October 21, 1976. These tracts will be sold at no less than the appraised fair market value. The subject lands are located at:

Gila and Salt River Meridian, Arizona

Serial Nos.		Acres
AZA–23855	T. 8 N., R. 5 W., Sec. 15, NE¼NE¼NW¼.	10.00
AZA–23856	T. 8 N., R. 5 W., Sec. 15, SE¼NE¼NW¼.	10.00
AZA–23857	T. 8 N., R. 5 W., Sec. 15, W½NE¼NW¼.	20.00
AZA–23858	T. 8 N., R. 5 W., Sec. 15, NW¼NW¼.	40.00
AZA–23859	T. 8 N., R. 5 W., Sec. 15, N½SW¼NW¼.	20.00
AZA–23860	T. 8 N., R. 5 W., Sec. 15, W½/SE¼NW¼.	20.00
AZA–23861	T. 8 N., R. 5 W., Sec. 15, E½SE¼NW¼.	20.00

The above description totals 140.00 acres of land in Yavapai County.

Federal law limits sale of this land to United States citizens, corporations subject to the laws of any State or of the United States, States, State instrumentalities or political subdivisions authorized to hold property, and any entity legally capable of conveying and holding lands or interests therein under the laws of the State within which the lands to be conveyed are located. The purchaser is deemed to be the individual(s) or corporation that will actually take title to the land from the government; the citizenship limitation does not apply to agents who bid on behalf of an associate, client or employer.

All of the parcels listed will contain the following reservations when patented:

1. A right-of-way for ditches and canals constructed by the authority of the United States. (Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.)

2. A reservation of all oil and gas to the United States with the right to prospect for, mine, and remove such deposits.

The following tracts will be sold subject to the following:

1. Parcels AZA–23855—AZA–23861 will be sold subject to BLM road right-of-way A–18698.

2. AZA–23859 will be sold subject to BLM road right-of-way A–18699.

The successful bidder will also be required to purchase the mineral estate at the time of final payment.

Upon publication of this notice in the **Federal Register**, the land described above will be segregated from all forms of non-discretionary appropriation under the public land laws, including the mining laws, except the mineral leasing laws, for a period of 270 days or until the lands are sold. The segregative effect may otherwise be terminated by the authorized officer by publication of a termination notice in the **Federal Register** prior to the expiration of the 270 day period.

Additional information regarding these tracts of land will be contained in the sales brochure made available at least 30 days prior to the sale. This additional information includes: 1. Sealed bid instructions; 2. Times of first sealed bid opening; 3. Appraised fair market value of the tracts; 4. Any reservations or terms and conditions that apply to the tracts of land; 5. Maps showing the location of the tracts of land; 6. Requirements of parties wishing to bid; and 7. Payment procedures for the successful bidder.

For a period of 45 days from the date of this notice, interested parties may submit comments regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior. Comments regarding this action or requests for additional information should be sent to the Phoenix District, 2015 W. Deer Valley Road, Phoenix, Arizona 85027.

Dated: August 16, 1989.

Henri R. Bisson,

District Managers.

BILLING CODE 4310–32–M

[NM–010–9–5420–10–ZGKJ/GP–0115; NM NM 80786]

Albuquerque District, Issuance of Disclaimer of Interest to Land in New Mexico

AGENCY: Bureau of Land Mangement, Interior.

ACTION: Notice of intent to issue a disclaimer of interest.

SUMMARY: Notice is hereby given that the United States of America, pursuant to the provisions of the Federal Land Policy and Management Act (FLPMA) of 1976, section 315, 43 U.S.C. 1745, does hereby disclaim and release to F.H. Parks and Louise S. Parks all interests in both the surface and mineral estate in the land described below.

A certain tract of land situated within section 36, T. 11 N., R. 5 E., NMPM, Bernalillo County, New Mexico, being and comprising the East portion of Small Holding Claim No. 1918, Lot 2 in said section (less right-of-way for State Highway) and being more particularly described as follows:

Beginning at the Northwesterly corner of said tract, being a point on the East right-of-way of State Highway 14, whence the Easterly section corner common to Sections 35 and 36 bears N. 53°23'25" W., 727.81 feet distant; thence from said point of beginning; leaving said right-of-way S. 78°08'30" E., 297.45 feet to the Northeast corner; thence S. 16°34'41" W., 136.06 feet to the Southeast corner; thence N. 79°10'30" W., 278.76 feet to the Southwest corner; a point on said Easterly right-of-way of State Highway 14; thence along said right-of-way along a curve to the right; having a radius of 1,225.78 feet, a distance of 140.90 feet to the point of beginning and containing 0.909 acre more or less.

After review of the official records and other title evidence, it has been determined by the Bureau of Land Management that the above described land is a portion of Lot 2, Small Holding Claim No. 1918 that was patented out of Federal ownership on March 19, 1906. The patent was filed for record on April 7, 1911, and recorded on April 10, 1911, in Book 5C, Page 33, Bernalillo Courthouse, Albuquerque, New Mexico.

The Bureau of Land Management has determined that the United States has no interest in the above described land.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments on this disclaimer may present their views in writing to the District Manager, Albuquerque District Office, 435 Montano NE, Albuquerque, New Mexico

87107. If no protests are received within the time allowed, the disclaimer will be issued.

Dated: August 11, 1989.

Monte G. Jordan,

Associate State Director.

BILLING CODE 4310-FB-M

Minerals Management Service

Development Operations Coordination Document

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that FMP Operating Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 4897, Block 46, South Pass Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on August 14, 1989. Comments must be received on or before September 6, 1989 Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of title 30 of the CFR.

Dated: August 15, 1989.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

National Park Service

Acadia National Park, Bar Harbor, ME; Acadia National Park Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Commitee Act (Pub. Law 92-463. 86 Stat. 770, 5 U.S.C. App. 1, Sec. 10), that a meeting of the Acadia National Park Advisory Commission will be held on Monday, September 11, 1989.

The Commission was established pursuant to Public Law 99-420, Sec. 103. The purpose of the Commission is to consult with the Secretary of the Interior, or his designee, on matters relating to the management and development of the Park, including but not limited to the acquisition of lands and interests (in lands (including conservation easements on islands) and termination of rights of use and occupancy.

The meeting will convene at Acadia National Park Headquarters, McFarland Hill, Bar Harbor, Maine, at 1:00 p.m. to consider the following agenda:

1. Old Business.
2. New Business:
   A. Committee reports—
      Acquisition—Criteria for setting Priorities in Land Protection Plan.
      Easement—Criteria for accepting Easements on Mount Desert Island.
   B. General Management Plan
   C. Needs Assessment
3. Proposed agenda and date of next Commission meeting.

The Commission meeting is open to the public. Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made to the official listed below at least seven days prior to the meeting.

Further information concerning this meeting may be obtained from the Superintendent, Acadia National Park, P.O. Box 177, Bar Harbor, Maine 04609.

Dated: August 15, 1989.

Farmington Wild and Scenic River Study, Massachusetts and Connecticut, Farmington River Study Committee; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770, 5 U.S.C. App. 1 s 10), that a meeting of the Farmington River Study Committee will be held Thursday, September 14, 1989.

The Committee was established pursuant to Public Law 99-590. The purpose of the Committee is to consult with the Secretary of the Interior and to advise the Secretary in conducting the study of two segments of the Farmington River.

The meeting will convene at 7:30 p.m. at the Canton Town Hall, Canton, Connecticut, for the following reasons:

1. Approval of minutes of 6/8/89 meeting
2. Report on Budget Status
3. Update on Resource Assessment and Report from Eligibility Subcommittee
4. Report from Water Resources Subcommittee
5. Report from River Conservation Planning Subcommittee
6. Review of proposed themes/goals for the study and the river conservation plan
7. Opportunity for public comment
8. Other business.

It is anticipated that about 100 people will be able to attend the session in addition to the Committee members.

Interested persons may make oral/written presentations to the Committee or file written statements. Such requests should be made to the official listed below prior to the meeting.

Further information concerning this meeting may be obtained from the

Public Affairs Officer, National Park Service, North Atlantic Region, 15 State Street, Boston, Massachusetts 02109 (617) 223-5199.

Dated: August 15, 1989.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 388; Sub-No. 7]

Intrastate Rail Rate Authority, Illinois

AGENCY: Interstate Commerce Commission.

ACTION: Notice of certification.

SUMMARY: The Commission grants final (5-year unconditional) certification to the Illinois Commerce Commission under 49 U.S.C. 11501(b) to regulate intrastate rail transportation.

DATES: Certification will begin September 21, 1989.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. [TDD for hearing impaired: (202) 275–1721].

SUPPLEMENATRY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 275–1721].

Decided: August 15, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

[Finance Docket No. 31503]

The Garden City Co-Op, Inc., Exemption From 49 U.S.C. 10746 and 11343

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts Garden City Co-op, Inc., from the requirements of 49 U.S.C. 11343–11345 for it to control Garden City Western Railway Company (GCW) and The Garden City Northern Railway, Inc. (GCN), subject to standard labor protective conditions. Its request to be exempted from 49 U.S.C. 10746, the commodities clause, is dismissed. The request is in connection with Finance Docket No. 31502, Garden City No. Ry., Inc.—Exempt. of Acq. and Oper. of Rail Line—Atchison, T. and S. F. Ry. Co. and Garden City, G. and No. R. Co., in which GCN plans to acquire and operate a 30.59-mile rail line between Garden City and Shallow Water, KS.

DATES: This exemption is effective on September 6, 1989. Petitions for stay must be filed by September 1, 1989, and petitions for reconsideration must be filed by September 18, 1989.

ADDRESSES: Send an original and 10 copies of pleadings referring to Finance Docket No. 31503 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423 and

(2) Petitioner's representative: Thomas F. McFarland, Jr., Belnap, Spencer, McFarland, Emrich & Herman, 20 N. Wacker Drive, Chicago, IL 60606

FOR ADDITIONAL INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. [TDD for hearing impaired: (202) 275–1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 275–1721].

Decided: August 14, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners André, Lamboley, and Phillips.

Kathleen M. King,

Acting Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Foreign Claims Settlement Commission

Claims Against Egypt; Adjudication Program Transfer From State Department; Correction

AGENCY: Foreign Claims Settlement Commission of the United States, Justice.

ACTION: Notice; correction.

SUMMARY: The following is a correction of the notice published on August 10, 1989, at 54 FR 32856, concerning the transfer from the Department of State to the Foreign Claims Settlement Commission of the Department's program for adjudication of claims of United States nationals against the Government of the Arab Republic of Egypt. Among other things, this notice announced the setting of a final deadline for the filing of claims of United States nationals for losses resulting from the blocking of bank accounts by the Government of the Arab Republic of Egypt. However, due to an editing error, this final deadline was incorrectly stated at one place in the notice.

FOR FURTHER INFORMATION CONTACT: David E. Bradley, Chief Counsel, Foreign Claims Settlement Commission of the United States, 1111 20th Street NW., Room 400, Washington, DC 20579, (202) 653–5883 or FAX (202) 653–6009.

In the first sentence of the Notice of Time for Filing and Completion of Program paragraph appearing in the **Federal Register** at page 32856, column 3, on August 10, 1989 (54 FR 32856), the date is corrected to read as follows:

Notice of Time for Filing and Completion of Program

I. Pursuant to section 4(b) of Title I of the International Claims Settlement Act of 1949, as amended (22 U.S.C. 1623(b)), the Foreign Claims Settlement Commission hereby gives notice that the period for the filing of any new, previously unadjudicated claims for losses resulting from the blocking by the Government of the Arab Republic of Egypt of bank accounts in Egypt owned by United States nationals will * * * end on November 30, 1989. * * *.

* * * * *

Dated at Washington, DC, August 16, 1989.

Judith H. Lock,

Administrative Officer.

DEPARTMENT OF LABOR

Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463 as amended), notice is hereby given of a meeting of the Steering Subcommittee for the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: September 12, 1989, 9:30 a.m., Rm. S4215 A&B Frances Perkins, Department of Labor Building, 200 Constitution Avenue, NW., Washington, DC 20210.

Purpose: To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act and 5 U.S.C. section 552(c)(1). The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

For further information, contract: Fernand Lavallee, Director, Labor Advisory Committee Group, Phone: (202) 523–6061.

Signed at Washington, DC, this 16th day of August.

Berton J. Braley, Jr.,

Acting Deputy Under Secretary International Affairs.

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW, Room N–1301, Washington, D.C. 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395–6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Revision

Employment and Training Administration

Quarterly Determinations, Allowance Activities and Employability Services under the Trade Act & Training Waivers Issued and Revoked

1205–0016; ETA 563, ETA 9027

Form #	Affected Public	Respondents	Frequency	Average time per response
ETA 563	State or local governments.	52	Quarterly	12 minutes
ETA 9027	State or local governments.	52	Quarterly	15 minutes

1,331 total hours.

Quarterly data on Trade Adjustment Assistance activity is needed for timely program evaluation necessary for competent administration and for providing legally mandated reports to the Congress on the Trade Adjustment Assistance Program. Quarterly number of waivers of training issued and revoked by reason are needed for proper administration and to provide statutorily required report to the Congress.

Extension

Employment Standards Administration
Rehabilitation Maintenance Certificate
1215–0161; OWCP–17
On occasion

Individuals or households; small businesses or organizations 950 respondents; 1904 total hours; 10 minutes per response; 1 form. The form OWCP–17 serves as a bill submitted by the disabled worker to OWCP requesting reimbursement of expenses incurred due to participation in an approved rehabilitation effort for the preceding four week period.

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 1, 1989.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 1, 1989.

The petitions filed in this case area available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC, this 14th day of August 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA–W–21,805]

CRC Mallard d.b.a. Mallard Workover & Drilling, Inc., Lafayette, LA; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on January 9, 1989 applicable to all workers of CRC Mallard Workover & Drilling, Inc., Lafayette, Louisiana.

The certification is being amended to properly reflect the correct worker group. New information from the bankruptcy trustee indicates that the correct name of the subject worker group was CRC Mallard, Lafayette, Louisiana. All the assets were sold in May 1987 including the name Mallard to another firm in the same business which became called Mallard Workover & Drilling, Inc., Lafayette, Louisiana. Mallard Workover & Drilling is the successor firm of CRC Mallard.

The notice is amended to include the correct name of the worker group, CRC Mallard, Lafayette, Louisiana and its successor firm Mallard Workover & Drilling, Inc., Lafayette, Louisiana.

The amended notice applicable to TA–W–21,805 is hereby issued as follows:

> All workers of CRC Mallard, Lafayette, Louisiana and its successor firm Mallard Workover & Drilling, Inc., Lafayette, Louisiana who became totally or partially separated from employment on or after October 1, 1985 and before January 1, 1988 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 11th day of August 1989.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, UIS.

Phillips Petroleum Co., Western Division, Oklahoma City, OK; All Exploration and Production Units in Oklahoma; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on May 10, 1989 applicable to all workers of Phillips Petroleum Company, Western Division, Oklahma City, Oklahoma.

Based on new information from the company, additional workers were separated from Exploration and Production Units of the Western Division of Phillips Petroleum Company in the State of Oklahoma. The notice for the Oklahoma District of the Western Division of Phillips Petroleum Company is amended to include all exploration and production units of Phillips Petroleum Company in the State of Oklahoma.

The amended notice applicable to TA–W–22, 459 is hereby issued as follows:

> All workers of Phillips Petroleum Company, Western Division, Oklahoma City, Oklahoma and all Exploration and Production Units of Phillips Petroleum Company located throughout the State of Oklahoma who became totally or partially separated from employment on or after January 23, 1988 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 11th day of August 1989.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of July 1989.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases or imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the

separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-23,022; Witco Corp., Richardson Battery Parts Div, Clark, NJ

In the following cases, the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-23,086; PMC Equipment Co., Inc., Chart Drive Recorder Dept., Odessa, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,121; Rockwell International Measurement & Flow Control Div., Pittsburgh, PA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,984; Amoco Production Co., General Office, Chicago, IL

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,985; Amoco Production Co., Research Center, Tulsa, OK

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,987; Amoco Production Co., New Orleans, LA Region and Operating at Various Locations in the Following States

TA-W-22,987A; Louisiana
TA-W-22,987B; Mississippi
TA-W-22,987C; Pennsylvania
TA-W-22,987D; Alabama

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,986; Amoco Production Co., Houston, TX Region and Operating at Various Locations in the Following States

TA-W-22,987A; New Mexico
TA-W-22,987B; Texas
TA-W-22,987C; Michigan

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,983; Amoco Production Co., Denver, CO Region and Operating at Various Locations in the Following States

TA-W-22,983A; New Mexico
TA-W-22,983B; Alaska
TA-W-22,983C; Wyoming
TA-W-22,983D; Colorado
TA-W-22,983E; Oklahoma
TA-W-22,983F; Utah
TA-W-22,983G; North Dakota
TA-W-22,983H; South Dakota
TA-W-22,983I; Nebraska
TA-W-22,983J; Kansas

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

Affirmative Determination

TA-W-23,007; Hunt Energy Corp., Dallas, TX

A certification was issued covering all workers separated on or after May 3, 1988.

TA-W-23,002; Gruss Petroleum Management, Inc., Midland, TX

A certification was issued covering all workers separated on or after May 18, 1988.

TA-W-23,003; Gruss Petroleum Management, Inc., New York, NY

A certification was issued covering all workers separated on or after May 18, 1988.

TA-W-23,045; Scab Rock Feeders, Inc., Othello, WA

A certification was issued covering all workers separated on or after December 1, 1988.

TA-W-23,009; Jerry Scott Drilling Co., Inc., Seminole, OK

A certification was issued covering all workers separated on or after May 16, 1988.

TA-W-23,014; Maxim Drilling & Exploration, Inc., Gillette, WY

A certification was issued covering all workers separated on or after April 18, 1988.

TA-W-23,008; J.G. Carmel, Inc., Midland, TX

A certification was issued covering all workers separated on or after May 18, 1988.

TA-W-23,010; Jorgruss Oil Corp., Midland, TX

A certification was issued covering all workers separated on or after May 18, 1988.

TA-W-23,015; Pegasus Holding Corp., Midland, TX

A certification was issued covering all workers separated on or after May 18, 1988.

TA-W-23,062; Oryx Energy Co., Formerly Sun Exploration and Production Co., Headquartered in Dallas, TX and Operating at Various Locations in the Following States

TA-W-23,062A; California
TA-W-23,062B; Oklahoma
TA-W-23,062C; District of Columbia
TA-W-23,062D; Florida
TA-W-23,062E; Kansas
TA-W-23,062F; Louisiana
TA-W-23,062G; Michigan
TA-W-23,062H; Mississippi
TA-W-23,062I; New Mexico
TA-W-23,062J; Oklahoma
TA-W-23,062K; Texas
TA-W-23,062L; Wyoming

A certification was issued covering all workers separated on or after June 26, 1988.

I hereby certify that the aforementioned determinations were issued during the month of July 1989. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213 during normal business hours or will be mailed to persons to write to the above address.

Dated: August 15, 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 89-57]

NASA Advisory Council (NAC), Space Science and Applications Advisory Committee (SSAAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science and Applications Advisory Committee Informal Executive Subcommittee.

DATES: September 12, 1989, 1 p.m. to 5:30 p.m., and September 13, 1989, 8:30 a.m. to 12:30 p.m.

ADDRESSES: State Plaza Hotel, Envoy Room, 2117 E Street NW., Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph K. Alexander, Code E, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1430).

SUPPLEMENTARY INFORMATION: The Space Science and Applications Advisory Committee consults with and advises the NASA Office of Space Science and Applications (OSSA) on long-range plans for, work in progress on, and accomplishments of NASA's Space Science and Applications programs. The Informal Executive Subcommittee will meet to formulate plans for the next meeting of the full Committee.

The Subcommittee is chaired by Dr. Berrien Moore and is composed of 8 members. The meeting will be open to the public up to the seating capacity of the room (approximately 15 people including members of the Subcommittee).

Type of Meeting: Open.

Agenda

Tuesday, September 12

1 p.m.—Office of Space Science and Applications Issues and Space Science and Applications Advisory Committee (SSAAC) tasks.

2 p.m.—Discussion of follow-up actions from the June SSAAC meeting.

3:30 p.m.—Discussion of SSAAC work priorities in Fiscal Year 1990.

5:50 p.m.—Adjourn.

Wednesday, September 13

8:30 a.m.—Discussion of November SSAAC meeting topics.

10:30 a.m.—Preparation of agenda for November meeting.

12:30 p.m.—Adjourn.

Dated: August 14, 1989.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS) and Advisory Committee on Nuclear Waste (ACNW); Notice of Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittees and meetings of the ACRS full Committee, and of the ACNW, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published July 26, 1989 (54 FR 31125). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the Federal Register approximately 15 days (or more) prior to the meetings. It is expected that sessions of ACRS full Committee and ACNW meetings designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee and ACNW meetings begin at 8:30 a.m. and ACRS Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during ACRS full Committee and ACNW meetings and when ACRS Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agendas for the September 1989 ACRS full Committee and the September 1989 ACNW meetings can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone: 301/492-7288, ATTN: Barbara Jo White) between 7:30 a.m. and 4:15 p.m., Eastern Time.

ACRS Subcommittee Meetings

Regional Programs, August 29-30, 1989, King of Prussia, PA (Region I Office). The Subcommittee will review the activities under the purview of the NRC Regional I Office.

Joint Extreme External Phenomena and Severe Accidents, September 6, 1989, Bethesda, MD. The Subcommittees will be briefed by the NRC and industry on the Individual Plant Examination for External Events (IPEEE) program.

Joint Containment Systems and Structural Engineering, September 12, 1989, San Francisco, CA. The Subcommittees will discuss containment design criteria for future plants with invited speakers from industry and National Laboratories.

Thermal Hydraulic Phenomena, September 13 and a.m. on 14, 1989, *San Jose, CA.* The Subcommittee will discuss the capability of the thermal hydraulic codes to model BWR core power instability.

Joint Severe Accidents and Probabilistic Risk Assessment, September 19, 1989, Bethesda, MD. The Subcommittees will discuss the second draft of NUREG-1150, "Severe Accident Risks: An Assessment for Five U.S. Nuclear Power Plants."

Severe Accidents, September 20, 1989, Bethesda, MD. The Subcommittee will discuss the proposed Generic Letter by NRR, the NRC Research Program, and the NUMARC/EPRI activities in the accident management area.

Advanced Pressurized Water Reactors, September 21, 1989, Bethesda, MD. The Subcommittee will discuss the comparison of the *W*APWR (RESAR SP/90) design with other modern plants (in U.S. and abroad).

Human Factors, September 27, 1989, Bethesda, MD. The Subcommittee will review the proposed Access Authorization Rule and performance indicators.

Mechanical Components, October 3, 1989, Bethesda, MD. The Subcommittee will review the proposed resolution of Generic Issue 87, "Failure of HPCI Steamline Without Isolation,"—specifically the matter of implementing current design requirements on MOV's, status of Task Action Plan on check valves, and discuss Generic Letter 89-04, "Guidance on Developing Acceptable Inservice Testing Program."

Joint Containment Systems and Structural Engineering, October 17, 1989, Chicago, IL. The Subcommittees will discuss containment design criteria for future plants with invited speakers from industry and National Laboratories.

Thermal Hydraulic Phenomena, October 27, 1989, San Jose, CA. The Subcommittee will review the key thermal hydraulic design aspects of the GE ABWR.

Advanced Boiling Water Reactors (GE ABWR), October 31, 1989, Bethesda, MD. The Subcommittee will review the NRC staff's SER on Module One of GE ABWR.

Regulatory Policies and Practices, November 15, 1989, Bethesda, MD. The Subcommittee will discuss integration of the regulatory process.

Thermal Hydraulic Phenomena, November 22, 1989, Bethesda, MD. The Subcommittee will discuss selected topics related to the NRC-RES thermal hydraulic research program.

Decay Heat Removal Systems, Date to be determined (September/October), Bethesda, MD. The Subcommittee will review the NRC staff's proposed resolution of Generic Issue 84, "CE PORVs."

Joint Thermal Hydraulic Phenomena and Core Performance, Date to be determined (September/October), Bethesda, MD. The Subcommittees will continue their review of boiling water reactor core power stability pursuant to the core power oscillation event at LaSalle County Station, Unit 2.

General Electric Reactors, Date to be determined (September/October), Bethesda, MD. The Subcommittee will review the restart of Nine Mile Point Unit 1.

Advanced Pressurized Water Reactors, Date to be determined (September/October), Bethesda, MD. The Subcommittee will discuss the licensing review bases document being developed for Combustion Engineering's Standard Safety Analysis Report-Design Certification (CESSAR-DC).

Severe Accidents, Date to be determined (September/October), Bethesda, MD. The Subcommittee will discuss the NRC Severe Accident Research Program (SARP) plan.

Decay Heat Removal Systems, Date to be determined (November), Bethesda, MD. The Subcommittee will review the proposed resolution of Generic Issue 23, "RCP Seal Failures."

Systematic Assessment of Experience, Date to be determined (November/December), Bethesda, MD. The Subcommittee will review the proposed power level increase for Indian Point Unit 2.

Decay Heat Removal Systems, Date to be determined, Bethesda, MD. The Subcommittee will explore the issue of the use of feed and bleed for decay heat removal in PWRs.

Thermal Hydraulic Phenomena, Date to be determined, Bethesda, MD. The Subcommittee will discuss the status of Industry best-estimate ECCS model submittals for use with the revised ECCS Rule.

Auxiliary and Secondary Systems, Date to be determined, Bethesda, MD. The Subcommittee will discuss the: (1) Criteria being used by utilities to design Chilled Water Systems, (2) regulatory requirements for Chilled Water Systems design, and (3) criteria being used by the NRC staff to review the Chilled Water Systems design.

Reliability Assurance, Date to be determined, Bethesda, MD. The Subcommittee will discuss the status of implementation of the resolution of USI A–46, "Seismic Qualification of Equipment in Operating Plants," and other related matters.

Joint Regulatory Activities and Containment Systems, Date to be determined, Bethesda, MD. The Subcommittees will review the proposed final revision to Appendix J to 10 CFR Part 50, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors."

Safeguards and Security, Date to be determined, Bethesda, MD. The Subcommittee will review NUREG–1267, "Technical Resolution of Generic Safety Issue A–29, Nuclear Power Plant Design for Reduction of Vulnerability to Industrial Sabotage."

ACRS Full Committee Meetings

353rd ACRS Meeting, September 7–9, 1989—Items are tentatively scheduled.

*A. *Generic Issue A–29, "Nuclear Power Plant Design for Reduction of Vulnerability to Industrial Sabotage" (Open)*—Review and report on proposed resolution of this generic issue.

*B. *EPRI Requirements for Advanced LWRs (Open)*—Briefing and discussion regarding the status of the proposed EPRI Requirements for Advanced Light Water Reactors.

*C. *Individual Plant Examination for External Events (IPEEE) (Open)*—Briefing and discussion regarding the status of guidance regarding IPE consideration of external events.

*D. *ACRS Subcommittee Activities (Open)*—Reports and discussion of the status of assigned subcommittee activities, including the August 29–30, 1989 meeting of the ACRS Subcommittee on Regional Programs.

*E. *Generic Issue 99, "Improved Reliability of RHR Capability In PWRs" (Open)*—Briefing by NRC staff regarding implementation of this matter.

*F. *Seabrook Nuclear Plant (Open)*—Review and comment on the off-site emergency preparedness for this facility.

*G. *Accident Severity Scales (Open)*—Briefing and discussion regarding development of accident severity scales for use in the NRC regulatory process.

*H. *Maintenance of Nuclear Plants (Open)*—Review and comment on proposed NRC policy statement and an associated regulatory guide regarding maintenance programs for nuclear power plants.

*I. *Advanced PWRs (Open)*—Report and discussion of the status of NRC staff review of the Westinghouse (REAR SP-90 and AP–600), and Combustion Engineering (CE System–80+) standard plant designs.

*J. *NUREG–1150, "Severe Accident Risks: An Assessment for Five U.S. Nuclear Power Plants" (Open)*—Meeting and discussion with NRC staff representatives regarding ACRS report dated May 9, 1989 on interim use of NUREG–1150.

*K. *Appointment of ACRS Members (Open/Closed)*—Discuss the qualifications of candidates proposed for nomination to the ACRS.

*L. *Anticipated Activities (Open)*—Discuss anticipated ACRS subcommittee activities and topics proposed for consideration by the full Committee.

354th ACRS Meeting, October 5–7, 1989—Agenda to be announced.
355th ACRS Meeting, November 16–18, 1989—Agenda to be announced.
356th ACRS Meeting, December 14–16, 1989—Agenda to be announced.

ACNW Full Committee Meetings

13th ACNW Meeting, September 13–15, 1989—The Committee will discuss the following topics:

A. A discussion of the approach to performance assessment for the high-level waste repository and status of activities.

B. A review of the Pathfinder Reactor Dismantlement Plan.

C. The review of a number of staff technical positions.

D. A discussion of the concrete bunker prototype license application.

E. A discussion on the availability of data from the USGS.

F. A discussion of activities at the Center for Nuclear Waste Regulatory Analyses.

G. A discussion of waste related activities of Nuclear Safety Research Review Committee.

H. A discussion of DOE's program to store and dispose of Greater-Than-Class C wastes.

I. An administrative session to discuss anticipated proposed Committee activities, future meeting agendas, and organizational matters, as appropriate.

14th ACNW Meeting, October 11–13, 1989—Agenda to be announced. No November Meeting
15th ACNW Meeting, December 27–29, 1989—Agenda to be announced.

Dated: August 17, 1989.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 89–19756 Filed 8–21–89; 8:45 am]

BILLING CODE 7590-01-M

Issuance and Availability of NUREG-1174, "Evaluation of Systems Interactions in Nuclear Power Plants: Technical Findings Related to Unresolved Safety Issue A17," and NUREG–1229, "Regulatory Analysis for Resolution of USI A–17—Systems Interactions in Nuclear Power Plants"

The U.S. Nuclear Regulatory Commission (NRC) staff is issuing the resolution of Unresolved Safety Issue (USI) A–17, "Systems Interactions in Nuclear Power Plants." The resolution is documented in two NUREG reports entitled "Evaluation of Systems Interations in Nuclear Power Plants: Technical Findings Related to Unresolved Safety Issue A–17" (NUREG–1174) and "Regulatory Analysis for Resolution of USI A–17—Systems Interactions in Nuclear Power Plants" (NUREG–1229). Systems interactions was identified as an Unresolved Safety Issue (USI) in NUREG–0510, "Identification of Unresolved Safety Issues Relating to Nuclear Power Plants," January 1979, and was reported to the Congress pursuant to section 210 of the Energy Reorganization Act of 1974 as amended on December 13, 1977.

Nuclear power plants contain many structures, systems, and components (SSCs), some of which are safety-related. Certain SSCs are designed to interact to perform their intended functions. These "systems interactions" are usually well recognized and therefore accounted for in the evaluation of plant safety by the designers and by those who assess plant safety.

A number of significant events have involved unintended or unrecognized dependencies among the SSCs. Some of these events have involved subtle dependencies between safety-related SCCs and other SCCs. Some events have also involved subtle dependencies between redundant safety-related SSCs that were believed to be independent.

Therefore, the purpose of USI A–17 was to investigate the potential that unrecognized, subtle dependencies among SSCs have remained hidden and that they could lead to safety-significant events. The term used to describe these unrecognized, subtle dependencies is adverse systems interactions (ASIs).

The staff is not recommending that further broad searches specifically for all ASIs be undertaken because such searches have not proved to be cost effective in the past, and there is no guarantee after such a study that all ASIs have been uncovered. Rather, the staff has concluded that certain more specific actions, together with other ongoing activitivies, should reduce the risk from adverse systems interactions.

The staff has concluded from its A–17 investigations that the following actions should be taken:

(1) Issuance of a generic letter that includes:

(a) The bases for resolution of USI A–17,

(b) A summary of information relevant to ongoing operating experience reviews.

(2) Recognition that Individual Plant Examinations (IPEs) already include evaluation of internal flooding and the A–17 insights will be referenced in the IPE guidance documents.

(3) Recognition that the USI A–46 resolution will address seismically induced systems interactions to verify that components and systems needed to safely shut down the plant are protected, given loss of offsite power. (New plants, not covered by A–46, have been reviewed to current requirements that address seismically induced systems interactions.)

(4) Communication of information regarding ASIs for staff review of PRAs and for staff evaluation of electric power supplies as part of GI–128, "Electric Power Reliability."

(5) Identification and definition of concerns related to A–17 and other programs that have not been specifically addressed. (The objective of this program is to define the concerns with sufficient specificity to permit them to be prioritized as potential generic safety issues.)

(6) Development of a Standard Review Plan for future plants that would include guidance regarding protection from internal flooding and water intrusion events.

Copies of the documents included in the final resolution for USI A–17 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. A copy is also available for public inspection and/or copying at the NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC.

Dated at Rockville, Maryland this 14th day of August, 1989.

For the Nuclear Regulatory Commission.

R. Wayne Houston,

Director, Division of Safety Issue Resolution, Office of Nuclear Regulatory Research.

[FR Doc. 89–19730 Filed 8–21–89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-237 and 50–249]

Commonwealth Edison Co. (Dresden Nuclear Power Station, Unit Nos. 2 and 3); Exemption

I

Commonwealth Edison Company (CECo, the licensee) is the holder of Provisional Operating License No. DPR–19 and Facility Operating License No. DPR–25 which authorizes the operation of Dresden Nuclear Power Station, Unit Nos. 2 and 3 (the facilities) at a steady state power level not in excess of 2,527 megawatts thermal. This license provides, among other things, that the facilities are subject to all rules, regulations, and Orders of the Nuclear Regulatory Commission (the Commission or the staff) now or hereafter in effect. The facilities are boiling water reactors (BWR's) located at the licensee's site in Grundy County, Illinois.

II

Section 50.54 of Title 10 of the Code of Federal Regulations (10 CFR 50.38, "Fire Protection") and Appendix R to 10 CFR part 50, "Fire Protection Program for Nuclear Facilities Operating Prior to January 1, 1979," set forth certain fire protection features required to satisfy the General Design Criterion related to fire protection (Criterion 3, Appendix A to 10 CFR part 50).

Section III.G of Appendix R requires fire protection for equipment important to post-fire shutdown. Such fire protection is achieved by various combinations of fire barriers, fire suppression systems, fire detectors, and separation of safety trains (III.G.2) or alternate post-fire shutdown equipment free of the fire area (III.G.3). The objectives of this protection is to assure that one train of equipment needed for hot shutdown would be undamaged by fire, and that systems needed for cold shutdown could be repaired within 72 hours (III.G.1).

III

By letter dated August 10, 1984 as supplemented by letters dated September 18, 1985, March 12 and March 20, 1986, CECo requested exemptions from section III.G of Appendix R to 10 CFR part 50. By letter dated October 16, 1985, CECo submitted additional fire protection exemption requests and by letter dated May 30, 1986, CECo further revised exemption request submittals based on a meeting held with the NRC staff on April 8, 1986. This information was further supplemented by CECo in a letter dated April 14, 1987. A description of the exemptions requested and a summary of the Commission's evaluation follows.

Exemption Requested

The licensee requested exemptions from the requirements of section III.G.1 of 10 CFR part 50 Appendix R which, in part, requires that one train of systems necessary to achieve and maintain hot shutdown be free of fire damage. In their submittals, the licensee identified several shutdown circuits and associated equipment that could be compromised due to failure or fuses associated with these circuits, or due to fire induced spurious operation of certain shutdown equipment. The licensee requested exemptions in regard to the following equipment and failure modes:

(1) Condensate transfer pumps 2A and 3A; control circuits for 4KV and 480V safe shutdown circuit breakers; inboard isolation condenser (IC) valves; and Swing DG 2/3 control circuits affected by postulated fuse failures due to inadequate electrical isolation from circuits compromised by the fire.

(2) 4KV and 480V safe shutdown buses affected by failures of non-safety load circuits to a fire.

(3) Reactor relief valves affected by fire induced failures of associated circuits causing their spurious operation.

The licensee proposed hot shutdown repairs to justify their request for exemption from section III.G.1. Fire induced postulated failures of fuses protecting safe shutdown circuits, prior to the isolation of these circuits for local control, was justified by evidence of redundant manual controls including pulling out of appropriate fuses, and by controls for fuse replacement. The staff determined that the licensee controls for the location, accessibility, surveillance, and operator safety in regard to replacement of fuses and other proposed manual controls are acceptable.

Repairs for fuse failures caused by high impedance faults associated with common power sources and fire induced spurious operation of equipment were justified by evidence of established plant shutdown procedures and controls requiring tripping of circuit breakers, operating disconnect switches, and removing fuses. These procedures also require shedding of non-safety loads from appropriate 4KV and 480V safety buses, and the removal of 125V DC control power fuses from appropriate non-safety load circuit breakers. The staff determined these procedures and controls to be acceptable.

The staff has also determined that there is reasonable assurance that the licensee's proposed manual actions including the hot shutdown repairs (fuse replacement) meet the intent and purpose of IE Information Notice No. 85–09, "Isolation Transfer Switches and Post-Fire Shutdown Capability," dated January 31, 1985, and are therefore acceptable.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case, the hot shutdown repairs involving fuse removal and replacement preclude the possibility of postulated fire induced fuse failures and high impedance faults from impairing the operability of required safe shutdown systems from performing their safety function. Thus, the underlying purpose of the rule would be satisfied without requiring redundant fusing and electrical isolation.

Exemption Requested

The licensee requested an exemption from the requirements of section III.G.2 of Appendix R because intervening combustibles or fire hazards are present between the redundant trains of safe shutdown equipment in the upper and lower crib houses (Fire Zone 11.3 Crib House).

The staff's principal concern was that the intervening combustibles and fire hazards may create a path for the spread of fire between redundant safe shutdown systems and result in a loss of safe shutdown capability. However, because of the light fuel load in these zones, a fire of significant magnitude or duration to cause a loss of safe shutdown capability is not expected to occur.

If a fire should occur, it should not spread from the place of origin or endanger redundant pumps in the upper or lower crib house because the installed curbs should contain lubricating oil spills, sprinkler systems installed above cable trays and in other areas should extinguish or control fires to prevent their spread via intervening combustibles, and the detection systems or water flow alarms should alert the plant fire brigade to respond to the fire. Upon arrival, the fire brigade should extinguish the fire if the sprinkler systems have not. On this basis, the staff concludes that the licensee's alternative fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.2.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case, the light fuel load in these zones in combination with the existing fire protection features and completed modifications minimize the possibility of a fire in one train spreading and causing damage to the redundant train. Thus the underlying purpose of the rule would be satisfied without requiring the 20 foot minimum separation distance free of intervening combustible material

Exemption Requested

The licensee requested an exemption from the requirements of Secton III.G.2 of Appendix R in the following fire zones: Fire Zone 1.1.2.2, Unit 2 Reactor Building, Elevation 517 feet, 6 inches; Fire Zone 1.1.2.3, Unit 2 Reactor Building, Elevation 545 feet, 6 inches; Fire Zone 1.1.1.2, Unit 3 Reactor Building, Elevation 517 feet, 6 inches; Fire Zone 1.1.1.3, Unit 3 Reactor Building, Elevation 517 feet, 6 inches. These exemptions were submitted because: although safe shutdown equipment in these zones is separated by a horizontal distance of more than 20 feet, intervening combustibles or fire hazards are present between the redundant trains of equipment (reactor coolant water level and pressure instrumentation) and automatic fire suppression systems are not provided throughout the zones.

The staff's principal concern was that the intervening combustibles and fire hazards may create a path for the spread of fire between redundant safe shutdown systems and that the lack of fire suppression systems may permit the fire to continue and result in a loss of safe shutdown capability. However, because of the light to moderate fuel load, it is not expected that a fire of significant duration or magnitude would occur. Intervening combustibles in Fire Zones 1.1.2.2, 1.1.2.3, 1.1.1.2, and 1.1.1.3 provide a path for the spread of fire between redundant safe shutdown systems in the form of cables in trays. However, cable quantities along these paths are small, path distances are at least 75 feet, and the licensee has installed fire detection systems in all four of these zones and fire stops in cable trays in Fire Zones 1.1.2.2, 1.1.1.2, 1.1.2.3 and 1.1.1.3 which cross from one side of the Reactor Building to the other. Should a fire start, it should not spread to endanger redundant systems because the detection systems will alert the plant fire brigade to respond to the fire prior to extensive spread. On this basis, the staff concludes that the licensee's proposed fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.2.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not nececsary to achieve the underlying purpose of the rule. In this case, the light to moderate fuel load in combination with the fire detection systems installed by the licensee in all four of these zones and fire stops in cable trays in all four zones which cross from one side of the reactor building to the other minimize the possibility of a fire in one train spreading and causing damage to the redundant train. Thus the underlying purpose of the rule would be satisfied without requiring the 20 foot minimum separation distance free of intervening combustible material.

Exemption Requested

The licensee requested an exemption from the requirements of section III.G.3 of Appendix R in 23 fire zones located in Reactor Building Fire Areas RB2–1 and RB2–11 for Unit 2 and Reactor Building Fire Areas RB3–II for Unit 3 because fire detection systems and/or fixed fire suppression systems have not been installed in zones or areas for which alternative shutdown capability is provided.

The staff's principal concern was that a fire in one of these fire zones could cause a loss of normal safe shutdown capability. However, the fire loading in all of these fire zones ranges from negligible to low an in no case does the equivalent fire severity exceed 21 minutes. Because of the low combustible loading, a fire of significant magnitude or duration in not expected to occur. Except for seven fire zones, area-wide fire detection is provided. For the seven fire zones not having area-wide fire detection, there is either linear cable fire detection or spot fire detection, or the fire zones are open to an adjacent fire zone having fire detection installed throughout. Adequate means (extinguishers and/or hose lines) for manual fire fighting is available in all of the fire zones as required. Therefore, there is reasonable assurance that a fire in any of the 23 subject fire zones would be detected in its early stages and extinguished by the fire brigade before adjacent safety-related locations are threatened.

Should a fire damage any safe shutdown components in any of these locations before the fire brigade extinguishes it, an independent alternative shutdown capability is available to be used to achieve and maintain safe shutdown. The alternative safe shutdown path is separated from all fire zones where it is intended to be used by 3-hour fire rated barriers and any unsealed openings in a rated barrier are protected by an automatic suppression system in accordance with Generic Letter 86–10 for unsealed penetrations. On this basis, the staff concludes that the licensee's proposed alternative fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.3.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case, the low fire loadings and the area-wide or linear cable or spot fire detection in combination with adequate means for manual fire fighting in all 23 fire zones and independent alternative shutdown capability eliminate the possibility of not achieving or maintaining safe shutdown. Thus the underlying purpose of the rule would be satisfied without requiring fire detection systems and/or fixed fire suppression systems in each of the zones.

Exemption Requested

The licensee requested an exemption from the requirements of section III.G.3 of Appendix R in 22 fire zones located in Central, Eastern, and Western Zone Groups of the Turbine Building because fixed-fire suppression systems and/or fire detection systems have not been installed in zones for which an alternative safe shutdown capability is provided.

The staff's principal concern was that a fire in one of these fire zones could cause a loss of normal safe shutdown capability. Although some of these fire zones have a high fire load, the fire loading is due to diesel fuel or lubricating oils in steel tanks. These steel tanks have been reviewed to the provisions of the "Flammable and Combustible Liquids Code" (NFPA–30) published by the National Fire Protection Association. While the tanks do not conform in all details to this code, they do satisfy the major provisions of the code and are considered to provide an equivalent level of protection. In addition, these fire loads are protected by automatic fire suppression systems. With these exceptions, however, the fire loads range from negligible to moderate and, in no case, do they exceed a 1-hour equivalent fire severity. Because of these low to moderate fire loadings, and given that the diesel fuel and lubricating oil fire hazards are contained and protected by fire suppression systems, a fire of significant magnitude or duration is not expected to occur. All fire zones are protected by fire detection or fire suppression systems or both. Therefore, there is reasonable assurance that a fire in any of the subject fire zones will be detected in its early stages and extinguished by the automatic fire suppression systems or by the fire brigade before adjacent safety-related locations are threatened.

If a fire should damage any normal shutdown components in any one of these zones before it is extinguished, the alternative shutdown capability, which is independent of these zones per section III.L of Appendix R, is available to be used to achieve and maintain safe shutdown. On this basis, the staff concludes that the licensee's proposed alternative fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.3.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case, most of the fire zones have negligible to moderate fire loadings and the high fire loading zones, which have the diesel fuel and lubricating oil, are contained in tanks which satisfy the major provisions of the fire protection codes. Since all fire zones are protected by the fire detection cr suppression equipment or both and independent alternative shutdown capability is available, the possibility of not achieving or maintaining safe shutdown is eliminated. Thus the underlying purpose of the rule would be satisfied without requiring fire detection systems and/or fixed fire suppression systems in each of the zones.

Exemption Requested

The licensee requested an exemption from the requirements of section III.G.3 of Appendix R in Fire Zones 1.1.2.6 and 1.1.1.6 of the Unit 2 and 3 Reactor Building, respectively, because fire detection and/or fixed-fire suppression systems have not been installed since they form a part of the plant area for which an alternative shutdown system has been provided.

The staff's principal concern for a fire in one of these two fire zones is that a fire could develop and spread to adjacent fire zones (for which alternative shutdown capability has been provided) and damage normal safe shutdown system components contained therein. These two fire zones have fire loads that are negligible and, in no case, does the equivalent fire severity exceed 2 minutes. Because of the negligible fire loads, a fire of significant magnitude or duration is not expected to occur. Should a fire occur, it should develop slowly, remain small, and dissipate its heat to the surrounding environment without spreading to adjacent fire zones. The fire detection systems in the adjacent fire zones would detect the fire and the fire brigade would be summoned to extinguish the fire manually.

Since there are no safe shutdown components in these two fire zones, there is no concern for any immediate fire damage potential. On this basis, the staff concludes that the licensee's proposed alternative fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.3.

BEST COPY AVAILABLE

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case, the negligible fire loadings in combination with the fire detection systems and alternate shutdown capability in adjacent zones eliminates the possibility of not achieving or maintaining safe shutdown. Thus the underlying purpose of the rule would be satisfied without requiring fire detection systems and/or fixed fire suppression systems in both of these zones.

Exemption Requested

The licensee requested an exemption from the requirement of section III.G.2 of Appendix R in Fire Zones 1.1.2.1 and 1.3.2 of the Unit 2 Reactor Building and Fire Zones 1.1.1.1 and 1.4.1 of the Unit 3 Reactor Building because an automatic fire suppression system has not been installed.

The staff's concern was that a fire in one of these fire zones could cause a loss of normal safe shutdown capability. However, the fire loading in these fire zones is negligible. Because of the low combustible loading, a fire of significant magnitude or duration is not expected to occur. Fire detection is provided for these fire zones. Therefore, there is reasonable assurance that a fire in any of the subject fire zones will be detected in its early stages and extinguished by the fire brigade before redundant safety-related components are threatened.

The provision of a 1-hour fire rated wrapped conduit that contains the alternative isolation condenser valves power and control feeds routed through these fire zones also ensures that the alternative safe shutdown path remains available with respect to the isolation condenser valve flow path because of the low fire severity potential and lack of fire hazards in these four fire zones. On this basis, the staff concludes, that the licensee's proposed alternative fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.2.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case, the negligible fire loadings in combination with existing fire protection features and alternative shutdown capability eliminate the possibility of not achieving or maintaining safe shutdown. Thus the underlying purpose of the rule would be satisfied without requiring an automatic fire suppression system to be installed.

Exemption Requested

The licensee requested an exemption from the requirements of section III.G.2 of Appendix R in Fire Zones 1.1.1.2 and 1.1.1.3 of the Unit 3 Reactor Building because an automatic fire suppression system has not been installed.

The staff's concern for these two fire zones was that a fire could start and damage redundant Diesel Generator (DG)–⅔ cables or its bus ducts. DG–⅔ supplies power to both units and is required for emergency power in the event of a fire in most five zones.

For both of these fire zones, the fire load is low and does not exceed, on the average, a 21-minute fire severity. In the vicinity of the 1-hour wrapped DG–⅔ cables, there are either no combustibles or only a negligible amount. Therefore, it is expected that a fire would develop slowly and remain small.

Fire detection is provided for these two fire zones so that there is reasonable assurance that the fire brigade would be summoned in a timely manner. Because of the low fire load, the fire-brigade can quicly extinguish the fire. In the interim, the Unit 2 cables and bus duct which are 1-hour fire rated wrapped can successfully withstand the effects of a small fire associated with these two fire zones.

The staff has determined that there is reasonable assurance that a fire in either of these two fire zones will not result in the loss of safe shutdown capability. On this basis, the staff concludes that the licensee's proposed alternative fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.2.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case, the low fire loadings in combination with fire detection and protection features provided, eliminate the possibility of not achieving or maintaining safe shutdown. Thus the underlying purpose of the rule would be satisfied without requiring an automatic fire suppression system to be installed.

Exemption Requested

The licensee requested an exemption from the requirements of section III.G.3 of Appendix R in Fire Area TB–V located in the Main Control Room and Auxiliary Electric Equipment Room because a fixed-fire suppression system has not been installed in a fire area for which an alternative shutdown capability is provided.

The staff's primary concern for this fire in the main control room could cause the loss of normal shutdown capability. However, should a fire occur within the main control room, it is expected to be promptly detected by either the automatic fire detection system or by one of the station's personnel manning the area. The fire is expected to develop slowly and be extinguished promptly by the control room personnel or the fire brigade. Should fire damage be extensive, requiring evacuation, then an alternative safe shutdown system can be used. Because Fire Area TB–V has complete 3-hour fire rated barriers (except, as described above, for the unprotected structural steel supporting the Control Room ceiling which will not be subjected to temperatures high enough to cause concern), it is expected that a fire would not spread beyond the barriers because of the low fire load. On this basis, the staff concludes that the licensee's proposed alternative fire protection configuration provides an equivalent level of fire safety to that achieved by compliance with section III.G.3.

The special circumstances of 10 CFR 50.12 apply in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. In this case the existing fire detection system or station personnel manning the area should promptly detect the fire and once detected promptly, extinguish it. In the unlikely event that extensive damage, requiring control room evacuation should occur, the alternative safe shutdown system can be used. The above combination eliminates the possibility of not achieving or maintaining safe shutdown. Thus the underlying purpose of the rule would be satisfied without requiring a fixed-fire suppression system to be installed.

IV

Accordingly, the Commission has determined that pursuant to 10 CFR 50.12, this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission has further determined that special circumstances, as set forth in 10 CFR 50.12(a)(2)ii), are present justifying the exemption, namely that the application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. Specifics are

discussed in each exemption request, but in general the underlying purpose of the rule is to accomplish safe shutdown in the event of a single fire and maintain the plant in a safe condition. This is accomplished by assuring that sufficient undamaged equipment is available to support safe shutdown, assuming a fire within the area of concern. In the areas for which an exemption is being requested, passive as well as active fire protection features assure that any single fire will not result in the loss of safe shutdown capability. These features include fire detection systems, separation distance, fire barriers, water spray systems to preclude propagation, and manual actions. The fire protection features, in conjunction with low combustible loadings and in some cases physical location and configurations, provide a high degree of assurance that a single fire will not result in loss of post-fire shutdown capability.

Accordingly, the Commission hereby grants the exemptions from the requirements of 10 CFR part 50, appendix R as described in section III above.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no significant impact on the environment (54 FR 32399) August 7, 1989.

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 15th day of August 1989.

For the Nuclear Regulatory Commission.

Gary M. Holahan,

Acting Director, Division of Reactor Projects—III, IV, V, and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Revised, File No. 270–325, Rule 15c2–6]

Forms Under Review By Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272–2142

Upon Written Request Copy Available From: Securities and Exchange Commission, Public Reference Branch, 450 Fifth Street NW., Washington, DC 20549

Notice is here given that, pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for clearance Rule 15c2–6, which would require a registered broker-dealer who recommends a Designated Security to a person other than an established customer to: (1) Approve the customer's account for transactions in Designated Securities by making a documented suitability determination; and (2) obtain written agreement to the transaction from the customer. Four hundred respondents incur an estimated average of seventy eight burden hours to comply with this rule. The estimated average burden hours are made solely for the purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even a representative summary or study of the cost of Commission rules and forms.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with Commission rules and forms to Kenneth A. Fogash, Deputy Executive Director, 450 Fifth Street NW., Washington, DC 20549–6004, and Gary Waxman, Clearance Officer, Office of Management and Budget [Paperwork Reduction Project 3235–03zz], Room 3208, New Executive Office Building, Washington, DC 20543.

Dated: August 16, 1989.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[34–27139; SR–DTC–88–19]

Self-Regulatory Organizations; Depository Trust Company; Order Approving Proposed Rule Change Implementing Automated Tender Offer Program

August 14, 1989.

On November 23, 1988, the Depository Trust Company ("DTC") filed a proposed rule change (File No. SR–DTC–88–19) under section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] to implement the Automated Tender Offer Program ("ATOP"). Notice of the proposal was published in the **Federal Register** on December 13, 1988.[2] No comments were received. On February 13, 1989, the Commission granted temporary approval of the proposal for a period of 90 days.[3] Subsequently, on April 13, 1989, DTC filed an amendment to the proposal that included ATOP operating procedures and an ATOP agent agreement.[4] On May 4, 1989, the Commission extended approval of the proposal for an additional 90 days.[5] This order grants permanent approval of the proposed rule change.

I. Description of the Proposal

The proposed rule change will implement ATOP, which is designed to further automate the manner in which tender and exchange offers are processed through DTC. For tender or exchange offers declared eligible for ATOP by DTC, ATOP will permit DTC participants to transmit electronically through DTC to a bidder's agent acceptance of and deliver securities on deposit at DTC that the participant intends to tender.

To accept an offer through ATOP, a participant will send an ATOP instruction to DTC through DTC's Communication system.[6] The ATOP instruction will contain the same information currently contained in DTC's hardcopy Voluntary Offering Instruction form and a special field in which the participant will acknowledge that it has received and agrees to be bound by the terms of the letter of transmittal. If the participant has correctly sent the ATOP instruction and has sufficient securities in its DTC account,[7] DTC will deduct the specified securities from the participant's account and add them to the tender or exchange agent's account. DTC then will generate hardcopy messages reflecting this transaction on the PTS printers in the Offices of the participant and agent. After the close of the offer, the securities are surrendered to the agent, who then makes payment to DTC, which in turn distributes the funds or securities to the tendering participants.

---

[1] 15 U.S.C. 78(b)(1).

[2] Securities Exchange Act Release No. 26344 (December 7, 1988), 53 FR 50145.

[3] Securities Exchange Act Release No. 26538 (February 13, 1989), 54 FR 7316.

[4] Securities Exchange Act Release No. 26757 (April 21, 1989), 54 FR 18619.

[5] Securities Exchange Act Release No. 26784 (May 4, 1989), 54 FR 20221.

[6] Because the proposal was fully described in a previous order, only a brief description of ATOP is included here. For a more complete description of ATOP, *see* Securities Exchange Act Release No. 26538 (February 13, 1989), 54 FR 7316. For a description of DTC's communication systems, *see* Securities Exchange Act Release Nos. 24216 (March 3, 1987), 52 FR 8996; 20519 (Dec. 30, 1984), 49 FR 996.

[7] If the participant does not have a sufficient amount of securities in its DTC account at the time the ATOP instruction is submitted, the ATOP instruction will recycle until a sufficient amount of securities are in the account. If the participant does not have a sufficient amount of securities in the account by the end of the day, the ATOP instruction will not be processed.

Under ATOP, participants that accept an offer through the bidder's agent may surrender securities through ATOP. A participant having securities on deposit with DTC may accept an offer through the offeror's agent (also known as a "guarantee of delivery"). The participant then may surrender the securities by means of an ATOP instruction. The ATOP instruction must include an acknowledgement of the letter of transmittal and verification and the date of the acceptance of the offer to the offeror's agent. An incomplete instruction will not be processed. A complete instruction will be processed similar to an offer accepted through ATOP, including the movement of securities to the offeror's agent's account, generation of hardcopy messages and distribution of funds or securities.

II. DTC's Rationale

DTC states that the proposed rule change is consistent with the requirements of the Act and the rules thereunder applicable to DTC. Specifically, DTC believes that the proposed enhancement to DTC's tender and-exchange offer services is consistent with the requirement to safeguard securities and funds in DTC's custody or control or for which it is responsible under Section 17A of the Act.

DTC also states that ATOP will alleviate problems arising from use of hardcopy documents in tender and exchange offers, such as the risk of loss, delay during shipment and the expense and labor involved in the physical handling of documents. In addition, ATOP will provide agents for tender and exchange offers with an improved ability to control the processing of such offers by making more information available to the agent (and to the bidder) while an offer is open.

III. Discussion

The Commission believes that the proposal is consistent with section 17A of the Act in that it promotes the prompt and accurate clearance and settlement of securities transactions. ATOP will improve tender and exchange offer processing by decreasing risk of loss, reducing participant costs and providing a later cut-off date for the submission of instructions.

ATOP is one step in a continuing effort to bring to the tender and exchange offer processing area the benefits of automation that many other areas of the securities processing industry have had for years. Originally, processing of tender and exchange offers was not integrated into the National Clearance and Settlement System and tender activity was handled through inefficient physical settlement. Significant improvement occurred after the promulgation of Exchange Act Rule 17Ad–14 in 1984, which requires the transfer agent for an issue that is the subject of a tender or exchange offer to establish an account at one or more qualified registered securities depositories to receive tendered securities and letters of transmittal from participants.[8] Since that time Rule 17Ad–14 has encouraged a majority of the tender and exchange offer processing activity to be brought within the automated, centralized environment of securities depositories such as DTC, which processes tender and exchange offers through its Voluntary Offering Program. The Commission agrees with DTC that the rule filing promotes the prompt and accurate clearance and settlement of tender and exchange offer processing by eliminating much of the hardcopy document movement between and among participants, DTC and agents.

DTC's operation ATOP during the pilot period has been smooth. As of July 14, 1989, DTC had processed four offers through ATOP and has six more that were still open. DTC had processed 1,516 instructions involving 22.5 million shares of stock and 1.4 million bonds with a total dollar value of over $681 million (based on tender price). DTC estimates that 200–300 participants have used ATOP to submit tender instructions and a letter of transmittal. DTC has represented that it has sufficient operation capacity to handle a foreseeable peak volume of tender or exchange offer instructions and deliveries through ATOP.[9]

The Commission notes that ATOP will provide, in essence, facilities for communications between agents and participants. Although Exchange Act Rule 17Ad–14 requires agents to establish accounts with DTC because DTC is a qualified securities depository, nothing in that rule currently requires agents to participate in ATOP or to accept ATOP transmittals absent an agreement to do so.

IV. Conclusion

The Commission finds that the proposal is consistent with the requirements of the Act, particularly section 17A of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b) of the Act, that the proposed rule change (SR–DTC–88–19) be, and hereby is, permanently approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

Self-Regulatory Organizations; Intermarket Clearing Corporation; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Use of Material, Non-Public Information

August 11, 1989.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on July 28, 1989, The Intermarket Clearing Corporation ("ICC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of this rule is to implement the provisions of regulation 1.59(c) of the Commodity Exchange Act. Regulation 1.59(c) generally prohibits governing members of self-regulatory

organizations who possess material, non-public information obtained as a result of their official duties as board or committee members from using or disclosing such information. The general purpose and effect of the prohibition was discussed in the Commodity Futures Trading Commission's release published in the **Federal Register** on December 29, 1987.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Proposed rule 223 would prohibit, pursuant to regulation 1.59(C) of the Commodity Exchange Act, a member of ICC's Board of Directors or a member of any committee of ICC from using or disclosing, for any purpose other than the performance of such member's official duties as a governing member, material, non-public information obtained as a result of such member's participation on the Board or any committee. The Rule further provides that if a governing member can show that a transaction was in the ordinary course of business, he will be deemed not to have misused the information he possessed unless it can be shown that he would not have effected the transaction in the absence of such information.

The proposed rule change is consistent with the purposes and requirements of section 17A of the Securities Exchange Act of 1934, in that it will limit the use of material, non-public information obtained by governing members as a result of their official duties as board members or committee members. This limitation, in turn, is necessary for the protection of investors and the maintenance of a fair and orderly market.

B. Self-Regulatory Organization's Statement on Burden on Competition

ICC does not believe that the proposed rule change would impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

ICC did not solicit nor did it receive any comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of SR–ICC–89–1 will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to file number SR–ICC–89–1 and should be submitted by September 12, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[FR Doc. 89–19725 Filed 8–21–89; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–27144; File No. SR–NASD–89–36]

Self-Regulatory Organizations; Notice of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Registration Category, Study Outline and Specifications for Series 28 Examination, Introducing Broker/Dealer Financial and Operations Principal

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on July 28, 1989 the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule amends Schedule C of the NASD By-Laws to add an additional category of registration, Introducing Broker/Dealer Financial and Operations Principal. Upon effectiveness of the proposed amendment, the new text would be designated as part II, section (2)(c) of schedule C. The text of the change is as follows:

(c) Limited Principal—Introducing Broker/Dealer Financial and Operations:

(i) Every member of the Corporation, which is operating pursuant to the provisions of SEC Rule 15c3–1(a)(2) (i) or (vi) and to the provisions of SEC Rule 15c3–3(k)(2)(ii), shall designate as Limited Principal—Introducing Broker/Dealer Financial and Operations those persons associated with it, at least one of whom shall be its chief financial officer, who perform the duties described in Part II, section (2)(c)(ii) hereof. Each person associated with a member who performs such duties shall be required to register as a Limited Principal—Introducing Broker/Dealer Financial and Operations with the Corporation and shall pass an appropriate Qualification Examination before such registration may become effective.

(ii) The term "Limited Principal—Financial and Operations" shall mean a person associated with a member whose duties include:

(a) final approval and responsibilities for the accuracy of financial reports submitted to any duly established securities industry regulatory body;

(b) final preparation of such reports;

(c) supervision of individuals who assist in the preparation of such reports;

(d) supervision of and responsibility for individuals who are involved in the actual maintenance of the member's books and records from which such reports are derived;

(e) supervision and/or performance of the member's responsibilities under all financial responsibility rules promulgated pursuant to the provisions of the Securities Exchange Act of 1934;

(f) overall supervision of and responsibility for the individuals who are involved in the administration and maintenance of the member's back office operations; or

(g) any other matter involving the financial and operational management of the member.

Subsequent Sections To Be Re-Numbered Accordingly.

The National Association of Securities Dealers, Inc. ("NASD") is also submitting the examination specifications and study outline for this registration category. The examination will be designated Series 28. The specifications and study outline items do not involve any textual changes to the NASD's By-Laws, Schedules to the By-Laws, rules, practices or procedures.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In implementing the recommendations of the Regulatory Review Task Force, the NASD Board of Governors determined that it was appropriate to approve a new registration category, Introducing Broker/Dealer Financial and Operations Principal, for principals of introducing general securities firms. All introducing and clearing firms are required to qualify financial and operations principals on the Series 27 examination. It was recognized, however, that the Series 27 examination tested knowledge of subject areas such as margin accounts, the Uniform Practice Code and the Customer Protection Rule (SEC Rule 15c3–3), which would not be relevant to a financial and operations principal at an introducing firm. The Board determined that the proposed registration category would address this situation, while still assuring an appropriate level of qualifications in introducing firms in the financial and operations area. The proposed registration category is also intended to povide greater flexibility to members in qualifying their personnel.

With respect to the Series 28 examination, specifications and study outline, it is the NASD's responsibility under section 15A(g)(3) of the Securities Exchange Act of 1934 ("the Act") to prescribe standards of training, experience, and competence for persons associated with the NASD members. Pursuant to this statutory obligation, the NASD has developed examinations that are administered to establish that persons associated with NASD members have attained specific levels of competence and knowledge.

The proposed rule change is consistent with the provision of section 15A(g)(3) of the Securities Exchange Act of 1934, pursuant to which the NASD prescribes standards of training, experience, and competence for persons associated with NASD members.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the new registration category or the study outline and specifications impose any burden on competition that is not necessary or appropriate in furtherance of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments regarding the new registration category, study outline and specifications were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by September 12, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Dated: August 15, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. 34–27142; Filed No. SR–NASD–89–34]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Buy-In Procedures

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on July 13, 1989, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends the NASD's Uniform Practice Code (the "Code"). The proposed rule change amends the procedures for the handling of buy-ins and provides for the handling of buy-ins by electronic capabilities.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the

proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In September of 1987 the NASD initiated a review of the Code with the intent of amending, where necessary, certain provisions to bring the Code into conformity with current industry standards and practices. One of the sections which has been reviewed in particular is section 59, pertaining to "buy-in" procedures. Aftrer extensive study and discussion, the NASD Board upon the recommendation of the Uniform Practice Committee and its Operations Subcommittee has adopted proposed amendments to section 59 to more clearly define the procedures which should be followed by broker, dealers in their handling of "buy-ins". The new procedures are specifically designed to provide for the use of sophisticated and modern methods of sending "buy-in" notices and reflect current electronic notification and response methods. The amendments will allow members to utilize the Depository Trust Company's ("DTC") Participant Exchange Service ("PEX") which is an on-line system whereby a member can send and repond to various types of "buy-in" reorganization and stock loan items. PEX is expected to be implemented in the third quarter of 1989.

The proposed rule change is intended to reflect current methods of communciation and to eradicate from the Code provisions that are obsolete.

The NASD has adopted the proposed rule change pursuant to Section 15A(b)(6) udner the act. In pertinent part, section 15A(b)(6) mandates that the rules of a national securities association be designed to "* * * foster cooperation and coordination with persons engaged in regulatory, clearing, settling and facilitating transactions in securities * * * The NASD believes that the proposed rule change is consistent with these objectives.

B. Self-Regulatory Organziation's Statement on Burden on Competition

The NASD does not believe that the proposed rule change imposes any burden on competition not necessarily or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organziation's Statement on Comments on the Proposed Rule change Received from Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

With 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with repsect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above (SR–NASD–89–34) and should be submitted by September 12, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: August 15, 1989.

Jonathan G. Katz,

Secretary.

[FR Doc. 89–19722 Filed 8–21–89; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 34–27143; File No. SR–NSCC–89–10]

Self-Regulatory Organizations; Notice of Filing of the Proposed Rule Change by National Securities Clearing Corp.; Regarding a Description of NSCC's Telecommunications System

August 15, 1989.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on July 19, 1989 NSCC filed the proposed rule change File number SR–NSCC–89–10, with the Securities and Exchange Commission as described in Items I, II, and III below, which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of a description of NSCC's telecommunications system.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) The purpose of the proposed rule filing is to comply with the Commission's request that NSCC describe its Data Communications Services, which facilitate the automated transmission of data between Members and the computer system operated by SIAC, NSCC's facilities manager.

The physical connection for the transmission of data is established by a communications link between the Member's Main Frame Computer or Personal Computer (PC) and SIAC's Main Frame Computer. When Members use Main Frame Computers, each Member develops its own application software that delivers data to (or receives data from) SIAC for a particular service in an NSCC prescribed standard manner. That is, NSCC prescribes the input and output formats, but the Member collects, edits and prepares data and then transmits it to (or receives it from) SIAC using the prescribed formats.

Members preferring to use a PC may also access SIAC's Main Frame Computer using NSCC's PC Access System or the IBM Information Exchange communications system, for input and output of bond data. NSCC also develops and provides the PC edit application software programs to simplify the Member's entry of data. Using the Information Exchange, data is sent by the Member (or SIAC) to a central IBM service bureau where it is collected and then routed to SIAC (or the Member).

NSCC's PC Access System is a PC communication methodology which will eliminate the IBM Information Exchange so that data will pass directly between SIAC and the Members PC. Members are currently being converted from the IBM Information Exchange to NSCC PC Access. NSCC anticipates that this methodology will be completely in place by the end of 1989.

NSCC is also in the process of developing a PC application for input of RECAPS data (scheduled to be available this September) and input and output of ACATS data (scheduled to be available fourth quarter 1989). Other PC applications will follow.

Members can utilize most types of Main Frame Computers. The PC's must be either IBM or IBM clones (perform the functions of an IBM PC). For both PC's and Main Frame Computers, the Member may connect to the SIAC computer via a private line, a dial-up line connected to a dedicated port, or a dial-up line connected to a hunt group. A private line is installed directly between the Member's system and a SIAC port and provides direct communications without use of a dial-up telephone line.

A dial-up line connected to a dedicated port allows the Member to dial a telephone line directly to a SIAC port dedicted to that Member at SIAC. Each private line and dedicated dial-up line associated with each port has definitions which are unique to the Member, so that one Member's line will not work in another's port.

A dial-up line connected to a hunt group allows the Member to dial a telephone line into a SIAC sharing device called a hunt group. A hunt group device is comprised of a five ports with twenty-five sharing Members per group. Only five of the twenty-five Members may be connected at any point in time. Each Member is provided a telephone number for his group. The call will hunt to one of four other numbers associated with the other ports in the hunt group if the first port is being utilized. In the unlikely event that a Member is unable to connect with one of the ports in the hunt group because all ports are being utilized, the Member may call the SIAC Help Desk and SIAC provides temporary access to a different port, or the Member may redial at a later time.

There are several compatibility requirements between the Member's and SIAC's systems. For PC's, SIAC accepts private and dial-up line speeds of either 4800 or 9600 bps (bit per second). For Main Frames, SIAC accepts private and dial-up line speeds of 4800 bps, 9600 bps, or 56,000 bps. In addition, the Member's Main Frame Computer must be compatible with SIAC's line protocols. (Line protocols define the method by which computers communicate with each other and transmit data to each other.) The line protocols must be either bisynchronous or SNA and also support either RJE or NJE. Bisychronous protocol requires a pause and line turnaround for the transmission of data and its acknowledgment. SNA allows the passage of data and acknowledgments to occur simultaneously without line turnaround. RJE and NJE are the subsets of the line protocols which identify the Member's computer system configuration that the data is coming from, in order to establish the way the systems communicate.

The Member's Main Frame Computers may also support theree different optional bulk transfer mechanisms, BDT II, NDM and Netview File Transfer. These mechansims provide benefits for services that require high volumes of data because they allow data to be compressed and allow an interrupted transmission of data to be restarted without resending the entire file from the beginning.

As stated above, Members can access NSCC services through either private lines or dial-up lines. At this time, 25% of NSCC's 290 Member connections are private lines, and 75% are dial-up lines. NSCC notes and shares the Commission concerns, expressed in orders approving other clearing agency automated communications systems, about unauthorized access to securities, funds, and data through use of dial-up computer connections (see Securities Exchange Act Release No. 20519 December 30, 1983, approving file Nos. SR–DTC–76–8; SR–MSTC–77–9; SR–MCC–77–4; SR–Philadep–83–3). However, the Commission has approved dial-up systems presented by other clearing agencies based on a review of the safeguards employed by those systems and the economic and beneficial alternative that dial-up systems present to smaller participants. (See Release No. 21227 dated August 15, 1984 approving SR–MCC–84–5 and SR–MSTC–84–5, and Release No. 22939 dated February 28, 1986 approving SR–OCC–85–20).

NSCC has, similar to these clearing agencies, developed a system of intruder blocks for dial-up lines which prevent unauthorized access into NSCC's system. There are four levels of blocks which must be passed before data can actually be entered:

(a) *Level One:* (Physical Connection) There must be a match between the physical connection of the Member's Main Frame Computer or PC (modem type, line speeds and protocol) and the SIAC port accessed by the telephone number.

(b) *Level Two:* (Computer Operating System Connection) Each Member is provided a unique communication ID (identifying the communications link) when first connected to SIAC's Main Frame. This ID is checked each time the Member tries to access the SIAC Computer. The Member will not be able to enter Job Control Language (JCL) (which is a programming language used to communicate with a Main Frame), unless the ID is correct.

(c) *Level Three:* (Job Entry System "JES" Identification) The Member's system sends a unique JES identification ID and a unique password in Job Control Language in order to log on to JES. Each Member has his own version of JCL in order to define himself to the SIAC system. The JES identification ID and JCL password are checked for validity and cross checked against the communication ID in the SIAC system. If valid, the JCL password and JES identification will only allow the Member to enter JES. JES is a set of codes which allows the Member to transmit data for subsequent processing or receive data that has already been processed. The Member is locked out of other SIAC systems which might allow for other tasks. Once the Member is logged on to JES he can inform the system that data is forthcoming or request transmission of data to him.

(d) *Level Four:* (Data Entry) Another unique password identifying the Member to the application programs and Datatrak is entered with his JCL and then used to allow the Member access to SIAC's Datatrak system. Datatrak routes data to the appropriate application program for subsequent processing. In addition, Datatrak does a basic check on the data to assure that it contains the

proper date, and the proper ID for the program to run. Datatrak also checks the first four lines of the data to make sure that it conforms to the required format for the service to be accessed. Finally, Datatrak checks the total number of records sent and compares it with a masterfile of the usual number of records sent by a particular Member. If any of the information is incorrect, the data will either be rejected or held in abeyance and sent to a Datatrak control desk, where the Member is contacted to investigate the problem and determine further action.

If a Member fails to connect at any level in the process after three attempts, his communication ID will not be able to be entered into the system to tray access again. Once the problem is resolved, the Member will be re-activated by SIAC security.

Private lines are secure by virtue of the fact that there is a direct line installed between the Member's system and a port at the SIAC computer. That line is used only by the Member and can only be rearranged (connected to another port) by SIAC. Even if the line is rearranged, it would not work on another Member's port unless the port were reprogrammed. Once the physical connection is established, the various levels of intruder blocks are the same for private lines as for dial-up lines. Specific conversion procedures for either Main Frame Computers or PC's have been established for access by a Member.

(2) The proposed rule change promotes the prompt and accurate clearance and settlement of securities transactions by providing Members with automated, secure and cost effective access to NSCC services. Therefore, it is consistent with the requirements of the 1934 Act and the rules and regulations thereunder applicable to NSCC.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments have been solicited or received. NSCC will notify the Commission of any written comments received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designated up to 90 days of such date if it finds such longer period to be appropriate and published its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be approved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change that are filed with Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to SR–NSCC–89–10 and should be submitted by September 12, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 89–19721 Filed 8–21–89; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 34–27141; File No. PHLX–89–44]

Self-Regulatory Organizations; Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Relating to Revised Philadelphia Stock Exchange Automated Communication and Execution System ("PACE") Limit Order Execution Criteria.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on July 10, 1989, the Philadelphia Stock Exchange, Inc., filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange ("PHLX") submits as a proposed rule change revised Philadelphia Stock Exchange Automated Communication and Execution System ("PACE") limit order execution criteria. The text of Rule 229 (b) (1) through (4) has been replaced in full with the following new text. Rule 229.

* * * Supplementary Material

.10(b) Market orders and round-lot limit orders of 600 to 1000 shares and PRLs of 601 to 1099 shares and such limit orders of greater size up to 5000 shares that the specialist may accept must be entered at least (3) minutes prior to the opening in order to be guaranteed the opening price. Round-lot limit orders and PRLs entered after the opening shall be provided a professional execution in accordance with the following standards.

1. Circumstance: Limit order price is between the PACE quote when received by the specialist.

Standard: Each time the primary market prints a trade at the limit order's price, a portion of the limit order equal to the size of the primary market print shall be entitled to be excuted.

2. Circumstance: Limit order price is away from the PACE quote when received by the specialist; limit order price is on the PACE quote when received by the specialist.

Standard: The primary market quotation size associated with the PACE bid or offer which matches the limit price shall be ascertained (hereinafter referred to as the Reference Quote.) The limit order shall be entitled to an execution when the primary market prints a trade or trades equaling the limit price and aggregating to the size of the Reference Quote; after which each time the primary market prints a trade at the limit order's price, a portion of the limit order equal to the size of the primary market print must be executed.

3. Circumstance: Order is received by the specialist two (2) minutes or less prior to the close.

Standard: A reasonable effort will be made to execute the order.

4. Orders executed under this paragraph (b) will be executed at or within the primary market high-low range existing at the time of execution.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspect of such statements.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for the Proposed Rule Change

The PACE system provides to PHLX member organizations a cost efficient, competitive order delivery and execution system for public customer orders. In the years prior to 1983, the PACE system was considered to be a system for the delivery and execution of small orders, *e.g.*, 1 to 599 shares.

On May 17, 1983, the Securities and Exchange Commission ("SEC") approved a PHLX rule change (SR-PHLX-83-5) which permitted use of PACE computer facilities to enable member organizations to electronically transmit, directly to the specialist post, orders in issues and of order size designated by the specialist, with a minimum order size of 600 shares.

On September 17, 1986, the SEC approved a PHLX rule change (SR-PHLX-86-30) which increased PACE order size eligibility from 599 to 1099 shares. Orders up to 599 shares continued to be executed in accordance with PHLX Rule 229. Orders of 600 to 1099 shares were not subject to the execution parameters of Rule 229 and such orders were executed in accordance with other applicable rules of the PHLX.

On May 19, 1988, the SEC approved a PHLX rule change (SR-PHLX-87-30) which provided for a professional execution for limit orders of 600 shares or greater routed to specialists over PACE as well as guidance to PHLX specialists, by identifying the types of trades that constitute a professional execution of this class of limit orders. Such standards imposed a number of trading obligations upon PHLX specialists when executing PACE limit orders of 600 shares or more.

By specifying the execution standards set forth in SR-PHLX-87-30, the Exchange provided for increased consistency in the execution of limit orders on the floor and, at the same time, provided notice to PACE users of the kind of execution they can expect for larger limit orders delivered over the PACE system. Such standards are reflected in Commentary .10(b) of PHLX Rule 229.

The purpose of the instant proposed rule change is to simplify and improve the standards approved on May 19, 1988, based upon experience gained during the appoximately one (1) year of their use. Under the proposed rule change, both market and limit orders up to 599 shares will continue to be executed in accordance with the current provisions of Rule 229 and its accompanying Commentary .01 through and including .10(a).

Prior to this amendment, paragraph .10(b) dealt only with orders delivered after the opening. The present proposal adds a standard of guaranteeing the opening price on orders entered at least three (3) minutes prior to the opening. In the case of orders received by the specialist less than three (3) minutes prior to the opening, a reasonable effort will be made to execute such orders at the opening price.

The standard under Circumstance 1 has been amended to delete reference to the New York market since both New York and American Stock Exchange issues are traded through PACE. The reference to New York caused confusion. It is proposed that the reference be changed to primary market. In addition, reference to execution of marketable limit orders has been deleted because such standard applies to all orders, whether or not delivered through the PACE system and, therefore, it is confusing and redundant.

Circumstance 2 has been broadened to include a limit order price which is outside the PACE quote when received by the specialist. In either case, when the limit order price is away (*i.e.*, outside) the PACE quote when received by the specialist or when the limit order price is on the PACE quote when received by the specialist, after ascertaining the primary market quotation size, the specialist would be obligated to execute the limit order when the primary market prints a trade that is equivalent to the limit price and aggregates to the size of the reference quote.

Old Circumstance 3, which dealt with a limit order price which is outside the PACE quote when received by the specialist, has been deleted in its entirety and such orders have been included in the execution criteria of Circumstance 2. The previously established standard for execution of this type of order was confusing and difficult to administer. The new execution criteria improves and simplifies executions and provides better service to retail users of the PACE system.

New Circumstance 3 has been established in order to afford specialists the opportunity to seek execution of orders in other markets by means of the Intermarket Trading System ("ITS"). By the terms of PHLX rules, members must avoid trading through a superior bid or offer of another market which is an ITS participant. In order to avoid such an occurrence, a PHLX specialist may choose to send a commitment to trade to such other market against the superior bid or offer. Since the receiving market has up to two (2) minutes to respond to the commitment, at least that much time is required of the PHLX specialist to make such effort and receive a response prior to the close.

Old Circumstance 4, which dealt with a limit price traded through by a transaction reported on a market eligible to compose the PACE quote, has been deleted in its entirety because such standard applies to all orders whether or not delivered through the PACE system and, therefore, is confusing and redundant.

New Circumstance 4 provides that execution of an order under the conditions set forth in this proposal will not breach the existing primary market high or low. In other words, the order will be executed at or within the primary market high-low range existing at time of execution. This new standard improves substantially the competitiveness of the criteria as proposed.

Equity specialists and member organizations may choose to participate in trading on the PACE system or they may choose not to do so. To the extent a specialist chooses to accept orders through the PACE system as described herein, such orders are entitled to an execution under the terms of the proposed rule.

Since such stock has unique trading characteristics respecting depth, liquidity, volatility and so forth, not every stock may be suitable for a program involving execution of larger orders on the basis of predetermined execution criteria. Because of this, and in the interest of administrative ease, specialists choosing to participate in the program will establish an order eligibility size of either 2500 shares or 5000 shares on a stock by stock basis. Orders up to either size will be executed under the terms of the proposed rule. Except under unusual circumstances, the specialist must remain committed to his order size eligibility elections for at least six (6) months thereby proving stability and continuity to the list of issues in the program. Under exceptional or extraordinary circumstances, the Floor Procedure Committee may grant a specialist's withdrawal from the program.

The proposed rule change is consistent with section 6(b)(5) of the Act in that it will promote just and equitable principles of trade; facilitate transactions in securities and remove impediments to, and perfect the mechanism of, a free and open market and a national market system; and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by September 12, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: August 14, 1989.

Jonathan G.Katz,

Secretary.

BILLING CODE 4910-62-M

Federal Aviation Administration

[Summary Notice No. PE–89–33]

Petitions for Exemption; Summary and Disposition

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. the purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: September 11, 1989.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–10), Petition Docket No.______, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–3132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued at Washington, DC, on August 15, 1989.

Deborah Swank,

Acting Manager, Program Management Staff, Office of the Chief Counsel.

Petitions for Exemption

Docket No.: 24950
Petitioner: General Electric Company, Aircraft Engine Business Group
Sections of the FAR Affected: 14 CFR 21.325(b) (1) and (3)
Description of Relief Sought: To extend Exemption No. 4675 that allows Class I, II, and II products, which have been manufactured, assembled, and tested by Rolls Royce Limited, located in Derby, England, to be eligible for the issuance of export airworthiness approvals. Exemption No. 4675 will expire on December 29, 1989.

Docket No.: 24104
Petitioner: Robert Haveman Air Charter
Regulations Affected: 14 CFR 43.3(g)
Description of Relief Sought: To allow petitioner's pilots to change the seating configuration on petitioner's Cessna 310K, 401A, and 402B aircraft.

Docket No.: 25919
Petitioner: Kletus W. Rood
Sections of the FAR Affected: 14 CFR 121.383(c)
Description of Relief Sought: To allow petitioner to continue to serve as crewmember on commercial air carriers past his 60th birthday.

Docket No.: 25947
Petitioner: Embraer
Sections of the FAR Affected: 14 CFR 135.159 (a) and (b)
Description of Relief Sought: To allow petitioner to operate CBA–123 airplanes without being equipped with a gyroscopic rate-of-turn/slip-skid indicator. A backup, third attitude indicator would be substituted for the gyroscopic rate-of-turn indicator.

Docket No.: 25962
Petitioner: U.P. Exec Air
Sections of the FAR Affected: 14 CFR 43.3(g)
Description of Relief Sought: To allow petitioner's properly trained pilot to remove and reinstall seats and a stretcher in either of the two aircraft operated by the petitioner (a Cessna 310 and a Cessna 421).

Docket No.: 25184
Petitioner: Imperial Aviation, Inc.
Regulations Affected: 14 CFR 121.371(a)
Description of Relief Sought/ Disposition: To extend Exemption No. 4793 that allows petitioner to use certain original equipment manufacturers to perform maintenance, preventive maintenance, and alterations outside of the United States on petitioner's Fairchild FH–227 aircraft. Grant, August 10, 1989, Exemption No. 5084

Docket No.: 25351
Petitioner: USAir
Regulations Affected: 14 CFR 121.371(a) and 121.378
Description of Relief Sought/ Disposition: To amend Exemption No. 5005 that allows petitioner to utilize certain foreign original equipment manufacturers and related repair facilities to perform maintenance, preventive maintenance, and alterations on the compenents, parts, and applicances that are produced by such foreign manufacturers and used on the BAC 1–11, BAe–146, B–737–300, and MD–80 aircraft operated by USAir. The amendment would add the Fokker F–28 and F–100 and Boeing B–737–400 and B–767–200ER aircraft to the provisions of the exemption. Grant, August 2, 1989, Exemption No. 5005A

Docket No.: 25638
Petitioner: Midway Commuter Airlines
Sections of the FAR Affected: 14 CFR 135.429(a) and 135.435
Description of Relief Sought/ Disposition: To allow petitioner to use components, parts and accessories repaired, overhauled, or otherwise maintained by foreign original equipment manufacturers on its German-built DO228–201/202 aircraft. Grant, August 10, 1989, Exemption No. 5083

Docket No.: 25810, et al.
Petitioner: Mountain Air Cargo, Inc., et al.
Regulations Affected: 14 CFR 121.343(b)
Description of Relief Sought/ Disposition: To continue operation of certain aircraft with currently installed flight data recorders beyond the digital flight data recorder installation compliance data of May 26, 1989. Grant, May 25, 1989, Exemption No. 5051

Docket No.: 25972
Petitioner: Federal Express Corporation
Sections of the FAR Affected: 14 CFR 121.291(b0(1) and (d)
Description of Relief Sought/ Disposition: To allow petitioner to begin Boeing B–747 operations without first conducting a partial demonstration of emergency evacuation procedures and without showing by simulated ditching that it is able to efficiently carry out its ditching procedures. Grant, August 14, 1989, Exemption No. 5080

Docket No.: 25976
Petitioner: Resort Commuter, Inc.
Sections of the FAR Affected: 14 CFR 135.337(a)(2), (3), and (4) and 135.339(c)(1)
Description of Relief Sought/ Disposition: To allow petitioner to use certain instructor pilots of British Aerospace Corporation to train petitioner's initial cadre of pilots in the British Aerospace Jetstream 31 (BA–3201) type airplane without meeting all of the applicable training requirements of Subpart H of Part 135. Grant, August 7, 1989, Exemption No. 5081

Docket No.: 25986
Petitioner: Federal Express Corporation
Sections of the FAR Affected: 14 CFR 121.163(b)(1)
Description of Relief Sought/ Disposition: To allow petitioner to operate Boeing B–747 and McDonnell Douglas DC–8 airplanes without complying, at this time, with the requirements to conduct aircraft proving tests. Grant, August 4, 1989, Exemption No. 5079

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement; Forsyth County, North Carolina

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be

prepared for a proposed highway project within Forsyth County, North Carolina.

FOR FURTHER INFORMATION CONTACT: Roy C. Shelton, District Engineer, Federal Highway Administration, P.O. Box 26806, Raleigh, NC 27611, Telephone (919) 790–2852.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the City of Winston-Salem and the North Carolina Department of Transportation (NCDOT), will prepare an Environmental Impact Statement (EIS) on a proposed Northern Beltway (Western Section) location. The proposed action will be a multi-lane divided facility, potentially on a new location, and will run from US 158 (Clemmonsville Road area) to US 52 near the NC 65 intersection in Forsyth County. Access control to the facility has not been determined at this time.

Alternatives under consideration include: (1) The "no-build," (2) improving existing facilities, (3) a highway on new location. Letters describing the proposed action and soliciting comments are being sent to appropriate Federal, State, and local agencies. Public meetings and meetings with local officials and neighborhood groups will be held in the study area. A public hearing will also be held. Information on the time and place of the public hearing will be provided in the local news media. The draft EIS will be available for public and agency review and comment at the time of the hearing. No formal scoping meeting is planned at this time.

To assure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning the proposed action should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: August 14, 1989.

Roy C. Shelton,

District Engineer, Raleigh, NC.

[FR Doc. 89–19744 Filed 8–21–89; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement: Richmond and Montgomery Counties, North Carolina

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project within Richmond County and Montgomery County, North Carolina.

FOR FURTHER INFORMATION CONTACT: Roy C. Shelton, District Engineer, Federal Highway Administration, P.O. Box 26806, Raleigh, NC 27611, Telephone (919) 790–2852.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the North Carolina Department of Transportation (NCDOT), will prepare an environmental impact statement (EIS) on a proposed US 220 improvement. The proposed action will be a multi-lane divided facility potentially on a new location and will run from the existing four-lane section just south of Ellerbe, in Richmond County, to the existing four-lane section just north of Emery, in Montgomery County. The proposed facility will have full control of access with interchanges and grade separations.

Alternatives under consideration include: (1) The "no-build," (2) improving existing facilities, (3) a full control of access highway on new location.

Letters describing the proposed action and soliciting comments are being sent to appropriate Federal, State, and local agencies. Public meetings and meetings with local officials and neighborhood groups will be held in the study area. A public hearing will also be held. Information on the time and place of the public hearing will be provided in the local news media. The draft EIS will be available for public and agency review and comment at the time of the hearing. No formal scoping meeting is planned at this time. To assure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning the proposed action should be directed to the FHWA at the address provided above.

10:00 a.m.
Briefing on Status of NRC Technical Training Programs (Public Meeting)
2:00 p.m.
Briefing on Emerging Technical Issues (Public Meeting)
3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Friday, September 15

9:00 a.m.
Briefing on Status of Maintenance Initiatives and Schedule (Public Meeting)

ADDITIONAL INFORMATION: By a vote of 4-0 on August 10, the Commission determined pursuant to 5 U.S.C. 552b(e) and § 9.107(a) of the Commission's rules that Commission business required that "Affirmation of Motion by Joseph J. Macktal for Disqualification of Commissioners from Further Consideration of Matters Relating to Him; Petition to Intervene in Limerick Remand Proceeding and Request for Stay of Low-Power Operation of Limerick Unit 2; and Response to Limerick Ecology Action's Motion for Reconsideration" (Public Meeting) scheduled for August 10, be held on less than one week's notice to the public.

By a vote of 4-0 on Agusut 15, the Commission determined pursuant to 5 U.S.C. 552b(e) and § 9.107(a) of the Commission's rules that Commission business required that "Collegial Discussion of Items of Commissioner Interest" (Public Meeting) scheduled for August 15, be held on less than one week's notice to the public.

By a vote of 4-0 on August 16, the Commission determined pursuant to 5 U.S.C. 552b(e) and § 9.107(a) of the Commission's rules that Commission business required the "Affirmation of Morabito Request for Reconsideration" (Public Meeting) scheduled for August 16, be held on less than one week's notice to the public.

Note.—Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this data.

TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING): (301) 492-0292.

CONTACT PERSON FOR MORE INFORMATION: William Hill (301) 492-1661.

RESOLUTION TRUST CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:36 p.m. on Thursday, August 17, 1989, the Board of Directors of the Resolution Trust Corporation met in closed session to consider matters relating to the Corporation's corporate activities.

In calling the meeting, the Board determined, on motion of Mr. Robert J. Herrmann, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), seconded by Mr. Karl T. Hoyle, acting in the place and stead of Director of M. Danny Wall (Director of the Office of Thrift Supervision), concurred in by Director C.C. Hope, Jr. (Appointive), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2) and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 550 17th Street NW., Washington, DC.

Dated: August 17, 1989.

Resolution Trust Corporation.

Robert E. Feldman,
Acting Executive Secretary.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [54 FR 33146 August 11, 1989].

STATUS: Open meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Tuesday, August 8, 1989.

CHANGES IN THE MEETING: Time change/deletion.

An open meeting scheduled on Wednesday, August 16, 1989 at 10:00 a.m., was changed to Wednesday, August 16, 1989, at 9:30 a.m.

The following item was not considered at an open meeting on Wednesday, August 16, 1989, at 9:30 a.m.

Consideration of whether to issue a release for comment proposing amendments to transactional disclosure requirements to enhance shareholder analysis of corporate control transactions recommended or approved by the board of directors. Proposed amendments to Rule 13e-3 and Schedule 13E-3 would ensure that the purposes of the rule are met in all going private transactions in which management has a significant interest. The proposals also would impose a new disclosure requirement, modeled on the structure and interpretive positions of Rule 13e-3, for issuers engaged in extraordinary corporate transactions. Recommendations to reject a tender offer also would be subject to new disclosure requirements under certain circumstances. These additional disclosure requirements would be implemented by adding a new Item 703 to Regulation S-K. The Commission also will consider whether to propose amendments to Rule 14e-2 regarding the obligation of the issuer to respond promptly to revised tender offers. In addition, the Commission will consider whether to propose a procedure by which exhibits would be filed in connection with preliminary and definitive proxy materials. For further information, please contact Richard E. Baltz or Gregg Corso at (202) 272-3097.

Commissoner Fleischman, as duty officer, determined that Commission business required the above changes.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: John Kincaid at (202) 272-2300.

Jonathan G. Katz,
Secretary.

Part II

Department of Education

Office of Special Education and Rehabilitative Services

34 CFR Part 319

Training Personnel for the Education of the Handicapped; Grants to State Educational Agencies and Institutions of Higher Education; Notice of Proposed Rulemaking

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

34 CFR Part 319

RIN 1820–AA65

Training Personnel for the Education of the Handicapped—Grants to State Educational Agencies and Institutions of Higher Education

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Training Personnel for the Education of the Handicapped Program under Part D of the Education of the Handicapped Act (EHA), as amended. The present regulations are codified in 34 CFR Part 319. These proposed regulations are needed to implement amendments made to section 632 of the EHA by Public Law 100–630, section 104 (November 7, 1988). Section 632 authorizes grants to State educational agencies (SEAs) and institutions of higher education (IHEs). The intended effort of these proposed regulations is to clarify the statutory requirements and to improve the operation of the program.

DATE: Comments must be received on or before September 21, 1989.

ADDRESS: Comments concerning these proposed regulations should be addressed to Dr. Norman Howe, Division of Personnel Preparation, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3094–M/S 2651), Washington, DC 20202. A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Dr. Norman Howe, Telephone: (202) 732–1070.

SUPPLEMENTARY INFORMATION: The Training Personnel for the Education of the Handicapped Program is authorized by sections 631 and 632 of the EHA. Section 631 creates three specific subprograms, providing for grants to (1) nonprofit organizations for parent training and information, (2) IHEs and nonprofit organizations for training personnel for careers in special education and early intervention, and (3) IHEs, nonprofit organizations, and State agencies for special projects. Section 632 provides for grants to SEAs and IHEs, for preservice and inservice personnel training.

Under section 632 as amended in 1988, the Secretary is directed to make a grant of "sufficient size and scope" to each SEA for the purpose of assisting States in establishing and maintaining preservice and inservice programs to prepare personnel to meet the needs of handicapped infants, toddlers, children, and youth or supervisors of those persons, consistent with the personnel needs identified in the State's comprehensive system of personnel development under sections 613 and 676(b)(8).

The Secretary proposes to change the basic method for the allocation of these funds. In previous years, funds under this program have been awarded based on the applicant's need and on the quality of the grant application within a narrow range of funding. This method did not take into consideration the varying personnel training needs of States based on their population of students with handicaps.

The regulations propose that States henceforth will be awarded funds based on their proportionate share of the national "annual child count", i.e. the count of students receiving a free appropriate public education required under Part B of the EHA and Chapter 1 of Title I of the Elementary and Secondary Education Act of 1965 as amended by Public Law 100–297. Limited additional funds will be awarded for quality of the application (quality incentive funds). Moreover, the 1988 amendments provide that in any State in which the SEA does not apply for such a grant, any IHE within that State may apply for that grant. If any SEA chooses not to apply for any State grant award, it must notify all IHEs within the State of this decision one month prior to the competition closing date.

The Secretary may also make a limited number of awards to SEAs on a competitive basis.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

Paperwork Reduction Act of 1980

Sections 319.20, 319.22 and 319.33 contain information collection requirements. As required by the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3078, Switzer Building, 330 "C" Street, SW., Washington, DC 20202, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burdens, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burden found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in the document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 319

Colleges and universities, Education, Education of handicapped, Education-training, Grant programs-education, Reporting and recordkeeping requirements, State educational agencies, Teachers.

Dated: June 12, 1989.

Lauro F. Cavazos,

Secretary of Education

(Catalog of Federal Domestic Assistance No. 84.029; Training Personnel for the Education of the Handicapped)

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by revising Part 319 to read as follows:

PART 319—TRAINING PERSONNEL FOR THE EDUCATION OF THE HANDICAPPED—GRANTS TO STATE EDUCATIONAL AGENCIES AND INSTITUTIONS OF HIGHER EDUCATION

Subpart A—General

Sec.
319.1 What is the purpose of this part?
319.2 What activities may the Secretary fund?
319.3 What regulations apply to this program?
319.4 What definitions apply to this program?
319.5–319.9 [Reserved]

Subpart B—How Does One Apply for an Award?

319.10 How does an eligible applicant apply for an award?
319.11–319.19 [Reserved]

Subpart C—How Does the Secretary Make an Award?

319.20 How does the Secretary determine the amount of a State grant?
319.21 How does the Secretary make an award under the competitive grant process?
319.22 What selection criteria does the Secretary use in the State grant and competitive grant programs?
319.23–319.29 [Reserved]

Subpart D—What Conditions Must be Met After an Award?

319.30 Is student financial assistance authorized?
319.31 What are the student financial assistance criteria?
319.32 May the grantee use funds if a financially assisted student withdraws or is dismissed?
319.33–319.39 [Reserved]

Authority: 20 U.S.C. 1432 and 1434, unless otherwise noted.

Subpart A—General

§ 319.1 What is the purpose of this part?

The Secretary funds a mandatory State grant program and may conduct a competitive grant program under this part to assist States in establishing and maintaining preservice and inservice training programs that prepare personnel to meet the needs of infants, toddlers, children, and youth with handicaps or supervisors of such personnel.

(a) *State grant program.* Under the State grant program, the Secretary makes a grant to each State educational agency (SEA). If an SEA does not apply for a grant, the Secretary makes the grant to an institution of higher education (IHE) within that State.

(b) *Competitive grant program.* Under the competitive grant program, the Secretary may make grants to SEAs only (in addition to the grants awarded under the State grant program).

(Authority: 20 U.S.C. 1432)

§ 319.2 What activities may the Secretary fund?

(a) The Secretary supports preservice and inservice training programs that prepare personnel, or their supervisors, to serve infants, toddlers, children, or youth with handicaps.

(b) Any activities assisted under this part must be consistent with the personnel needs identified in the State's comprehensive system of personnel development.

(Authority: 20 U.S.C. 1432)

§ 319.3 What regulations apply to this program?

The following regulations apply to assistance under this program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), Part 75 (Direct Grant Programs), Part 77 (Definitions that Apply to Department Regulations), Part 79 (Intergovernmental Review of Department of Education Programs and Activities), Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments), Part 81 (General Education Provisions Act—Enforcement), and Part 85 (Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants)).

(b) The regulations in this Part 319.

(Authority: 20 U.S.C. 1432)

BEST COPY AVAILABLE

§ 319.4 What definitions apply to this program?

The following terms used in this part are defined in
34 CFR 77.1:

Applicant
Application
Award
Department
EDGAR
Fiscal year
Grant period
Preschool
Project
Public
Secretary
State
State educational agency

(Authority: 20 U.S.C. 1432)

§ 319.5–319.9 [Reserved]

Subpart B—How Does One Apply for an Award?

§ 319.10 How does an eligible applicant apply for an award?

(a) Each SEA may make an application to the Secretary for a competitive grant under § 319.1(b).

(b) If an SEA elects not to apply for a State grant under § 319.1(a), IHEs within that State may apply for the grant for that State. However, only one State grant may be awarded in each State. If any SEA chooses not to apply for the State grant award, it must notify all IHEs within the State of this decision one month prior to the competition closing date.

(c) If applications are submitted by more than one IHE within a State, the Secretary uses the selection criteria in § 319.22 to evaluate the applications. An IHE that proposes to provide preservice special education and related services training must demonstrate that it meets State and professionally recognized standards for the training of special education and related services personnel, as evidenced by appropriate State and professional accreditation, unless—as indicated in a published priority of the Secretary—the grant is for the purpose of assisting the applicant to meet those standards.

(Authority: 20 U.S.C. 1432)

§ 319.11–319.19 [Reserved]

Subpart C—How Does the Secretary Make an Award?

§ 319.20 How does the Secretary determine the amount of a State grant?

(a) The Secretary determines the amount of a grant under § 319.1(a) based upon the applicant's need for assistance under this part for activities in the State comprehensive system of personnel development, as follows:

(1) The Secretary provides each SEA a minimum proportionate share of no less than 80% of the funds available under this section, based on the State's proportion of the national child count provided under Part B of the Education of the Handicapped Act (EHA) and

Chapter 1 of Title I of the Elementary and Secondary Education Act of 1965, as amended.

(2) However, in order to ensure that each State receives an award of sufficient size and scope, no State will receive less than $75,000.

(b) After determining a State's grant under paragraph (a) of this section, the Secretary determines annually the additional amount of funds to be awarded for the quality of the application based on the criteria set forth in § 319.22(b).

(Authority: 20 U.S.C. 1432)

§ 319.21 How does the Secretary make an award under the competitive grant process?

(a) The Secretary may make a limited number of awards to SEAs on a competitive basis for the purpose of assisting States in establishing and maintaining preservice and inservice programs to prepare personnel to meet the needs of handicapped infants, toddlers, children, and youth or supervisors of those persons, consistent with the personnel needs identified in the State comprehensive system of personnel development.

(b) In any fiscal year, the Secretary may not expend for this competitive program an amount that exceeds 10% of the amount expended under section 632 of the EHA in the preceding fiscal year.

(Authority: 20 U.S.C. 1432)

§ 319.22 What selection criteria does the Secretary use in the State grant and competitive grant programs?

(a) The Secretary uses the criteria in paragraph (b) of this section to evaluate an application for a State grant (SEA or IHE applicant) and for a competitive grant.

(b)(1) *Extent of need for the project.* (30 points) The Secretary reviews each application to determine—

(i) The extent to which the project identifies and selects priority needs from the range of personnel needs identified in the State comprehensive system of personnel development;

(ii) The extent to which the project addresses the personnel needs selected by the applicant under paragraph (b)(1)(i) of this section; and

(iii) If appropriate, how the project relates to actual and projected personnel needs for certified teachers in the State as identified by the State educational agency in its annual data report required under section 618 of the Education of the Handicapped Act.

(2) *Program content.* (20 points) The Secretary reviews each application to determine the extent to which—

(i) Competencies that will be acquired by each trainee and how the competencies will be evaluated are identified;

(ii) Substantive content of the training to be provided is appropriate for the attainment of professional knowledge and competencies that are necessary for the provision of quality educational or early intervention services to infants, toddlers, children, and youth with handicaps;

(iii) Benefits to be gained by the number of trainees expected to be graduated or otherwise to complete training and employed over the next five years are described;

(iv) Appropriate methods, procedures, techniques, and instructional media or materials will be used in the preparation of trainees who serve infants, toddlers, children, and youth with handicaps;

(v) If relevant, appropriate practicum facilities are accessible to the applicant agency and trainees and will be used for such activities as observation, participation, practice teaching, laboratory or clinical experience, internships, and other supervised experiences of adequate scope, and length;

(vi) If relevant, practicum facilities for model programs will provide state-of-the-art educational services, including use of current and innovative curriculum materials, instructional procedures, and equipment; and

(vii) Program philosophy, program objectives, and activities to be implemented to attain program objectives are related to the educational or early intervention needs of infants, toddlers, children, and youth with handicaps.

(3) *Plan of operation.* (15 points) The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(i) High quality in the design of the project;

(ii) An effective plan of management that ensures proper and efficient administration of the project;

(iii) How the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) How the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition.

(4) *Evaluation plan.* (15 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(i) Are appropriate for the project; and

(ii) To the extent possible, are objective and produce data that are quantifiable including, but not limited to, the number of trainees graduated or otherwise to complete training and hired. (See 34 CFR 75.590 Evaluation by the grantee).

(5) *Quality of key personnel.* (10 points) The Secretary reviews each application to determine the quality of the key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(5) (i) and (ii) of this section plans to commit to the project;

(iv) How the applicant, as a part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition; and

(v) Evidence of the trainer's past experience and training in fields related to the objectives of the project.

(6) *Adequacy of resources.* (5 points) The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

(7) *Budget and cost-effectiveness.* (5 points) The Secretary reviews each application to determine the extent to which—

(i) The budget is adequate to support the project; and

(ii) Costs are reasonable in relation to the objectives of the project.

(Authority: 20 U.S.C. 1432)

§ 319.23–319.29 [Reserved]

Subpart D—What Conditions Must be Met After an Award?

§ 319.30 Is student financial assistance authorized?

A grantee may use grant funds to provide traineeships or stipends. The sum of the assistance provided to a student through this part and any other assistance provided the student may not exceed the student's cost of attendance. "Cost of attendance" means—

(a) Tuition and fees normally assessed a student carrying the same academic workload as determined by the institution, and including costs for rental or purchase of any equipment, materials, or supplies required of all students in the same course of study;

(b) An allowance for books, supplies, transportation, and miscellaneous personal expenses for a student attending the institution on at least a half-time basis, as determined by the institution;

(c) An allowance (as determined by the institution) for room and board costs incurred by the student that—

(1) For a student without dependents residing at home with parents, is not less than $1,500;

(2) For students without dependents residing in institutionally owned or operated housing, is a standard allowance determined by the institution based on the amount normally assessed most of its residents for room and board; and

(3) For all other students, is an allowance based on the expenses reasonably incurred by the students for room and board, except that the amount may not be less than $2,500;

(d) For less than half-time students (as determined by the institution) tuition and fees and an allowance for only books, supplies, and transportation (as determined by the institution) and dependent care expenses (in accordance with paragraph (g) of this section);

(e) For a student engaged in a program of study by correspondence, only tuition and fees and, if required, books and supplies, travel, and room and board costs incurred specifically in fulfilling a required period of residential training;

(f) For a student enrolled in an academic program that normally includes a formal program of study abroad, reasonable costs associated with the study (as determined by the institution);

(g) For a student with one or more dependents, an allowance (as determined by the institution) based on the expenses reasonably incurred for dependent care based on the number and age of the dependents;

(h) For a handicapped student, an allowance (as determined by the institution) for those expenses related to his or her handicap, including special services, transportation, equipment, and supplies that are reasonably incurred and not provided for by other assisting agencies; and

(i) For a student receiving all or part of his or her instruction by means of telecommunication technology, no distinction may be made with respect to the mode of instruction in determining costs, but this pararaph may not be construed to permit including the cost of rental or purchase of equipment.

(Authority: 20 U.S.C. 1432)

§ 319.31 What are the student financial assistance criteria?

Direct financial assistance may only be paid to students in preservice programs and only if—

(a) The student is qualified for admission to the program of study;

(b) The student maintains satisfactory progress in a course of study as provided in 34 CFR 668.16(e);

(c) The student is a citizen or a national of the United States.

(Authority: 20 U.S.C. 1432)

§ 319.32 May the grantee use funds if a financially assisted student withdraws or is dismissed?

Financial assistance awarded to a student that is unexpended because the student withdraws or is dismissed from the training program may be used for financial assistance to other students during the grant period.

(Authority: 20 U.S.C. 1432)

§ 319.33–319.39 [Reserved]

37 CFR Part 1

Deposit of Biological Materials for Patent Purposes; Final Rule

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Part 1

[Docket No. 70635-9174]

RIN 0651-AA13

Deposit of Biological Materials for Patent Purposes

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Final rule.

SUMMARY: The Patent Trademark Office (Office) is amending its rules of practice in patent cases to define procedures to govern the deposit of biological materials for patent purposes. Where an invention is or relies on a biological material which cannot be described in writing alone, and access to the biological material is necessary to satisfy the statutory requirements for patentability under 35 U.S.C. 112, these rules prescribe the procedures and conditions for making a deposit that will satisfy these requirements. These rules also prescribe examining procedures that will be used to address deposit issues, and the procedures pertaining to access to a deposit once a patent is granted.

EFFECTIVE DATE: January 1, 1990.

FOR FURTHER INFORMATION CONTACT: Charles E. Van Horn or Harris A. Pitlick by telephone at (703) 557-4035 or by mail marked to his attention and addressed to Box 8, Commissioner of Patents and Trademarks, Washington, DC 20231.

SUPPLEMENTARY INFORMATION: Every patent must contain a written description of the invention sufficient to enable a person skilled in the art to which the invention pertains to make and use the invention. Where the invention involves a biological material and words alone cannot sufficiently describe how to make and use the invention in a reproducible or repeatable manner, access to the biological material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. The rules set forth examining procedures and conditions of deposit which must be satisfied in the event a deposit is required to provide the necessary access. The rules do not address the substantive issue of whether a deposit is required under any particular set of facts.

These rules will be effective for all applications filed on or after January 1, 1990, and for all reexamination proceedings in which the request for reexamination was filed on or after January 1, 1990, except that deposits made prior to the effective date which are acceptable under current practice will be acceptable in such applications and proceedings. Since most of the provisions reflect existing policy and practice, little change to existing practice or burden on applicants for patent and patent owners relying on the deposit of biological material is anticipated. Applicants and patent owners are encouraged to comply with these rules prior to the effective date.

The final rules on the deposit of biological materials for patent purposes have evolved over several years of actual experience in administering the guidelines set forth in section 608.01(p) of the Manual of Patent Examining Procedure, including several administrative and judicial decisions, and interaction with interested public, bar and industry groups. A draft policy statement on the deposit of biological materials was circulated among interested bar and industry groups and published in the BNA-Patent, Trademark and Copyright Journal on May 22, 1986. An advance notice of proposed rulemaking setting forth rules being considered for deposit of biological material was published in the Federal Register, 52 FR 34080 (September 9, 1987), and in the *Official Gazette*, 1082 O.G. 47 (September 29, 1987). Finally, a notice of proposed rulemaking relating to the deposit of biological materials for patent purposes was published in the Federal Register, 53 FR 39420 (October 6, 1988), and in the *Official Gazette*, 1095 O.G. 47 (October 25, 1988).

In this notice of final rulemaking, a description of the changes in the text of the proposed rules is provided along with an explanation of the reasons supporting the changes. In addition, comments received in response to the notice of proposed rulemaking are analyzed. Finally, an explanation of the content of the final rules is provided, together with a compilation of relevant comments and responses that have been made during the rulemaking process. This explanation and compilation of previous comments and responses will serve as a set of guidelines that will be reproduced in the Manual of Patent Examining Procedure in due course.

Changes in Text of Proposed Rules

Several changes have been made in the text of the final rules from the text of the proposed rules which were published for comment in the notice of proposed rulemaking. Those changes are discussed below.

Section 1.200 as proposed has been renumbered as § 1.801 as adopted and the term "patent purposes" as proposed has been replaced with the term "purposes of patents for inventions under 35 U.S.C. 101" as adopted to clarify that the regulations pertaining to the deposit of biological material do not apply for purposes other than patents for inventions. Thus, these regulations are not applicable to applications for plant patents under 35 U.S.C. 161-164.

Section 1.201 as proposed has been renumbered as § 1.802 as adopted and the term "or Opportunity" in the heading thereof has been inserted after "Need" to reflect the permissive nature of a deposit when not necessary to satisfy 35 U.S.C. 112.

Paragraph (a) thereof as proposed provided that where a claimed invention is or relies on a biological material, the disclosure may include a deposit of the biological material deposited in a depository and under conditions complying with these regulations, provided a precondition was satisfied. The precondition was that the biological material not be known and readily available to the public and not be describable in writing alone. Paragraph (a) as adopted eliminates this precondition, does not require that the biological material be, or be used for, a claimed invention, does not require that the deposit be made in a depository and under conditions complying with these regulations, and more accurately states that the disclosure may include reference to a deposit, since the deposit is not physically part of the disclosure. Paragraph (a) as adopted merely provides that where an invention is, or relies on, a biological material, the disclosure may include reference to a deposit of such biological material.

Paragraph (b) of § 1.802 prescribes that biological material need not be deposited unless access to the material is necessary to satisfy 35 U.S.C. 112. If a deposit is necessary, it shall be acceptable if made in accordance with these regulations. Proposed paragraph (b) made no reference to 35 U.S.C. 112. Situations where a biological material is known and readily available to the public or can be made or isolated without undue experimentation are now listed as some, but not an exhaustive set, of the circumstances where deposit need not be made. The term "from known and readily available material" has been dropped from the end of the term "can be made or isolated without undue experimentation" as redundant. Paragraph (b) as adopted also prescribes that once deposited in a depository complying with these regulations, a biological material will be considered to be readily available even

though some requirement of law or regulation permits access only under conditions imposed for safety, public health or similar reasons. Proposed paragraph (b) did not include the condition of deposit in a depository complying with these regulations.

Proposed paragraph (c) thereof was limited to reference to a specific organism or other biological material in a specification disclosure as not creating a presumption that the material was necessary to satisfy 35 U.S.C. 112 or that a deposit thereof is required. Paragraph (c) as adopted eliminates the term "specific organism or other" as redundant and also includes the act of deposit by an applicant or patent owner as not creating a presumption that the deposit is or was required.

Section 1.202 as proposed has been renumbered as § 1.803 as adopted.

Paragraph (a) thereof as proposed prescribed that a deposit shall be made in any International Depositary Authority (IDA) or any other depository recognized as suitable by the Office. Paragraph (a) as adopted now specifies that such deposits shall be recognized for the purpose of these regulations so as not to preclude deposits made for other reasons such as a gratuitous disclosure. Paragraph (a)(2) as adopted eliminates the requirement in the proposed rule that impartial consultants be from the biotechnology industry or governmental agencies. Paragraph (a)(2) as adopted also contains new sub-subparagraph (vii) as a requirement which a suitable depository must meet, *viz.*, that it promptly notify depositors of its inability to furnish samples, and the reasons why. This requirement appeared, in essence, in proposed § 1.204(a).

Proposed paragraph (b) thereof has not been adopted. Replacement of deposits is governed solely by § 1.805, *infra*.

Proposed paragraph (c) thereof has been adopted as paragraph (b). In subparagraph (2) thereof, "(b)" has been changed to "(a)(2)" to correct an inadvertent error in the proposed rule.

Proposed paragraph (d) thereof has been adopted as paragraph (c) except that the reference to paragraph (a) has been changed to paragraph (a)(2) to more clearly delineate which category of depository is intended to be covered by this paragraph of § 1.803 and all references to other paragraphs whose designations have been changed by adoption of these rules have been changed accordingly.

Proposed paragraph (e) thereof has been adopted as paragraph (d).

Section 1.203 as proposed has been renumbered as § 1.804 as adopted.

Paragraph (a) thereof prescribed that an original deposit of a biological material may be made before filing an application for patent or, pursuant to a requirement that will be made by the examiner no later than the date the Notice of Allowance and Issue Fee Due is mailed, during pendency of the application for patent. Paragraph (a) as adopted adds a precondition to making an original deposit that the biological material be specifically identified in the application as filed. Since proposed paragraph (a) did not address original deposits made during the pendency of an application that were not made pursuant to a requirement of an examiner, the rule as adopted states that original deposits may be made during pendency of an application for patent, subject to § 1.809, *infra*, which prescribes, *inter alia*, when during the pendency of an application for patent a deposit shall be made when made pursuant to a requirement by the examiner.

Paragraph (b) thereof as proposed required a statement that, for an original deposit made after the effective filing date of an application for patent, the biological material deposited was the same biological material described in the application as filed. Paragraph (b) as adopted substitutes the word "a" for the word "the" since more than one biological material may be referred to in the application as filed, drops the word "same" and requires the statement that the biological material deposited is a biological material specifically identified in the application as filed.

Section 1.204 as proposed has been renumbered as § 1.805 as adopted and a reference to supplemental deposits has been added to the heading thereof. Paragraphs (a) and (b) of the section as proposed have been substantially rewritten as paragraphs (a), (b) and (c). New elements have been added and some eliminated, although some elements of the proposed rule on replacement deposits have been adopted, either with similar language or different language.

Elements of the proposed rule on replacement deposits which have not been adopted include a requirement that replacement deposits be made or be made within a specific time limit. Ramifications in Office proceedings from not making a replacement deposit, or in the case of a patent, not diligently making a replacement deposit, are stated.

A requirement in the proposed section that depositories promptly notify depositors of an inability to furnish samples has been adopted as § 1.803(a)(2)(vii), *supra*.

Paragraph (a) of § 1.805 requires a depositor, after receiving notice during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, to notify the Office in writing, in each application for patent or patent affected. In such a case, or where the Office otherwise learns, during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, the need for making a replacement or supplemental deposit will be governed by the same considerations governing the need for making an original deposit under the provisions set forth in § 1.802(b). A replacement or supplemental deposit made during the pendency of an application for patent shall not be accepted unless it meets the requirements for making an original deposit under these regulations, including the requirement set forth under § 1.804(b). A replacement or supplemental deposit made in connection with a patent, whether or not made during the pendency of an application for reissue patent or a reexamination proceeding or both, shall not be recognized by the Office unless a certificate of correction under § 1.323 is requested by the patent owner which meets the terms of paragraphs (b) and (c) of this section. The proposed rules did not provide for certificates of correction relating to replacement or supplemental deposits.

Paragraph (b) of § 1.805 prescribes that a request for certificate of correction under this section shall not be granted unless the certificate identifies the accession number for the replacement or supplemental deposit; the date of the deposit; and the name and address of the depository.

Paragraph (c) of § 1.805 prescribes that a certificate of correction under this section shall not be granted unless the request therefor is made promptly after the replacement or supplemental deposit has been made and includes a verified statement of the reason for making the replacement or supplemental deposit; a verified statement from a person in a position to corroborate the fact, and shall state, that the replacement or supplemental deposit is of a biological material which is identical to that originally deposited; a verified showing that the patent owner acted diligently—in the case of a replacement deposit, in making the deposit after receiving notice that samples could no longer be furnished from an earlier deposit, or in the case of a supplemental deposit, in making the deposit after receiving notice that the earlier deposit had become contaminated or had lost its capability to function as described in the specification; a verified statement that the term of the replacement or supplemental deposit expires no earlier than the term of the deposit being replaced or supplemented; and otherwise establishes compliance with these regulations, except that if the person making one or more of the required statements or showing is an attorney or agent registered to practice before the Office, that statement or showing need not be verified.

Paragraph (d) of § 1.805 prescribes that a depositor's failure to replace a deposit, or in the case of a patent, to diligently replace a deposit and promptly thereafter request a certificate of correction which meets the terms of paragraphs (b) and (c) of this section, after being notified that the depository possessing the deposit cannot furnish samples thereof, shall cause the application or patent involved to be treated in any Office proceeding as if no deposit were made.

Paragraph (e) as adopted is identical to proposed paragraph (d) except that the word "the" before "patent" has been replaced with "a" because the term "the patent" had no antecedent basis, and the term "according to these regulations" has been inserted after the word "replaced" to make it clear that the rebuttable presumption according to this paragraph applies only where the replacement deposit has been made according to these regulations.

Paragraph (f) as adopted is substantially similar to proposed paragraph (e) with respect to an applicant's ability to make a replacement for any reason during the pendency of an application for patent. Paragraph (f) extends such applicant's ability to supplemental deposits as well. The first two sentences of proposed paragraph (e) prescribing when a replacement deposit shall be made while an application is still pending and that an applicant notify the Office when a replacement deposit is necessary have been adopted in § 1.805(a), *supra*.

Paragraph (g) as adopted is identical to proposed paragraph (f) except that supplemental deposits are also included and the reference to another section therein has been changed to reflect its renumbering.

Paragraph (h) as adopted is substantially similar to proposed paragraph (g) except for two changes. One is that the word "the" before "biological material" has been changed to "a" because the term "the biological material" had no antecedent basis. The other change is replacement of the term "viable deposit is in the depository" with the term "depository can furnish samples thereof". The term "in the depository" was not clear. The word "viable" before "deposit" would have excluded biological materials not capable of reproduction either directly or indirectly. For biological materials which are so capable of reproduction, samples of viable deposits thereof which become non-viable cannot be furnished by the depository.

Paragraph (i) as adopted modifies paragraph (h) as proposed. Whereas the proposed rule proscribed a patentee from replacing a viable deposit where the depository can furnish samples, the rule as adopted states that the Office will not recognize in any Office proceeding a replacement deposit of a biological material made by a patent owner where the depository could furnish samples of the deposit being replaced.

Section 1.205 as proposed has been renumbered as § 1.806 as adopted. The proposed rule had set the term of deposit as, *inter alia*, at least thirty years after the date of a viable deposit. The rule as adopted sets the thirty-year term to begin after a deposit, before or during pendency of an application for patent, is made. The term of a deposit made by a patent owner is not prescribed. However, § 1.805(a), *supra*, prescribes that a replacement or supplemental deposit made in connection with a patent will not be recognized in any Office proceeding unless a certificate of correction under § 1.323 is requested by the patent owner which meets the terms of paragraphs (b) and (c) of § 1.805, one of which terms is a verified statement by the patent owner that the term of the new deposit expires no earlier than the term of the deposit being replaced or supplemented. An additional change in the rule as adopted is the replacement of the term "deposited biological material" with the word "deposit" since the former term had no antecedent basis.

Section 1.206 as proposed has been renumbered as § 1.807 as adopted. The rule as adopted is identical to the rule as proposed except for the reference to a rule which has been renumbered.

Section 1.207 as proposed has been renumbered as § 1.808 as adopted.

In paragraph (a) thereof, first word, "The" as proposed has been replaced with "A" because "The" had no antecedent basis.

In view of the non-adoption of proposed § 1.207(c), *infra*, paragraph (a)(2) as adopted refers to only paragraph (b), not paragraphs (b) and (c).

Paragraph (b)(1) as proposed permitted a depositor to require, *inter alia*, that a depository furnish samples only if a request for a sample is in writing and signed. Paragraph (b) as adopted permits a depositor to require a request to be in writing or other tangible form. The signing requirement, however, has not been adopted.

Paragraph (b)(3) as proposed permitted a depositor to require, *inter alia*, that a depository furnish the depositor with a copy of the request. This requirement has not been adopted.

Paragraph (c) as proposed has not been adopted.

Paragraph (d) as proposed, with one change, has been adopted as paragraph (c). The change is the insertion of the term "made to the Office" after the term "Upon request" to make it clear that certification imposes no burden on a depository.

Section 1.208 as proposed has been renumbered as § 1.809 as adopted.

The term "required" when referring to "deposit" in proposed paragraphs (a), (b) and (c) thereof has been changed to "needed" as adopted for purposes of consistency with § 1.802. The term "in case one has not been made, or" as proposed in paragraph (a) has been replaced with "and if needed," as adopted for purposes of clarification. The statement as proposed that a deposit accepted in any acceptable depository under § 1.202(a) shall be accepted for patent purposes if made under conditions complying with § 1.207(a) has not been adopted. The statement is redundant in view of the provision in § 1.802(b) as adopted that a deposit necessary for the satisfaction of 35 U.S.C. 112 shall be acceptable if made in accordance with these regulations. Since the question of deposits may come up in reissue applications and reexamination proceedings as well as in applications for patents, paragraph (a) as adopted covers examination of all such applications and proceedings. Paragraph (a) as adopted also refers to supplemental deposits since issues of the need for a supplemental deposit may arise where a deposit has lost its capability to function as described in the specification. Paragraph (a) as proposed prescribed that affected claims would be rejected in an Office action.

Paragraph (a) as adopted drops "in an Office action" and instead prescribes that the claims would be rejected "where appropriate."

Paragraph (b)(1) as proposed was limited to applicants. Paragraph (b)(1) as adopted covers applicants for patents and patent owners involved in specified Office proceedings. The provision for applicants for patents in paragraph (b)(1) as adopted is identical to the provision for applicants in paragraph (b)(1) as proposed except for the additional adoption of a reference to supplemental deposits. Paragraph (b)(1) as adopted additionally provides for patent owners responding to a rejection under paragraph (a) of this section by requesting a certificate of correction of the patent which meets the terms of paragraphs (b) and (c) of § 1.805.

Paragraph (b)(2) as proposed has not been adopted. Subparagraph (3) has therefore been renumbered as (2) and the reference therein to paragraph (b)(2) has been eliminated. Two additions have been made. One, since the question of deposit may come up in connection with a reissue application or reexamination proceeding, the term "or patent" has been inserted after "application" in the first sentence. Two, since paragraph (a) provides for a rejection under 35 U.S.C. 112 when a deposit actually made cannot be accepted, it is considered an appropriate response that a deposit actually made should be accepted. Thus, the term "and/or why a deposit actually made should be accepted" has been inserted at the end of the first sentence of paragraph (b)(2) as adopted.

Paragraph (c) as proposed has been adopted except that the term "for patent" has been inserted after "application" in the first sentence to make it clear that this paragraph does not apply to other applications, such as applications for reissues. Additionally, the word "the" before the proposed term "required deposit" has been changed to "a" because the term "the required deposit" had no antecedent basis. Finally, the term "37 CFR" preceding "1.136" in the proposed rule has been replaced with "§" as adopted to be consistent with standard nomenclature.

Paragraph (d)(3) as proposed required a taxonomic description of the deposit. Paragraph (d)(3) as adopted requires a description of the deposited biological material sufficient to specifically identify it and to permit examination. Paragraphs (d)(1), (d)(2), (d)(3) and (d)(4) have otherwise been adopted except for the addition of prefatory articles "The" or "A".

Response to and Analysis of Comments

Written comments from sixteen (16) sources were received in response to the notice of proposed rulemaking. Some suggestions made in comments have been adopted as presented or in modified form and others have not been adopted. A detailed analysis of the comments follows.

Comment: The proposed rule numbers, except § 1.200, are the same as those of the old interference rules, and it appears to be Office practice to normally avoid using rule numbers which end in "00," especially for a rule, viz., § 1.200, which is the first of a group of rules. The rules, if adopted, should have different numbers.

Response: The suggestion has been adopted. Proposed §§ 1.200 through 1.208 have renumbered as §§ 1.801 through 1.809 as adopted, respectively.

Comment: Two comments ask whether the rules will apply retroactively. One comment suggests that they should and further, that the benefits provided for depositors in proposed § 1.207 (b) and (c) take effect immediately so that those patent applicants who would benefit from them will be encouraged not to delay in filing or obtaining a patent until a final rule takes effect.

Response: To the extent the rules codify existing office practice, they are already effective. Otherwise, the rules will be effective in applications for patent or for reissue of patent filed on or after January 1, 1990, and in reexamination proceedings in which the request for reexamination was filed on or after January 1, 1990, except that deposits made prior to the effective date which are acceptable under current practice will be acceptable in such application and proceedings. Applicants and patent owners are encouraged to comply now with those requirements of the rules not required by existing Office practice.

Comment: A sentence should be added at the end of proposed § 1.200 to clarify that the rule does not preclude the possibility of depositing other biological materials for patent purposes, such as plants *per se*, even though not within the scope of the term "biological material" as defined by the rule. Adding such a sentence would be consistent with previous concerns expressed to the Office over the possible requirement for deposits with respect to plant patents. With the added sentence, the rule would not address any kind of requirement for deposit in plant patents.

Response: In a response to a comment in the notice of proposed rulemaking, it was stated that the Office did not intend to propose rules on deposits under the Plant Patent Act (35 U.S.C. 161–164) at this time, nor will the Office take the position that a deposit is required under the present provisions of 35 U.S.C. 162. The text of the rule adopted in § 1.801 is the same as proposed in § 1.200 except that the rule now explicity states that the regulations are for purposes of patents for inventions under 35 U.S.C. 101. Thus, these regulations do not and are not intended to address the question of deposits in plant patent applications.

Comment: One comment suggests that the language in § 1.200 should be expanded to make it clear that other biological materials, such as plants *per se*, are not precluded from being deposited. Another comment assumes that the Office intends to limit the scope of "biological material" as defined by this rule. The rules and commentary should indicate that the scope and effect of the rules are limited to biological materials as defined in the rules. This rule is acceptable provided it simply defines what constitutes biological material.

Response: None of the suggestions have been adopted. In a response to a comment in the notice of proposed rulemaking, it was stated that biological material is defined in the proposed rule in terms of a non-exhaustive list of what it includes and that no materials were explicitly excluded. The response also stated that the Office does not contemplate that there would be many situations where a material that is not capable of self-replication either directly or indirectly would be acceptable as a deposit under these regulations but that an applicant was not precluded in any given case from attempting to show why such a material should be acceptable. Plants *per se* are an example of such materials.

Comment: The proposed rules do not, but should, address a problem associated with marine sponges and other marine macroorganisms. These materials and their natural location can be adequately described so that one skilled in the art could obtain them using the necessary equipment. But their taxonomy is in a developmental stage and scientific names are subject to revision. Deposit and maintenance of these materials in viable form is not practical. They can and have been deposited in non-viable form, preserved or fixated in a suitable non-destructive medium, where their shelf life is expected to be at least 30 years.

Response: See the response to the previous comment. As stated in a response to a comment in the advance notice of proposed rulemaking, the PTO

Board of Patent Appeals and Interferences held that a description of the precise geographic location of marine tunicates used in a claimed invention was adequate to satisfy the enablement requirement of 35 U.S.C. 112. *Ex Parte Rinehart*, 10 USPQ2d 1719 (PTO Bd. Pat. App. & Int. 1985). It was also stated in that response that the term "readily" as used in the term "known and readily available" appearing in the proposed rules is considered appropriate to define that degree of availability which would be reasonable under the circumstances. Since the comment states that the subject materials and their natural location can be adequately described so that one skilled in the art could obtain them using the necessary equipment, the disclosure would appear to be sufficient to meet the enablement requirements of 35 U.S.C. 112 without a deposit so long as their degree of availability is reasonable under the circumstances.

Comment: In a response to a comment in the notice of proposed rulemaking which was in response to a solicitation for comments in the advance notice of proposed rulemaking on the setting of an appropriate minimum number of seeds to ensure availability of the seed through the enforceable life of the patent, it was stated that the Office does not intend to propose rules quantifying a minimum number of seeds but that the Office will consider 2500 to be a minimum number in the normal case and will provide an applicant an opportunity to provide justification why a lesser number would be suitable under the circumstances of a particular case. One comment suggests that 2500 may present problems where the normal yield of a plant is only a few seeds. A more reasonable minimum is 1250. Another comment suggests that there be no minimum number but an obligation on the part of the depositor to replace a seed each time one is requested.

Response: Since the Office has stated that an applicant will be provided an opportunity to show why a lesser amount than 2500 seeds would be appropriate in a particular case, the policy of requiring a minimum number of 2500 is adhered to. An obligation on the part of the depositor to replace a seed each time one is requested is simply impractical.

Comment: The title of proposed § 1.201 should be changed from "Need to make a deposit" to "Opportunity to make a deposit" since the provision states that "the disclosure *may* include a deposit of a biological material * * *."

Response: The suggestion has been adopted in part. Since § 1.802 applies to situations both when a deposit may be made (optional) and when a deposit is necessary, the heading of the rule states both need and opportunity in the alternative.

Comment: Proposed § 1.201(a) should state that the disclosure may include reference to a deposit, rather than that the disclosure may include a deposit.

Response: The suggestion has been adopted in § 1.802(a).

Comment: Proposed § 1.201(a) does not clearly permit deposits where conditions enumerated therein do not apply. The proposed rule should be revised by eliminating the requirement that the biological material not be known and readily available to the public before a deposit may be made. The proposed revision would make clear that an applicant has a universal and unconditional right to make a deposit of a biological material whenever the biological material cannot be described in writing alone, regardless of whether the material is known and readily available. The rule as proposed is not consistent with the permissive use of deposits where they might not be mandated. The proposed revision would dispel any suggestion or implication that the legal standard under which deposits are mandated is that the biological material be neither known nor readily available. Obviously, such materials even if unknown and not readily available might be enabled solely through a written description, rendering deposit unnecessary.

Response: The suggestion has been adopted in § 1.802(a). In addition, the rule as adopted permits deposits even where the biological material can be described in writing alone and even where the claimed invention is not, or does not rely on, the biological material. Section 1.802(a) as adopted permits reference in the disclosure to a deposit of a biological material, the only precondition being that an invention is or relies on that material. The requirement in the proposed rule that the biological material not be known and readily available to the public and not be describable in writing alone, and that the material be, or be used for, the claimed invention, has not been adopted.

Comment: Two comments suggest that § 1.201(a) refer to 35 U.S.C. 112. One comment suggests that § 1.201(a) should make some reference to 35 U.S.C. 112 for completeness. Another comment suggests that proposed § 1.201(a) contains no standard and should thus make reference to 35 U.S.C. 112, for example, by inserting words to the effect that the biological material cannot be described in writing alone to satisfy the requirements of 35 U.S.C. 112.

Response: The suggestions have not been adopted. *But see* the response to the next comment.

Comment: Proposed § 1.201(b) should be revised by stating that biological material need not be deposited unless necessary for the satisfaction of the statutory requirements of 35 U.S.C. 112. Thus, the rule would state that the ultimate reason for a requirement for a deposit would be to satisfy 35 U.S.C. 112. Further, the rule should state one circumstance, among others, where a biological material need not be deposited, *viz.*, where it is known and readily available to the public or can be made or isolated without undue experimentation. The last sentence of proposed § 1.201(b) should state a precondition that a deposit of the biological material be made in a depository complying with these regulations.

Response: The suggestions have been adopted in § 1.802(b).

Comment: Proposed § 1.201(c) should be revised by stating that the actual deposit of a biological material referred to in a specification disclosure also does not create a presumption that the material is necessary to satisfy 35 U.S.C. 112 or that the deposit is or was required. The proposed revision would recognize that the act of deposit does not and should not constitute an admission by the applicant that the deposit was made because it was necessary to satisfy 35 U.S.C. 112. For example, deposit may be necessary in the United States prior to the time a patent application is filed in order for an applicant to be entitled to assert a priority right under patent laws of a foreign country based on a United States application which makes reference to such deposit. Additionally, applicants ought to be encouraged to make deposits in questionable cases without such act being construed as an admission of any sort.

Response: The suggestion has been adopted in § 1.803(c).

Comment: The term "or other biological material" in proposed § 1.201(c) should be changed to "or any other biological material" to make sure that all biological materials that would normally be considered for deposits are included.

Response: The comment is not understood. Nevertheless, it is moot. The term "specific organism or other biological material" in proposed § 1.201(c) has been changed to "biological material" in § 1.802(c) as adopted.

Comment: Two comments suggest that proposed § 1.202(a)(2) unnecessarily limits who may be consulted in determining the suitability of a depository to be recognized by the Office to those in the biotechnology industry or Government agencies. Views from academia may be wanted. One of the comments suggests, therefore, that the term "from the biotechnology industry or governmental agencies" be deleted from § 1.202(a)(2).

Response: The suggestions have been adopted in § 1.803(a)(2).

Comment: Proposed § 1.202(a) should be revised to state that a deposit shall be recognized for the purposes of these regulations if made in a depository according to subparagraph (1) or (2) thereof. The proposed revision would allow for deposits other than in Office-recognized depositories, but give deposits in Office-recognized depositories the "safe harbor" advantages of these regulations.

Response: The suggestion has been adopted in § 1.803(a). Simply put, the rules do not prohibit deposits made under any conceivable conditions. The Office will treat a deposit not made according to these regulations, however, as if no deposit had been made.

Comment: The provision set forth in proposed § 1.202(c)(3), i.e., that a depository seeking status under paragraph (a)(2) indicate that it intends to be available, for the purposes of deposit, to any depositor under these same conditions, should also be listed in § 1.202(a)(2), which enumerates the qualifications for a depository seeking recognition as suitable by the Office.

Response: The suggestion is not being adopted. The requirement in proposed § 1.202(a)(2)(v), and § 1.803(a)(2)(v) as adopted, that the depository be impartial and objective, is inclusive of a requirement that it be available, for purposes of deposit, to any depositor under these same conditions.

Comment: One comment suggests that the proposed rules do not adequately define the term "depositor". It could be the inventor, the assignee, one to whom the inventor has an obligation to assign, or the individual who signs the deposit form. In the case of joint inventors with different institutional ties, who is the depositor? Assuming that where the inventor is a university professor, the depositor is the university, deposit in that university's depository would be precluded by proposed § 1.202(a)(2)(ii) and possibly § 1.202(a)(2)(v). An exception should be made for non-profit organizations. They should be allowed to "self-deposit" since it is highly improbably that they would refuse to provide samples to third parties. The availability of a strain from a university was found to satisfy 35 U.S.C. 112 in *Merck and Co., Inc.* v. *Chase Chemical Co.*, 273 F.Supp. 68, 77, 92, 155 USPQ 139, 146, 159 (D.N.J. 1967). Another comment suggests that it is not clear, where the depositor is a separate, independent division of a particular entity and the depository is another separate, independent division of the same entity, whether this arrangement meets the terms of proposed § 1.202(a)(2)(ii).

Response: None of the suggestions have been adopted. In § 1.803(a)(2)(ii) as adopted, a depository recognized to be suitable by the Office and not otherwise an IDA must exist independent of the control of the depositor. In a response to a comment in the notice of proposed rulemaking, it was stated that the term "depositor" is intended to include the party on whose behalf the deposit is made. It was further stated in that response that the rationale of the Office in requiring that a depository, if not an IDA, be independent of the depositor was adequately discussed in the advance notice of proposed rulemaking. The advance notice stated:

> The concept of an independent depository of an IDA as an acceptable depository is based on the need and desire to ensure the safe and reliable storage of a deposited biological material under circumstances that are free of the opportunity for intentional or negligent handling of the deposited material. The use of an independent depository or an internationally recognized depository will tend to preserve the integrity of the deposit process against those that may accidentally alter the deposited material, may wish to tamper with the deposited material or may wish to resume control of its availability when the patent is no longer enforceable, and to preserve the interest of the public in the free access to the biological material for any purpose once the term of the patent expires. Further, while the PTO is constrained to approve independent depositories other than an IDA, the PTO has neither the resources nor capability to assess the individual capability of any party that wishes to act as its own depository. The rules under consideration are intended to minimize depositories that will be found acceptable.

The above discussion applies to non-profit organizations as well as for-profit organizations. Moreover, it is clear from the discussion above that the scope of the term "depositor" is limited only by the requirement that the depositor have no control over the depository. Such a relationship is not necessarily inconsistent with one where there is some legal relationship between depositor and depository. The *Merck* case cited above does not stand for the proposition that a university is necessarily an acceptable depository because it makes available samples of a biological material. In *Merck*, the availability of the biological material from the university was evidence that the biological material was known and readily available. While a deposit by an applicant in a depository under the applicant's control will not be recognized by the Office as a deposit under these regulations, an applicant is not precluded from showing that the deposited material, by virtue of conditions of public knowledge of unrestricted availability of samples of the deposit, is known and readily available to the public. However, depositors should be aware that relying on such a showing rather than making a deposit according to these regulations involves a risk that the biological material might in the future not be readily available. The university relied on in the *Merck* case, for example, eventually ceased its practice of making biological materials readily available.

Comment: Proposed § 1.202(b) is intended to apply in the event that a depository ceases to enjoy the status of a recognized depository. The manner of making a substitute deposit in such a situation would not seem to be fully explained by a reference to proposed § 1.204. For example, if a depository were to cease operation, it might not be able to, in the words of proposed § 1.204(a), "promptly after having noted its inability to furnish samples, notify the depositor of such inability". Second, the rule as proposed is difficult to follow. For example, it indicates that a substitute deposit "must be viable if the biological material is of a kind capable of self-replication". The implication that certain deposits might be non-viable is at best confusing in the absence of a definition for viability.

Response: Proposed § 1.202(b) has not been adopted. Section 1.805, the rule as adopted on replacement deposits, puts the burden exclusively on the applicant or patent owner, whatever the case may be, to both make a replacement deposit and make the necessary showing that such a deposit complies with these regulations. Viability is dealt with exclusively by § 1.807 as adopted.

Comment: Three comments suggest that it be a requirement of the rules that the biological material have been in existence at the time of filing the patent application. One comment suggests that a sentence be added to proposed § 1.208(a) to require that the application as filed state that the biological material is in existence. The other comments suggest that proposed § 1.203 require an averment that the deposited biological material was in existence at the time the application was filed.

Response: None of the suggestions have been adopted. Patent law does not require an actual reduction to practice as a condition precedent to filing a patent application. While few, if any, situations can be imagined where the description requirement of 35 U.S.C. 112 can be satisfied where the biological material was not in existence at the time of filing, the rules do not preclude such a situation. *But see* the response to the next comment.

Comment: Proposed § 1.203(a) should require that a biological material may be deposited only if an adequate antecedent basis exists in the specification as filed, i.e., the biological material to be deposited must be specifically identified therein.

Response: The suggestion has been adopted in § 1.804(a). It must be clear from the application as filed that the invention claimed and described in the specification "was fully capable of being reduced to practice (i.e., no technological problems, the resolution of which would require more than ordinary skill and reasonable time, remained in order to obtain an operative, useful process)." *Feldman* v. *Aunstrup*, 517 F.2d 1351, 1355, 186 USPQ 108, 113 (CCPA 1975), *cert. denied*, 424 U.S. 912 (1976). *Accord, In re Lundak*, 773 F.2d 1216, 1221, 227 USPQ 90, 94 (Fed. Cir. 1985).

Comment: Two comments suggest that proposed § 1.203(a) be revised so that it addresses the permissible situation where a deposit is made during the pendency of an application for patent not pursuant to a requirement made by an examiner.

Response: The suggestion has been substantially adopted in § 1.804(a). An original deposit may be made, subject to § 1.809, during pendency of the application for patent. Where § 1.809 does not apply, i.e., where a deposit is ultimately not required, a deposit may be made at anytime during pendency.

Comment: The Office should discuss in the commentary accompanying the notice of proposed § 1.203(b) as a final rule the meaning and intent behind the requirement that the deposited biological material be the "same" as the material described in the specification. For example, does the Office contemplate that the statement constitute a representation that the deposited material is in essentially the same form as was in existence at the time of the filing of the patent specification, and, accordingly as specifically described therein?

Response: Proposed § 1.203(b) has been adopted as § 1.804(b) but with the word "same" deleted and the term "described" replaced with "specifically identified." Under § 1.804(b), the biological material deposited must be a biological material specifically identified in the application as filed.

Comment: One comment asks whether a patent which is defective because of the lack of a deposit can be rectified by making the deposit in connection with a reissue application. Another comment points out that the issue of post-grant original deposits is not addressed by these regulations and the Office is urged to comment to this effect in the final promulgation of the rules.

Response: It is assumed from the comment that a deposit was necessary at the time the patent was issued. A patent defective because of lack of a necessary deposit is necessarily fatally defective for failure to comply with the first paragraph of 35 U.S.C. 112. Reissue is not available in such cases. *See In re Hay*, 534 F.2d 917, 189 USPQ 790 (CCPA), *cert. denied*, 429 U.S. 977 (1976). Whether reissue is available where a biological material necessary for compliance with 35 U.S.C. 112 was known and readily available at the time of issuance of the patent and subsequently ceased to be readily available is not addressed by this response. Nor do the rules address the question of post-issue original deposits, whether necessary or not to comply with the patent statutes.

Comment: Many comments were received regarding proposed § 1.204 and the subject of replacement deposits. One comment suggests that the time limits in proposed § 1.204(a) for making replacement deposits, specifically as they apply post-grant, are totally arbitrary. For example, a replacement deposit made four months after notice from the depository, without a suitable petition for extension of time, could not be relied on. A number of comments suggest that in proposed § 1.204(a), it is not clear who is required to petition whom in order to obtain an extension of time in which to make a replacement deposit. A depository is not equipped to deal with the legalities of such matters. If the petition is filed with the Office, there will be administrative burdens. Another comment suggests that instead of specified time limits and petitions for extensions of time, the rule should state that where a patentee makes a replacement deposit, the patentee shall promptly request a certificate of correction identifying the particulars of the replacement deposit and that no such certificate of correction shall be granted unless the request includes, *inter alia*, a verified showing that the patentee acted diligently in making the replacement deposit. A certificate of correction in providing the particulars of the new deposit (depository and accession number) would provide the simplest and most straightforward vehicle under which the patentee could assure continuing public notice (and accordingly public access) to particular biological materials described in the specification. Corrections to the issued patent would be made subject to all conditions of these deposit regulations and an additional specific requirement that the replacement deposit be made diligently after the notification is received that samples cannot be furnished from the deposit. This generalized requirement of diligence is preferable to the more rigid and cumbersome procedures set forth in the rules as proposed.

Response: The provisions of a three-month time limit for making a replacement deposit and petitioning for extensions of time to extend the limit in proposed § 1.204(a) applied by their terms only to patentees or patent owners. These provisions have not been adopted. Except in reexamination and reissue applications, it is beyond the rulemaking authority of the Office to regulate issued patents. Thus, instead of requiring patent owners to make replacement, or supplemental, deposits and to make them within a specified time, or to require them to request certificates of correction, paragraphs (a), (b) and (c) of § 1.805 as adopted specify that a replacement or supplemental deposit made in connection with a patent, whether or not made during the pendency of an application for reissue patent or a reexamination proceeding or both, shall not be recognized in any Office proceeding unless the patent owner requests a certificate of correction under § 1.323 provided certain specified conditions are met, including that the patent owner acted diligently in making the replacement or supplemental deposit and promptly thereafter requested the certificate of correction.

Comment: The rules should indicate that replacement deposits made during the pendency of an application will be treated in exactly the same way as any other deposit made after the filing date.

Response: The suggestion has been essentially adopted in § 1.805(a) which states, *inter alia*, that a replacement or supplemental deposit made in connection with an application for patent shall be accepted if it meets the requirements for making an original deposit under these regulations, including the requirement set forth under § 1.804(b)

Comment: The rules should address a situation where the deposit is of a non-viable biological material, such as a marine sponge or other marine macroorganism. Filling requests for samples can ultimately consume the entire deposit. Two other comments suggest that a depositor be permitted to charge the requesting party a fee sufficient to cover the cost of replacing the deposit. A competitor could "drain off" the store of deposit and thereby require replacement at significant economic hardship to the depositor.

Response: Where the biological material deposited is capable of self-replication either directly or indirectly, exhaustion of the deposit would appear to be highly unlikely. Regardless of the type of biological material deposited, however, the depositor must assure that samples thereof be available beyond the enforceable life of any patent relying on the material.

Comment: Nothing in the regulations which define the suitability of a depository requires that the depository itself must provide notice to depositors in the event of an inability to furnish samples yet proposed § 1.204(a) does.

Response: The suggestion has been adopted in § 1.803(a)(2)(vii).

Comment: A number of comments suggest that the legal ramifications of an additional deposit made pursuant to proposed § 1.204(h), i.e., made where an earlier deposit has become contaminated or has lost its capability to function as described in the specification, are not clear. Some of the same comments go on to suggest that the deposit provided for in § 1.204(h) be termed a "supplemental" deposit rather than an "additional" deposit to emphasize the relationship between it and the earlier deposit, that such a deposit have the same legal effect as the earlier deposit provided the patent holder provides a verified statement that it is identical to the earlier deposit, and that it have the same accession number as the earlier deposit, perhaps with a suffix modification. One comment suggests that the rules require that a deposit under paragraph (h) be assigned the same accession number but with an appropriate suffix. A depository commentator asks that where a deposit under paragraph (h) is made, which deposit—the earlier or the later one—should be made available to the public. Currently, this deposit advises a requesting party that there are two deposits.

Response: The suggestion of replacing the term "additional" with the term "supplemental" has been adopted but in a somewhat different setting. Whereas proposed § 1.204(h) stated that nothing in the regulations was intended to prohibit a patentee from making an additional deposit, paragraphs (a), (b), (c), (f) and (g) of § 1.805 as adopted provide for patent owners as well as patent applicants making supplemental deposits of a biological material earlier deposited from which a depository can still furnish samples. These paragraphs provide for supplemental deposits similar to the provisions in these paragraphs for replacement deposits, including the requirement of showing diligence in making the deposit in connection with a patent, except that instead of making the deposit after receiving notice that samples could no longer be furnished from an earlier deposit, as in the case of a replacement deposit, the deposit is made after receiving notice that the earlier deposit had become contaminated or had lost its capability to function as described in the specification. While the rules specify that the Office in any Office proceeding will recognize supplemental deposits if made under certain conditions, it is not known what legal effect a court will give to such recognition. As far as what accession number a depository should give to a supplemental deposit, this is a matter within the discretion of the depository. As to which deposit, either an earlier deposit or a supplemental deposit, should be made available to the public, this would depend on the accession number requested. A supplemental deposit made according to these regulations would be freely available to the public to the same extent as an original deposit made according to these regulations. Obviously, nothing in these regulations prohibits a depository from advising a requesting party that there is more than one deposit of a particular biological material.

Comment: To the extent proposed § 1.204 regulates the effects on patents, in other than certain statutorily defined situations such as reexamination and reissue, for failure to make replacement deposits according to the rule, it exceeds the rulemaking authority of the Office. An example is proposed § 1.204(c).

Response: Section 1.805 as adopted, to the extent it addresses replacement deposits made by patent owners, contains no affirmative provisions requiring or prohibiting replacement deposits. Rather, it prescribes what an applicant or patent owner may do vis-a-vis the Office if a replacement deposit is made and what the ramifications are in any Office proceeding if a replacement deposit is not made or improperly made. Proposed § 1.204(c) was, and § 1.805(d) as adopted is, limited to Office proceedings. The provision that a patentee may not replace a viable deposit where the depository can furnish samples in proposed § 1.204(h) has been replaced in § 1.805(i) as adopted with the provision that the Office will not recognize in any Office proceeding a replacement deposit made by a patent owner where the depository could furnish samples of the deposit being replaced.

Comment: One comment suggests that the term of deposit in proposed § 1.205 is excessive. The term should be through the expiration of the patent plus 10 years. Another comment suggests that § 1.205 be adopted except that the last sentence should be deleted and the term "viable" before "deposit"be dropped. The term "viable" should be deleted as viability is dealt with elsewhere, e.g., proposed § 1.206. The last sentence should be deleted because, while the Office may set what it considers adequate terms of deposit on or before patent grant, it has no statutory authority or mechanism for supervising the term of the agreement of the deposit. The last sentence is also highly indefinite in failing to indicate how far beyond the enforceable life of a patent the deposit must be maintained.

Response: The suggestions have been adopted in part. Proposed § 1.205, including the last sentence, has been adopted as § 1.806 except that the thirty-year term applies to any deposit made before or during pendency of an application for patent. No requirement of viability is stated in the rule. The Office agrees that once a patent issues, it has no authority or mechanism for supervising the term of the agreement of the deposit. But the Office does have the authority to set the term of deposit while an application is still pending. That is all § 1.806 does. In almost all cases, the term of deposit as set forth in the first sentence of § 1.806 will extend beyond the enforceable life of the patent for which a deposit was made. The last sentence of § 1.806 is intended to cover those rare circumstances where extended prosecution in the Office results in expiration of the term of deposit as set forth in the first sentence while the patent is still enforceable. At this time, there appears to be no need to specify any finite time period beyond the enforceable life of a patent. If experience demonstrates that the public interest is not being served by the present provisions, an appropriate amendment will be proposed.

Comment: A depository commentator suggests that the requirement in proposed § 1.207(b)(1) that a request for a sample of the deposited material be signed poses an administrative burden on depositories which accept telephone, telex and electronic mail requests for samples. Requiring that a request be signed can and will delay the receipt of samples by many days. The signing requirement should not be adopted.

Response: The suggestion has been adopted in § 1.808(b)(1).

Comment: A depository commentator suggests that the requirement in proposed § 1.207(b)(3) that a copy of the request be provided to the depositor poses a problem since most requests also include a request for samples of many other deposited biological materials. For such a request, it would be necessary to send a copy to each depositor, blanking out the other deposits not made by that depositor. It should be sufficient that the depositor is notified to whom and the date a sample was provided. The cost will be much greater if a copy has to be supplied.

Response: The suggestion has been adopted in § 1.808(b)(3).

Comment: A depository commentator suggests that in proposed § 1.207(b), it is not clear, after the term of the patent, whether the deposit is again restricted as it was before the patent was granted, i.e., not furnished unless the requesting party has the proper authorization from the depositor or the Commissioner, or whether the deposit is no longer subject to subparagraphs (1), (2) and (3) thereof and can be furnished without any specific identification or notification. It is suggested that either a statement be added as to what happens after the term of the patent or the term "during the term of the patent" be deleted.

Response: The suggestions have not been adopted. Section 1.808(a)(2) requires that subject to paragraph (b) thereof, all restrictions imposed by the depositor or the availability to the public of the deposited material will be irrevocably removed upon the granting of the patent. Paragraph (b), by its terms, is limited to the term of the patent. A contract between a depositor and a depository according to paragraph (b) but which extends beyond the term of the patent would violate paragraph (a)(2). It should be self-evident that for deposits in compliance with these regulations, samples of the deposit may be furnished without any specific identification or notification for requests made after the term of the patent.

Comment: While many comments suggest adoption of a rule restricting the transfer of a sample of a deposited material to a third party without the depositor's permission, such as proposed § 1.207(c), as well as the adoption of a rule requiring other restrictions on access to deposited material, two comments suggest that such rules not be adopted. The rationale is that if a deposit is basically a replacement for that which could not be adequately written in the patent specification itself, no specific statutory authority exists for restricting access to the deposited material any more than the patent law would countenance restrictions on access to the written description itself. If abuses exist by virtue of the absence of limitations on access to deposited materials, then the remedy for patent infringement is as applicable to deposited material as it is to infringers acting from knowledge of the written description itself. Accordingly, unrestricted access to deposits should be allowed. One of the comments suggests further that if there are to be some restrictions to access, proposed § 1.207(c) is otherwise problematic and ineffective. For example, the limitation on access applies to "derived" materials which could include wholly noninfringing derivatives which might themselves constitute a patentable invention of a third party requester. The proposed rule would deny the third party requester the right to what ought to be an unrestricted right to sell or otherwise dispose of this derivative material to third parties. Moreover, the proposed rule is remediless since the Office neither has continuing jurisdiction over the patentee nor a third party requester. Two depository commentators expressed reservations about proposed § 1.207(c). One suggests that the first sentence therein is in direct contradiction to the long-standing policies of both NRRL and ATCC. Most depositories no longer require this type of guarantee from requesting parties as they find it almost impossible to enforce. The other suggests that the administrative burden to the depository in handling agreements made pursuant to the proposed rule will be great and the cost will be borne by the depositor. At $10 an agreement and 300 requests a year for a particular deposit, the cost to the depositor would be $3,000 a year. If § 1.207(c) is adopted, there should be some mention that if a depository charges a fee for this service, the fee must be paid or the depository will not be obligated to provide the service. In the European Patent Office (EPO), which has a similar provision, the EPO, not the depository, obtains the agreement and advises the depository to make the sample available. The comment asks if the Office is prepared to do this. Additional comments ask what rules govern a new deposit for patent purposes of the same or derived biological material by a requesting party if the substance of proposed § 1.207(c) is adopted. Some comments were in response to a solicitation in the notice of proposed rulemaking for alternative approaches and suggestions for an appropriate definition of "essential characteristics" with respect to derived material in proposed § 1.207(c).

Response: The Office has decided not to adopt a rule permitting a depositor to require that a sample of a deposited biological material shall be furnished only if the requesting party has agreed not to make the material or a derivative thereof available to a third party without the depositor's permission. Thus, proposed § 1.207(c) has not been adopted. The Office agrees with many of the comments about shortcomings in the proposed rule. Fundamentally, however, the proposed rule has not been adopted in view of the rationale stated in the comment that no greater restriction on access to a deposit should be permitted than is permitted on access to the written description itself, even considering that the practical value of access to a deposit may be substantially greater than access to the written description and that infringement may be more difficult to police. While it might be argued that the adoption of proposed § 1.207(b) with revisions as § 1.808(b) is inconsistent with this rationale, the Office believes that permitting the depositor to require a requesting party, in essence, to identify itself is not unreasonable under the circumstances and is consistent with international practice as embodied in the Budapest Treaty.

Comment: Many comments which suggest the adoption of the substance of proposed § 1.207(c) also suggest the adoption of rules incorporating the recommendations made in the April 8, 1987 World Intellectual Property Organization (WIPO) report on the Industrial Property Protection of Biotechnological Inventions (1) to use the biological material only for experimental purposes concerning the invention, and (2) not to export the biological material except to a country for which a relevant patent has been granted. The reasons generally given were that it is necessary to protect the patentee and enhance the patentee's ability to enforce a patent relying on a deposited material. One comment suggests that incorporating the recommendation on experimental use would clarify what is permitted by law. In the Notice of Proposed Rulemaking, 53 FR at 39423–24, the Office described the difficulties in drafting a regulation incorporating these recommendations and requested specific suggestions as to how to draft a regulation which both accomplishes the intended purpose and is not inconsistent with law. No specific suggestions were received, although one comment suggests that where a deposited material is covered by an

unexpired U.S. patent, a rule be adopted permitting the depositor to require the requesting party to agree to comply with the provisions of 35 U.S.C. 271. Another comment suggests that legislation is necessary to deal with the problems addressed by the WIPO recommendations. A restriction against exports could be considered to be violative of 35 U.S.C. 112 since foreign requesters would be denied access to deposits where a patentee had never sought foreign patent protection. A restriction to experimental purposes only, while more justifiable, raises two problems. One is that "experimental purposes" have not been defined and the term has been open to several interpretations. The other is that the proper redress for non-experimental use is a suit for patent infringement, not a suit based on the requester's promise to the depository. The comment suggests that a rule be adopted permitting the depositor to require that a requesting party acknowledge that the furnishing of a sample of the deposited biological material does not constitute a license, express or implied, to use that sample for any purpose.

Response: None of the suggestions have been adopted for essentially the same rationale discussed in the response to the previous comment. None suggest how to draft a regulation which both accomplishes the intended purpose and is not inconsistent with law, and which provides a compelling justification and rationale for departing from present policy and practice. The suggestion that a requesting party agree to comply with 35 U.S.C. 271 as a condition precedent to obtaining a sample of deposited biological material is interpreted as an agreement not to infringe a corresponding valid patent, something which a requesting party is already bound not to do under law. The suggestion that a depositor be permitted to require a requesting party to acknowledge that there is no express or implied license to use a sample for any purpose exceeds the rulemaking authority of the Office since certain unlicensed uses of patented subject matter have been found by the courts to be permissible.

Comment: Many of the comments suggesting adoption of the substance of § 1.207(c) and/or the WIPO recommendations on experimental use and export also suggest adoption of rules permitting additional restrictions. One comment suggests requiring the recipient of biological material to report, at least annually, to the patent holder, on the research and other results obtained by use of the biological material. The same commentator suggests that even after patent expiration, an unlicensed recipient should not be permitted to use the biological material for other than experimental purposes absent agreement from the depositor. The commentator would prohibit commercial use of the biological material without permission of the depositor. Another comment suggests that the policy consideration for permitting deposits is to insure that the patented invention can be practiced after patent expiration. Requiring a requesting party to enter into an agreement with the depositor defining the terms and conditions under which a sample of the deposited material would be used, making an accounting of such use, and proof of compliance, is neither unreasonable nor contrary to law. It would not place an administrative burden on the Office since the depository could be permitted to release samples only if the requesting party signs a license. Any attempt by the depositor to impose an unlawful restriction and withhold release would be a matter for the courts, not the Office. Another comment suggests various additional restricitons be adopted. These are (1) that the requesting party have residence in the U.S. or in the country where the depository is located, if different; (2) that the patentee be given the option to restrict furnishing of samples to independent experts only for the duration of the patent; and (3) that the deposit be released only if the depositor expressly consents (in the absence of which validity of the patent must be resolved without recourse to the deposit). Restriction (1) should be adopted so that the deposit cannot be legally exported to a country where the patent owner has no enforceable rights. Restriction (2) should be adopted to prevent access of the deposited material to potential infringers. Its adoption should be coupled with a statement that a deposit released to an expert shall be regarded as being available to the public. Restriction (3) should be adopted as an extension to the description in proposed § 1.201 that the disclosure "may include a deposit." In other words, the patentee at any time during the patent term should be able to rely on the written description alone for satisfying 35 U.S.C. 112, such as where the reasons for requiring a deposit originally no longer exist.

Response: None of the suggestions have been adopted for essentially the same reasons discussed in the responses to the previous two comments.

Comment: A depository commentator suggests that proposed § 1.207(d) needs further deliberation. Now, publication in a U.S. patent of a deposit and accession number is sufficient for that depository (ATCC) to make samples available. The Office should be prepared to receive several thousand requests for certification under § 1.207(d) if adopted. If the Office is going to certify the availability of deposits, it should certify the availability of all deposits. Easier than the proposed rule would be to include a statement in the patent that there is a deposit, its accession number and where it is deposited, and that it has been made under the condition that it is available upon publication of the issued patent.

Response: The suggestion has not been adopted. The comment appears to be interpreting the term "Upon request" at the beginning of proposed § 1.207(d) to mean "Upon request to a depository for a sample of a deposited material", or in other words, the commentator appears to have interpreted the proposed language as requiring the depository to request certification from the Office each time a request for a sample of a deposit is made. It was not intended to impose such a burden on depositories. Rather, it was intended that the term "Upon request" refer to a request made to the Office. Therefore, proposed § 1.207(d), revised by inserting the term "made to the Office" after "Upon request", has been adopted as § 1.808(c).

Comment: One comment suggests that there is no apparent reason for the use of the different words "[e]stablishing" and "[a]rguing", in proposed paragraphs (b)(2) and (b)(3), respectively, of § 1.208 since the same meaning is intended by each. Either word alone should be used in both subparagraphs (2) and (3). The same comment goes on to suggest that the reference to paragraph (b)(2) in the last sentence of proposed § 1.208(b)(3) is redundant since the examiner may be convinced that a deposit is not required where the applicant has established that the involved biological material is known and readily available to the public. A comment along the same lines suggests that paragraph (b)(2) is unnecessary. As a purely logical matter, an applicant ought to be entitled to reply to a rejection either by making an acceptable deposit or arguing why a deposit is not required under the circumstances. Proposed § 1.208(b)(2) is merely one possibility for an argument that a deposit is not required.

Response: The suggestions have been adopted. Proposed § 1.208(b)(2) has not been adopted and proposed § 1.208(b)(3) has been substantially adopted as § 1.809(b)(2). In addition, § 1.809(b)(2) provides for examination with respect to a patent, since deposit issues may arise in connection with a reissue application and/or a reexamination proceeding, and provides also for an argument that a deposit actually made should be accepted.

Comment: A number of comments suggest that the term "taxonomic description" in proposed § 1.208(d)(3) is unclear and inappropriate in some cases. One comment suggests that it is not clear how complete a description is required. If construed in its broadest sense, it could have the undesirable effect of delaying filing of an application until taxonomic characteristics have been determined. Some biological materials within the scope of the proposed rules, such as plasmids, are not susceptible of taxonomic description. The requirement that the specification contain a taxonomic description should not be adopted since such a description may not be possible and since the availability of a deposit makes such a description superfluous, since the taxonomy is inherent in the deposit. The response to comments made earlier regarding the taxonomic description requirement is inconsistent with the proposed rule. The response states that the extent to which a taxonomic description is required will depend on the facts of the case yet the proposed rule states that the specification shall contain such a description. The response states that the taxonomic description must be sufficient for purposes of 35 U.S.C. 112 yet the requirement of a deposit presupposes that a written description alone will not satisfy the statute. The need to verify that the deposited biological material is that disclosed in the specification arises only when the deposit is made after the filing date. That situation can be dealt with by deleting the taxonomic description requirement from § 1.208(d) and adding a new subparagraph (e) which would provide that in cases where a deposit is made after the filing date and where the nature of the material permits, a taxonomic description is required in addition to the items specified in subparagraph (d). Another comment suggests that the term "taxonomic" be deleted since it is irrelevant to many types of deposits and would provide greater clarity to the rules. Another comment suggests that the current language in proposed § 1.208(d)(3) be replaced with "Fully identify and describe the deposited material".

Response: The suggestions have been adopted in part. Section 1.809(d)(3) as adopted requires a description of the deposited biological material sufficient to specifically identify it and to permit examination. While the rule does not by its terms require a taxonomic description, such a description should satisfy the rule as adopted in cases where the biological material deposited admits of a taxonomic description.

Comment: The Office should petition the Budapest Assembly to address the same issues dealt with in the proposed rules so that they apply to both U.S. and foreign filings. Uniformity in the rules is important, especially for U.S. inventors who file here and abroad.

Response: While uniformity in both U.S. and foreign rules is desirable, this is not deemed to be the appropriate forum in which to address the suggestion.

Discussion of Specific Sections

Biological Material (Section 1.801)

The section indicates that the rules pertaining to deposits for purposes of patents for inventions under 35 U.S.C. 101 are intended to relate to biological material. For the purposes of these rules, the term "biological material" is defined in terms of a non-exhaustive list of representative materials which can be deposited in accordance with the procedures defined in these rules. Since these rules are intended to address procedural matters in the deposit of biological material for patent purposes, and are not designed to decide such substantive issues such as whether a deposit of a particular organism or material would be recognized or needed to be made for the purposes of satisfying the statutory requirements for patentability under 35 U.S.C. 112, the definition provided in this section is intended to be permissive—specifically defining materials which can be deposited.

Biological material includes material that is capable of self-replication either directly or indirectly. Direct self-replication includes those situations where the biological material reproduces by itself. Representative examples of materials capable of self-replication are defined in the rule. Indirect self-replication is meant to include those situations where the biological material is only capable of replication when another self-replicating biological material is present. Self-replication after insertion in a host is one example of indirect self-replication. Examples of indirect replicating biological materials include viruses, phages, plasmids, symbionts, and replication defective cells. The list of representative examples of each type of replicating material includes viruses to demonstrate that the lists are not intended to be mutually exclusive.

Although plant material is included within the scope of the definition of biological material for purposes of patents for inventions under 35 U.S.C. 101, these rules on deposits are not applicable to applications filed under the Plant Patent Act (35 U.S.C. 161–164). The Office is of the view that a deposit is not required under the present provisions of 35 U.S.C. 162. Thus, no plant patent granted under the provisions of 35 U.S.C. 161–164 need be supported by a deposit. As with other biological material deposited for purposes of patents for inventions under 35 U.S.C. 101, the deposit of plant material together with the written specification must enable those skilled in the art to make and use the claimed invention.

As with some types of reproducible biological material, seeds can be reproduced only after a growing season which may be relatively long. Although the rules do not specify a specific number of seeds to be deposited to meet the requirements of these rules, the Office will consider 2500 to be a minimum number in the normal case, but will give an applicant the opportunity to provide justification why a lesser number would be suitable under the circumstances of a particular case. The Department of Agriculture requires a deposit of 2500 seeds for the grant of a Plant Variety Protection Certificate. As the reproduction of seeds will often take a substantial period of time, the Office will require, at a minimum, a number of seeds that is likely to satisfy demand for samples once the patent is granted.

Section 1.801 does not attempt to identify what biological material either needs to be or may be deposited to comply with the requirements of 35 U.S.C. 112. For the most part, this issue must be addressed on a case-by-case basis. Thus, while the Office does not presently contemplate that there would be any situations where a material that is not capable of self-replication either directly or indirectly would be acceptable as a deposit, an applicant is clearly not precluded in any given application, by these rules, from attempting to show why the deposit of such a material should be acceptable to satisfy the requirements of 35 U.S.C. 112.

Need or Opportunity to Make a Deposit (Section 1.802)

This section permits a deposit of a biological material to be referenced in a patent application where an invention is, or relies on, a biological material. The invention may rely on a biological

material for the purposes of making or using the invention, either as a preferred mode or an alternative mode of operation. It is not necessary, for the purposes of paragraph (a), that a deposit be required to satisfy the requirements of 35 U.S.C. 112 *before* a reference to a deposit is permitted in the specification.

There is no necessary implication or presumption that can or should be made about the need for a deposit simply because reference to a deposit is made in an application disclosure. As noted in paragraph (b), biological material need not be deposited unless access to such material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112 and that access is not otherwise available in the absence of a deposit. Where a deposit is required to provide the necessary access, a deposit is acceptable for patent purposes only where it is made in accordance with these regulations. Even where access to biological material is required to satisfy these statutory requirements, a deposit may not be necessary if access sufficient to satisfy these requirements is otherwise available.

For example, applicant could show that the biological material is known and readily available to the public. The concepts of "known and readily available" are considered to reflect a level of public accessibility to a necessary component of an invention disclosure that is consistent with an ability to make and use the invention. To avoid the need for a deposit on this basis, the biological material must be both known and readily available—neither concept alone is sufficient. A material may be known in the sense that its existence has been published, but is not available to those who wish to obtain that particular known biological material. Likewise, a biological material may be available in the sense that those having possession of it would make it available upon request, but no one has been informed of its existence.

By showing that a biological material is known and readily available or by making a deposit in accordance with these rules, applicant does not guarantee that such biological material will be available forever. Public access during the term of the patent may affect the enforceability of the patent. Although there is a public interest in the availability of a deposited biological material during and after the period of enforceability of the patent, the examiner need not be unduly concerned about continued access to the public. Unless there is a reasonable basis to believe that the biological material will cease to be available during the life of the patent, the examiner should accept current availability as satisfying the requirement. The incentives provided by the patent system should not be constrained by the mere possibility that a disclosure that was once enabling would become non-enabling over a period of time through no fault of the patentee. *In re Metcalfe,* 410 F.2d 1370, 161 USPQ 789 (CCPA 1969).

There are many factors that may be used as indicia that a biological material is known and readily available to the public. Relevant factors include commercial availability, references to the biological material in printed publications, declarations of accessibility by those working in the field, evidence of predictable isolation techniques, or an existing deposit made in accordance with these rules. Each factor may or may not be sufficient alone to demonstrate that the biological material is known and readily available. Those applicants that rely on evidence of accessibility other than a deposit take the risk that the patent may no longer be enforceable if the biological material necessary to satisfy the requirements of 35 U.S.C. 112 ceases to become accessible.

The Office will accept commercial availability as evidence that a biological material is known and readily available only when the evidence is clear and convincing that the public has access to the material. A product could be commercially available but only at a price that effectively eliminates accessibility to those desiring to obtain a sample. The relationship between an applicant relying on a biological material and the commercial supplier relied upon is one factor that would be considered in determining whether the biological material was known and readily available. However, the mere fact that the biological material was available only through the patent holder or the patent holder's agents or assigns shall not, by itself, justify a finding that the necessary material is not readily available, absent reason to believe that access to the biological material would later be improperly restricted.

The mere reference to a deposit or the biological material itself in any document or publication does not necessarily mean that the deposited biological material is readily available. Even a deposit made under the Budapest Treaty and referenced in a United States or foreign patent document would not necessarily meet the test for known and readily available unless the deposit was made under conditions which are consistent with those specified in these rules, including the one that requires, with one possible exception, that all restrictions on the accessibility will be irrevocably removed upon the granting of the patent.

Applicant may show that a deposit is not necessary even though specific biological materials are required to practice the invention if those biological materials can be made or isolated without undue experimentation. Deposits may be required to support the claims if an isolation procedure requires undue experimentation to obtain the desired biological material. *Ex Parte Jackson,* 217 USPQ 804 (PTO Bd. Pat. App. 1982) No deposit is required, however, where the required biological materials can be obtained from publicly available material with only routine experimentation and a reliable screening test. *Tabuchi* v. *Nubel,* 559 F.2d 1183, 194 USPQ 521 (CCPA 1977); *Ex Parte Hata,* 6 USPQ 2d 1652 (PTO Bd. Pat. App. & Int. 1987).

Once a deposit is made in a depository complying with these rules, and under conditions complying with these rules, a biological material will be considered to be readily available even though some requirement of law or regulation in the United States or in the country where the depository institution is located permits access to the material only under conditions imposed for health, safety or similar reasons. This provision is consistent with the Budapest Treaty (Article 5) and is designed to permit the patenting of inventions involving materials having restricted distribution, where the restrictions are imposed for the public, as opposed to the private, welfare.

Paragraph (c) specifically provides that the mere reference to a deposit of biological material in the specification disclosure or the actual deposit of such material does not create any presumption that such referenced or deposited material is necessary to satisfy 35 U.S.C. 112, or that a deposit in accordance with these regulations is or was required. Since reference to a biological material cannot be added to a specification disclosure after filing an application without risking the prohibited introduction of new matter (35 U.S.C. 132), applicants must be permitted to address the need to make a deposit in accordance with these regulations without jeopardizing a filing date. Thus, the examiner has the burden of showing that a deposit is required to satisfy 35 U.S.C. 112, and cannot rely on whether a deposit has been made or has been referenced in the specification disclosure to establish a *prima facie* case that the disclosure does not comply with 35 U.S.C. 112 without a deposit.

Acceptable Depository (Section 1.803)

This section indicates that a depository will be recognized as acceptable for the purposes of these regulations if it is either an International Depositary Authority (IDA) established under the Budapest Treaty, or if it is a depository recognized as suitable by the Commissioner. After the effective date of these regulations, a deposit of biological material which is made in a depository which is not recognized as acceptable under this regulation will not be considered as satisfying the requirements of 35 U.S.C. 112. On the other hand, if a deposit is not required to satisfy the requirements of 35 U.S.C. 112, it is permissible to make reference to such a deposit even though it may not be in a depository or made under the conditions which are acceptable under these regulations. As new depositories are accepted under the Budapest Treaty or are recognized as suitable by the Commissioner, their identity will be announced in the Official Gazette.

An organization may be recognized as suitable by the Office if the procedure and conditions specified in paragraphs (a)(2) and (b) are followed. Generally, it is not the intention of the Office to recognize as suitable any organization where the need for a suitable depository for patent purposes is being met by depositories recognized as IDAs under the Budapest Treaty. Suitability will be judged by the Commissioner, based on need and the information supplied by the organization seeking status, and information obtained from other sources that may be consulted.

While there is a desire to provide flexibility to a patent applicant in selecting an appropriate depository, these rules are not intended to permit each patent applicant to become its own depository since both the patent owner and the public have an interest in the continued availability and accessibility of the deposit during the enforceable life of the patent, and the public has a continuing interest in its availability when the patent is no longer enforceable. The concept of a depository independent of the control of the depositor or an IDA as an acceptable depository is based on the need and desire to ensure the safe and reliable storage of a deposited biological material under circumstances that are substantially free of the opportunity for intentional or negligent handling of the deposited material. The use of an independent depository or internationally recognized depository will tend to preserve the integrity of the deposit process against those that may accidentally alter the deposited material, may wish to tamper with the deposited material or may wish to resume control of its availability when the patent is no longer enforceable, and to preserve the interest of the public in the access to the biological material once the term of the patent expires.

When a depository having status under paragraph (a)(2) of this regulation seeks to change the kinds of biological materials that it will accept and maintain for the purposes of these rules, a communication requesting such a change should be directed to the Commissioner containing the information requested in paragraph (b). When such a change is requested, the requesting organization should provide a complete list of the kinds of biological materials it will accept.

Paragraph (d) of this section indicates that once a depository is recognized as suitable for the purposes of this rule, or has defaulted or discontinued its performance under this section, notice thereof will be published in the Official Gazette of the Patent and Trademark Office. A current list of IDAs recognized under the Budapest Treaty is as follows:

Agricultural Research Culture Collection (NRRL)—USA
American Type Culture Collection (ATCC)—USA
Australian Government Analytical Laboratories (AGAL)—Australia
Centraalburéau Voor Schimmelcultures (CBS)—Netherlands
Collection Nationale De Culture De Micro-organismes (CNCM)—France
Commonwealth Agriculturial Bureau (CAB), International Mycological Institute—United Kingdom
Culture Collection of Algae and Protozoa (CCAP)—United Kingdom
Deutsche Sammlung Von Mikroorganismen (DSM)—Federal Republic of Germany
European Collection of Animal Cell Cultures (ECACC)—United Kingdom
Fermentation Research Institute (FRI)—Japan
Institute of Micro-organism Biochemistry and Physiology of the USSR Academy of Science (IBRM)—Soviet Union
In Vitro International, Inc. (IVI)—USA
Mezogazdasagi Es Ipari Mikroorganizmusok Magyar Nemzeti Gyujtemenye (MIMNG)—Hungary
National Bank for Industrial Microorganisms and Cell Cultures (NBIMCC)—Bulgaria
National Collection of Industrial Bacteria (NCIB)—United Kingdom
National Collection of Type Cultures (NCTC)—United Kingdom
National Collection of Yeast Cultures (NCYC)—United Kingdom
USSR Research Institute for Antibiotics of the USSR Ministry of the Medical and Microbiological Industry (VNIIAA)—Soviet Union
USSR Research Institute for Genetics and Industrial Microorganism Breeding of the USSR Ministry of the Medical and Microbiological Industry (VNII Genetika)—Soviet Union

Time of Making an Original Deposit (Section 1.804)

This section specifies the time for making an original deposit to fulfill the requirements of 35 U.S.C. 112. Paragraph (a) specifies not only a permissible time frame for making an original deposit, but also specifies that the biological material deposited must be specifically identified in the application for patent as filed. The requirement for a specific identification is consistent with the description requirement of the first paragraph of 35 U.S.C. 112, and to provide an antecedent basis for the biological material which either has been or will be deposited before the patent is granted.

The description in the Lundak application as filed (now patent 4,594,325) provides a suitable illustration of the specific identification and description which is required in an application for patent as filed. In that application, an immortal B-cell line was disclosed and claimed. The cell line was referred to in the application as filed as WI–L2–729 HF2. The methods of obtaining and using this cell line were also described in the application as filed. A deposit of the cell line was made with the American Type Culture Collection (ATCC) about a week after the application was filed in the United States. The United States Court of Appeals for the Federal Circuit held that the requirements of access by the Office to a sample of the cell line during pendency, and public access after grant, were met by Lundak's procedures. The Court further held that the addition of information designating the depository, accession number, and deposit date of the deposited cell line in ATCC after the filing date did not violate the prohibition against new matter in 35 U.S.C. 132. *In re Lundak*, 773 F.2d 1216, 227 USPQ 90 (Fed. Cir. 1985). It must be clear from the application as filed that the invention claimed and described in the specification "was fully capable of being reduced to practice (i.e., no technological problems, the resolution of which would require more than ordinary skill and reasonable time, remained in order to obtain an operative, useful process)." *Feldman* v. *Aunstrup*, 517 F.2d 1351, 1355, 186 USPQ 108, 113 (CCPA 1975), *cert. denied*, 424 U.S. 912 (1976).

When the original deposit is made after the effective filing date of an application for patent, applicant is required to promptly submit a verified statement from a person in a position to corroborate that the biological material which is deposited is a biological material specifically identified in the application (the filing date of which is relied upon) as filed. The nature of this corroboration will depend on the circumstances in the particular application under consideration, including the length of time between the application filing date and the date of deposit. While few, if any, situations can be imagined where the description requirement of 35 U.S.C. 112 can be satisfied where the biological material was not in existence at the time of filing, the rules do not preclude such a situation. There is no requirment in the patent law that an actual reduction to practice occur as a condition precedent to filing a patent application. The requirement for a verified statement is not necessary under paragraph (b) of this section if the person making the statement is an attorney or agent registered to practice before the Office.

For the purposes of complying with the requirements of 35 U.S.C. 112, a deposit of a biological material may be made at any time before filing the application for patent or during the pendency of the application subject to the conditions of § 1.809. Where the deposit is needed to satisfy the requirement of 35 U.S.C. 112 and is made during the pendency of the application, it must be made no later than the time period set by the examiner at the time the Notice of Allowance and Issue Fee Due is mailed. A necessary deposit need not be made by applicant until the application is in condition for allowance so long as applicant provides a written assurance that an acceptable deposit will be made on or before the payment of the issue fee. This written assurance must provide sufficiently detailed information to convince the examiner that there is no outstanding issue regarding deposits that needs to be resolved.

Those applicants intending to file patent applications in a country foreign to the United States relying upon biological material that must be deposited to satisfy the requirements of 35 U.S.C. 112 when the application is filed in the United States are cautioned that in many countries the deposit must be made before the filing date of the priority application in order to obtain foreign priority rights. Thus, while the deposit of a biological material subsequent to the effective filing date of a United States application is sufficient to comply with 35 U.S.C. 112, an applicant may not be able to rely on the filing date of such a U.S. application if a patent is sought in a country foreign to the United States.

Replacement or Supplement of Deposit (Section 1.805)

This section relates to the deposit of a biological material to replace or supplement a previous deposit. The term "replacement" is directed to those situations where one deposit is being substituted for another. An applicant may have greater latitude in replacing a deposit during the pendency of an application than after the patent is granted. Replacement will typically take place where the earlier deposit is no longer viable. The term "supplement" is directed to those situations where the earlier deposit is still viable in the sense that it is alive and capable of replication either directly or indirectly, but has lost a quality (e.g., purity, functionality) it allegedly possessed at the time the application was filed. The procedures in these rules contemplate that only the original depositor would have a right to replace or supplement the original deposit.

Paragraph (a) relates to the procedure for replacing or supplementing a deposit with respect to a pending application or a patent. An applicant for patent or patent owner whose patent is the subject of a reissue application or reexamination proceeding is required to notify the Office when it obtains information that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capabilty to function as described in the specification. When the Office is so notified or otherwise becomes aware of such information, the need for making a replacement or supplemental deposit will be determined by the same considerations used to determine the need for an original deposit under § 1.802(b).

A replacement or supplemental deposit made in connection with a pending application for patent will be accepted if it meets all the requirements for making an original deposit. It should be noted that for a pending application for patent, applicant need not replace or supplement the identical material previously deposited, but may make an original deposit of a biological material which is specifically identified and described in the application as filed. Whether this alternative deposit will meet the requirements of 35 U.S.C. 112 with respect to the claimed subject matter must be resolved by the examiner on a case-by-case basis.

A replacement or supplemental deposit made in connection with a patent, whether or not it is the subject of a pending reissue application or reexamination proceeding, shall not be recognized in any Office proceeding unless a certificate of correction under § 1.323 is requested by the patent owner which meets the terms of paragraphs (b) and (c) of this section. These paragraphs specify the procedures that a patent owner must follow to ensure both that a replacement or supplemental deposit will be recognized in any Office proceeding and that a certificate of correction under this section containing "up to date" information about a deposited biological material will be granted. The term "recognized in any Office proceeding" as used in this section includes the proceeding in which a request for certificate of correction under this section is acted upon. Paragraph (b) describes the information which must be contained in the certificate of correction, whereas paragraph (c) describes when the request must be made and the information which must be provided in the request to make the correction. The rules require, *inter alia*, that replacement or supplement of a deposit be made diligently, followed by prompt request thereafter for a certificate of correction, as conditions precedent to being recognized in any Office proceeding. Thus, for example, if a patent owner learns early during the term of the patent that the depository cannot furnish samples of a deposit described in the patent and the patent owner fails to both diligently make a replacement deposit and promptly thereafter request a certificate of correction under these rules, a replacement deposit made years later when the patent becomes the subject of a reissue application or reexamination proceeding will not be recognized by the Office nor will any request for certificate of correction in connection with that deposit be granted.

Where a proper request for certificate of correction is made and has been granted, any correction made to the original patent will be automatically incorporated into any reissued or reexamined patent unless changes are made during examination of the reissue application or reexamination proceeding.

Paragraph (d) of § 1.805 sets forth the Office position that the failure to make a replacement deposit or, in the case of a patent, diligently make a replacement deposit and promptly thereafter request a certificate of correction which meets the terms of paragraphs (b) and (c) of this section, after notification that samples of an earlier deposit cannot be furnished, shall cause the application or patent involved to be treated in any Office proceeding as if no deposit were made.

Paragraph (e) thereof indicates that the Office will apply a rebuttable presumption of an identity between the replacement deposit and an original deposit where a patent making reference to the deposit is relied on during any Office proceeding. This means that where a replacement deposit is permitted and made, the examiner will assume that the same material as described in the patent is accessible from the identified depository unless evidence to the contrary comes to the attention of the Office.

An applicant for patent may make a replacement or supplemental deposit during the pendency of the application for any reason. The provisions of paragraph (f) of § 1.805 recognize that since an original deposit may be made during the pendency of the application subject to the conditions of § 1.809, a replacement or supplemental deposit logically cannot be held to any higher standard or any further requirements. Likewise, the provisions of paragraph (g) indicate that neither a replacement nor a supplemental deposit need be made where, at the point in time when replacement or supplement would otherwise be necessary, access to the necessary biological material was otherwise available. For example, a replacement or supplemental deposit would not be required under the circumstances where access to the necessary biological material was established through commercial suppliers.

The provisions of paragraph (h) of § 1.805 indicate that a replacement deposit is not required even though the depository cannot furnish samples, under certain conditions, to those requesting a sample outside of the jurisdiction where the depository is located. The conditions are specified in this paragraph as being limited to national security, health or environmental safety reasons.

Finally, paragraph (i) of this section indicates that the Office will not recognize in any Office proceeding a replacement deposit made by the patent owner where the depository could furnish samples of the deposit being replaced. The best evidence of what was originally deposited should not be lost through destruction or replacement if made in association with an existing patent. A supplemental deposit may be accepted in an Office proceeding, however, depending on the circumstances in each case.

Term of Deposit (Section 1.806)

The term of deposit must satisfy the requirements of the Budapest Treaty which sets a term of at least 30 years from the date of deposit and at least five (5) years after the most recent request for the furnishing of a sample of the deposit was received by the depository. In the event that the 30-year term covers the 17-year term of the patent plus six (6) years to include the Statute of Limitations, no further requirement is necessary. The mere possibility of patent term extension or extended litigation involving the patent should not be considered in this analysis.

In the event that the 30-year term of deposit measured from the date of deposit would necessarily terminate within the period of enforceability of the patent (normally the 17-year term plus six (6) years), samples must be stored under agreements that would make them available beyond the enforceable life of the patent for which the deposit was made. No requirement should be made as to any particular period of time beyond the enforceable life of the patent. The purpose of the requirement is to insure that a deposited biological material necessary for the practice of a patented invention would be available to the public after expiration of the patent for which the deposit was made. The term of the deposit must comply with the requirements of each sentence of § 1.806 whether or not the deposit is made under the Budapest Treaty. A specific statement that the deposit complies with the second sentence of this section is required only where the 30-year term would terminate within the enforceable life of the patent.

Viability of Deposits (Section 1.807)

This section requires that the deposit of biological material that is capable of self-replication either directly or indirectly must be viable at the time of deposit and during the term of deposit. This requirement for viability is essentially a requirement that the deposited material is capable of reproduction. For the purpose of making a deposit under these rules, there is no requirement that evidence be provided that the deposited material is capable or has the ability to perform any function described in the patent application. However, as with any other issue of description or enablement, if the examiner has evidence or reason to question the objective statements made in the patent application, applicants may be required to demonstrate that the deposited biological material will perform in the manner described.

Under the Budapest Treaty, there is a requirement that the deposit be tested for viability before it is accepted. Thus, a mere statement by applicant, an authorized representative of applicant or the assignee that the deposit has been accepted under the Budapest Treaty would satisfy § 1.807.

For each deposit which is not made under the Budapest Treaty, a viability statement must be filed in the patent application and contain the information listed in paragraph (b) of this section. Under paragraph (c), the examiner will accept the conclusion set forth in a viability statement which is issued by a depository recognized under § 1.803(a). If the viability test indicates that the deposit is not viable upon receipt, or the examiner cannot for scientific or other valid reasons accept the statement of viability received from the applicant, the examiner shall so notify the applicant stating the reasons for not accepting the statement and proceed with the examination process as if no deposit had been made.

Furnishing of Samples (Section 1.808)

This section requires that the deposit of biological material be made under two (2) conditions:

(1) Access to the deposit will be available during pendency of the patent application making reference to the deposit to one determined by the Commissioner to be entitled thereto under § 1.14 and 35 U.S.C. 122, and

(2) With one exception, that all restrictions imposed by the depositor on the availability to the public of the deposited biological material will be irrevocably removed upon the granting of the patent.

The one exception that is permitted is specified in paragraph (b) of this section which permits the depositor to contract with the depository to require that samples of a deposited biological material shall be furnished only if a request for a sample, during the term of the patent meets any one or all of the three conditions specified in this paragraph. These conditions are:

(1) The request is in writing or other tangible form and dated; and/or

(2) The request contains the name and address of the requesting party and the accession number of the deposit; and/or

(3) The request is communicated in writing by the depository to the depositor along with the date on which the sample was furnished and the name and address of the party to whom the sample was furnished.

It should be noted that this exception to the general rule that all restrictions will be removed must be strictly followed and that no variations of this explicit exception will be accepted as meeting the conditions of this section. This exception is consistent with the provisions in the Budapest Treaty and its implementing regulations (Rule 11.4).

Since the mere description of a deposit or identity of a deposit in a patent specification is not necessarily an indication that a requirement for deposit was made or that a deposit which complies with these rules has been made, accessibility to a deposited material referenced in a patent may depend on the satisfaction of conditions not apparent on the face of the patent. For these reasons, and upon request made to the Patent and Trademark Office, the Office will certify whether a deposit has been stated to have been made under conditions which would make it available to the public as of the issue date of the patent grant provided the request is made to the Director of Patent Examining Group 180, and contains the following information:

(1) The name and address of the depository

(2) The accession number given to the deposit

(3) The patent number and issue date of the patent referring to the deposit and

(4) The name and address of the requesting party.

For those deposits made pursuant to the Budapest Treaty, the World Intellectual Property Organization provides a form (Form BP–12) for requesting a certification of the availability of samples of deposited microorganisms pursuant to Rule 11.3(a) of the regulations under the Budapest Treaty. Copies of this form are available from the Director of Patent Examining Group 180.

Examination Procedures (Section 1.809)

This section sets forth procedures that will be used by the examiner to address a deposit issue. Deposit issues may arise in the examination of claims in applications for patent and for reissue of a patent, and in the examination of new or amended claims in a reexamination proceeding. The burden is initially on the Office to establish that access to a biological material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. Once the Office has met this burden, the burden shifts to the applicant or patent owner to demonstrate that access to such biological material either is not necessary or is already available, or that a deposit of such material is being or will be made, replaced or supplemented in accordance with these regulations.

Under paragraph (a) of this section, once the examiner has determined that access to a biological material is necessary, and that access is not presently available in accordance with these regulations, the examiner should make an appropriate rejection under 35 U.S. 112.

The applicant or patent owner may respond, pursuant to paragraph (b)(2) of this section, to a rejection made under paragraph (a) thereof by arguing why a deposit is not needed under the circumstances and/or why a deposit actually made should be acceptable. Other prescribed responses which are available to such a rejection depend upon whether the rejection is made in an application for patent, on the one hand, or in a proceeding involving a patent, i.e., an application for reissue patent or reexamination proceeding, on the other hand.

In an application for patent, applicant may respond, pursuant to paragraph (b)(1) of this section, by either making an acceptable original, replacement or supplemental deposit in accordance with these regulations, or assuring the Office in writing that an acceptable deposit will be made on or before the date of payment of the issue fee. In a proceeding involving a patent, the patent owner may respond, pursuant to paragraph (b)(1) of this section, by requesting a certificate of correction of the patent which meets the terms of paragraphs (b) and (c) of § 1.805. In all cases, any other response shall be considered non-responsive. The rejection will be repeated and made final until the requirements of paragraph (b)(1) of this section are satisfied or the examiner is convinced that a deposit is not required for the claimed subject matter.

As set forth in paragraph (c) of this section, in the event that an application for patent is otherwise in condition for allowance except for a needed deposit and the Office has received a written assurance that an acceptable deposit will be made, the Office will mail to the applicant a requirement that the needed deposit be made within three (3) months together with the Notice of Allowance and Issue Fee Due. Although the period for paying the issue fee cannot be extended under the provisions of § 1.136, the period for satisfying the requirement to make an acceptable deposit may be extended under the provisions of that section. Failure to make the needed deposit in accordance with this requirement may be considered a failure to prosecute the application under 35 U.S.C. 133 and result in abandonment of the application.

The type of written assurance which will be considered acceptable by the Office that an acceptable deposit will be made within the required time must include sufficient information to conclude that there is no outstanding issue with regard to the deposit of an appropriate biological material under conditions which satisfy these rules.

In a proceeding involving a patent, it may not be possible to request a certificate of correction of the patent which meets the terms of paragraphs (b) and (c) of § 1.805. For example, if the patent owner is on notice that samples of an original deposit can no longer be furnished by the depository, failure to diligently make a replacement deposit will preclude grant of a certificate of correction. A replacement deposit subsequently made will not be recognized by the Office nor will a request for certificate of correction, even if made promptly thereafter, be granted. It would also not be possible to request a certificate of correction of the patent which meets the terms of paragraphs (b) and (c) of § 1.805 where no original deposit was made before or during the pendency of the application which matured into the patent.

A patent defective because of lack of a necessary deposit is necessarily fatally defective for failure to comply with the first paragraph of 35 U.S.C. 112. Reissue is not available in such cases. See *In re Hay*, 534 F.2d 917, 189 USPQ 790 (CCPA 1976). Whether reissue is available where a biological material necessary for compliance with 35 U.S.C. 112 was known and readily available at the time of issuance of the patent and subsequently ceased to be readily available is problematic. Nevertheless, the rules do not provide for post-issue original deposits.

Where an applicant for patent has any doubt whether access to a biological material specifically identified in the specification is necessary to satisfy 35 U.S.C. 112 or whether such a material, while presently freely available, may become unavailable in the future, the applicant would be well-advised to make a deposit thereof before any patent issues. Similarly, where a patent owner has any doubt whether a deposit referred to in the specification is of a biological material necessary to satisfy 35 U.S.C. 112 and, if the material is necessary, whether it is otherwise known and readily available, the patent

BEST COPY AVAILABLE

owner would be well-advised to follow the procedures set forth in paragraphs (b) and (c) of § 1.805 after receiving the notice specified in those paragraphs.

Paragraph (d) of this section sets forth the requirements for the content of the specification with respect to a deposited biological material. Specifically, the specification shall contain the accession number for the deposit, the date of the deposit, the name and address of the depository, and a description of the deposited biological material sufficient to specifically identify it and to permit examination. The description must be sufficient to permit verification that the deposited biological material is in fact that disclosed. Once the patent issues, the description must be sufficient to aid in the resolution of questions of infringement. As a general rule, the more information that is provided about a particular deposited biological material, the better the examiner will be able to compare the identity and characteristics of the deposited biological material with the prior art.

Other Considerations

The rules are in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96–354), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel has certified to the Chief Counsel for Advocacy, Small Business Administration, that this rule change is not expected to have a significant adverse economic impact on a substantial number of small entites (Regulatory Flexibility Act, Pub. L. 96–354). The deposit practice will not impose extra work on patent applicants (whether small or large businesses or individuals).

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. There will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Patent and Trademark Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

These rules contain a collection of information requirement subject to the Paperwork Reduction Act which has been approved by the Office of Management and Budget under Control No. 0651–0022. Public reporting burden for this collection of information is estimated to average one hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed to make a deposit or request a sample, and completing and reviewing the collection of information. It is further estimated that a respondent depository would spend about five hours collecting and submitting the necessary information to be recognized as a suitable depository by the Office. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Organization, Patent and Trademark Office, Washington, DC 20231, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Paperwork Reduction Project 0651–0022). No comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, were received in response to the notice of proposed rulemaking.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and recordkeeping requirements, Small business.

For the reason as set out in the preamble, 37 CFR part 1 is amended as follows:

PART 1—RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR part 1 continues to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. A new subpart G, consisting of an undesignated centered heading and §§ 1.801 to 1.809, is added to read as follows:

Subpart G—Biotechnology Invention Disclosures

Deposit of Biological Material

Sec.
1.801 Biological material.
1.802 Need or Opportunity to make a deposit.
1.803 Acceptable depository.
1.804 Time of making an original deposit.
1.805 Replacement or supplement of deposit.
1.806 Term of deposit.
1.807 Viability of deposit.
1.808 Furnishing of samples.
1.809 Examination procedures.

Subpart G—Biotechnology Invention Disclosures

Deposit of Biological Material

§ 1.801 Biological material.

For the purposes of these regulations pertaining to the deposit of biological material for purposes of patents for inventions under 35 U.S.C. 101, the term biological material shall include material that is capable of self-replication either directly or indirectly. Representative examples include bacteria, fungi including yeast, algae, protozoa, eukaryotic cells, cell lines, hybridomas, plasmids, viruses, plant tissue cells, lichens and seeds. Viruses, vectors, cell organelles and other non-living material existing in and reproducible from a living cell may be deposited by deposit of the host cell capable of reproducing the non-living material.

§ 1.802 Need or opportunity to make a deposit.

(a) Where an invention is, or relies on, a biological material, the disclosure may include reference to a deposit of such biological material.

(b) Biological material need not be deposited unless access to such material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. If a deposit is necessary, it shall be acceptable if made in accordance with these regulations. Biological material need not be deposited, inter alia, if it is known and readily avaliable to the public or can be made or isolated without undue experimentation. Once deposited in a depository complying with these regulations, a biological material will be considered to be readily available even though some requirement of law or regulation of the United States or of the country in which the depository institution is located permits access to the material only under conditions imposed for safety, public health or similar reasons.

(c) The reference to a biological material in a specification disclosure or the actual deposit of such material by an applicant or patent owner does not create any presumption that such material is necessary to satisfy 35 U.S.C. 112 or that deposit in accordance with these regulations is or was required.

§ 1.803 Acceptable depository.

(a) A deposit shall be recognized for the purposes of these regulations if made in

(1) any International Depositary Authority (IDA) as established under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure, or

(2) any other depository recognized to be suitable by the Office. Suitability will be determined by the Commissioner on the basis of the administrative and technical competence, and agreement of the depository to comply with the terms and conditions applicable to deposits for patent purposes. The Commissioner may seek the advice of impartial consultants on the suitability of a depository. The depository must:

(i) Have a continuous existence;

(ii) Exist independent of the control of the depositor;

(iii) Possess the staff and facilities sufficient to examine the viability of a deposit and store the deposit in a manner which ensures that it is kept viable and uncontaminated;

(iv) Provide for sufficient safety measures to minimize the risk of losing biological material deposited with it;

(v) Be impartial and objective;

(vi) Furnish samples of the deposited material in an expeditious and proper manner; and

(vii) Promptly notify depositors of its inability to furnish samples, and the reasons why.

(b) A depository seeking status under paragraph (a)(2) of this section must direct a communication to the Commissioner which shall:

(1) Indicate the name and address of the depository to which the communication relates;

(2) Contain detailed information as to the capacity of the depository to comply with the requirements of paragraph (a)(2) of this section, including information on its legal status, scientific standing, staff and facilities;

(3) Indicate that the depository intends to be available, for the purposes of deposit, to any depositor under these same conditions;

(4) Where the depository intends to accept for deposit only certain kinds of biological material, specify such kinds;

(5) Indicate the amount of any fees that the depository will, upon acquiring the status of suitable depository under paragraph (a)(2) of this section, charge for storage, viability statements and furnishings of samples of the deposit.

(c) A depository having status under paragraph (a)(2) of this section limited to certain kinds of biological material may extend such status to additional kinds of biological material by directing a communication to the Commissioner in accordance with paragraph (b) of this section. If a previous communication under paragraph (b) of this section is of record, items in common with the previous communication may be incorporated by reference.

(d) Once a depository is recognized to be suitable by the Commissioner or has defaulted or discontinued its performance under this section, notice thereof will be published in the Office Gazette of the Patent and Trademark Office.

§ 1.804 Time of making an original deposit.

(a) Whenever a biological material is specifically identified in an application for patent as filed, an original deposit thereof may be made at any time before filing the application for patent or, subject to § 1.809, during pendency of the application for patent.

(b) When the original deposit is made after the effective filing date of an application for patent, the applicant shall promptly submit a verified statement from a person in a position to corroborate the fact, and shall state, that the biological material which is deposited is a biological material specifically identified in the application as filed, except if the person is an attorney or agent registered to practice before the Office, in which case the statement need not be verified.

§ 1.805 Replacement or supplement of deposit.

(a) A depositor, after receiving notice during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, shall notify the Office in writing, in each application for patent or patent affected. In such a case, or where the Office otherwise learns, during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, the need for making a replacement or supplemental deposit will be governed by the same considerations governing the need for making an original deposit under the provisions set forth in § 1.802(b). A replacement or supplemental deposit made during the pendency of an application for patent shall not be accepted unless it meets the requirements for making an original deposit under these regulations, including the requirement set forth under § 1.804(b). A replacement or supplemental deposit made in connection with a patent, whether or not made during the pendency of an application for reissue patent or a reexamination proceeding or both, shall not be accepted unless a certificate of correction under § 1.323 is requested by the patent owner which meets the terms of paragraphs (b) and (c) of this section.

(b) A request for certificate of correction under this section shall not be granted unless the certificate identifies:

(1) The accession number for the replacement or supplemental deposit;

(2) The date of the deposit; and

(3) The name and address of the depository.

(c) A request for a certificate of correction under this section shall not be granted unless the request is made promptly after the replacement or supplemental deposit has been made and:

(1) Includes a verified statement of the reason for making the replacement or supplemental deposit;

(2) Includes a verified statement from a person in a position to corroborate the fact, and shall state, that the replacement or supplemental deposit is of a biological material which is identical to that originally deposited;

(3) Includes a verified showing that the patent owner acted diligently—

(i) In the case of a replacement deposit, in making the deposit after receiving notice that samples could no longer be furnished from an earlier deposit or

(ii) In the case of a supplemental deposit, in making the deposit after receiving notice that the earlier deposit and become contaminated or had lost its compability to function as described in the specification;

(4) Includes a verified statement that the term of the replacement or supplemental deposit expires no earlier than the term of the deposit being replaced or supplemented; and

(5) Otherwise establishes compliance with these regulations, except that if the person making one or more of the required statements or showing is an attorney or agent registered to practice before the Office, that statement or showing need not be verified.

(d) A depositor's failure to replace a deposit, or in the case of a patent, to diligently replace a deposit and promptly thereafter request a certificate of correction which meets the terms of paragraphs (b) and (c) of this section, after being notified that the depository possessing the deposit cannot furnish samples thereof, shall cause the application or patent involved to be treated in any Office proceeding as if no deposit were made.

(e) In the event a deposit is replaced according to these regulations, the Office will apply a rebuttable presumption of identity between the original and the replacement deposit where a patent making reference to the deposit is relied upon during any Office proceeeding.

(f) A replacement or supplement deposit made during the pendency of an application for patent may be made for any reason.

(g) In no case is a replacement or supplemental deposit of a biological material necessary where the biological material, in accordance with § 1.802(b), need not be deposited.

(h) No replacement deposit of a biological material is necessary where a depository can furnish samples thereof but the depository for national security, health or environmental safety reasons is unable to provide samples to requesters outside of the jurisdiction where the depository is located.

(i) The Office will not recognize in any Office proceeding a replacement deposit of a biological material made by a patent owner where the depository could furnish samples of the deposit being replaced.

§ 1.806 Term of deposit.

A deposit made before or during pendency of an application for patent shall be made for a term of at least thirty (30) years and at least five (5) years after the most recent request for the furnishing of a sample of the deposit was received by the depository. In any case, samples must be stored under agreements that would make them available beyond the enforceable life of the patent for which the deposit was made.

§ 1.807 Viability of deposit.

(a) A deposit of biological material that is capable of self-replication either directly or indirectly must be viable at the time of deposit and during the term of deposit. Viability may be tested by the depository. The test must conclude only that the deposited material is capable of reproduction. No evidence is necessarily required regarding the ability of the deposited material to perform any function described in the patent application.

(b) A viability statement for each deposit of a biological material defined in paragraph (a) of this section not made under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure must be filed in the application and must contain:

(1) The name and address of the depository;

(2) The name and address of the depositor;

(3) The date of deposit;

(4) The identify of the deposit and the accession number given by the depository;

(5) The date of the viability test;

(6) The procedures used to obtain a sample if the test is not done by the depository; and

(7) A statement that the deposit is capable of reproduction.

(c) If a viability test indicates that the deposit is not viable upon receipt, or the examiner cannot, for scientific or other valid reasons, accept the statement of viability received from the applicant, the examiner shall proceed as if no deposit has been made. The examiner will accept the conclusion set forth in a viability statement issued by a depository recognized under § 1.803(a).

§ 1.808 Furnishing of samples.

(a) A deposit must be made under conditions that assure that:

(1) Access to the deposit will be available during pendency of the patent application making reference to the deposit to one determined by the Commissioner to be entitled thereto under § 1.14 and 35 U.S.C. 122, and

(2) Subject to paragraph (b) of this section, all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of the patent.

(b) The depositor may contract with the depository to require that samples of a deposited biological material shall be furnished only if a request for a sample, during the term of the patent:

(1) Is in writing or other tangible form and dated;

(2) Contains the name and address of the requesting party and the accession number of the deposit; and

(3) Is communicated in writing by the depository to the depositor along with the date on which the sample was furnished and the name and address of the party to whom the sample was furnished.

(c) Upon request made to the Office, the Office will certify whether a deposit has been stated to have been made under conditions which make it available to the public as of the issue date of the patent grant provided the request contains:

(1) The name and address of the depository;

(2) The accession number given to the deposit;

(3) The patent number and issue date of the patent referring to the deposit; and

(4) The name and address of the requesting party.

§ 1.809 Examination procedures.

(a) The examiner shall determine pursuant to § 1.104 in each application for patent, application for reissue patent or reexamination proceeding if a deposit is needed, and if needed, if a deposit actually made is acceptable for patent purposes. If a deposit is needed and has not been made or replaced or supplemented in accordance with these regulations, the examiner, where appropriate, shall reject the affected claims under the appropriate provision of 35 U.S.C. 112, explaining why a deposit is needed and/or why a deposit actually made cannot be accepted.

(b) The applicant for patent or patent owner shall respond to a rejection under paragraph (a) of this section by—

(1) In the case of an applicant for patent, making an acceptable original or replacement or supplemental deposit or assuring the Office in writing that an acceptable deposit will be made on or before the date of payment of the issue fee, or, in the case of a patent owner, requesting a certificate of correction of the patent which meets the terms of paragraphs (b) and (c) of § 1.805, or

(2) Arguing why a deposit is not needed under the circumstances of the application or patent considered and/or why a deposit actually made should be accepted. Other replies to the examiner's action shall be considered non-responsive. The rejection will be repeated until either paragraph (b)(1) of this section is satisfied or the examiner is convinced that a deposit is not needed.

(c) If an application for patent is otherwise in condition for allowance except for a needed deposit and the Office has received a written assurance that an acceptable deposit will be made on or before payment of the issue fee, the Office will mail to the applicant a Notice of Allowance and Issue Fee Due together with a requirement that the needed deposit be made within three months. The period for satisfying this requirement is extendable under § 1.136. Failure to make the needed deposit in accordance with this requirement will result in abandonment of the application for failure to prosecute.

(d) For each deposit made pursuant to these regulations, the specification shall contain:

(1) The accession number for the deposit;

(2) The date of the deposit;

(3) A description of the deposited biological material sufficient to specifically identify it and to permit examination; and

(4) The name and address of the depository.

Dated: July 21, 1989.

Donald J. Quigg,

Assistant Secretary and Commissioner of Patents and Trademarks.

Part IV

Department of Commerce

Patent and Trademark Office

37 CFR Part 2

Amendment of Trademark Rules Governing Inter Partes Proceedings, and Miscellaneous Amendments to Other Trademark Rules

DEPARTMENT OF COMMERCE

37 CFR Part 2

[Docket No. 81268-9163]

RIN 0651–AA36

Amendment of Trademark Rules Governing Inter Partes Proceedings, and Miscellaneous Amendments to Other Trademark Rules

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Final rule.

SUMMARY: The Patent and Trademark Office is amending the rules of practice in trademark cases to revise and/or codify procedures for the examination of applications; appeals from final refusals of registration; and the institution and conduct of trademark interference, concurrent use, opposition, and cancellation proceedings. The amendments will assist the orderly and prompt resolution of issues in proceedings before the Trademark Trial and Appeal Board.

EFFECTIVE DATE: November 16, 1989.

FOR FURTHER INFORMATION CONTACT: Janet E. Rice by telephone at (703) 557–3551 or by mail marked to her attention and addressed to Box 5, Trademark Trial and Appeal Board, Commissioner of Patents and Trademarks, Washington, DC 20231.

SUPPLEMENTARY INFORMATION: Amendments to §§ 2.42, 2.68, 2.91, 2.92, 2.93, 2.102, 2.104, 2.106, 2.112, 2.113, 2.114, 2.119, 2.120, 2.121, 2.122, 2.123, 2.125, 2.127, 2.128, 2.129, 2.134, 2.135, 2.142, 2.145, and 2.186 were proposed in a notice of proposed rulemaking published in the **Federal Register** on March 7, 1989, at 54 FR 9514, the Patent and Trademark Office *Official Gazette* of March 28, 1989, at 1100 O.G. 137, and the Bureau of National Affairs' *Patent, Trademark & Copyright Journal*, Vol. 37, No. 921, pp. 477–486 (March 9, 1989). Corrections to the **Federal Register** printing of the notice of proposed rulemaking were published in the **Federal Register** on April 4, 1989, at 54 FR 13605. The purpose of these proposed rule amendments was to revise, simplify, remove, or clarify existing rules or to codify in rules certain practices which are currently in effect. The rules involved included those relating to the requirements for concurrent use applications; abandonment of trademark applications; appeals to the Trademark Trial and Appeal Board (Board) from the final refusal of registration in ex parte applications; institution and conduct of interference, concurrent use, opposition, and cancellation proceedings before the Board; review by civil action of a decision of the Board; and allowing an assignee to take action with respect to the assigned application or registration. Written comments were submitted by two firms, five individuals, and one organization. The relevant committee of another organization stated that it had nothing to add to the comments of the first organization. Two other organizations submitted letters indicating that they accepted the proposed rule amendments in their entirety.

Discussion of Specific Sections Being Changed

In this discussion, "Patent and Trademark Office" is abbreviated as "PTO" and "Trademark Trial and Appeal Board" is abbreviated as "Board."

Section 2.42(a), which specifies certain requirements for an application for registration as a lawful concurrent user, is amended to remove the designation "(a)" (because § 2.42(b) is removed) and to delete the qualifying phrase "to the extent of his knowledge" from the requirement that an applicant for registration as a lawful concurrent user state in the application the area, the goods, and the mode of use for which registration is sought. This information obviously is within the knowledge of the applicant and is essential for purposes of examination and publication.

Section 2.42(b), which requires that the verification or declaration in an application for registration as a lawful concurrent user "be made with the stated exceptions," is removed to simplify practice. The paragraph has been construed, in applications for registration based on concurrent use, as requiring that the portion of the verification or declaration which normally reads, "to the best of his/her knowledge and belief no other person, firm, corporation or association has the right to use said mark in commerce," also include, after the word "association," the additional phrase "other than specified in the application." Because most applicants and/or their attorneys do not realize that this is the import of the paragraph, the examination process is often prolonged. Moreover, an applicant for registration based on concurrent use is required to list, in the statement portion of the application, the exceptions to applicant's right to exclusive use, so that it is clear that the verification or declaration is being made, in effect, with the stated exceptions. Therefore, the requirement for a verification or declaration which differs in form from that of an application for a geographically unrestricted registration is unnecessary.

Section 2.68, which pertains to the express abandonment of an application, presently provides, in the second sentence, that the fact that an application has been expressly abandoned shall not, in any proceeding in the PTO, affect any rights that the applicant may have in the mark which is the subject of the abandoned application. The section was proposed to be amended by inserting the phrase "during the ex parte prosecution thereof" immediately after the phrase "The fact that an application has been expressly abandoned." Instead, the section is being amended to include, at the beginning of the second sentence, a cross-reference to § 2.135 (i.e., "Except as provided in § 2.135, the fact that an application has been expressly abandoned shall not * * *"). The cross-reference to § 2.135 (which provides, in essence, that if an applicant whose application is the subject of an inter partes proceeding before the Board files a written abandonment of the application without the written consent of every adverse party, judgment shall be entered against the applicant) has been added, in lieu of the phrase specified in the notice of proposed rulemaking, and as a result of a written comment received thereon, to further clarify the section.

Section 2.91, which governs the declaration of interference proceedings, is amended to change the title of the section from "Interferences." to "Declaration of interference." The amendment is one of a series of amendments, involving §§ 2.91–2.93, intended to distinguish between the "declaration" of an interference by the Commissioner upon petition and the subsequent "institution" of the interference by the Board. *See* §§ 1208.04 and 1208.05 of the *Trademark Manual of Examining Procedure.*

Section 2.92, which pertains to certain matters preliminary to an interference, is revised to specifically indicate what must happen before an interference which has been "declared" by the Commissioner upon petition can be "instituted" by the Board.

Section 2.93, which governs the institution of an interference, is amended to, inter alia, change the title of the section from "Declaration of interference." to "Institution of interference.", and to revise the text of the paragraph to harmonize with §§ 2.91 and 2.92, as amended.

Section 2.102(c), which pertains to extensions of time for filing an opposition, was proposed to be amended to change the specified time period "120 days" to "four months." However, upon further consideration, it appears, for the reasons described hereafter in the "Response to Comments on the Rules" portion of this final rule notice, that the proposed amendment might add to confusion regarding the computation of extension periods. Accordingly, the proposal to amend this paragraph is withdrawn.

Section 2.104, which states certain requirements for a notice of opposition, is amended to redesignate the present paragraph as "(a)" and to add a new paragraph, designated "(b)," codifying the practice that oppositions to different applications owned by the same party may be joined in a consolidated opposition, when appropriate, provided that the required fees are paid. The proposed new paragraph parallels present § 2.112(b).

Section 2.106(b)(1), which contains provisions relating to opposition answers, is amended to include a short description of the content requirements for an answer to an opposition, just as present § 2.104 describes the content requirements for an opposition. The amendment parallels an amendment made herein to § 2.114(b)(1) concerning answers to petitions for cancellation. The description of the content requirements for an answer is modeled after portions of Rule 8 of the Federal Rules of Civil Procedure.

Section 2.106(c), which governs the withdrawal of an opposition, is amended to codify the practice that an applicant's written consent to the withdrawal of an opposition after answer may be signed by the applicant or by the applicant's attorney or other authorized representative. The amendment parallels amendments made herein to §§ 2.114(c), 2.134(a), and 2.135.

Section 2.112(a), which states requirements for a petition for cancellation, is revised to delete the requirement that a petitioner indicate in the petition "the respondent party to whom notification shall be sent," and to substitute a requirement that the petitioner indicate, to the best of the petitioner's knowledge, "the name and address of the current owner of the registration." The purposes of the revision are to provide the Board with information relating to the identity of the current owner of the registration sought to be cancelled, so that the Board can serve a copy of the petition on that party, and to remove any implication that the petitioner is permitted to designate who shall be the respondent. See also, in this regard, § 2.113, as amended herein.

Section 2.113, which concerns notification to the respondent of the filing of a petition for cancellation, is revised to codify the practice that the respondent shall be the party shown by the records of the PTO to be the current owner of the registration sought to be cancelled, except that the Board, in its discretion, may join or substitute as respondent a party who makes a showing of a current ownership interest in the registration. *See generally Gold Eagle Products Co.* v. *National Dynamics Corp.*, 193 USPQ 109 (TTAB 1976). The section is further revised to provide that when the party identified by the petitioner, pursuant to amended § 2.112(a), as the current owner of the registration or registrations is not the record owner thereof, a courtesy copy of the petition for cancellation shall be forwarded with a copy of the notification to the alleged current owner, which may file a motion to be joined or substituted as respondent.

Section 2.114(b)(1), which contains certain provisions relating to cancellation answers, is amended to include a short description of the content requirements for an answer to a petition for cancellation, just as present § 2.112(a) describes the content requirements for a petition for cancellation. The amendment parallels the amendment made herein to § 2.106(b)(1) concerning answers to oppositions.

Section 2.114(c), which governs the withdrawal of a petition for cancellation, is amended to codify the practice that a registrant's written consent to the withdrawal of a petition for cancellation after answer may be signed by the registrant or by the registrant's attorney or other authorized representative. The amendment parallels amendments made herein to §§ 2.106(c), 2.134(a), and 2.135.

Section 2.119, which presently governs service of papers, is amended to change the title from "Service of papers." to "Service and signing of papers.", so that the section title will describe the contents of the section as amended herein by the revision of paragraphs (b) and (c), and by the addition of two new paragraphs, designated "(d)" and "(e)."

Section 2.119(b), which states, inter alia, methods for service of papers, is revised to provide for two additional methods of service, namely, transmission by the "Express Mail" service of the United States Postal Service and transmission by overnight courier. The amendment codifies existing practice.

Section 2.119(c), which presently provides that when service is made by mail, the date of mailing will be considered the date of service; and that whenever a party is required to take some action within a prescribed period after the service of a paper upon him by another party and the paper is served by mail, 5 days shall be added to the prescribed period, is revised to specify that when service is made by first-class mail, "Express Mail," or overnight courier, the date of mailing or of delivery to the overnight courier will be considered the date of service; and that whenever a party is required to take some action within a prescribed period after the service of a paper upon such party by another party, and the paper is served by first-class mail, "Express Mail," or overnight courier, 5 days shall be added to the prescribed period. The amendments codify existing practice.

Section 2.119(d) is added to require that when a party to an inter partes proceeding before the Board is not domiciled in the United States, and is not represented by an attorney or other authorized representative located in the United States, the party must appoint a domestic representative on whom may be served notices or process in the proceeding. The purpose of the paragraph is to facilitate the service of papers on foreign parties not represented by domestic counsel in proceedings before the Board.

Section 2.119(e) is added to provide that every paper filed in an inter partes proceeding before the Board, and every request for an extension of time to file an opposition, must be signed by the party filing it, or by the party's attorney or other authorized representative. An unsigned paper will be refused consideration unless a signed copy is submitted before or within a time limit set in the PTO's notification of this defect. The purpose of the amendment is to simplify practice, and to eliminate the necessity for a petition to the Commissioner in the case of an unsigned notice of opposition or request for extension of time to oppose. The final rule includes a phrase that was not included in the proposed rule, namely, the phrase "and every request for an extension of time to file an opposition." The phrase has been added to further clarify the intent of the paragraph (that is, the paragraph was intended to cover requests for extension of time to oppose, but such a request is not, strictly speaking, a "paper filed in an inter partes proceeding before the Board," since at the time of the filing of a request for extension of time to oppose, there is not yet an opposition).

Section 2.120(a), which contains certain general provisions relating to discovery in inter partes proceedings before the Board, is amended to include a new sentence specifying that the opening of discovery is governed by the Federal Rules of Civil Procedure. The amendment is a codification of current practice. *See generally* Saul Lefkowitz and Janet E. Rice, *Adversary Proceedings Before the Trademark Trial and Appeal Board,* 75 TMR 323, 381–382 (1985).

Section 2.120(d), which presently pertains to document production, is amended to change the title from "Request for production." to "Interrogatories; request for production."; to redesignate the present paragraph as "(2)"; and to add a new paragraph, designated "(1)." The new paragraph limits the total number of interrogatories which a party may serve upon another party in a proceeding before the Board to seventy-five, counting subparts, with additional interrogatories being allowed by the Board, in its discretion, upon motion to the Board showing good cause, or upon stipulation of the parties; requires that a motion for leave to serve additional interrogatories be accompanied by a copy of the interrogatories, if any, which have already been served by the moving party, and by a copy of the interrogatories proposed to be served; and provide that if a party upon which interrogatories have been served believes that the number of interrogatories served exceeds the limitation specified in the paragraph, and is unwilling to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and objections to the interrogatories, file a motion for a protective order, accompanied by a copy of the interrogatories which together are said to exceed the limitation. The purpose of the new paragraph is to discourage parties from using written interrogatories for purposes of harassment, as exemplified in the case of *C. H. Stuart Inc.* v. *S. S. Sarna, Inc.,* 212 USPQ 386 (TTAB 1980). The amendment is believed to be in general harmony with corresponding local rules now prevalent in the federal district courts.

Section 2.120(g), which provides for the imposition of sanctions for failure to comply with an order of the Board relating to discovery, is amended to change the title from "Failure to comply with order." to "Sanctions."; to redesignate the present paragraph as "(1)"; and to add a new paragraph, designated, "(2)," providing that if a party fails to attend its discovery deposition, after being served with proper notice, or fails to respond to a set of interrogatories or to a set of requests for production of documents and things, and the party or the party's attorney informs the party seeking discovery that no response will be made thereto, the Board may make any appropriate order by way of sanctions. The purpose of the amendment is to eliminate the expense and delay resulting from the present practice, embodied in present paragraphs (e) and (g) of § 2.120, that in situations of the type described in the new paragraph, a motion to compel must be filed and granted and the resulting order violated before the party seeking discovery may move for sanctions. The proposed practice is in harmony with Rule 37(d) of the Federal Rules of Civil Procedure.

Section 2.120(j)(3), which describes how a discovery deposition, interrogatory answer, or admission may be made of record by a party entitled to rely thereon, is amended to redesignate the present paragraph as "(i)" and to add a new paragraph, designated "(ii)." The new paragraph codifies the existing practice, exemplified in cases such as *Jeanne-Marc, Inc.* v. *Cluett, Peabody & Co., Inc.,* 221 USPQ 58 (TTAB 1984); *Autac Inc.* v. *Viking Industries, Inc.,* 199 USPQ 367 (TTAB 1978); *Harvey Hubbell, Inc.* v. *Red Rope Industries, Inc.,* 191 USPQ 119 (TTAB 1976); and *MRI Systems Corp.* v. *Wesley-Jessen, Inc.,* 189 USPQ 214 (TTAB 1975), that a party which has obtained documents from another party, pursuant to a request for production under Rule 34 of the Federal Rules of Civil Procedure, may not make the produced documents of record by notice of reliance alone, except to the extent that the documents fall within the provisions of § 2.122(e). The reason for the practice is that documents so obtained generally suffer from a lack of proper authentication, unless they are of the self-authenticating type admissible by notice of reliance under § 2.122(e).

Section 2.120(j)(4), which presently provides, in effect, that if an appropriate party files a notice of reliance upon only part of a discovery deposition, an adverse party may file a notice of reliance upon any other part of the deposition which should in fairness be considered so as to make not misleading what was offered by the submitting party, is amended to require that the notice of reliance filed by the adverse party be supported by a written statement explaining why the adverse party needs to rely upon each of the additional parts listed in the adverse party's notice, failing which the Board, in its discretion, may refuse to consider the additional parts. The amendment represents a codification of current practice. *Cf. Alabama Board of Trustees* v. *BAMA-Werke Curt Baumann,* 231 USPQ 408, 409 (TTAB 1986), and *Holiday Inns, Inc.* v. *Monolith Enterprises,* 212 USPQ 949, 950–951 (TTAB 1981).

Section 2.120(j)(5), which presently specifies who may make of record (by notice of reliance) an interrogatory answer or an admission, is amended to require that a party which seeks to rely upon certain of its own responses to interrogatories or requests for admissions, pursuant to the fairness exception presently provided in the paragraph, support its notice of reliance with a written statement explaining why it needs to rely upon each of the additional discovery responses listed in the notice, failing which the Board, in its discretion, may refuse to consider the additional parts. The amendment parallels the amendment made herein to paragraph (j)(4) of the section and represents a codification of current practice. *See The Board of Trustees of the University of Alabama* v. *BAMA–Werke Curt Baumann, supra,* and *Holiday Inns, Inc.* v. *Monolith Enterprises, supra.*

Section 2.120(j)(8), which presently provides that "[i]nterrogatories, requests for production, requests for admissions, and materials or depositions obtained during the discovery period" should not be filed with the Board except under certain specified circumstances, one of which is "when submitted with a motion to compel," is revised to provide that "requests for discovery, responses thereto, and materials or depositions obtained through the discovery process" should not be filed with the Board except under certain specified circumstances; to change the phrase "when submitted with a motion to compel" to "when submitted with a motion relating to discovery;" and to state that papers or materials filed in violation of the paragraph may be returned by the Board. The purpose of the revision is to clarify the beginning of the paragraph, and to reduce the number of papers and materials which must be retained in a proceeding file and stored by the Board. The amendment changing the phrase "when submitted with a motion to compel" to "when submitted with a motion relating to discovery" did not appear in the notice of proposed rulemaking as a proposed amendment. However, the amendment is "housekeeping" in nature, being necessary to harmonize this paragraph with amendment § 2.120(d)(1), which

requires that copies of interrogatories be filed with the Board in connection with two additional discovery motions, namely, the motion for leave to serve additional interrogatories, and the motion for a protective order filed in response to interrogatories believed to be excessive in number.

Section 2.121(a)(1), which governs the scheduling of trial periods, is amended to include a new sentence codifying the practice that the resetting of a party's time to respond to an outstanding request for discovery will not automatically result in the rescheduling of the discovery and/or testimony periods, and that such dates will be rescheduled only upon stipulation of the parties approved by the Board, or upon motion granted by the Board, or by order of the Board.

Section 2.122(e), which presently requires that a notice of reliance on a printed publication specify the printed publication and the pages to be read, indicate generally the relevance of the material being offered, and be accompanied by "the printed publication or a copy of the relevant portion thereof, including the title page and any other page needed to show the place and date of publication, the name and address of the publisher, and the name of the author or the editor," is amended to require that the notice of reliance specify the printed publication (including information sufficient to identify the source and the date of the publication) and the pages to be read; indicate generally the relevance of the material being offered; and be accompanied by the printed publication or a copy of the relevant portion. The purpose of the amendment is to simplify practice.

Section 2.123(c), which governs notices of depositions, is amended to clarify the paragraph and to codify the current practice that testimony depositions may be noticed for any reasonable time and place in the United States, but that a testimony deposition may not be noticed for a place in a foreign country except as provided in paragraph (a)(2) of the section. This codification of practice as to the place where testimony depositions may be taken roughly parallels § 1.673(a), which governs the taking of testimony depositions in patent interference proceedings in the PTO.

Section 2.123(e)(2), which pertains to the examination of witnesses during oral deposition, is amended to include a new sentence stating that exhibits which are marked and identified at a deposition will be deemed to have been offered into evidence, without any formal offer thereof, unless the intention of the party marking the exhibits is clearly expressed to the contrary. The purpose of the amendment is to revise existing practice, which requires, on the part of the party marking the exhibits, either a formal offer or a clear indication in the transcript of an intent to introduce the exhibits. *See, e.g., Roux Laboratories, Inc.* v. *Kaler,* 214 USPQ 134, 135–136 (TTAB 1982); *H. Betti Industries, Inc.* v. *Brunswick Corp.,* 211 USPQ 1188, 1189 (TTAB 1981); and *Kay Corp.* v. *Weisfield's, Inc.,* 190 USPQ 565, 567–568 (TTAB 1976). Under the existing practice, a party can lose a case simply because the party's attorney forgets to make a formal offer of the exhibits marked and identified during the party's testimony deposition. Under the practice set forth in the amended paragraph, the Board will be able to determine such cases on their merits, rather than on the basis of a technical defect.

Section 2.123(g)(1), which relates to the form of deposition transcripts, is amended to permit the use of paper with numbered lines as an alternative to consecutively numbering the questions propounded to a witness. The amendment, which parallels § 1.677(a), the provision governing the form of deposition transcripts in patent interference proceedings, will simplify practice.

Section 2.125(a), which governs the filing and service of testimony, is amended to codify the existing practice that if a copy of a deposition transcript, with exhibits, is not served upon each adverse party within thirty days after completion of the taking of the testimony or within an extension of time for that purpose, any adverse party which was not served may have remedy by way of a motion to the Board to reset the adverse party's testimony and/or briefing periods, as may be appropriate. The paragraph is further amended to provide that if the deposing party fails to serve a copy of the transcript with exhibits on an adverse party after having been ordered to do so by the Board, the Board may strike the deposition, or enter judgment by default against the deposing party, or take other action as may be deemed appropriate.

Section 2.127(e)(1) is added to codify the long-established practice that a motion for summary judgment should be filed prior to the commencement of the first testimony period, as originally set or as reset, and that the Board, in its discretion, may deny as untimely any motion for summary judgment filed thereafter. *See Rainbow Carpet, Inc.* v. *Rainbow International Carpet Dyeing & Cleaning Co.,* 226 USPQ 718 (TTAB 1985); *Allegro High Fidelity, Inc.* v. *Zenith Radio Corp.,* 197 USPQ 550 (TTAB 1977); *La Maur, Inc.* v. *Bagwells Enterprises, Inc.,* 193 USPQ 234 (Comm'r Pat. 1976); *Peterson's Ltd., Inc.* v. *Consolidated Cigar Corp.,* 183 USPQ 559 (TTAB 1974); *Cities Service Oil Co.* v. *Perfection American, Inc.,* 157 USPQ 209 (TTAB 1968); T. Jeffrey Quinn, *Tips From the TTAB: Inter Partes Summary Judgment Revisited,* 76 TMR 73 (1986); and David J. Kera, *Tips From the TTAB: Summary Judgment,* 71 TMR 59, 61–62 (1981).

Section 2.127(e)(2) is added to provide, in essence, that for purposes of summary judgment only, a party may rely on its own responses to requests for discovery served upon it by an adverse party. The new paragraph changes the Board's current practice, under which a party normally is not permitted to rely upon its own responses to discovery for purposes of summary judgment. It is believed that the new practice will be more consistent with the practice in the Federal district courts.

Section 2.127(f) is added to codify the existing practice that the Board does not have authority to hold any person in contempt, or to award attorneys' fees or other expenses to any party. Although paragraphs (f), (g), and (h) of § 2.120, the section which governs the taking and use of discovery in inter partes proceedings before the Board, include provisions very similar in nature to the new paragraph, some litigants and/or their attorneys have mistakenly assumed that the Board has the authority to award attorneys' fees or other expenses in situations not involving a failure to provide discovery. The addition of this new paragraph to § 2.127, the section which governs motions in general, will clarify the matter.

Section 2.128(b), which presently provides, in pertinent part, that without leave of the Board, no brief shall contain more than fifty pages of argument, is amended to specify a minimum type or print size for a brief and to provide that without prior leave of the Board, a main brief on the case shall not exceed fifty-five pages in length in its entirety. Litigants before the Board, and their attorneys, are often confused as to exactly what is encompassed by the term "argument," as used in the present paragraph. The amendment simplifies and clarifies practice by specifying length limits for briefs in their entireties, followed by a list of the elements which are included within the length limit. The limit specified in the amended paragraph is five pages longer than that specified in the present paragraph, because the new length limit covers the entire brief, including the table of contents and index of cases, whereas the present length limit does not.

Section 2.129(a), which presently provides, in pertinent part, that oral arguments at final hearing will be heard by three Members of the Board, is amended to provide that such oral arguments will be heard by at least three Members of the Board. The purpose of the amendment, which parallels an amendment made herein to § 2.142(e)(1), is to reflect the Board's use of augmented panels in certain cases.

Section 2.134(a), which pertains to the surrender or voluntary cancellation of a registration which is the subject of a cancellation proceeding before the Board, is amended to codify the practice that in a cancellation proceeding, an adverse party's consent to the respondent's voluntary surrender of the involved registration may be signed by the adverse party or by the adverse party's attorney or other authorized representative. The amendment parallels amendments made herein to §§ 2.106(c), 2.114(c), and 2.135.

Section 2.135, which states the effect of the abandonment of an application which is the subject of an inter partes proceeding before the Board, is amended to codify the practice that in an opposition, concurrent use, or interference proceeding, an adverse party's consent to an applicant's abandonment of the applicant's involved application may be signed by the adverse party or by the adverse party's attorney or other authorized representative. The amendment parallels amendments made herein to §§ 2.106(c), 2.114(c), and 2.134(a).

Section 2.142(b), which governs ex parte appeal briefs, is amended to redesignate the present paragraph as "(1)" and to add a new paragraph, designated "(2)," codifying the form requirements and a length limit (twenty-five pages) for briefs filed in connection with ex parte appeals to the Board.

Section 2.142(e)(1), which presently provides that oral argument on an ex parte appeal to the Board will be heard by three Members of the Board, is amended to provide that oral argument will be heard by at least three Members of the Board. The purpose of the amendment, which parallels an amendment made herein to § 2.129(a), is to reflect the Board's use of augmented panels in certain cases.

Section 2.142(f)(6) is added to codify the practice that if, during an appeal to the Board from a refusal of registration, it appears to the examiner that an issue not previously raised may render the mark of the appellant unregistrable, the examiner may, by written request, ask the Board to suspend the appeal and to remand the application to the examiner for further examination.

Section 2.145(c)(4) is added to provide that a party to a proceeding before the Board which commences a civil action, pursuant to section 21(b) of the Act, seeking review of a decision of the Board should file written notice with the Board, within one month after the expiration of the time for appeal or civil action, in order to avoid premature termination of the Board proceeding. The purpose of the amendment is to ensure that parties who seek review of Board decisions by way of civil action will be aware of the need for informing the Board thereof.

Section 2.186, which presently provides that any action with respect to an assigned application or registration which may or must be taken by a registrant or applicant may be taken by the assignee provided that the assignment has been recorded, is amended by adding at the end the phrase "or that proof of the assignment has been submitted." The purpose of the amendment is to bring the section into closer conformity with section 10 of the Act.

Response to Comments on the Rules

The written comments received in response to the notice of proposed rulemaking have been given careful consideration, and a number of the suggested modifications have been adopted. The comments and responses are discussed below.

Comment: In the notice of proposed rulemaking, it was stated in the "Discussion of Specific Sections Proposed to be Changed" that § 2.68, which pertains to the express abandonment of an application, was proposed to be amended to indicate that the section applies only to the abandonment of an application during the ex parte prosecution thereof, i.e., an application not involved in an inter partes proceeding before the Board. Specifically, the proposed amendment was that the second sentence of the section, which presently reads, "The fact that an application has been expressly abandoned shall not, in any proceeding in the Patent and Trademark Office, affect any rights that the applicant may have in the mark which is the subject of the abandoned application," be amended by adding the phrase "during the ex parte prosecution thereof" immediately after the phrase "The fact that an application has been expressly abandoned." One firm commented that if the proposed amendment was intended to clarify the fact that this section applies only to ex parte applications, the phrase "during the ex parte prosecution thereof" should be added not to the second sentence of the section but rather after the words "An application" in the first sentence, which presently reads, "An application may be expressly abandoned by filing in the Patent and Trademark Office a written statement of abandonment or withdrawal of the application signed by the applicant, or the attorney or other person representing the applicant."

Response: The intent of the proposed amendment was to make it clear that the second sentence of the section (i.e., the sentence which provides, in essence, that the express abandonment of an application shall not, in any proceeding in the PTO, affect any rights which applicant may have in the mark which was the subject of the abandoned application) applies only to the abandonment of an application during ex parte prosecution (the effect of the abandonment of an application which is the subject of an inter partes proceeding before the Board being governed by § 2.135). Thus, the "Discussion of Specific Sections Proposed to be Changed" should have stated that § 2.68 was proposed to be amended to indicate that the "second sentence of the section" (not "the section") applies only to the abandonment of an application during the ex parte prosecution thereof. The first sentence of the section, which relates to the form of an express abandonment, is applicable both to applications which are the subject of an inter partes proceeding before the Board and to those which are not. Thus, the suggested modification has not been adopted. However, for purposes of added clarity, and in lieu of the amendment proposed in the notice of proposed rulemaking, the beginning of the second sentence of the section is being modified to include a cross-reference to § 2.135 (i.e., "Except as provided in § 2.135, the fact that an application has been expressly abandoned shall not * * *").

Comment: Section 2.102(c) was proposed to be amended to change the specified time beyond which an extension of time to oppose will not be granted without the consent of the applicant or a showing of extraordinary circumstances, from "120 days from the date of publication" to "four months from the date of publication." The organization indicated its belief that since the proposed change would not affect the statutorily mandated "30 day" period for filing an opposition, the amendment would (at least initially) add to confusion regarding the computation of extension periods. In the same vein, one firm commented that the proposed amendment would make sense provided the Board allows potential opposers to request extensions of time to oppose in terms of months rather than days.

Response: It is true that under section 13 of the Act of 1946, the statutorily mandated period for filing an opposition is "thirty days after the publication * * * of the mark sought to be registered." Section 13 further provides, in part, that the time for filing an opposition shall be extended for an additional thirty days upon written request prior to the expiration of the thirty-day opposition period, and that further extensions of time for filing an opposition may be granted by the Commissioner for good cause when requested prior to the expiration of an extension. Upon further consideration, it appears that the proposed amendment may encourage potential opposers to request the first and subsequent extensions of time to oppose in terms of months rather than days, causing confusion in the computation of extension periods. Accordingly, the proposal to amend § 2.102(c) is withdrawn. In the event that section 13 of the Act is amended to change the time periods specified therein from "thirty days" to "one month," the proposal to amend § 2.102(c) to change the designation "120 days" to "four months" may be included in a future notice of proposed rulemaking.

Comment: With respect to the proposal to revise § 2.113 (which concerns notification to the respondent of the filing of a petition for cancellation) to indicate that the respondent "shall be the party shown by the records of the Patent and Trademark Office to be the current owner of the registration or registrations sought to be cancelled, except that the Board, in its discretion, may join or substitute as respondent a party who makes a showing of a current ownership interest in such registration or registrations," one individual suggested, in effect, that the section be further revised to provide that if the party identified by the petitioner as the current owner of the registration is not the party shown by the records of the PTO to be the owner, service of the notification and of the petition will be made on the identified current owner as well as on the record owner. The individual notes that this revision would make § 2.113 consistent with proposed (and amended) § 2.112(a) (governing the contents of a petition for cancellation), which requires, in part, that the petitioner indicate, to the best of petitioner's knowledge, the name and address of the current owner of the registration. In addition, one firm suggested that § 2.113 be further revised to provide that a copy of a petition for cancellation will be sent (by the Board) both to the registrant and to the registrant's last attorney of record. The firm expressed its belief that sending a copy of the petition for cancellation to the registrant's last attorney of record as well as to the registrant "may serve to speed up cancellation proceedings, which are sometimes delayed by many months by reason of the fact that the registrant cannot be located and it is necessary to publish notice of the proceeding in the Office Gazette."

Response: Under present practice, when a petitioner informs the Board of petitioner's belief that the registration sought to be cancelled is currently owned by a party other than the party shown by the records of the PTO to be the owner, the Board sends a copy of the notification and of the petition to cancel both to the record owner, and to the party identified by the petitioner as the current owner. The current owner may file a motion, supported by evidence of its current ownership of the registration, to be joined or substituted as respondent. The paragraph has been modified, as suggested by the first individual, to reflect this practice.

As to the suggestion that § 2.113 be further revised to provide that a copy of the petition for cancellation will be sent both to the registrant and to the registrant's last attorney of record, it is the practice of the Board, in those cases where the respondent's copy of the petition for cancellation is returned to the Board as undeliverable, to send a written communication to the petitioner asking the petitioner for information concerning respondent's current address. If the petitioner files a response indicating that the respondent is no longer in business, notice of the proceeding is published in the *Official Gazette*. If the petitioner fails to file a reponse, or files a response indicating that it is unable to furnish respondent's current address, the Board attempts to locate the respondent. Typically, the Board will contact a telephone information operator in the city of respondent's last-known address; the respondent's last attorney of record, if there is an attorney and such attorney's last appearance of record on the respondent's behalf was within the last five years or so; and/or the Secretary of State of the respondent's state of incorporation. If the Board is unable to locate the respondent after reasonable investigation, notice of the proceeding is published in the *Official Gazette*.

The practice suggested by the firm would be burdensome to the Board since the Board would have to make an extra copy of the petition to cancel (and any exhibits attached thereto) to send to the attorney; this would have to be done for most cancellation proceedings, since most respondents have been represented by counsel at one time or another; and in those cases where the copy of the petition for cancellation mailed to the respondent's attorney was returned to the Board as undeliverable, the returns would be additional receipts to be processed by the Board.

Under the Board's present practice, on the other hand, the Board acts only in those cancellation proceedings in which the respondent's copy of the petition for cancellation is returned as undeliverable (a minority of cases).

Preliminary steps have been taken to begin giving notice, by publication in the *Official Gazette*, of the filing of every petition for cancellation soon after its filing date, thus eliminating the need for a later service by publication in cases where the Board's efforts to serve notice of the proceeding by mail are unsuccessful.

Accordingly, the modification suggested by the firm has not been adopted.

Comment: Section 2.119(b), which lists methods for service of papers by one party upon another in an inter partes proceeding before the Board, was proposed to be amended to specifically provide for the service of papers by two additional methods, namely, transmission by the "Express Mail" service of the United States Postal Service and transmission by overnight courier. One individual applauded the proposal but commented that on one occasion, a problem arose when an overnight courier delivered a paper directly to the PTO at its physical location in Virginia. The individual suggested that if the proposed amendment is adopted, "the overnight courier should be provided a physical address rather than Box 5 at Washington DC 20231."

Response: Section 2.119(b) pertains to the service of papers by one party upon another, not to the filing of papers with the PTO.

Comment: Section 2.119(c), which presently provides, in part, that whenever a party is required to take some action within a prescribed period after the service of a paper upon that party by another party and the paper is served by mail, 5 days shall be added to the prescribed period, was proposed to be amended to apply also to service by "Express Mail" or by ovenright courier. One individual commented that when service is made by "Express Mail" or overnight courier, the addition of 5 days to any prescribed time period for taking action seems unjustified. This individual suggested that the paragraph be modified to provide for the addition of only one day to the prescribed time for taking action when service is made by "Express Mail" or by overnight courier.

Response: Since papers transmitted by "Express Mail" or by overnight courier are not always delivered in one day, it was determined that the number of added days for service should be the same for service by "Express Mail" or by overnight courier as for service by first-class mail. An attorney who does not want to give an adverse party the advantage of having 5 added days after service by "Express Mail" or by overnight courier can always elect to serve by first-class mail instead. Accordingly, the suggested modification has not been adopted.

Comment: New § 2.119(d) was proposed to be added to require, in essence, that a party to an inter partes proceeding who is not domiciled in the United States and is not represented by an attorney or other authorized representative located in the United States, appoint a domestic representative on whom may be served notices or process in the proceeding. One firm commented that the proposed paragraph might be redundant because any foreign applicant is required (by § 2.24) to designate a domestic representative in the application.

Response: In the notice of proposed rulemaking, the term "application" was inadvertently used instead of the correct term "proceeding" in the second sentence of the paragraph. Although § 2.24 requires that an applicant not domiciled in the United States appoint a domestic representative, there is no rule which makes any similar requirement in the case of a foreign opposer, petitioner, or respondent involved in an inter partes proceeding before the Board. The proposal to add new § 2.119 was intended to remedy that oversight and thus to facilitate the service of papers on foreign opposers, petitioners and respondents not represented by domestic counsel. Inasmuch as there is, in fact, a need for the proposed requirement, proposed § 2.119(d) is adopted herein as a final rule, and the second sentence has been corrected by substituting the term "proceeding" for the term "application."

Comment: Section 2.120(a), which contains certain general provisions relating to discovery in inter partes proceedings before the Board, was proposed to be amended to include a new sentence specifying that the opening of discovery is governed by the Federal Rules of Civil Procedure. One firm commented, in essence, that the proposed amendment "does not clarify the situation of when discovery opens;" that the opening of discovery as set forth in the Federal Rules of Civil Procedure does not work in opposition and cancellation proceedings because of the delay (of one to two months) between the filing of the complaint, i.e., the notice of opposition or petition for cancellation, and service of a copy of the complaint upon the defendant by the Board; that this delay gives the defendant, which may start to take discovery immediately after the complaint is filed, an advantage over the plaintiff, which cannot take discovery until a copy of the complaint has been served by the Board upon the defendant, and is not entitled to receive responses to its interrogatories, requests for production, and requests for admission until 45 days after such service by the Board; and that the "preferred situation would be for the Board to set forth a specific time before which discovery requests cannot be served," as, for example, to provide that discovery opens on the date that the Board notifies the defendant of the filing of the proceeding.

Response: It is apparent that the thrust of the firm's comments relating to this proposed amendment is not that the proposed new provision is unclear but rather that the firm would prefer a different practice with respect to the opening of discovery in proceedings before the Board. The proposed amendment codifies a long-standing practice which, in the experience of the Board, has worked smoothly. Although some defendants in Board opposition and cancellation proceedings learn about the existence of the proceeding, and serve discovery requests, before the Board serves them with a notice of the filing of the proceeding and a copy of the complaint, most do not. Nor does the plaintiff, who, after all, is the party which initiated the proceeding, and has had time to plan and prepare therefor, suffer any real prejudice (as opposed to a possible perceived tactical disadvantage) in those cases where the defendant does initiate discovery before the plaintiff can do so. Accordingly, the modification suggested by the firm has not been adopted.

Comment: Section 2.120(d) was proposed to be amended to include a new paragraph, designated "(1)," limiting the number of interrogatories which a party may serve upon another party to twenty-five, not counting subparts (required to be relevant, and reasonable in number), with additional interrogatories being allowed by the Board, in its discretion, only upon motion to the Board showing extraordinary circumstances, or upon stipulation of the parties.

One individual expressed his belief that the proposed "extraordinary circumstances" test is too harsh and suggested instead that the test be "substantial need in the preparation of the moving party's case."

A second individual expressed his belief that the "reasonable number of relevant subparts" provision is so subjective that it would lead to an increase in discovery disputes and motions. This individual suggested that the interrogatory limit be set at fifty rather than twenty-five, and that the "reasonable number of relevant subparts" provision be replaced with the sentence, "In computing the total number of interrogatories, each subdivision of separate questions shall be counted as an interrogatory."

A third individual commented that limiting interrogatories to twenty-five with a reasonable number of subparts would cause uncertainty over whether interrogatories, although numbered twenty-five or less, actually contain more than twenty-five separate questions, leading litigants to make their own count of the questions, answer twenty-five, and not answer fully the remainder on the ground that supernumerary questions are not authorized by the rules. To remedy this problem, the individual suggested that if the proposed rule is adopted, it might be advisable to add "a provision prescribing that relief for an excessive number of interrogatories is a protective order rather than an incomplete response to the interrogatories." The same individual also commented that in any event, the rule should not be applied to pending cases.

One firm commented that by stating that the twenty-five interrogatories may contain a reasonable number of relevant subparts, the whole purpose of the proposed rule (to discourage harassment by the use of too many interrogatories) has been defeated since the interrogatory limit can easily be avoided by using subparts. The firm suggested that the number of interrogatories be limited instead to a stated number, such as 125, including subparts; and that the rule be clarified to provide for extra interrogatories in cases where more than one mark is involved.

Another firm expressed its belief that the number of interrogatories should not be limited; that the proposed rule would make practice before the Board more expensive and less convenient; that the

particular number limit proposed is even below the number allowed by some federal courts; that the "extraordinary circumstances" test is not practical because of the lack of specificity as to what constitutes "extraordinary" circumstances, and because of the delay involved in having to file a motion to obtain a ruling on the question; and that a better practice would be a provision which allows a party to move for a limitation on the number of interrogatories if a problem arises. This firm submitted copies of a number of different federal district court local rules pertaining to interrogatories.

Finally, an organization expressed its concern that the proposed limitation on the number of interrogatories could: (1) Lead to an increase in motions to the Board in order to permit parties to serve valid follow-up interrogatories regarding prior responses and documents produced; or (2) result in increased reliance on depositions, generally a more costly and intrusive form of discovery. The organization recommended that the PTO monitor the impact of this amendment carefully and further amend the rule to make it less restrictive, if the circumstances warrant.

Response: Upon careful consideration of the comments, and supporting arguments, submitted with respect to proposed § 2.120(d)(1), it is concluded that the "reasonable number of relevant subparts" provision is so subjective that it would lead to a large increase in discovery disputes and motions, and hence be burdensome both to the Board and to litigants and their attorneys. Moreover, if unlimited subparts were allowed, the purpose of the proposed paragraph (to discourage parties from using written interrogatories for purposes of harassment) would, as noted by the firm, be defeated, since the interrogatory number limit could easily be avoided through the use of many subparts; whereas, if no subparts were allowed (or if each subpart were counted as an interrogatory), the limit in the proposed rule might lead to increased use of discovery depositions, a more costly form of discovery. The proposed limitation was not intended to deprive parties of interrogatories for which they have a legitimate need or to make it more expensive for parties to obtain discovery. Rather, it was intended to protect litigants from being harrassed by excessive numbers of interrogatories. Accordingly, the proposed paragraph has been modified to limit the total number of interrogatories which a party may serve upon another party in a proceeding to seventy-five, counting subparts, with additional interrogatories being allowed by the Board, in its discretion, upon motion to the Board showing good cause, or upon stipulation of the parties. The words "total" and "in a proceeding," which were not included in the proposed rule, have been included in the final rule to make it clear that the number limitation refers to the total number of interrogatories served during an entire proceeding, not just per set of interrogatories.

The suggestion that the final rule include, in lieu of a specific limitation on the number of interrogatories which may be served, a provision allowing a party to move for a limitation on the number of interrogatories if a problem arises, has not been adopted. It is believed that such a provision would result in a large number of motions from parties which would not be willing to answer interrogatories without first obtaining a ruling from the Board as to whether the interrogatories were reasonable in number.

The amended paragraph has not been modified to provide for extra interrogatories in cases where more than one mark is pleaded by the plaintiff, or where the proceeding involves more than one mark registered or sought to be registered by the defendant, because in such cases the adverse party may simply request that each interrogatory be answered with respect to each mark, and the interrogatories will be counted the same as if they pertained to only one mark. In the same vein, the final rule does not provide for extra interrogatories in cases where there is a counterclaim for cancellation of a plaintiff's pleaded registration or registrations, because the discovery information needed by a defendant in a proceeding before the Board for purposes of defending itself against the plaintiff's claim usually encompasses any information which may be needed for a counterclaim. Thus, it is believed that in most cases, the mere fact that there may be a multiple mark situation, or a counterclaim, will not result in a need for interrogatories exceeding in total number the limitation specified in the final rule. However, in those cases where there is, because of a multiple mark or counterclaim situation, a legitimate need for interrogatories exceeding the specified limit in number, the party who wishes to serve additional interrogatories will be able to make the requisite showing of good cause in support of a motion for leave to do so.

For purposes of clarity, the final paragraph includes (as did several of the Federal district court local rules submitted by one firm) a requirement that a motion for leave to serve additional interrogatories be accompanied by a copy of the interrogatories which have already been served by the moving party, if any, and by a copy of the interrogatories proposed to be served. Obviously, the Board cannot make an informed ruling on such a motion without these copies.

The final paragraph also includes, as suggested by one individual, a provision indicating that relief for an excessive number of interrogatories is a protective order rather than an incomplete response to the interrogatories. Specifically, the final paragraph states that if a party upon which interrogatories have been served believes that the number of interrogatories served exceeds the limitation specified in the paragraph, and is not willing to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and objections to the interrogatories, file a motion for a protective order, accompanied by a copy of the interrogatories which together are said to exceed the limitation.

The suggestion that this rule not be applied to pending cases has not been adopted. By a final rule notice published in the **Federal Register** on April 18, 1972 at 37 FR 7605, the rules of practice in trademark cases were amended to substantially adopt the liberal discovery practice provided under the Federal Rules of Civil Procedure. Those rule amendments were made applicable to all proceedings filed on or after July 1, 1972. The result was that for a number of years, some inter partes cases before the Board were governed by one set of rules, providing a liberal discovery practice, and others were governed by another set of rules under which discovery was more restricted. This situation caused confusion among litigants and their attorneys and was burdensome to the Board. Further, it is desirable that other rule amendments herein be made effective in all cases as soon as possible, and it would be extremely confusing for all concerned if some of the rule amendments were made applicable to all cases pending before the Board on or after the effective date of the rule amendments, and others were made applicable only to proceedings which commenced on or after that date. For these reasons, it is believed that the better alternative is to make the new interrogatory rule applicable to all inter partes proceedings pending before the Board on or after the effective date of the rule amendments. However, the new rule will apply only to interrogatories served on or after that date (although interrogatories served prior to that date will, of course, be counted in determining whether interrogatories served after the effective date violate the limitation specified in the new rule; that is, a party who has served 100 interrogatories prior to the effective date of the new rule is not given license by the new rule to serve another 75 after the effective date).

Finally, as suggested by the organization, the PTO will monitor the impact of this rule amendment carefully and further amend the rule to make it less restrictive, if circumstances warrant.

Comment: One individual and one firm commented, with respect to proposed §§ 2.120(g)(2) and 2.120(j)(3)(i), that there appeared to be significant errors in the text as published in the **Federal Register** and in the *Patent, Trademark & Copyright Journal.*

Response: The noted errors were made in printing, when several pages of original text were transposed. On April 4, 1989, a correction notice pertaining to those errors, among others, was printed in the Federal Register at 54 FR 13605. The errors did not appear in the text as published in the *Official Gazette.*

Comment: Section 2.123(e)(2), which pertains to the examination of witnesses during oral deposition, was proposed to be amended to include a new sentence stating that exhibits which are marked and identified at a deposition will be deemed to have been offered into evidence, without any formal offer thereof, unless the intention of the parties is clearly to the contrary. The purpose of the proposed amendment was to revise existing practice, which requires, on the part of the party marking the exhibits, either a formal offer or a clear indication in the transcript of an intent to introduce the exhibits. One individual commented that the clause "unless the intention of the parties is clearly to the contrary" is somewhat inaccurate and ambiguous. The individual suggested that the proposed clause be modified to read, "unless the intention of the party marking the exhibit is clearly expressed to the contrary."

Response: The paragraph has been modified as suggested.

Comment: One individual commented that he applauded the proposal to amend § 2.123(g)(1), which relates to the form of deposition transcripts, to permit the use of paper with numbered lines as an alternative to consecutively numbering the questions propounded to a witness, but suggested that the paragraph be amended further to delete another requirement, namely, the requirement that the name of the witness be plainly and conspicuously written at the top of each page. The individual questioned whether "it is necessary to still require that the name of the witness be written at the top of each page provided that the testimony of each witness is bound into one or more volumes separately from the testimony of any other witness and clearly marked on the cover and at the first and last to indicate the name of that particular witness." The individual noted that many of the reporters available for use in this type of proceeding are retired former court reporters who have established independent businesses, and "who do not have elaborate word processing which could perform that task automatically during printing."

Response: The appearance of the name of the witness at the top of each page of a deposition transcript is quite helpful to the Board. For example, sometimes litigants submit, in connection with a motion, copies of several selected pages from one or more deposition transcripts. In such cases, the name at the top of the page is sometimes the only means the Board has of determining whose testimony is on each page. Moreover, often, while drafting an opinion, it is necessary for a Board Member to refer repeatedly to a number of open deposition transcripts, and it would be inconvenient for the Board Member to have to keep turning to the front of the transcripts to verify the identity of the witness in each one. Accordingly, the suggestion has not been adopted.

Comment: With respect to § 2.127(e)(1), which was proposed to be added to provide that a motion for summary judgment should be filed prior to the commencement of the first testimony period, and that the Board, in its discretion, may deny as untimely any motion for summary judgment filed thereafter, the organization commented that the language does not take into account the possibility that the trial periods may be reset; and recommended that the problem be corrected by substituting the phrase "opening trial date" for the phrase "first testimony period."

Response: The phrase "opening trial date" is somewhat ambiguous since "trial date" might be construed by some litigants as referring to the date on which testimony is actually scheduled to be taken, rather than the date of the commencement of the testimony period. Moreover, it is not believed that the substitution of the phrase "opening trial date" for the phrase "first testimony period" would solve the problem perceived by the organization. It appears that the organization may have construed the phrase "first testimony period" as meaning the opening testimony period as first set, when in fact the phrase was intended to signify the opening testimony period of the plaintiff, as distinguished from other testimony periods, such as the testimony period of the defendant (particularly where the defendant is also the plaintiff in a counterclaim, in which case the testimony period of the defendant as defendant in the main proceeding and as plaintiff in the counterclaim could be argued to be the "opening testimony period" for purposes of the counterclaim), the rebuttal testimony period of the plaintiff, etc. In any event, in order to further clarify the paragraph, the phrase "as originally set or as reset" has been included in the amended paragraph immediately after the phrase "first testimony period." This should not be construed as meaning, however, that when the Board denies a motion for summary judgment as untimely filed, but resets the plaintiff's main (i.e., "first") testimony period, the motion may be refiled before the commencement of the period as reset, and considered timely. *See La Maur, Inc.* v. *Bagwells Enterprises, Inc., supra.*

Comment: Section 2.127(e)(2) was proposed to be added to provide that for purposes of summary judgment only a party may rely upon its own responses to discovery requests. The organization stated that it opposes this amendment "because it could lead to discovery abuses and will create conflicting treatment of a party's own answers to discovery, depending upon whether the case is resolved on summary judgment or after a trial on the merits." The organization also expressed its belief that although the proposed paragraph follows practice in the Federal district courts, the limited jurisdiction and sanctioning power of the Board "would tend to frustrate the self-policing effect of the rule as it operates in a federal court context." One individual commented that the proposed paragraph may mislead some lawyers into thinking that the filing, without more, of a party's own interrogatory answers, etc., in connection with a motion for summary judgment will make them probative; that rule 56(e) of the Federal Rules of Civil Procedure specifies certain requirements for affidavits submitted in connection with a summary judgment motion; that these requirements (namely, that the affidavits be made on personal knowledge, set forth such facts as would be admissible in evidence, and show

affirmatively that affiant is competent to testify to the matters stated therein) have been applied by the courts to answers to interrogatories filed in support of or in opposition to a summary judgment motion; and that the proposed paragraph should be modified to refer to these requirements, as, for example, by the addition of the phrase "and subject to the requirements of rule 56(e) of the Federal Rules of Civil Procedure" after the introductory phrase "For purposes of summary judgment only."

Response: It is noted that the specific discovery abuses feared were not enumerated. To the extent that the proposed practice would create conflicting treatment of a party's own responses to discovery, depending upon whether a case is resolved upon summary judgment or after trial on the merits, it is not believed that this is a matter of great concern. Indeed, there is precedent for such a conflict in the treatment of evidence. Under present practice, there is conflicting treatment of affidavit "testimony," which is not admissible at trial except by agreement of the parties (see § 2.123(b)), but is admissible for purposes of a motion for summary judgment (subject to the requirements of rule 56(e) of the Federal Rules of Civil Procedure).

Essentially, the matters raised by the organization and by the individual are factors to be considered by the Board in determining the probative value of a party's own discovery responses submitted for purposes of summary judgment. However, the proposed paragraph relates to the admissibility of this type of evidence, not to its probative value. The fact that a piece of evidence is admissible does not mean that it will necessarily be accorded great, or even any, probative value.

Over the years, many attorneys have argued, in briefs filed in connection with summary judgment motions, that a party's own discovery responses should be admissible for purposes of summary judgment. Under the circumstances, the paragraph is being adopted as proposed, without any modifications. However, the impact of the new rule will be monitored carefully, and the paragraph will be modified by future rulemaking, if necessary.

Comment: Section 2.128(b), which governs the form of briefs at final hearing, presently provides, in part, that without leave of the Board, no brief shall contain more than fifty pages of argument and, in the case of a reply brief, the entire brief shall not exceed twenty-five pages. The paragraph was proposed to be amended to provide that without prior leave of the Board, "a main brief on the case shall not exceed fifty-five pages in length in its entirety, including the table of contents, index of cases, description of the record, statement of the issues, recitation of facts, argument, and summary, and a reply brief shall not exceed twenty-five pages in its entirety." The two firms commented that the table of contents and index of cases should not be included in the page limitations for main briefs. They stated that these two elements do not actually constitute the brief, but clearly facilitate the use and reading of the brief, and hence are helpful to both the Board and the parties; that incorporation of these parts into the page limitation will encourage minimal use of these features; and that in most federal courts which have a limitation on the number of pages, these two elements are excluded from the limitation.

Response: The provision of present § 2.128(b), that no (main) brief shall contain more than fifty pages of argument, has always been deemed by the Board to exclude the table of contents and index of cases (as well as any attached exhibits or appendices, which are not considered to be part of the brief itself), but to include (the term "argument" being construed broadly) the description of the record, statement of the issues, recitation of facts, arguments based on the law and the facts, and summary. Because of confusion on the part of litigants and their attorneys as to which parts of the brief are included within the length limitation of the present provision, and for purposes of clarity, the paragraph was proposed to be amended to include all parts of the brief itself (again, any exhibits or appendices to the brief are not considered to be part of the brief). Since the proposed amendment included in the length limitation the two elements which had not been included before, namely, the table of contents and index of pages, the brief length limitation was proposed to be increased from fifty pages to fifty-five pages. It is believed that the allowance of an extra five pages is more than sufficient to cover the table of contents and index of cases in main briefs before the Board, and that a page limitation which is all-inclusive is simpler and less confusing than one which is not all-inclusive. Therefore, the suggested modification has not been adopted.

Comment: Section 2.142(b)(2) was proposed to be added to govern the form of briefs on the case in ex parte appeals before the Board. The proposed paragraph provides, in part, that without prior leave of the Board, a brief shall not exceed twenty-five pages in length in its entirety. The organization commented that the proposed provision would limit appeal briefs "to a maximum of 25 pages, including all appendices and exhibits;" that although the proposed rule allows a party to seek prior leave to file a more extensive brief, it is likely that the need to seek such leave will arise too frequently, with the result being a counter-productive rule; and that if a page limit is required, it should either be increased or clarified to exclude exhibits and appendices.

Response: Exhibits and appendices to a brief are not considered by the Board to be part of the brief, and hence are not included within the length limitation. However, the inclusion in the paragraph of a reference to exhibits and appendices to an appeal brief may mislead some litigants and/or their attorneys into believing that new evidence may be submitted with an appeal brief by way of an exhibit or appendix thereto, when, in fact, an applicant may submit new evidence after appeal only with the consent of the Examining Attorney or in accordance with the provisions of § 2.142(d). Accordingly, the suggested modification has not been adopted.

Comment: Section 2.142(f)(6) was proposed to be added to provide, in part, that "if, during an appeal from a refusal of registration, it appears to the examiner that an issue not involved in the appeal may render the mark of the appellant unregistrable, the examiner may request the Board to suspend the appeal and to remand the application to the examiner for further examination." The organization commented that the paragraph should be modified to specify that the Examining Attorney must file a written request and show good cause before an application will be remanded for examination; that the situations in which remand is allowed by the Board should be closely scrutinized; that after an applicant has submitted its appeal brief, for example, remand should be allowed, if at all, only in the most exceptional circumstances; and that when a requested remand is for the purpose of curing technical problems previously overlooked, the consent of the applicant shall be sought.

Response: The proposed paragraph, which codifies present practice, has been modified to specify that the Examining Attorney's request for remand must be written (as is, in fact, the practice). The remainder of the organization's suggestions, if adopted, would make it much more difficult for the Examining Attorney to obtain a remand of the application for purposes of further examination with respect to an issue not involved in the appeal.

However, it is in the interest of the public, the applicant, and the PTO to avoid the issuance of an invalid registration. Accordingly, the remainder of the organization's suggestions have not been adopted.

Comment: Section 2.145(c)(4) was proposed to be added to provide that a party to a proceeding before the Board who commences a civil action, pursuant to section 21(b) of the Act, seeking review of a decision of the Board must file written notice thereof in the PTO, addressed to the Board, within one month after the expiration of the time for appeal or civil action, in order to avoid premature termination of the Board proceeding. The organization commented that the proposed paragraph requires further clarification to define what is meant by the term "premature termination;" that depending on the meaning, the result of a "premature termination" may be too harsh, e.g., where a party may have otherwise perfected an appeal of a Board decision with the exception of having timely filed written notice of the proceeding with the Board; and the word "should" should be substituted for the word "must" in the proposed paragraph.

Response: When a decision of the Board has become final, that is, when the time for appeal therefrom has expired and no appeal has been filed, the PTO takes certain further steps, based on the final decision, including those steps necessary to give effect to the decision. This process is referred to as the "termination" of the proceeding. For example, when a decision of the Board dismissing an opposition has become final, the word "Terminated" is stamped on the file of the opposition proceeding, the opposition file is sent to the warehouse where terminated proceeding files are stored, and the registration sought by the applicant is issued. When a decision of the Board granting a petition for cancellation has become final, one of the further steps taken as a consequence thereof is the cancellation of the respondent's subject registration. If an "appeal" by way of civil action is taken from a decision of the Board, and the PTO is not notified, the PTO, believing the Board's decision to be final, will take the further steps which are appropriate based on the decision, i.e., the PTO will "terminate" the proceeding, not knowing that it is doing so prematurely.

The premature termination of a Board proceeding has no effect on the perfection of the "appeal" by way of civil action, and is not in the nature of a sanction, but rather occurs because the PTO has followed its normal procedures to give effect to a decision of the Board. The purpose of the proposed paragraph is simply to warn litigants who have filed a civil action seeking review of a decision of the Board that they need to give timely notice to the PTO of the filing of the civil action so that the PTO will not take steps to give effect to the Board's decision in the mistaken belief that it is final, when in fact it is not.

However, it is possible that in some cases where a written notice of the commencement of a civil action is filed shortly after the time specified in the rule, the PTO will not yet have terminated the proceeding, and therefore the written notice, even though somewhat untimely, will serve to avoid premature termination of the proceeding. For this reason, the paragraph has been modified as suggested by substituting the word "should" for the word "must."

The adoption of the suggestion that the proposed paragraph be clarified to define what is meant by the term "premature termination" would result in a rule which is unduly lengthy. Moreover, a detailed explanation of the meaning of the term has been given in this final rule notice.

Comment: Two individuals and one firm submitted suggestions for changes to rules not involved herein.

Response: The suggested changes cannot be adopted without affording members of the public an opportunity to comment thereon. However, these suggestions will be considered in connection with any future amendments to the rules of practice in trademark cases.

Environmental, Energy, and Other Considerations

The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The rule change includes no additional or increased fees. Substantive rights to use valuable trademarks are not adversely affected.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect to the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The PTO has also determined that this notice has no federalism implications affecting the relationship between the National Government and the states as outlined in Executive Order 12612.

This rule contains collections of information subject to the Paperwork Reduction Act previously approved by OMB under ICB Number 0651-0009. Public reporting burden for this collection of information is estimated to average 25 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Commissioner of Patents and Trademarks, Washington, DC 20231 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Amendment of Regulations

For the reasons set forth in the preamble and pursuant to the authority contained in section 41 of the Trademark Act of July 5, 1946, as amended, part 2 of title 37 of the Code of Federal Regulations is amended as set forth below.

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

1. The authority citation for Part 2 continues to read as follows:

Authority: 15 U.S.C. 1123, 35 U.S.C. 6, unless otherwise noted.

1a. Section 2.42 is revised to read as follows:

§ 2.42 Concurrent use.

An application for registration as a lawful concurrent user shall specify and contain all the elements required by the preceding sections. The applicant in addition shall state in the application the area, the goods, and the mode of use for which applicant seeks registration; and also shall state, to the extent of the applicant's knowledge, the concurrent lawful use of the mark by others, setting forth their names and addresses; registrations issued to or applications filed by such others, if any; the areas of such use; the goods on or in connection with which such use is made; the mode of such use; and the periods of such use.

2. Section 2.68 is revised to read as follows:

§ 2.68 Express abandonment (withdrawal) of application.

An application may be expressly abandoned by filing in the Patent and Trademark Office a written statement of abandonment or withdrawal of the application signed by the applicant, or the attorney or other person representing the applicant. Except as provided in § 2.135, the fact that an application has been expressly abandoned shall not, in any proceeding in the Patent and Trademark Office, affect any rights that the applicant may have in the mark which is the subject of the abandoned application.

3. Section 2.91 is amended by revising the section heading to read as follows:

§ 2.91 Declaration of interference.

* * * * *

4. Section 2.92 is revised to read as follows:

§ 2.92 Preliminary to interference.

An interference which has been declared by the Commissioner will not be instituted by the Trademark Trial and Appeal Board until the Examiner of Trademarks has determined that the marks which are to form the subject matter of the controversy are registrable, and all of the marks have been published in the Official Gazette for opposition.

5. Section 2.93 is revised to read as follows:

§ 2.93 Institution of interference.

An interference is instituted by the mailing of a notice of interference to the parties. The notice shall be sent to each applicant, in care of the applicant's attorney or other representative of record, if any, and if one of the parties is a registrant, the notice shall be sent to the registrant or the registrant's assignee of record. The notice shall give the name and address of every adverse party and of the adverse party's attorney or other authorized representative, if any, together with the serial number and date of filing and publication of each of the applications, or the registration number and date of issuance of each of the registrations, involved.

6. Section 2.104 is revised to read as follows:

§ 2.104 Contents of opposition.

(a) The opposition must set forth a short and plain statement showing why the opposer believes it would be damaged by the registration of the opposed mark and state the grounds for opposition. A duplicate copy of the opposition, including exhibits, shall be filed with the opposition.

(b) Oppositions to different applications owned by the same party may be joined in a consolidated opposition when appropriate, but the required fee must be included for each party joined as opposer for each class in which registration is opposed in each application against which the opposition is filed.

7. Section 2.106 is amended by revising paragraphs (b)(1) and (c) to read as follows:

§ 2.106 Answer.

* * * * *

(b)(1) An answer shall state in short and plain terms the applicant's defenses to each claim asserted and shall admit or deny the averments upon which the opposer relies. If the applicant is without knowledge or information sufficient to form a belief as to the truth of an averment, applicant shall so state and this will have the effect of a denial. Denials may take any of the forms specified in Rule 8(b) of the Federal Rules of Civil Procedure. An answer may contain any defense, including the affirmative defenses of unclean hands, laches, estoppel, acquiescence, fraud, mistake, prior judgment, or any other matter constituting an avoidance or affirmative defense. When pleading special matters, the Federal Rules of Civil Procedure shall be followed. A reply to an affirmative defense need not be filed. When a defense attacks the validity of a registration pleaded in the opposition, paragraph (b)(2) of this section shall govern. A pleaded registration is a registration identified by number and date of issuance in an original notice of opposition or in any amendment thereto made under Rule 15, Federal Rules of Civil Procedure.

* * * * *

(c) The opposition may be withdrawn without prejudice before the answer is filed. After the answer is filed, the opposition may not be withdrawn without prejudice except with the written consent of the applicant or the applicant's attorney or other authorized representative.

8. Section 2.112 is amended by revising paragraph (a) to read as follows:

§ 2.112 Contents of petition for cancellation.

(a) The petition to cancel must set forth a short and plain statement showing why the petitioner believes it is or will be damaged by the registration, state the grounds for cancellation, and indicate, to the best of petitioner's knowledge, the name and address of the current owner of the registration. A duplicate copy of the petition, including exhibits, shall be filed with the petition.

* * * * *

9. Section 2.113 is revised to read as follows:

§ 2.113 Notification of cancellation proceeding.

When a petition for cancellation has been filed in proper form (see §§ 2.111 and 2.112), a notification shall be prepared by the Trademark Trial and Appeal Board, which shall identify the title and number of the proceeding and the registration or registrations involved and shall designate a time, not less than thirty days from the mailing date of the notification, within which an answer must be filed. A copy of the notification shall be forwarded to the attorney or other authorized representative of the petitioner, if any, or to the petitioner. The duplicate copy of the petition for cancellation and exhibits shall be forwarded with a copy of the notification to the respondent (see § 2.118), who shall be the party shown by the records of the Patent and Trademark Office to be the current owner of the registration or registrations sought to be cancelled, except that the Board, in its discretion, may join or substitute as respondent a party who makes a showing of a current ownership interest in such registration or registrations. When the party identified by the petitioner, pursuant to § 2.112(a), as the current owner of the registration or registrations is not the record owner thereof, a courtesy copy of the petition for cancellation shall be forwarded with a copy of the notification to the alleged current owner, which may file a motion to be joined or substituted as respondent. If the petition is found to be defective as to form, the party filing the petition shall be so advised and allowed a reasonable time for correcting this informality.

10. Section 2.114 is amended by revising paragraphs (b)(1) and (c) to read as follows:

§ 2.114 Answer.

* * * * *

(b)(1) An answer shall state in short and plain terms the respondent's defenses to each claim asserted and shall admit or deny the averments upon which the petitioner relies. If the respondent is without knowledge or information sufficient to form a belief as to the truth of an averment, respondent shall so state and this will have the effect of a denial. Denials may take any of the forms specified in Rule 8(b) of the Federal Rules of Civil Procedure. An answer may contain any defense, including the affirmative defenses of unclean hands, laches, estoppel, acquiescence, fraud, mistake, prior judgment, or any other matter constituting an avoidance or affirmative defense. When pleading special matters, the Federal Rules of Civil Procedure shall be followed. A reply to an affirmative defense need not be filed. When a defense attacks the validity of a registration pleaded in the petition, paragraph (b)(2) of this section shall govern. A pleaded registration is a registration identified by number and date of issuance in an original petition for cancellation or in any amendment thereto made under Rule 15, Federal Rules of Civil Procedure.

* * * * *

(c) The petition for cancellation may be withdrawn without prejudice before the answer is filed. After the answer is filed, the petition may not be withdrawn without prejudice except with the written consent of the registrant or the registrant's attorney or other authorized representative.

11. Section 2.119 is amended by revising the section heading, paragraphs (b) and (c), and adding new paragraphs (d) and (e) to read as follows:

§ 2.119 Service and signing of papers.

* * * * *

(b) Service of papers must be on the attorney or other authorized representative of the party if there be such or on the party if there is no attorney or other authorized representative, and may be made in any of the following ways:

(1) By delivering a copy of the paper to the person served;

(2) By leaving a copy at the usual place of business of the person served, with someone in the person's employment;

(3) When the person served has no usual place of business, by leaving a copy at the person's residence, with a member of the person's family over 14 years of age and of discretion;

(4) Transmission by the "Express Mail Post Office to Addressee" service of the United States Postal Service or by first-class mail, which may also be certified or registered;

(5) Transmission by overnight courier.

Whenever it shall be satisfactorily shown to the Commissioner that none of the above modes of obtaining service or serving the paper is practicable, service may be by notice published in the *Official Gazette*.

(c) When service is made by first-class mail, "Express Mail," or overnight courier, the date of mailing or of delivery to the overnight courier will be considered the date of service. Whenever a party is required to take some action within a prescribed period after the service of a paper upon the party by another party and the paper is served by first-class mail, "Express Mail," or overnight courier, 5 days shall be added to the prescribed period.

(d) If a party to an inter partes proceeding is not domiciled in the United States and is not represented by an attorney or other authorized representative located in the United States, the party must designate by written document filed in the Patent and Trademark Office the name and address of a person residing in the United States on whom may be served notices or process in the proceeding. In such cases, official communications of the Patent and Trademark Office will be addressed to the domestic representative unless the proceeding is being prosecuted by an attorney at law or other qualified person duly authorized under § 10.14(c) of this subchapter. The mere designation of a domestic representative does not authorize the person designated to prosecute the proceeding unless qualified under § 10.14(a), or qualified under paragraph (b) or (c) of § 10.14 and authorized under § 2.17(b).

(e) Every paper filed in an inter partes proceeding, and every request for an extension of time to file an opposition, must be signed by the party filing it, or by the party's attorney or other authorized representative, but an unsigned paper will not be refused consideration if a signed copy is submitted to the Patent and Trademark Office within the time limit set in the notification of this defect by the Office.

12. Section 2.120 is amended by revising paragraphs (a), (d), (g), (j)(3), (j)(4), (j)(5), and (j)(8) to read as follows:

§ 2.120 Discovery.

(a) *In general.* The provisions of the Federal Rules of Civil Procedure relating to discovery shall apply in opposition, cancellation, interference and concurrent use registration proceedings except as otherwise provided in this section. The Trademark Trial and Appeal Board will specify the closing date for the taking of discovery. The opening of discovery is governed by the Federal Rules of Civil Procedure.

* * * * *

(d) *Interrogatories; request for production.* (1) The total number of written interrogatories which a party may serve upon another party pursuant to Rule 33 of the Federal Rules of Civil Procedure, in a proceeding, shall not exceed seventy-five, counting subparts, except that the Trademark Trial and Appeal Board, in its discretion, may allow additional interrogatories upon motion therefor showing good cause, or upon stipulation of the parties. A motion for leave to serve additional interrogatories must be accompanied by a copy of the interrogatories, if any, which have already been served by the moving party, and by a copy of the interrogatories proposed to be served. If a party upon which interrogatories have been served believes that the number of interrogatories served exceeds the limitation specified in this paragraph, and is not willing to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and objections to the interrogatories, file a motion for a protective order, accompanied by a copy of the interrogatories which together are said to exceed the limitation.

(2) The production of documents and things under the provisions of Rule 34 of the Federal Rules of Civil Procedure will be made at the place where the documents and things are usually kept, or where the parties agree, or where and in the manner which the Trademark Trial and Appeal Board, upon motion, orders.

* * * * *

(g) *Sanctions.* (1) If a party fails to comply with an order of the Trademark Trial and Appeal Board relating to discovery, including a protective order, the Board may make any appropriate order, including any of the orders provided in Rule 37(b)(2) of the Federal Rules of Civil Procedure, except that the Board does not have authority to hold any person in contempt or to award any expenses to any party. The Board may impose against a party any of the sanctions provided by this subsection in the event that said party or any attorney, agent, or designated witness of that party fails to comply with a protective order made pursuant to Rule 26(c) of the Federal Rules of Civil Procedure.

(2) If a party, or an officer, director, or managing agent of a party, or a person designated under Rule 30(b)(6) or 31(a) of the Federal Rules of Civil Procedure to testify on behalf of a party, fails to attend the party's or person's discovery deposition, after being served with proper notice, or fails to provide any response to a set of interrogatories or to a set of requests for production of documents and things, and such party or the party's attorney or other authorized representative informs the party seeking discovery that no response will be made thereto, the Board may make any appropriate order, as specified in paragraph (g)(1) of this section.

* * * * *

(j) *Use of discovery deposition, answer to interrogatory, or admission.*

* * * * *

(3)(i) A discovery deposition, an answer to an interrogatory, or an admission to a request for admission, which may be offered in evidence under the provisions of paragraph (j) of this section may be made of record in the case by filing the deposition or any part thereof with any exhibit to the part that is filed, or a copy of the interrogatory and answer thereto with any exhibit made part of the answer, or a copy of the request for admission and any exhibit thereto and the admission (or a statement that the party from which an admission was requested failed to respond thereto), together with a notice of reliance. The notice of reliance and the material submitted thereunder should be filed during the testimony period of the party which files the notice of reliance. An objection made at a discovery deposition by a party answering a question subject to the objection will be considered at final hearing.

(ii) A party which has obtained documents from another party under Rule 34 of the Federal Rules of Civil Procedure may not make the documents of record by notice of reliance alone, except to the extent that they are admissible by notice of reliance under the provisions of § 2.122(e).

(4) If only part of a discovery deposition is submitted and made part of the record by a party, an adverse party may introduce under a notice of reliance any other part of the deposition which should in fairness be considered so as to make not misleading what was offered by the submitting party. A notice of reliance filed by an adverse party must be supported by a written statement explaining why the adverse party needs to rely upon each additional part listed in the adverse party's notice, failing which the Board, in its discretion, may refuse to consider the additional parts.

(5) An answer to an interrogatory, or an admission to a request for admission, may be submitted and made part of the record by only the inquiring party except that, if fewer than all of the answers to interrogatories, or fewer than all of the admissions, are offered in evidence by the inquiring party, the responding party may introduce under a notice of reliance any other answers to interrogatories, or any other admissions, which should in fairness be considered so as to make not misleading what was offered by the inquiring party. The notice of reliance filed by the responding party must be supported by a written statement explaining why the responding party needs to rely upon each of the additional discovery responses listed in the responding party's notice, failing which the Board, in its discretion, may refuse to consider the additional responses.

* * * * *

(8) Requests for discovery, responses thereto, and materials or dispositions obtained through the discovery process should not be filed with the Board except when submitted with a motion relating to discovery, or in support of or response to a motion for summary judgment, or under a notice of reliance during a party's testimony period. Papers or materials filed in violation of this paragraph may be returned by the Board.

13. Section 2.121 is amended by revising paragraph (a)(1) to read as follows:

§ 2.121 Assignment of times for taking testimony.

(a)(1) The Trademark Trial and Appeal Board will issue a trial order assigning to each party the time for taking testimony. No testimony shall be taken except during the times assigned, unless by stipulation of the parties approved by the Board, or, upon motion, by order of the Board. Testimony periods may be rescheduled by stipulation of the parties approved by the Board, or upon motion granted by the Board, or by order of the Board. The resetting of the closing date for discovery will result in the rescheduling of the testimony periods without action by any party. The resetting of a party's time to respond to an outstanding request for discovery will not result in the automatic rescheduling of the discovery and/or testimony periods; such dates will be rescheduled only upon stipulation of the parties approved by the Board, or upon motion granted by the Board, or by order of the Board.

* * * * *

14. Section 2.122 is amended by revising paragraph (e) to read as follows:

§ 2.122 Matters in evidence.

* * * * *

(e) *Printed publications and official records.* Printed publications, such as books and periodicals, available to the general public in libraries or of general circulation among members of the public or that segment of the public which is relevant under an issue in a proceeding, and official records, if the publication or official record is competent evidence and relevant to an issue, may be introduced in evidence by filing a notice or reliance on the material being offered. The notice shall specify the printed publication (including information sufficient to identify the source and the date of the publication) or the official record and the pages to be read; indicate generally the relevance of the material being offered; and be accompanied by the official record or a copy thereof whose authenticity is established under the Federal Rules of Evidence, or by the printed publication or a copy of the relevant portion thereof. A copy of an official record of the Patent and Trademark Office need not be certified to be offered in evidence. The notice of reliance shall be filed during the testimony period of the party that files the notice.

* * * * *

15. Section 2.123 is amended by revising paragraphs (c), (e)(2), and (g)(1) to read as follows:

§ 2.123 Trial testimony in inter partes cases.

* * * * *

(c) *Notice of examination of witnesses.* Before the depositions of witnesses shall be taken by a party, due notice in writing shall be given to the opposing party or parties, as provided in § 2.119(b), of the time when and place where the depositions will be taken; of the cause or matter in which they are to be used, and the name and address of each witness to be examined; if the name of a witness is not known, a general description sufficient to identify the witness or the particular class or group to which the witness belongs, together with a satisfactory explanation, may be given instead. Depositions may be noticed for any reasonable time and place in the United States. A deposition

BEST COPY AVAILABLE

may not be noticed for a place in a foreign country except as provided in paragraph (a)(2) of this section. No party shall take depositions in more than one place at the same time, nor so nearly at the same time that reasonable opportunity for travel from one place of examination to the other is not available.

* * * * *

(c) *Examination of witnesses.* * * *

(2) The deposition shall be taken in answer to questions, with the questions and answers recorded in their regular order by the officer, or by some other person (who shall be subject to the provisions of Rule 28 of the Federal Rules of Civil Procedure) in the presence of the officer except when the officer's presence is waived on the record by agreement of the parties. The testimony shall be taken stenographically and transcribed, unless the parties present agree otherwise. In the absence of all opposing parties and their attorneys or other authorized representatives, depositions may be taken in longhand, typewriting, or stenographically. Exhibits which are marked and identified at the deposition will be deemed to have been offered into evidence, without any formal offer thereof, unless the intention of the party marking the exhibits is clearly expressed to the contrary.

* * * * *

(g) *Form of deposition.* (1) The pages of each deposition must be numbered consecutively, and the name of the witness plainly and conspicuously written at the top of each page. The deposition may be written on legal-size or letter-size paper, with a wide margin on the left-hand side of the page, and with the writing on one side only of the sheet. The questions propounded to each witness must be consecutively numbered unless paper with numbered lines is used, and each question must be followed by its answer.

* * * * *

16. Section 2.125 is amended by revising paragraph (a) to read as follows:

§ 2.125 Filing and service of testimony.

(a) One copy of the transcript of testimony taken in accordance with § 2.123, together with copies of documentary exhibits and duplicates or photographs of physical exhibits, shall be served on each adverse party within thirty days after completion of the taking of that testimony. If the transcript with exhibits is not served on each adverse party within thirty days or within an extension of time for the purpose, any adverse party which was not served may have remedy by way of a motion to the Trademark Trial and Appeal Board to reset such adverse party's testimony and/or briefing periods, as may be appropriate. If the deposing party fails to serve a copy of the transcript with exhibits on an adverse party after having been ordered to do so by the Board, the Board, in its discretion, may strike the deposition, or enter judgment as by default against the deposing party, or take any such other action as may be deemed appropriate.

* * * * *

17. Section 2.127 is amended by adding new paragraphs (e) and (f) to read as follows:

§ 2.127 Motions.

* * * * *

(e)(1) A motion for summary judgment should be filed prior to the commencement of the first testimony period, as originally set or as reset, and the Trademark Trial and Appeal Board, in its discretion, may deny as untimely any motion for summary judgment filed thereafter.

(2) For purposes of summary judgment only, a discovery deposition, or an answer to an interrogatory, or a document or thing produced in response to a request for production, or an admission to a request for admission, will be considered by the Trademark Trial and Appeal Board if any party files, with the party's brief on the summary judgment motion, the deposition or any part thereof with any exhibit to the part that is filed, or a copy of the interrogatory and answer thereto with any exhibit made part of the answer, or a copy of the request for production and the documents or things produced in response thereto, or a copy of the request for admission and any exhibit thereto and the admission (or a statement that the party from which an admission was requested failed to respond thereto).

(f) The Board does not have authority to hold any person in contempt, or to award attorneys' fees or other expenses to any party.

18. Section 2.128 is amended by revising paragraph (b) to read as follows:

§ 2.128 Briefs at final hearing.

* * * * *

(b) Briefs shall be submitted in typewritten or printed form, double spaced, in at least pica or eleven-point type, on letter-size paper. Each brief shall contain an alphabetical index of cases cited therein. Without prior leave of the Trademark Trial and Appeal Board, a main brief on the case shall not exceed fifty-five pages in length in its entirety, including the table of contents, index of cases, description of the record, statement of the issues, recitation of facts, argument, and summary; and a reply brief shall not exceed twenty-five pages in its entirety. Three legible copies, on good quality paper, of each brief shall be filed.

19. Section 2.129 is amended by revising paragraph (a) to read as follows:

§ 2.129 Oral argument; reconsideration.

(a) If a party desires to have an oral argument at final hearing, the party shall request such argument by a separate notice filed not later than ten days after the due date for the filing of the last reply brief in the proceeding. Oral arguments will be heard by at least three Members of the Trademark Trial and Appeal Board at the time specified in the notice of hearing. If any party appears at the specified time, that party will be heard. If the Board is prevented from hearing the case at the specified time, a new hearing date will be set. Unless otherwise permitted, oral arguments in an inter partes case will be limited to thirty minutes for each party. A party in the position of plaintiff may reserve part of the time allowed for oral argument to present a rebuttal argument.

* * * * *

20. Section 2.134 is amended by revising paragraph (a) to read as follows:

§ 2.134 Surrender or voluntary cancellation of registration.

(a) After the commencement of a cancellation proceeding, if the respondent applies for cancellation of the involved registration under section 7(d) of the Act of 1946 without the written consent of every adverse party to the proceeding, judgment shall be entered against the respondent. The written consent of an adverse party may be signed by the adverse party or by the adverse party's attorney or other authorized representative.

* * * * *

21. Section 2.135 is revised to read as follows:

§ 2.135 Abandonment of application or mark.

After the commencement of an opposition, concurrent use, or interference proceeding, if the applicant files a written abandonment of the application or of the mark without the written consent of every adverse party to the proceeding, judgment shall be entered against the applicant. The written consent of an adverse party may

be signed by the adverse party or by the adverse party's attorney or other authorized representative.

22. Section 2.142 is amended by adding paragraph (f)(6); and revising paragraphs (b) and (e)(1), to read as follows:

§ 2.142 Time and manner of ex parte appeals.

* * * * *

(b)(1) The brief of appellant shall be filed within sixty days from the date of appeal. If the brief is not filed within the time allowed, the appeal may be dismissed. The examiner shall, within sixty days after the brief of appellant is sent to the examiner, file with the Trademark Trial and Appeal Board a written brief answering the brief of appellant and shall mail a copy of the brief to the appellant. The appellant may file a reply brief within twenty days from the date of mailing of the brief of the examiner.

(2) Briefs shall be submitted in typewritten or printed form, double spaced, in at least pica or eleven-point type, on letter-size paper. Without prior leave of the Trademark Trial and Appeal Board, a brief shall not exceed twenty-five pages in length in its entirety.

* * * * *

(e)(1) If the appellant desires an oral hearing, a request therefor should be made by a separate notice filed not later than ten days after the due date for a reply brief. Oral argument will be heard by at least three Members of the Trademark Trial and Appeal Board at the time specified in the notice of hearing, which may be reset if the Board is prevented from hearing the argument at the specified time or, so far as is convenient and proper, to meet the wish of the appellant or his attorney or other authorized representative.

* * * * *

(f) * * *

(6) If, during an appeal from a refusal of registration, it appears to the examiner that an issue not involved in the appeal may render the mark of the appellant unregistrable, the examiner may, by written request, ask the Board to suspend the appeal and to remand the application to the examiner for further examination. If the request is granted, the examiner and appellant shall proceed as provided by §§ 2.61, 2.62, 2.63 and 2.64. After the additional ground for refusal of registration has been withdrawn or made final, the examiner shall return the application to the Board, which shall resume proceedings in the appeal and take further appropriate action with respect thereto.

* * * * *

23. Section 2.145 is amended by adding new paragraph (c)(4) to read as follows:

§ 2.145 Appeal to court and civil action.

* * * * *

(c) * * *

(4) A party to a proceeding before the Trademark Trial and Appeal Board which commences a civil action, pursuant to section 21(b) of the Act, seeking review of a decision of the Board should file written notice thereof in the Patent and Trademark Office, addressed to the Board, within one month after the expiration of the time for appeal or civil action, in order to avoid premature termination of the Board proceeding.

* * * * *

24. Section 2.186 is revised to read as follows:

§ 2.186 Action may be taken by assignee of record.

Any action with respect to an assigned application or registration which may or must be taken by an applicant or registrant may be taken by the assignee provided that the assignment has been recorded or that proof of the assignment has been submitted.

Dated: July 6, 1989.

Donald J. Quigg,

Assistant Secretary and Commissioner of Patents and Trademarks.

Part V

Department of Transportation

Federal Aviation Administration

14 CFR Part 93

High Density Traffic Airports; Slot Allocation and Transfer Methods; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 93

[Docket No. 25758; Amdt. No. 93-56]

High Density Traffic Airports Slot Allocation and Transfer Methods

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This action makes several technical amendments to the regulations pertaining to the allocation and transfer of air carrier and commuter operator slots (i.e., allocated instrument flight rules (IFR) takeoff and landing reservations) at Kennedy International Airport, LaGuardia Airport, O'Hare International Airport, and Washington National Airport. First, the rule adopted provides that slots generally will not be withdrawn from carriers holding eight or fewer slots if the holding carrier itself operates the slots. The addition of an operating requirement to the existing rule prevents small incumbent carriers from using their protected status to protect slots actually used by larger incumbent carriers. The rule adopted also changes the maximum passenger seating capacity authorized for operations in "schedule commuter" slots from "less than 56" seats to "less than 75" seats in order to allow more economical and advances aircraft to be used in providing service to small communities. Finally, this action changes the definition of "summer season" and "winter season" to conform to the current legal definition of Daylight Savings Time and Local Standard Time.

EFFECTIVE DATE: September 21, 1989.

FOR FURTHER INFORMATON CONTACT: David L. Bennett, Office of the Chief Counsel, AGC-230, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, Telephone: (202) 267-3491

SUPPLEMENTARY INFORMATION:

Availability of Document

Any person may obtain a copy of this document by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, DC 20591; or by calling (202) 267-8058. Communications must identify the amendment number of the document.

Background

The High Density Traffic Airports Rule (14 CFR part 93, subpart K) limits the number of operations during certain hours or half hours at four airports: Kennedy International, LaGuardia, O'Hare International, and Washington, National. Comprehensive rules for the allocation and transfer of High Density Airport slots were adopted in December 1985 (14 CFR part 93, subpart S). A "slot" is defined as the authority to conduct one allocated IFR landing or takeoff operation during a specific hour or 30-minute period at one of the High Density Airports.

Notice of Proposed Rulemaking 88-18

On December 16, 1988, the Department of Transportation issued Notice of Proposed Rulemaking 88-18 (53 FR 51826, December 22, 1988; corrected 54 FR 831 and 54 FR 3079). In that notice, the Department denied the petition of America West Airlines to withdraw slots from incumbent carriers at National and LaGuardia Airports and reallocate those slots to new entrants and smaller incumbent carrriers.

Second, the Department proposed for discussion six issues relating to the effect of the slot restrictions on competition and market entry, as required by section 149 of Pub. L. 100-457.

Finally, the Notice proposed two specific amendments to the current slot rules. The first proposal was that slots will not be withdrawn from a carrier with eight or fewer slots, except for failure to use the slots, if the carrier itself uses the slots held. This proposal was intended to prevent the current practice by which large carriers transfer vulnerable slots (i.e., slots with a low withdrawal priority number) to carriers holding fewer than eight slots, and lease the slots back for operation. The second amendment proposed in the Notice was to increase the slot-use requirements for carriers holding a substantial number of slots in certain hours or half-hours to further reduce the retention of unused slots.

DOT has under consideration additional or alternate measures for slot allocation to new entrant and limited incumbent carriers and alternate requirements for slot use. It is anticipated that many of the issues raised in Notice 88-18 could require further rulemaking at the proposal stage and, therefore, are not addressed in this final rule.

Discussion of Comments

Twenty-six comments were received in response to Notice 88-18, including supplemental comments filed by Air Wisconsin, the Regional Airline Association, and the City of Chicago Department of Aviation.

Separate Air Carrier and Commuter Slot Categories

Section 93.123(c) of the Federal Aviation Regulations (14 CFR part 93, subpart K) establishes the maximum passenger seating capacity, for the purposes of § 93.123(a), as 56 seats or more for "air carriers," and less than 56 seats for "scheduled commuters."

Notice 88-18. Of those commenters addressing the underlying issue of the distinction between commuter and air carrier slots, Pan Am, Pan Am Express, the Regional Airline Association, and several other carriers stated that the practice of carrier slots being operated by commuters is necessary to maintain scheduling flexibility. American, Pan Am, Pan Am Express, and the Regional Airline Association also stated that scheduling flexibility could be increased by eliminating this distinction altogether. While USAir/Piedmont argued that the elimination of the distinction would threaten service to small markets, American suggested that removing this distinction would enhance such service. Air Wisconsin noted that a flat prohibition on the use of commuter aircraft in air carrier slots would unfairly penalize carriers that operate both types of aircraft as a single entity.

Pan Am, Pan Am Express, and the Regional Airline Association, and several of its individual members further noted that the types of aircraft which can use commuter slots should be expanded in response to the needs of smaller communities where traffic has increased significantly. These commenters argued that the 56-seat limit contained in the definitions of "air carrier" and "scheduled commuter operator" under § 93.123(c) is based on the types of aircraft that were available at the time of the adoption of the High Density Rule in 1969. Since that time, new aircraft have been developed which have more than 60 seats, but are still properly considered "commuter" aircraft for the purposes of § 93.123(c) due to their limited range and cruise speed.

Air Wisconsin petition for exemption. In addition to the request for comments on the distinction between air carrier and commuter slots in Notice 88-18, the FAA received separate petitions from British Aerospace and Air Wisconsin, which were published in the **Federal Register** on April 12, 1988 (53 FR 12092) and March 31, 1989 (54 FR 13344), respectively. The petitioners requested the FAA to authorize the use of aircraft having 60 and 64 seats, respectively, or less in "scheduled commuter" slots in order to allow more economical and advanced aircraft to be used in providing service to smaller communities. Air Wisconsin noted that traffic on the routes which serve these communities routinely exceeds the capacity of 56-seat aircraft.

The British Aerospace petition was denied on August 15, 1988, because British Aerospace, as an aircraft manufacturer, was found to be not eligible for an exemption from an operating rule and because the FAA considered the issue to be more appropriate for resolution by general rulemaking. However, the FAA did not take issue with the substantive justification raised in the British Aerospace petition.

Numerous comments were received in support of the Air Wisconsin petition, including several congressional responses, and comments filed by airport authorities, municipalities, chambers of commerce, and state transportation departments. With the exception of Pan Am Express, none of the carrier commenters were specifically opposed to the petition. Most, however, shared Pan Am Express's view that the FAA should treat the Air Wisconsin petition as a petition for rulemaking and amend part 93, subpart K of the Federal Aviation Regulations.

Therefore, in view of the comments requesting that larger aircraft be permitted to use commuter slots, and in considerations of the fact that such a higher seat limit (in conjunction with a limitation to propeller-driven aircraft) has no significant effect on the regional airline industry and the service to small communities provided by that industry, the FAA is amending § 93.123(c) of subpart K of the Federal Aviation Regulations to change the maximum passenger seating capacity authorized for operations in "scheduled commuter" slots from "less than 56 [seats]" to "less than 75 [seats]," with a limitation to reciprocating and turboprop aircraft. The 75-seat limit will allow for anticipated seating configurations of all aircraft in this category. The limitation to propeller-driven aircraft provides a clear distinction between commuter aircraft and the turbojet aircraft used for longer routes and higher volume markets.

Although the 75-seat maximum passenger seating capacity that is being adopted in this final rule was not expressly proposed in Notice 88-18, the Notice requested comments on the use of air carrier slots using commuter aircraft, and the agency sought and received public comment on the issue by publication of the Air Wisconsin petition in the Federal Register. This amendment represents final agency action on the Air Wisconsin petition for exemption and Air Wisconsin's request for rulemaking filed in its supplemental comments on Notice 88-18.

Withdrawal of Slots From Carriers Holding 8 or Fewer Slots

Section 93.223(f) of the Federal Aviation Regulations (14 CFR part 93, subpart S) currently provides that slots will not be withdrawn from an air carrier or commuter operator holding eight or fewer slots at an airport (not counting international slots). Notice 88-18 proposed to add a use requirement to this provision so that the exception from withdrawal would only apply to slots used by the holding carrier, and would clarify that the protection does not apply to withdrawal for nonuse under § 93.227(a)(1). The use requirement would prohibit the current practice by larger carriers of transferring vulnerable slots (i.e., slots with a low withdrawal priority number) to a carrier with fewer than eight slots, then leasing the slot back for operation.

Although the Regional Carrier Slotholders stated that the practice by which carriers in effect "hide" their most vulnerable slots as described above is not widespread, several commenters expressed dissatisfaction over this practice. America West argued that this practice is inconsistent with the use-or-lose provisions of the Buy/Sell Rule. The FAA notes that there was little specific opposition to the proposal which would prohibit the withdrawal of slots from carriers holding and using fewer than eight slots. The Airport Operators Council International, USAir, Piedmont, Midwest Express, and United all specifically noted their lack of objection and/or support of this proposal.

In consideration of the need to protect carriers with limited slot holdings while maintaining opportunities for market entry, and in the interest of preventing carriers from circumventing the withdrawal provisions of the slot transfer and allocation rules, the FAA is amending § 93.223(f) to provide that slots shall not be withdrawn from an air carrier or commuter operator holding and using fewer than eight slots, excluding withdrawal under § 93.217(a)(1).

Summer/Winter Season Dates

As part of this action, the FAA is correcting a reference to seasonal designations which currently correspond to an obsolete definition of the Daylight Savings Time period. Section 93.217 of the Federal Aviation Regulations (14 CFR part 93, subpart S) establishes procedures for the allocation of slots to U.S. and foreign air carriers for international operations at the High Density Airports. The procedures apply primarily at Kennedy International and O'Hare International Airports.

At Kennedy and O'Hare Airports, international slots are allocated in accordance with seasonal designations, as defined in § 93.213, with specific slot operations being designated as either summer or winter slots. The seasonal allocations correspond to the beginning and ending of the Daylight Savings and Local Standard Time periods.

The date on which Local Standard Time changes to Daylight Savings Time in the spring was changed by Congress on July 8, 1986 (Pub. L. 99-359, 100 Stat. 764). Previously, Daylight Savings Time extended from the fourth Sunday in April to the fourth Sunday in October, while the Local Standard Time period extended from the fourth Sunday in October to the fourth Sunday in April. The Daylight Savings Time period now extends from the first Sunday in April to the fourth Sunday in October while the Local Standard Time period extends from the fourth Sunday in October to the first Sunday in April.

The purpose of this amendment, therefore, is simply to amend the seasonal time designations in the rule to reflect the current changeover date (i.e., from Local Standard Time to Daylight Savings Time) of the first Sunday in April. The change is adopted without prior notice and comment because it represents a minor technical amendment on which there would be little interest in commenting. Accordingly, I find that notice and public comment under 5 U.S.C. 553(b) is unnecessary.

The Rule Adopted

For the reasons discussed above, the FAA is amending the regulations governing transfer and allocation of slots at high density traffic airports to do the following:

1. Increase the maximum passenger seating capacity authorized under § 93.123(c) for operations in "scheduled commuter" slots from "less than 56 [seats]" to "less than 75 [seats]," with a limitation to reciprocating and turboprop aircraft.
2. Provide that slots shall not be withdrawn from an air carrier or commuter operator holding fewer than eight slots if that carrier is itself operating the slots, excluding withdrawal under § 93.217(a)(1).
3. Change the time designations in the rule for the summer and winter

scheduling seasons to reflect the current changeover date from Local Standard Time to Daylight Savings Time.

Regulatory Evaluation

The changes contained in this rulemaking with respect to the maximum passenger seating capacity authorized for operations using commuter slots will have no effect on the actual operations of carriers currently using aircraft having fewer than 56 seats in these slots. With the adoption of this final rule, these carriers will have the operational flexibility to respond to traffic increases, market considerations, and other related factors by replacing and/or supplementing their fleets with aircraft having slightly higher maximum passenger seating capacities.

With respect to the changes adopted in the withdrawal provisions of FAR § 93.227(a), the FAA will not withdraw any slot that is held and operated by a carrier holding eight or fewer slots. It is unlikely that slots would be withdrawn from carriers holding fewer than eight slots and not operating those slots. Rather, those carriers would simply terminate the sale and leaseback arrangements currently in effect. The potential cost to these carriers, therefore, is only the speculative loss of lease income from slots the carrier did not intend to use.

Finally, the changes in the definition of "summer season" and "winter season" to conform to the legal definition of Daylight Savings Time and Local Standard Time will affect only scheduling requests for international operations by U.S. and foreign air carriers at Kennedy and O'Hare Airports. Actual operations are similarly unaffected by this change in designation. Air carriers will not experience any benefit or cost as a result of this rule, except for a minor administrative benefit in submitting flight schedule requests based on the actual time change time between Standard Time and Daylight Savings Time.

Regulatory Flexibility Analysis

As discussed above under Regulatory Evaluation, the impact on all operators will be minimal, and there will be no disproportionate impact on smaller operators. Accordingly, the FAA has determined that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

For the reasons set forth above, the FAA has determined that this amendment (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Further, I certify that under the criteria of the Regulatory Flexibility Act, this rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This amendment provides for no changes to the required reporting of information by air carrier and commuter operators to the FAA. Under the requirements of the Federal Paperwork Reduction Act, the Office of Management and Budget previously has approved the information collection provison of subpart S. OMB Approval Number 2120-0524 has been assigned to subpart S.

Federalism Determination

The amendment set forth herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this regulation does not have federalism implications warranting the preparation of Federalism Assessment.

List of Subjects in 14 CFR Part 93

Aviation safety, Air traffic control.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 93 of the Federal Aviation Regulations (14 CFR part 93) is amended as follows:

PART 93—SPECIAL AIR TRAFFIC RULES AND AIRPORT TRAFFIC PATTERNS

1. The authority citation for part 93 continues to read as follows:

Authority: 49 U.S.C. 1302, 1303, 1348, 1354(a), 1421(a), 1424, 2402, and 2424; 49 U.S.C. 106 (Revised Pub. L. 97-449, January 12, 1983).

2. In § 93.123, paragraph (c) is revised to read as follows:

§ 93.123 High density traffic airports.

* * * * *

(c) For purpose of this subpart—

(1) The number of operations allocated to "air carriers except commuters," under paragraph (a) of this section and § 93.127, refers to the number of operations conducted by air carriers with turbojet aircraft or any aircraft having a certificated maximum passenger seating capacity of 75 or more or, if used for cargo service in air transportation, with aircraft having a maximum payload capacity of 18,000 pounds or more.

(2) The number of operations allocated to "scheduled commuters," as used in paragraph (a) of this section and § 93.124, refers to the number of operations conducted by air carriers with turboprop or reciprocating engine aircraft having a certificated maximum passenger seating capacity of less than 75 or, if used for cargo service in air transportation, with aircraft having a maximum payload capacity of less than 18,000 pounds.

3. In § 93.213, paragraphs (a)(3) and (a)(4) are revised to read as follows:

§ 93.213 Definitions and general provisions.

(a) * * *

(3) *Summer season* means the period of time from the first Sunday in April until the fourth Sunday in October.

(4) *Winter season* means the period of time from the fourth Sunday in October until the first Sunday in April.

* * * * *

4. In § 93.223, paragraph (c)(3) is added to read as follows:

§ 93.223 Slot withdrawal.

* * * * *

(c) * * *

(3) Except as provided in § 93.227(a), the FAA shall not withdraw any slot held and operated by an air carrier or commuter operator at an airport if that air carrier or commuter operator holds eight or fewer slots at that airport (excluding slots used for operations described in § 93.217(a)(1)).

* * * * *

Issued in Washington, DC, on August 15, 1989.

NOTES

All years referred to in this report are fiscal years, unless otherwise noted.

Details in the text and tables of this report may not add to totals because of rounding.

The Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as Gramm-Rudman-Hollings) is referred to in this report more briefly as the Balanced Budget Act.

The source for all data in this report is the Congressional Budget Office, unless otherwise noted.

CONGRESSIONAL BUDGET OFFICE
U.S. CONGRESS
WASHINGTON, D.C. 20515

Robert D. Reischauer
Director

August 21, 1989

Honorable Richard G. Darman
Director
Office of Management and Budget
Washington, D.C. 20503

Dear Mr. Darman:

I herewith submit to you my *Initial Sequestration Report for Fiscal Year 1990*, in accordance with the Balanced Budget and Emergency Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119).

Based on our updated economic and technical assumptions and on budgetary policies in effect on August 15, 1989, we estimate that the budget deficit in fiscal year 1990 will reach $141.5 billion, which exceeds by $41.5 billion the $100 billion target specified in the act.

This report presents the assumptions underlying CBO's deficit estimate, and calculates the amounts and percentages by which various budgetary resources would need to be sequestered to reduce the deficit to the target level under these assumptions.

I would be pleased to provide you with any assistance that you may require in preparing your own initial sequestration report.

Sincerely yours,

Robert D. Reischauer
Director

CONGRESSIONAL BUDGET OFFICE
U.S. CONGRESS
WASHINGTON, D.C. 20515

Robert D. Reischauer
Director

August 21, 1989

Honorable Dan Quayle
President of the Senate
Washington, D.C. 20510

Dear Mr. President:

I herewith submit to the Congress my *Initial Sequestration Report for Fiscal Year 1990*, in accordance with the requirements of the Balanced Budget and Emergency Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119).

The act specifies a 1990 deficit target of $100 billion. An across-the-board reduction of budgetary resources will be triggered if the deficit estimate made by the Office of Management and Budget exceeds the target by more than $10 billion. Based on our updated economic and technical assumptions and on budgetary policies in effect on August 15, 1989, we estimate that the budget deficit in fiscal year 1990 will reach $141.5 billion, which exceeds the target by $41.5 billion.

This report presents the assumptions underlying CBO's deficit estimate, and calculates the amounts and percentages by which various budgetary resources would need to be sequestered to reduce the deficit to the target level under these assumptions.

I would be pleased to provide the Congress with any assistance it may require in responding to this report, or to the initial report by the Director of the Office of Management and Budget.

Sincerely yours,

Robert D. Reischauer
Director

CONGRESSIONAL BUDGET OFFICE

August 21, 1989

Honorable Thomas S. Foley
Speaker of the House of Representatives
Washington, D.C. 20515

Dear Mr. Speaker:

I herewith submit to the Congress my *Initial Sequestration Report for Fiscal Year 1990*, in accordance with the requirements of the Balanced Budget and Emergency Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119).

The act specifies a 1990 deficit target of $100 billion. An across-the-board reduction of budgetary resources will be triggered if the deficit estimate made by the Office of Management and Budget exceeds the target by more than $10 billion. Based on our updated economic and technical assumptions and on budgetary policies in effect on August 15, 1989, we estimate that the budget deficit in fiscal year 1990 will reach $141.5 billion, which exceeds the target by $41.5 billion.

This report presents the assumptions underlying CBO's deficit estimate, and calculates the amounts and percentages by which various budgetary resources would need to be sequestered to reduce the deficit to the target level under these assumptions.

I would be pleased to provide the Congress with any assistance it may require in responding to this report, or to the initial report by the Director of the Office of Management and Budget.

Sincerely yours,

Robert D. Reischauer
Director

INITIAL SEQUESTRATION REPORT FOR FISCAL YEAR 1990

A CONGRESSIONAL BUDGET OFFICE REPORT TO THE CONGRESS AND THE OFFICE OF MANAGEMENT AND BUDGET

August 21, 1989

SUMMARY

Though the federal government's budget deficit has retreated from the steep levels that prompted the enactment of the Balanced Budget Act four years ago, the deficit will not drop enough under current policies to meet the act's 1990 target, according to calculations prepared by the Congressional Budget Office (CBO). The deficit target specified by the Balanced Budget Act for 1990 is $100 billion, and CBO currently projects a federal budget deficit of $141.5 billion. If CBO's estimates were controlling, and if no further changes were made in taxing and spending policies, across-the-board reductions of 10.7 percent in defense and 15.6 percent in nondefense programs would be required to achieve the target. On August 25, 1989, the Director of the Office of Management and Budget (OMB) will issue an initial independent estimate of the projected deficit, and will determine the necessity of across-the-board spending cuts. Based on the Administration's *Mid-Session Review of the 1990 Budget* and laws enacted since July 18, 1989, it appears that OMB's initial estimate will exceed the target by about $16 billion.

INTRODUCTION

The Balanced Budget Act became law in December 1985 and established a series of annual budget deficit targets for the federal government that would lead to a balanced budget over five years. As amended in 1987, the Balanced Budget Act eased these annual targets and delayed the attainment of a balanced budget by one year, to fiscal year 1993. The deficit targets specified by the act are (in billions of dollars):

Fiscal Year	Maximum Deficit	Sequestration Threshold
1990	100	110
1991	64	74
1992	28	38
1993	0	0

For the years 1989 through 1992, the deficit projection may exceed the target by as much as $10 billion. If the Administration's deficit projection exceeds the target by more than this $10 billion margin, the act provides a procedure--known as sequestration--to cut federal spending automatically. For 1993, sequestration would be triggered if any deficit is estimated in the Administration's October 15, 1992, report.

Sequestration involves the permanent cancellation of new budget authority and other authority to obligate and expend funds, except for special and trust funds, where the sequestered amounts of spending authority remain in the funds. The sequestration of budgetary resources is designed to achieve outlay reductions sufficient to reach the annual deficit targets.

The Balanced Budget Act specifies roles for the Congressional Budget Office, the Office of Management and Budget, and the Comptroller General. CBO's role is to advise OMB and the Congress, while the Director of OMB must determine whether or not sequestration is necessary and, if so, the amount of reductions in budgetary resources and outlays required to achieve the deficit target. Each year, CBO and OMB are required to prepare independently two sets of sequestration reports. The CBO reports, which are transmitted to the Director of OMB and to the Congress, are a benchmark against which the Congress and others may assess the OMB reports. The OMB reports, which are made to the President and to the Congress, provide the basis for sequestration orders to be issued by the President. The timetable for the agency reports and sequestration orders is shown on page 3.

The initial CBO and OMB sequestration reports are based on laws that are enacted and regulations that are final at the time of a common snapshot date, August 15. The revised reports, however, must be based on laws enacted and regulations promulgated by the latest possible date before they are issued. Therefore, because the snapshot date may be

Balanced Budget Act Deficit Target			100.0
Excess Deficit			41.5

different in the two agencies' final reports, some legislation and regulations reflected in one report may not be reflected in the other.

The role of the Comptroller General under the amended Balanced Budget Act is threefold: to prepare a report each year to the Congress and the President that certifies whether the final sequestration order issued by the President complies with the requirements of the Balanced Budget Act; to assess the compliance and accuracy of the OMB sequestration reports; and to make recommendations for improving sequestration procedures. The Comptroller's report is due on November 15.

This document is the initial CBO report for 1990. The report:

o Estimates budget baseline levels as of January 1, 1989, and August 15, 1989, the amount of net deficit change that has occurred between the two dates, and the outlay reductions required for 1990;

o Provides CBO economic assumptions used for the two baseline estimates, including the estimated rate of real economic growth for fiscal year 1990 by quarter; and

o Calculates the amounts and percentages by which various budgetary resources must be sequestered in order to achieve the required outlay reductions.

BUDGET BASELINE TOTALS

The CBO budget baseline estimates of total revenues, outlays, and the deficit for fiscal year 1990 are shown in Table 1. Two sets of budget baseline estimates are provided--one for laws and regulations in effect on January 1, 1989, and the other for laws and regulations in effect on August 15, 1989. The economic and technical assumptions used for the August 15 budget baseline estimates are identical to those used for the January 1 estimates. The differences between the two sets of estimates, therefore, result only from laws enacted and final regulations promulgated since January 1.

These estimates are made in accordance with the specifications set forth in the Balanced Budget Act.

When appropriations for the new fiscal year have not been enacted--and, as of August 15, none of the 1990 appropriation bills had been completed--the CBO and OMB budget baseline estimates under the act are to be based on the appropriations enacted for the previous year, with an adjustment for inflation and increased pay costs. The act specifies the inflation adjustment as the estimated annual increase in the gross national product implicit price deflator, estimated by CBO to be 4.4 percent. For 70 percent of personnel costs, this inflation factor is increased to allow for higher agency retirement costs and for pay absorption in the previous fiscal year, and is reduced to account for pay absorption in the upcoming fiscal year.

For nonappropriated spending accounts and revenues, the baseline estimates assume that current laws and regulations will continue unchanged, and that expiring provisions of law will terminate as scheduled. The Balanced Budget Act, however, provides an exception to the general treatment of expiring provisions in the cases of excise taxes dedicated to trust funds, Commodity Credit Corporation agricultural price support programs, and contract authority for transportation trust funds. As required by the act, the budget baseline estimates include the receipts and outlays of the Social Security trust funds, even though they are legally off-budget.

The Balanced Budget Act provides that asset sales and loan prepayments shall neither be included in the budget baseline estimates nor count toward any net deficit reduction. The act makes an exception for asset sales and loan prepayments that are routine and ongoing according to the practices followed in fiscal year 1986 and for asset sales mandated by law as of September 17, 1987. The budget baseline estimates may not, however, assume or reflect an acceleration of routine asset sales or loan prepayments. As Table 1 shows, $0.5 billion in prepayments of Rural Electrification Administration loans is expected in fiscal year 1990 and is excluded from the CBO baseline.

Snapshot date for initial CBO and OMB reports	August 15
Initial CBO report	August 21[a]
Initial OMB report	August 25
Initial sequestration order	August 25
Revised CBO report	October 10
Revised OMB report	October 16[a]
Final sequestration order	October 16[a]

a. The statutory dates for the initial CBO report and the revised OMB report are August 20 and October 15, respectively; both dates fall on Sundays in 1989. The reports will therefore be submitted on the following Mondays.

The act also prohibits the inclusion of savings resulting from the transfer of outlays, receipts, or revenues from one year to an adjacent year, except for certain types of transfers identified in law. No such savings apply to fiscal year 1990. The prohibition of timing shifts does not apply to the advancing of certain farm deficiency payments into 1989 or to the shifting of the October 1, 1989, military pay date to September 29, because these actions did not result from new laws or regulations.

Under these specifications, CBO's estimate as of August 15, 1989, of the budget baseline deficit for 1990 is $141.5 billion.

Table 1 shows the estimated budget effect of laws enacted and final regulations promulgated since January 1, 1989. The estimated increase in the deficit since January 1 of $5.5 billion stems primarily from three laws: the Financial Institutions Reform, Recovery, and Enforcement Act, intended to resolve the savings and loan crisis; the Dire Emergency Supplemental Appropriations Act of 1989; and the Disaster Assistance Act of 1989, which extends assistance to farmers affected by persistent drought conditions.

Other laws enacted and regulations promulgated since January 1 lower the budget baseline deficit for 1990 by an estimated $0.1 billion. As a result of all these changes, federal government interest costs have increased by $1.5 billion since January 1. About $1.2 billion of this increase results from an estimated $13.8 billion boost in the 1989 deficit, brought on by the savings and loan legislation.

CBO's final sequestration report will be issued on October 10, 1989, and will take into account legislation enacted after August 15. Significant deficit reduction could occur over the next two months: the Congress must act on 13 appropriation bills, as well as on legislation designed to reconcile certain permanently authorized programs with the 1990 budget resolution.

ECONOMIC ASSUMPTIONS

The principal economic assumptions underlying the CBO budget baseline estimates for fiscal year 1990

---

are shown in Table 2. The Balanced Budget Act requires the Directors of OMB and CBO to estimate the rate of real economic growth for the fiscal year covered by their reports, for each quarter of the fiscal year, and for the last two quarters of the preceding fiscal year. If either OMB or CBO projects real economic growth to be less than zero for any two consecutive quarters, or if the Department of Commerce reports actual real growth to have been less than 1 percent for two consecutive quarters, the Congress and the President may suspend many of the provisions of the act. Table 2 provides the CBO estimates for the rate of real economic growth and other economic variables for fiscal year 1990; Table 3 shows the quarterly estimates. CBO does not project real economic growth to be less than zero in any quarter during fiscal year 1990.

TABLE 2. CBO ECONOMIC ASSUMPTIONS FOR FISCAL YEAR 1990

Gross National Product:	
Billions of current dollars	5,463
Percent change, year over year	6.3
Billions of constant (1982) dollars	4,158
Percent change, year over year	1.9
GNP Implicit Price Deflator (Percent change, year over year)	4.4
CPI-U (Percent change, year over year)	4.9
Civilian Unemployment Rate (Percent, fiscal year average)	5.5
Interest Rates (Fiscal year average):	
91-day Treasury bills	7.3
10-year Treasury notes	8.2

REQUIRED OUTLAY REDUCTIONS

Sequestration of budgetary resources will be necessary for 1990 if the deficit estimated by OMB exceeds the $100 billion target by more than the $10 billion margin. Once sequestration is triggered, budget outlays must be reduced by the entire amount by which the deficit exceeds $100 billion. One-half of the required outlay reduction must be taken from defense programs (budget accounts in the national defense function, 050, excluding the Federal Emergency Management Agency) and the other half from nondefense programs. CBO's deficit projection of $141.5 billion would call for outlay reductions of $41.5 billion in 1990. Table 4 shows how budget outlays in defense and nondefense programs would be cut back to achieve this reduction.

April-June 1990	1.7
July-September 1990	1.9

a. As reported by the Department of Commerce (July 27, 1989).

If sequestration is required, the law provides that the automatic spending increases in three programs--the National Wool Act, the special milk program, and vocational rehabilitation--be eliminated and the resulting savings be applied to the required reduction in outlays for nondefense programs. According to CBO estimates, only the vocational rehabilitation program will receive an automatic spending increase in fiscal year 1990; eliminating this increase would produce $47 million in outlay savings in 1990. The outlay savings to be obtained by applying four special rules are also credited to the required spending reductions in nondefense programs. These special rules are for guaranteed student loans, foster care and adoption assistance, Medicare, and certain health programs, and are described in a later section of this report. Applying the special rules to these programs would achieve $2 billion in outlay savings in 1990.

The outlay reductions of $20.8 billion in defense programs and the remaining reductions of $18.7 billion in nondefense programs must be taken as a uniform percentage of all sequesterable budgetary resources in each category. The uniform reduction percentages are computed from outlay estimates: the required outlay savings to be achieved through across-the-board reductions are divided by the total estimated outlays from sequesterable budgetary resources in each category. The resulting uniform reduction percentages are then applied to all of the sequesterable budgetary resources (budget authority, credit authority, and other spending authority) for defense and nondefense programs.

TABLE 4. CBO SEQUESTRATION CALCULATIONS FOR FISCAL YEAR 1990
(In millions of dollars)

	Defense Programs	Nondefense Programs
Total Required Outlay Reductions	20,761	20,761
Savings from Eliminating Automatic Spending Increases	0	47
Savings from the Application of Special Rules:		
Guaranteed student loans	0	26
Foster care and adoption assistance	0	4
Medicare	0	1,786
Other health programs	0	204
Remaining Reductions Required	20,761	18,694
Estimated Sequestration Outlay Base	193,862	119,649[a]
Uniform Reduction Percentage	10.7	15.6

a. Includes $6,274 million in estimated 1991 outlays for the Commodity Credit Corporation that can be affected by a 1990 sequestration (see discussion of special rule for CCC). Also includes an estimated $1,972 million in outlays from the spending of offsetting collections.

According to CBO estimates, the 1990 outlays associated with sequesterable budgetary resources for defense programs are $193.9 billion. From this base amount, $20.8 billion in across-the-board outlay reductions must be made. The uniform percentage to be applied to sequesterable defense budgetary resources is 10.7 percent, as shown in Table 4. The Balanced Budget Act allows the President to exempt military personnel spending from sequestration, which would reduce sequesterable outlays by about $75 billion; an exemption has not been issued this year. If the President had exempted military personnel spending from sequestration, the required reduction in other defense spending would have been 17.5 percent.

The 1990 outlays associated with budgetary resources for nondefense programs subject to across-the-board reduction are estimated to be $119.6 billion. To achieve $18.7 billion in nondefense outlay reductions, a 15.6 percent across-the-board reduction in nondefense sequesterable resources is required.

Table 5 lists budget baseline outlays for 1990. Defense outlays total $300.6 billion, of which $193.9 billion is subject to sequestration. In defense programs, unlike nondefense programs, the law specifies that spending from unobligated balances is subject to sequestration. Since the President has decided not to exempt military personnel spending, the only defense outlays that are not subject to sequestration are those resulting from previously appropriated budget authority that has already been obligated.

Nondefense baseline outlays for 1990 total $911.8 billion. Of this amount, only $113.4 billion is subject to across-the-board reduction. An additional $6.3 billion in 1991 Commodity Credit Corporation (CCC) outlays is counted under Balanced Budget Act specifications; together, these amounts yield the nondefense outlay base of $119.6 billion shown in Table 4. As Table 5 shows, a large percentage of nondefense outlays is exempted by law from the sequestration process. Social Security benefits, net interest payments, certain low-income programs, most federal retirement and disability benefits, veterans compensation and pensions, and regular state unemployment insurance benefits account for the largest exemptions. Outlays from appropriations for nondefense programs made in previous years are also not subject to sequestration.

The calculations in this report generally assume that all nonexempt budgetary resources can be sequestered in order to produce outlay savings, including entitlement programs and other mandatory spending programs where the spending authority is not controlled through the annual appropriation process. An exception is made for the administrative expenses of the Postal Service. While more than $1 billion of budgetary resources of the Postal Service is sequesterable under CBO estimates, no outlay savings are attributed by CBO to this sequestration because the Administration appears to have no mechanism for enforcing a sequestration order on the Postal Service. The Congress is currently considering legislation that would remove the Postal Service from federal budget totals and exempt it from sequestration calculations.

AUTOMATIC SPENDING INCREASES

The three programs with automatic spending increases currently subject to sequestration by the Bal-

TABLE 5. COMPOSITION OF BASELINE OUTLAYS FOR FISCAL YEAR 1990

Category	Estimate (In billions of dollars)	Percentage of Total
Defense Programs [a]		
Subject to across-the-board reduction	193.9	16.0
Exempt from sequestration [b]	106.8	8.8
Subtotal, defense programs	300.6	24.8
Nondefense Programs		
Subject to sequestration:		
Certain programs with automatic spending increases [c]	1.6	0.1
Certain special rule programs [d]	129.0	10.6
Subject to across-the-board reduction [e]	113.4	9.4
Subtotal, subject to sequestration	244.0	20.1
Exempt from sequestration:		
Social Security	247.6	20.4
Federal Retirement, disability, and workers compensation	65.9	5.4
Earned income tax credit	4.1	0.3
Low-income programs [f]	83.0	6.8
Veterans compensation and pensions	15.0	1.2
State unemployment benefits	14.6	1.2
Offsetting receipts	-59.6	-4.9
Net interest payments	179.8	14.8
Other	117.5	9.7
Subtotal, exempt from sequestration	667.9	55.1
Subtotal, nondefense programs	911.8	75.2
Total	1,212.5	100.0

a. Budget function 050, excluding Federal Emergency Management Agency programs.
b. Outlays from obligated balances.
c. National Wool Act, special milk, and vocational rehabilitation programs.
d. Guaranteed student loans, foster care and adoption assistance, Medicare, veterans medical care, and other health programs.
e. Excludes 1991 outlays for the Commodity Credit Corporation.
f. Family Support payments, child nutrition, Medicaid, Food Stamps, Supplemental Security Income, the Women, Infants, and Children's program, Commodity Supplemental Food program, and Nutrition Assistance to Puerto Rico.

anced Budget Act are listed in Table 6. The scheduled percentage increases are shown as well as the amount of estimated outlay savings to be gained by eliminating these increases. According to CBO, only the vocational rehabilitation program will receive an automatic spending increase in 1990.

SPECIAL RULES

The Balanced Budget Act provides special rules for the sequestration of budgetary resources for certain federal programs. This section describes these special rules and their application to the 1990 sequestration calculations. The estimated outlay savings derived from the first four rules are shown separately in Table 4. Any outlay savings resulting from the remaining special rules are included in the amount to be obtained from the uniform percentage reductions.

Guaranteed Student Loan Program

The Balanced Budget Act requires two changes in the guaranteed student loan (GSL) program to occur automatically under sequestration. First, the statutory factor for calculating the quarterly special allowance payments to lenders will be reduced by the lesser of 0.40 percentage point or the amount by which the statutory factor exceeds 3 percent for the first four quarters after the loan is made. Under the current program, the reduction will be 0.25 percentage point. Second, a student's origination fee will increase by 0.50 pereentage point. In both cases, sequestration affects only GSL loans disbursed during

---

TABLE 6. AUTOMATIC SPENDING INCREASES FOR FISCAL YEAR 1990 SUBJECT TO SEQUESTRATION

Program	Scheduled Increase (Percent)	Outlay Reduction (Millions of dollars)
National Wool Act	a	a
Special Milk Programs	b	b
Vocational Rehabilitation [c]	4.2	46.9
Total		46.9

a. No 1990 payment increase is expected for this program, based on declining wool support price levels in marketing year 1989.
b. Benefits are indexed to the producer price index for fresh processed milk. This index is not projected to increase between May 1989 and May 1990.
c. This program is indexed to the change in the consumer price index (CPI-U) from October of the previous year.

the applicable fiscal year, but after the order is issued. For 1990, these changes are estimated by CBO to reduce outlays by $26 million.

Foster Care and Adoption Assistance Programs

The Balanced Budget Act limits the amount to be sequestered in the foster care and adoption assistance programs to increases in foster care maintenance payment rates or adoption assistance payment rates taking effect during the current fiscal year. Moreover, the amounts are limited to the extent that the reduction can be made by reducing federal matching payments by a uniform percentage across states. The increases in payment rates for these programs are made by the states and localities. Any increases planned by the states for fiscal year 1990 were included in the CBO calculations for sequestration reductions. The estimated outlay savings in 1990 from sequestration are $4 million.

Medicare

The sequestration reductions in the Medicare program are to be achieved by reducing payment amounts for covered services. No changes in coinsurance or deductible amounts are to be made, and covered services are unaffected under a sequestration order. Under such an order, each payment amount for services provided during the fiscal year would be reduced by a maximum of 2 percent relative to whatever level of payment would otherwise be made under Medicare laws and regulations. According to CBO estimates, the outlay savings to be achieved in 1990 by applying this special rule are $1.8 billion.

Veterans Medical Care and Other Health Programs

The Balanced Budget Act limits reductions in budget authority for the nonadministrative expenditures for veterans medical care, community and migrant health centers, and Indian health services and facilities to 2 percent in 1990 and any subsequent year. The estimated outlay savings to be achieved in 1990 by applying this special rule to these programs are $204 million.

Child Support Enforcement Program

In the child support enforcement (CSE) program, the Balanced Budget Act provides that sequestration of entitlement payments to states is to be accomplished by reducing the federal matching rates for state administrative expenses. For 1990, the federal matching rates on most expenditures under CBO estimates would be reduced from 66 percent to 55.7 percent, and the rate for computer-related and laboratory expenditures would be reduced from 90 percent to 76 percent. These reductions in the matching rates are necessary to achieve the same 15.6 percent reduction applied to other nondefense programs.

If states increase their share of CSE spending to maintain total program spending at the expected 1990 level, this reduction in the federal matching rate will lower federal outlays by the same percentage as other nondefense programs. If states do not increase their 1990 budgeted amounts to compensate for lower matching rates, however, the lower federal matching rate would result in a larger percentage reduction in federal spending than the act requires. The estimated outlay savings that are to be achieved in 1990 by applying this special rule are $200 million.

Unemployment Compensation Programs

The Balanced Budget Act provides that the following items are not to be sequestered: regular state unemployment benefits, the state share of extended unemployment benefits, unemployment benefits paid to former federal employees and former members of the armed services, and loans and advances to the state and federal unemployment accounts. The

MI

federal share of extended benefits, unemployment insurance for railroad employees, other federally paid benefits, and state and federal administrative expenses are subject to sequestration.

Both the federal and state shares of extended unemployment benefits are paid from the Unemployment Trust Fund--the federal share from a federal account and the state share from each state's account. State law sets the amount of each weekly extended benefit. The Balanced Budget Act permits any state to reduce the weekly extended benefit amount by a percentage equal to the uniform reduction in the federal share. If states do not change their laws to provide for such a reduction, the weekly benefit payments will not be reduced, the state share will increase by the amount of the decrease in the federal share, and total budget outlays that include both federal and state benefits will not be changed by the sequestration. No states are currently paying extended benefits.

Commodity Credit Corporation

Under the Balanced Budget Act, payments and loan eligibility under any contract entered into by the Commodity Credit Corporation (CCC) after a sequestration order has been issued for a fiscal year are subject to a percentage reduction. The act requires that reductions for all farm commodities supported by the CCC be made in a uniform manner, including all noncontract programs, projects, and activities within the CCC's jurisdiction. The act further stipulates that outlay reductions in the post-sequestration year that are the result of contract adjustments in the sequestration year should be credited to the overall outlay reduction required in the sequestration year. The outlay savings to be achieved by applying this special rule are estimated by CBO to be $1.0 billion in 1990, and $1.0 billion in 1991. The actual amount of savings realized in each year will depend upon how the sequestration is carried out for the various CCC programs. In accordance with the act, however, all $2.0 billion of these estimated outlay savings are credited toward the $20.8 billion reduction in nondefense spending required for 1990.

Federal Pay

The Balanced Budget Act provides that rates of pay or any scheduled pay increases may not be reduced following a sequestration order. For members of the armed services, this provision applies to rates of basic pay, basic subsistence allowances, and basic quarter allowances. Budgetary resources available for federal pay, however, will be subject to sequestration as part of the reduction of administrative expenses, which include travel, printing, supplies, and other services. The total amount of government-wide savings to be achieved in 1990 from employee compensation cannot be estimated because program managers are expected to be urged not to resort to personnel furloughs and reductions in force until other administrative expenses are reduced as much as possible.

CONCEPTUAL ISSUES

In preparing its initial sequestration report for 1990, CBO has identified a few areas of ambiguity in the interpretation of the Balanced Budget Act. Some of these uncertainties affect the computation of the baseline deficit, while others involve the determination of whether or not a particular budget account is subject to sequestration.

Baseline Issues

In developing the 1990 baseline estimates for national defense, CBO has taken as its starting point the 1989 budget authority figures shown in the Administration's *Mid-Session Review of the 1990 Budget*. These figures reflect expected transfers of budget authority from one account to another, which the Secretary of Defense can make under existing legislative authority. The OMB estimate of the Balanced Budget Act baseline contained in the *Mid-Session Review* is predicated on 1989 budget authority figures that do not reflect expected transfers. CBO's assumption adds $0.9 billion to 1990 defense outlays and the deficit because the transfers are, on balance, from slow-spending to fast-spending accounts.

CBO and OMB also make different assumptions about pay absorption--the portion of the January 1989 pay raise that was not reflected in 1989 appropriations and that agencies had to accommodate through reductions in other spending. CBO assumes that the 1989 pay raise for civilian agency employees was fully absorbed, and that the Department of Defense absorbed 42 percent of the pay raise for civilian personnel and 7 percent of the military pay raise. CBO bases its assumption on language in the 13 appropriation bills and the accompanying conference reports for 1989. OMB, however, assumes that there was no pay absorption in fiscal year 1989. CBO's assumption adds $0.2 billion to defense spending and $1.0 billion to nondefense outlays.

Although not affecting the 1990 deficit estimate, several issues involving expiring entitlement programs merit clarification if the Congress considers

modifications to the Balanced Budget Act. While entitlements and other mandatory spending are generally projected in accord with current laws, the act provides that agricultural price support programs are to be continued at current rates. The meaning of the term "current rates," however, should be clarified. It has been interpreted both as a constant level of target prices and as a constant rate of decline in target prices. Also, the act does not provide for the continuation of the Food Stamp program (even though it is authorized by the same law that authorizes farm price supports), guaranteed student loans, or trade adjustment assistance. If one of these programs were to expire in the budget year, as Food Stamps will do at the beginning of fiscal year 1991, the baseline estimate would be sharply reduced and sequestration would be unlikely. Such circumstances would limit the realism and usefulness of the baseline.

Sequestration Issues

One problematic area is the treatment of three entitlement programs created by the Family Support Act of 1988. The three new programs are designed to benefit families receiving Aid to Families with Dependent Children (AFDC)--the Job Opportunities and Basic Skills training program (JOBS), child care for families who are in the JOBS program, and extended child care for families who cease to receive AFDC. Pending clarification of their treatment, both CBO and OMB have assumed that the JOBS program is subject to sequestration and that the two child care programs are exempt. The child care funds are authorized under the same part of the Social Security Act (Title IV-A) that authorizes AFDC, which is exempt from sequestration. The JOBS program, however, is distinct from AFDC. Many of its requirements are set out in a different part of the law (Title IV-F), a separate state plan is required, and funding is separate.

CBO and OMB differ with respect to the treatment of the administrative expenses of the vaccine improvement program trust fund. Section 2115(f)(3) of the Public Health Service Act exempts from sequestration any payments of vaccine injury compensation. Because no explicit exemption is provided for administrative expenses, CBO regards them as sequesterable, although OMB treats the entire program as exempt. If such ambiguities are to be avoided, as CBO and OMB have previously noted, exempting programs from sequestration should be accomplished by amending the specifications for the sequestration report contained in the Balanced Budget Act.

CBO and OMB continue to disagree over the treatment of the Treasury's payments to the Farm Credit System Financial Assistance Corporation for interest and the Railroad Retirement Board's supplemental annuity pension fund. In conformance with the opinion of the General Accounting Office, CBO regards these programs as exempt from sequestration.

SEQUESTRATION REDUCTIONS

A summary of CBO's calculations for the sequestration of budgetary resources and the estimated outlay savings for 1990 is provided for national defense programs in Table 7 and for nondefense programs by function in Table 8. The tables show CBO's budget baseline estimates for new budget authority and outlays, reductions in outlays caused by sequestration, and post-sequestration spending levels. In most instances, additional outlay savings would be gained in 1991 and later years as a result of the cancellation of 1990 budget authority. Interest costs would also be permanently lowered as a result of reduced federal borrowing needs. Savings in later years have not been estimated for this report. A detailed list of the sequestration base and reductions by agency and budget account by type of spending authority is provided as an appendix to this report.

The CBO sequestration calculations and post-sequestration spending levels are advisory only. OMB will determine whether a sequestration is triggered and, if so, the actual sequestration amounts. OMB's initial determination will be issued on August 25.

LIST OF PUBLIC LAWS

Last List August 21, 1989

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 840/Pub. L. 101-92

To authorize appropriations for fiscal year 1990 for the Federal Maritime Commission, and for other purposes. (Aug. 16, 1989; 103 Stat. 601; 2 pages) Price: $1.00

H.R. 1426/Pub. L. 101-93

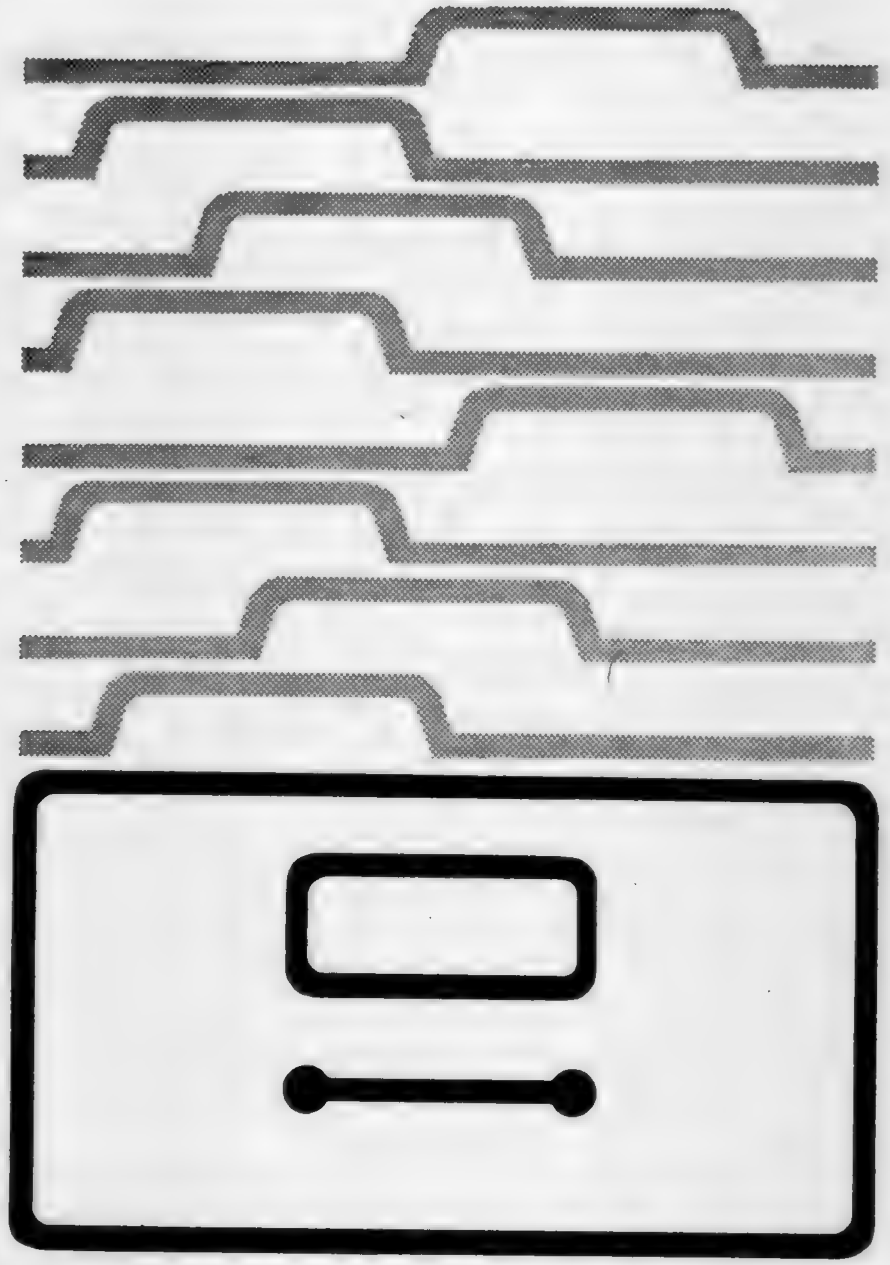
Drug Abuse Treatment Technical Corrections Act of 1989. (Aug. 16, 1989; 103 Stat. 603; 14 pages) Price: $1.00

H.R. 2727/Pub. L. 101-94

Court of Veterans Appeals Judges Retirement Act. (Aug. 16, 1989; 103 Stat. 617; 13 pages) Price: $1.00

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)



Revised January 1, 1989

The GUIDE to record retention requirements is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents,
U.S. Government Printing Office,
Washington, DC 20402-9325.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, and Atlanta, GA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

Contents

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

ATLANTA, GA

WHEN: September 20; at 9:00 a.m.
WHERE: Room 806, 75 Spring Street, SW.
Richard B. Russell Federal Building
Atlanta, GA
RESERVATIONS: Call the Federal Information Center
404-331-6895

WASHINGTON, DC

WHEN: September 25; at 9:00 a.m.
WHERE: Office of the Federal Register
First Floor Conference Room
1100 L Street NW., Washington, DC

Rules and Regulations

Federal Register
Vol. 54, No. 162
Wednesday, August 23, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 151

[Docket No. 89-077]

Recognition of Breeds and Books of Record of Purebred Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations relating to recognition of breeds and books of record of purebred animals by removing all references to "Deputy Administrator" and replacing them with references to "Administrator." We are also removing all references to "Veterinary Services" and replacing them with references to "Animal and Plant Health Inspection Service." These changes are warranted so the regulations will accurately reflect that the Administrator of the agency holds the primary authority and responsibility for various decisions under the regulations.

EFFECTIVE DATE: August 23, 1989.

FOR FURTHER INFORMATION CONTACT: Helene R. Wright, Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; 301-436-8682.

SUPPLEMENTARY INFORMATION:

The regulations in 9 CFR part 151 concern the recognition of breeds and books of record of purebred animals. Before the effective date of this document, these regulations indicated that the Deputy Administrator, Veterinary Services, of the Animal and Plant Health Inspection Service was the official responsible for various decisions made according to the regulations. We are revising 9 CFR part 151 to indicate that the primary authority and responsibility for various decisions under these regulations belongs to the Administrator of the agency. We are making similar revisions in all other APHIS regulations. These revisions will be published in separate **Federal Register** documents.

We are removing all references to "Deputy Administrator" and replacing them with references to "Administrator," and removing references to "Veterinary Services" and replacing them with references to "Animal and Plant Health Inspection Service (APHIS)." We are also adding a definition of "Administrator." Further, we are removing the definitions of "Deputy Administrator" and "Veterinary Services" because those terms are no longer used in the regulations.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity to comment are not required, and this rule may be made effective less than 30 days after publication in the **Federal Register**. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by Public Law 96-354, the Regulatory Flexibility Act, and thus is exempt from the provisions of that Act.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

These programs/activities under 9 CFR part 151 are listed in the Catalog of Federal Domestic Assistance under No. 10.025 and are subject to Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects in 9 CFR Part 151

Animals, Animal pedigree, Imports, Purebred animals.

Accordingly, we are amending 9 CFR part 151 as follows:

PART 151—RECOGNITION OF BREEDS AND BOOKS OF RECORD OF PUREBRED ANIMALS

1. The authority citation for part 151 continues to read as follows:

Authority: 19 U.S.C. 1202; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 151.1, the definitions of "Deputy Administrator, Veterinary Services" and "Veterinary Services" are removed.

3. In § 151.1, the paragraph designations are removed and all definitions are rearranged in alphabetical order.

4. In § 151.1, definitions of "Administrator" and "Animal and Plant Health Inspection Service" are added in alphabetical order to read as follows:

§ 151.1 Definitions.

Administrator. The Administrator, Animal and Plant Health Inspection Service, or any person authorized to act for the Administrator.

* * * * *

Animal and Plant Health Inspection Service. The Animal and Plant Health Inspection Service of the United States Department of Agriculture (APHIS).

* * * * *

§ 151.9 [Amended]

5. In § 151.9, remove the words "Veterinary Services" in the fourth sentence and in their place add "APHIS".

6. In § 151.9, remove "Veterinary Services," in the fifth sentence and in its place add the word "the".

§§ 151.1, 151.2, 151.5, 151.9, 151.11 [Amended]

7. In addition to the amendments set forth above, in 9 CFR part 151 remove the words "Deputy Administrator, Veterinary Services" and add, in their place, the word "Administrator" in the following places:

(a) Section 151.1, definition, "Certificates of pure breeding.";
(b) Section 151.2;
(c) Section 151.5;
(d) Section 151.9;
(e) Section 151.11(a).

§§ 151.1, 151.7 [Amended]

5. In addition to the amendments set forth above, in 9 CFR part 151 remove the words "Veterinary Services" and

add, in their place, the word "APHIS" in the following places:

(a) Section 151.1, definition, "Inspector";

(b) Section 151.7(c);

(c) Section 151.10.

Done in Washington, DC, this 17th day of August 1989.

Larry B. Slagle,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-CE-16-AD; Amdt. 39-6306]

Airworthiness Directives; American Champion Aircraft (Bellanca, Champion) Models 7ECA, 7GCAA, 7GCBC, 7KCAB, 8GCBC, and 8KCAB Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to American Champion Aircraft (Bellanca, Champion) Models 7ECA, 7GCAA, 7GCBC, 7KCAB, 8GCBC, and 8KCAB airplanes equipped with front folding seats. The FAA has received several reports of fatal accidents which have occurred after the seat back failed, causing the jamming of the rear control stick and loss of control of the airplane. The inspections specified in the AD will detect the cracks before a seat back failure occurs and the replacement of the seat frame also specified in the AD will preclude the development of these cracks.

DATES: *Effective Date:* September 21, 1989.

Compliance: As prescribed in the body of the AD.

ADDRESSES: American Champion Aircraft Service Letter No. 401, dated June 14, 1989, applicable to this AD may be obtained from American Champion Aircraft, P.O. Box 37, Rochester, Wisconsin 53167, Telephone (414) 534-6315. This information may also be examined at the Rules Docket, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City; Missouri 64106.

FOR FURTHER INFORMATION CONTACT:

Mr. Gregory J. Michalik, ACE-120C, Chicago Aircraft Certification Office, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694-7135.

SUPPLEMENTARY INFORMATION:

On January 15, 1987, the FAA was notified by Transport Canada of a fatal accident involving a Bellanca Model 7GCBC airplane. The preliminary investigation by the Canadian Aviation Safety Board (CASB) indicated that the crash was due to a failure of the folding backrest frame of the pilot's seat at the pivot point of the backrest which caused the pilot to shift aft contacting the rear flight control. This caused the airplane to pitch nose-up without recovery.

Two other airplanes of this type were inspected by the CASB and similar signs of metal fractures were evident on one of these seats. On February 18, 1987, Transport Canada issued Service Difficulty Alert (SDA) No. 87-01, relating to these failures. An alert similar to Canadian SDA No. 87-01 was issued by the FAA in the February 1987 issue of Advisory Circular (AC) No. 43-16, "General Aviation Airworthiness Alerts".

On November 14, 1988, the FAA was notified by the National Transportation Safety Board (NTSB) of a fatal accident involving a Bellanca Model 8KCAB airplane. The investigation by the NTSB disclosed that the pilot's folding seatback had failed at the hinge point on the right side and at the welded junction of the seat's lower side tube and seatback side brace on the left side. It is believed that the pilot fell backward and inadvertently exceeded the airplane's design stress limits by pulling or jerking on the front control stick or by hitting or jamming the rear control stick. A review of Service Difficulty Reports (SDR) regarding failures of the folding seatback frames in both Bellanca 7 and 8 series airplanes revealed reports of similar failures. Since February 1989, the FAA has been working with FRA Enterprises and American Champion Aircraft to increase the structural integrity of the folding seat frame and to develop a means for restraining aft seat movement. As a result, American Champion Aircraft has issued Service Letter No. 401, dated June 14, 1989, as a means to correct the front folding seat problem. Since the FAA has determined that the unsafe condition described herein is likely to exist or develop in other airplanes of the same type design, an AD is being issued requiring inspections for cracks in the seat frame and replacement of the seat frame on American Champion Aircraft (Bellanca, Champion) Models 7ECA, 7GCAA, 7GCBC, 7KCAB, 8GCBC, and 8KCAB airplanes equipped with front folding seats. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The FAA has determined that this regulation is an emergency regulation and that it is not major under section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the FAR as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

American Champion Aircraft (Bellanca, Champion): Applies to Models 7ECA, 7GCAA, 7GCBC, 7KCAB, 8GCBC, and 8KCAB (all serial numbers) airplanes certificated in any category, when equipped with front folding seats.

Compliance: Required as indicated in the body of the AD, unless already accomplished.

To prevent failure of the seat back which could result in loss of control of the airplane, accomplish the following:

(a) Within the next 25 hours time-in-service after the effective date of this AD and, thereafter at intervals not to exceed 25 hours time-in-service from the last inspection until the actions specified in paragraph (b) below are accomplished, accomplish the following:

(1) Magnetic particle or dye penetrant inspect the left and right sides of the welded lower seat frame side-tube/side-brace junction and seatback hinges for evidence of cracks. If any cracks are found, prior to further flight repair, in accordance with the recommended procedures in Advisory Circular (AC) 43.13-1A, the crack or replace the cracked part with a serviceable part.

(2) Fabricate and install on the instrument panel in clear view of the pilot a placard with letters of minimum 0.2 inches in height which reads as follows: "Warning: Do not pull or push on upper seat back."

(b) Within the next 150 hours time-in-service after the effective date of this AD, replace the front folding seat frame with an exchange unit in accordance with American Champion Aircraft Service Letter No. 401, dated June 14, 1989. The repetitive inspections and the placard specified in paragraph (a) above are no longer required after the actions specified in this paragraph have been accomplished.

(c) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Chicago Aircraft Certification Office, ACE-115C, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All persons affected by this directive may obtain copies of the documents referred to herein upon request to American Champion Aircraft, P.O. Box 37, Rochester, Wisconsin 53167, or may examine these documents at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City; Missouri 64106.

This amendment becomes effective on September 21, 1989.

Issued in Kansas City, Missouri, on August 11, 1989.

Dwight A. Young,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-19791 Filed 8-22-89; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89-CE-17-AD; Amdt. 39-6307]

Airworthiness Directives; Gulfstream Aerospace Models AA-5, AA-5A, AA-5B, and GA-7 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, request for comments.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Gulfstream Aerospace Models AA-5, AA-5A, AA-5B, and GA-7 airplanes, which requires a one-time inspection of the fuel tanks and the electric fuel pump filter for contamination, and resealing of the fuel tank access covers with a high-octane fuel resistant sealant. This action is prompted by reports of deteriorated fuel tank access cover sealant which can accumulate at the electric fuel pump filter and cause fuel flow interruption. The inspections and corrective actions required by this AD will eradicate the contamination problem and prevent possible fuel flow interruption.

DATES: *Effective Date:* September 21, 1989. Comments for inclusion in the Rules Docket must be received on or before September 22, 1989.

Compliance: Required within the next 25 hours time-in-service unless already accomplished.

ADDRESSES: Gulfstream Aerospace Corporation (GAC) Service Bulletins No. 176 and No. ME 22, both dated July 26, 1989, and applicable to this AD, may be obtained from the Gulfstream Aerospace Corporation, Technical Operations Department, Travis Field, P.O. Box 2206, Savannah, Georgia 31402-2206. This information may be examined at the Rules Docket at the address below. Send comments on the AD in triplicate to the FAA, Central Region, Attention: Rules Docket No. 89-CE-17-AD, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Ben Durrance, Aerospace Engineer, ACE-140A, Atlanta Aircraft Certification Office, FAA, Small Airplane Directorate, Aircraft Certification Service, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349, Telephone (404) 991-3810.

SUPPLEMENTARY INFORMATION: Gulfstream Aerospace Models AA-5, AA-5A, AA-5B, GA-7 airplanes were originally manufactured using Product Research and Chemical Corporation PR-1321 sealant to seal the fuel tank access covers. Gulfstream Aerospace Single Engine Aircraft Service Kit No. 140, "Integral Fuel Tank Repairs," and Gulfstream Aerospace GA-7/Cougar Aircraft Service Kit No. 1, "Integral Fuel Tank Repairs," also specified the use of PR-1321 for this purpose. It was subsequently learned that PR-1321 is not suitable for use in a high-octane fuel environment. In December of 1983, the two service kits were revised to Single Engine Aircraft Service Kit No. 140A and GA-7/Cougar Aircraft Service Kit No. 1A respectively. These revised service kits deleted the reference to PR-1321 and required the use of PR-1403, (a sealant which is compatible with high-octane fuel) on integral fuel tank repairs.

Subsequently, the FAA has received eleven reports of deteriorated access cover sealant found in the fuel tanks of Gulfstream Models AA-5, AA-5A, AA-5B, and GA-7 airplanes. The contamination can appear in any of the following forms: (1) Sealant in a mushy state, usually found in the bottom of the tanks in chunk form; (2) a sticky resinous substance, varying in color and appearing in the drain areas; (3) a fine powder, pink in color, found in the areas of the access covers, and possibly, throughout the fuel system. Sealant which has deteriorated to the powder form poses the greatest hazard to the operation of the airplane because this powder can accumulate at the electric fuel pump filter and result in fuel flow interruption.

Gulfstream Aerospace Corporation (GAC) has written GAC Service Bulletin No. 176 (applicable to Gulfstream Aerospace Models AA-5, AA-5A, and AA-5B airplanes) and GAC Service Bulletin No. ME 22 (applicable to Gulfstream Aerospace Model GA-7 airplanes). These Service Bulletins provide instructions for: (1) Inspection of the fuel tanks and the electric fuel pump filter; (2) cleaning of the fuel tanks and/or fuel system (if contamination is present); (3) resealing of the access covers with high-octane fuel resistant sealant. Since the FAA has determined that the unsafe condition described herein is likely to exist or develop in other airplanes of the same type design, and AD is being issued requiring that the actions specified in GAC Service Bulletin No. 176 or ME 22, as applicable, be accomplished on all Gulfstream Aerospace Models AA-5, AA-5A, AA-5B, and GA-7 airplanes. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

Although this action is in the form of a final rule which involves requirements affecting immediate flight safety and, thus, was not preceded by notice and public procedure, comments are invited on this rule.

Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered and this rule may be amended in light of the comments received. Comments that provide a factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effectiveness of the AD and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket at the address given above. A report summarizing each FAA public contract concerned with the substance of this AD, will be filed in the Rules Docket.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emerency regulation and that it is not major under section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

List of Subjects in 14 CFR Part 39

Air Transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of 14 CFR part 39 of the FAR as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

Gulfstream Aerospace Corporation: Applies to Gulfstream Aerospace Models AA–5, AA–5A, AA–5B, and GA–7 (all serial numbers) airplanes certificated in any category.

Compliance: Required within the next 25 hours time-in-service after the effective date of this AD, unless already accomplished. To preclude fuel tank/fuel system contamination caused by deterioration of fuel tank access cover sealant, accomplish the following:

(a) Inspect the fuel tanks, fuel system, and the electric fuel pump filter for fuel tank sealant contamination in accordance with the instructions specified in Gulfstream Aerospace Corporation (GAC) Service Bulletin (S/B) No. 178, dated July 28, 1989, or GAC S/B No. ME 22, dated July 28, 1989, as applicable. If contamination is detected, prior to further flight clean the fuel system and all fuel system components in accordance with the instructions in the above listed applicable GAC S/B.

(b) Reseal the fuel tank access covers using high-octane fuel resistant sealant per the instructions in the applicable GAC S/B listed in paragraph (a) of this AD.

(c) An equivalent means of compliance with this AD may be used if approved by the Manager, Atlanta Aircraft Certification Office, FAA, Small Airplane Directorate, Aircraft Certification Service, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Gulfstream Aerospace Corporation, Technical Operations Department, Travis Field, P.O. Box 2206, Savannah, Georgia 31402–2206; or may examine the documents at the FAA, Office of the Assistant Chief Counsel, Room 1558 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on September 21, 1989.

Issued in Kansas City, Missouri, on August 11, 1989.

Dwight A. Young,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89–19792 Filed 8–22–89; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 88–NM–210–AD; Amdt. 39–6311]

Airworthiness Directives; Lockheed Aeronautical Systems Company Model L–1011–385–1, L–1011–385–1–14, L–1011–385–1–15, and L–1011–385–3 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises an existing airworthiness directive (AD), applicable to Lockheed Model L–1011–385 series airplanes, which currently requires deactivation of the AC electric motor-driven hydraulic pumps. That action was prompted by a report of smoke and fire damage resulting from a failed AC electric motor-driven hydraulic pump electrical connector, in combination with leaking hydraulic fluid from the failed electro-hydraulic component. This amendment permits the installation of a newly-designed AC Hydraulic Pump Magnetic Circuit Breaker Panel (MCBP), which removes the restrictions on the use of the two hydraulic pumps imposed by the existing AD.

EFFECTIVE DATE: October 2, 1989.

ADDRESSES: The applicable service information may be obtained from Lockheed Aeronautical Systems Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Order Administration, Department 65–33, Unit 20, Plant A–1. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Elvin K. Wheeler, Aerospace Engineer, Systems and Equipment Branch, ANM–132L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806–2425; telephone (213) 988–5344.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to Lockheed Model L–1011–385 series airplanes, to permit the installation of a newly-designed AC Hydraulic Pump Magnetic Circuit Breaker Panel (MCBP), which would remove restrictions on the use of the pumps, was published in the

Federal Register April 10, 1989, (54 FR 14241).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Comments were received from the Air Transport Association (ATA) of America and one operator, both of whom supported adoption of the proposal. However, one of the commenters requested that an alternate means of compliance be approved, in lieu of the circuit validation test procedures now provided by Lockheed Service Bulletin 093–29–088, Revision 1, dated March 7, 1989. The commenter stated that repeated validation testing could be more safely and easily accomplished by removing the pump electrical connector and connecting it to a test box. The test box operation would direct current from one of the three phases, through a known load and then into the neutral circuit, which would cause the magnetic circuit breaker to trip in the same manner as lifting a phase lead from the Remote Controlled Circuit Breaker (RCCB). The FAA agrees that the utilization of a test box for the repeated validation tests would be more efficient than lifting a phase lead from the RCCB, but a test box for accomplishing this task is not available at this time. Therefore, the FAA does not concur with the commenter's suggestion. Should such a test box become available, operators may apply to use it as an alternate means of compliance, as provided by paragraph D. of the final rule.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 241 Model L–1011–385–1, L–1011–385–1–14, L–1011–385–1–15, and L–1011–385–3 series airplanes of the affected design in the worldwide fleet. It is estimated that 116 airplanes of U.S. registry will be affected by this AD, that it will take approximately 29 manhours per airplane to accomplish the option terminating action, and that the average labor cost will be $40 per manhour. Kits to accomplish the modification will be provided by Lockheed at no cost to operators. Based on these figures, the total cost impact of the AD on those U.S. operators who accomplish the optional terminating action is estimated to be $1,160 per airplane.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on "a substantial number of small entities, under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. Section 39.13 is amended by amending Amendment 39–5923 (53 FR 17017; May 13, 1988), AD 88–07–51, as follows:

Lockheed Aeronautical Systems Company: Applies to Model L–1011–385–1, L–1011–385–1–14, L–1011–385–1–15, and L–1011–385–3 series airplanes, as listed in Lockheed TriStar L–1011 Service Bulletin 093–29–A088, dated April 14, 1988, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent a fire from a failed AC electrical motor-driven hydraulic pump electrical connector, in combination with leaking hydraulic fluid from the failed electro-hydraulic component, accomplish the following:

A. Within 100 flight hours after June 3, 1988 (which is the effective date of Amendment 39–5923), accomplish the following:

1. On the Flight Engineer/Second Officer's (FE/SO) overhead CB panel CB2, open and collar circuit breakers L12 "AC Pump B3" and L22 "AC Pump C3", using PACO plastic ring P/N S–4933959–503 or equivalent.

2. As a verification that power has been removed from affected pumps, on the FE/SO hydraulic system control panel, cycle the AC pumps switch lights and verify that the "ON" legends do not illuminate.

B. Accomplishment of the requirements of paragraph A., above, in accordance with Lockheed TriStar L–1011 Alert Service Bulletin 093–29–A088, dated April 14, 1988, is considered an acceptable means of compliance with this AD.

C. Installation of a AC Hydraulic Pump Magnetic Circuit Breaker Panel (MCBP) in the Mid-Electrical Service Center (MESC) and associated aircraft wiring, in accordance with Lockheed TriStar L–1011 Service Bulletin 093–29–088, Revision 1, dated March 7, 1989, constitutes terminating action for the requirements of paragraph A., above. The hydraulic pumps may then be reactivated by removing the circuit breaker collars installed in accordance with paragraph A.1., above, and closing the circuit breakers.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: This request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Lockheed Aeronautical Systems Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Order Administration, Department 65–33, Unit 20, Plant A–1. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

This amendment amends Amendment 39–5923, AD 88–07–51.

This amendment becomes effective October 2, 1989.

Issued in Seattle, Washington, on August 15, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

ACTION: Final rule.

SUMMARY: The Indian Financing Act Amendments of 1984 amended the Indian Financing Act of 1974 by removing a restriction precluding individual Indians who are members of tribes having credit programs from receiving direct loans or loan guarantees from the Bureau of Indian Affairs; allowing the Secretary to cancel loan payment obligations without Congressional approval; authorizing annual appropriations to cover losses on guaranteed or insured loans, and making interest payments on such loans. These legislative amendments are the basis for amending subchapter G, parts 101 and 103, of the Code of Federal Regulations.

EFFECTIVE DATE: September 22, 1989.

FOR FURTHER INFORMATION CONTACT: Richard Nephew, Division of Financial Assistance, Bureau of Indian Affairs, telephone (202) 343–5324.

SUPPLEMENTARY INFORMATION: These amendments are published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8. The policy of the Department of the Interior is, whenever practical, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons were given the opportunity to submit written comments regarding the proposed rule as they were published April 11, 1989, at 54 FR 14361.

One letter was received commenting that the 1988 amendments to the Indian Financing Act should be incorporated in the amendments to the Code of Federal Regulations. These 1988 amendments include authority to guarantee bonds, an increase in the maximum loan guaranty for individuals, and bonuses to Federal contractors who subcontract with Indian business enterprises. The proposed rulemaking for these regulations although published after the 1988 amendments became effective was prepared before their enactment and consequently reflects only the 1984 amendments to the Indian Financing Act. Consequently, except for amending § 103.13 in the final rule to reflect that the statutory limit for loan guarantees for individual Indians has been raised to $500,000 by the 1988 amendments, other changes in the regulations authorized by the 1988 amendments must await future proposed rulemaking.

This final rule reflects changes in the Indian Financing Act of 1974 which expand financing opportunities to individual Indians for participation in the development of Indian economies.

Prior to the passage of the Indian Financing Act Amendments of 1984, individual Indians who were members of tribes having relending programs were ineligible to receive guaranteed or direct loans from the Bureau. Guaranteed loans to other eligible individuals were limited by the Act to $100,000, and direct loans were administratively held to the same level. Since the limit for a guaranteed loan to an individual has been raised to $500,000 and eligibility expanded, use of the program is expected to increase. Direct loans to individuals are not limited by the Act or its Amendments and those are being set at a $350,000 limit in the rule. The minimum limit of $10,000 on guaranteed loans, along with the minimum time limit of one year, were removed because they are unnecessary.

The 1984 legislative amendments removed the Leavitt Act (47 Stat. 564, 25 U.S.C. 386a) restriction on reporting cancellations to Congress before they became effective. This allows cancellations to be considered at any time and eliminates the waiting period after the Secretary has signed the cancellation order.

Another change adds the 1984 amendment requirement that all guaranteed loans shall be reviewed by the Bureau, independent of the lending institution.

The rule also provides that loans with variable interest rates may be guaranteed.

The Department of the Interior has determined that this document is not a major action under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). It is estimated the program regulated by this part will have no more than a $50 million gross annual effect on the national economy. It is then, by definition at 318 DM 5, not a major action. Since this document does not constitute a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969, no environmental assessments were made.

The collections of information contained in this rule have been approved by the Office of Management and Budget as required by 44 U.S.C. 3501 *et seq.* The clearance number assigned is 1076–0020.

Public reporting burden for this collection of information is estimated to vary from 15 minutes to 3 hours per response, with an average of one hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Information Collection Clearance Officer, Bureau of Indian Affairs, Mailstop 337–SIB, 18th and C Streets NW., Washington, DC 20240; and the Paperwork Reduction Project (1076–0020), Office of Management and Budget, Washington, DC 20503.

The primary authors of this document are Richard K. Nephew and Woodrow Sneed, Division of Financial Assistance, Bureau of Indian Affairs, telephone number (202) 343–5324.

List of Subjects

25 CFR Part 101

Indians—business and finance, Loan programs—Indians, Reporting and recordkeeping requirements.

25 CFR Part 103

Indians—business and finance, Loan programs—business, Loan programs—Indians.

For the reasons set out in the preamble, parts 101 and 103 of title 25, chapter I of the Federal Regulations are amended as set forth below.

PART 101—[AMENDED]

1. The authority citation for part 101 is revised to read as follows:

Authority: 25 U.S.C. 1469.

2. Section 101.2 is amended by revising the introductory text of paragraph (b) to read as follows:

§ 101.2 Kinds of loans.

* * * * *

(b) Direct loans may be made by the United States to eligible tribes, tribal organizations or corporations and tribal cooperative associations without fund restrictions. Direct loans to individual Indians, partnerships, and other non-tribal organizations shall not exceed $350,000. Direct loans from the United States shall be made for the following purposes:

* * * * *

3. Section 101.3 is amended by revising paragraph (a) to read as follows.

§ 101.3 Eligible borrowers under United States direct loan program.

(a) Loans may be made from the revolving loan fund to Indians, eligible tribes and relending organizations, and corporations, cooperative associations and partnerships having a form of organization satisfactory to the Commissioner. Loans may be made to applicants only when, in the judgment of the Commissioner, there is a reasonable prospect of repayment. Loans may be made only to an applicant who, in the opinion of the Commissioner, is unable to obtain financing on reasonable terms and conditions from other sources such as tribal relending programs, banks, Farmers Home Administration, Small Business Administration, Production Credit Associations, or Federal Land Banks, and is also unable to obtain a guaranteed or insured loan pursuant to title II of the Indian Financing Act of 1974 (88 Stat. 77).

* * * * *

4. Section 101.7 is amended by revising the first sentence to read as follows:

§ 101.7 Management and technical assistance.

Prior to and concurrent with the approval of a United States direct loan to finance an economic enterprise, the Commissioner will assure under title V of the Indian Financing Act of 1974 that competent management and technical assistance is available to the loan applicant for preparation of the application and/or administration of funds loaned consistent with the nature of the enterprise proposed to be or in fact funded by the loan. * * *

5. Section 101.17 is revised to read as follows:

§ 101.17 Uncollectable loans made by the United States.

If the Secretary determines that a United States direct loan is uncollectable in whole or in part or is collectable only at an unreasonable cost, or when such action would be in the best interest of the United States, the Secretary may cancel, adjust, compromise, or reduce the amount of any loan made from the revolving loan fund. The Commissioner may adjust, compromise, subordinate, or modify the terms of any mortgage, lease, assignment, contract, agreement, or other document taken as security for loans. The cancellation of all or part of a loan shall become effective when signed by the Secretary.

6. A new § 101.26 is added to read as follows:

§ 101.26 Information collection.

(a) The collections of information contained in §§ 101.3, 101.4, 101.12, and 101.25 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1076–0020. The information will be used to rate applicants in accordance with the terms and conditions set forth in section 103 of the Indian Financing Act, as amended. Response is required to obtain a benefit in accordance with 25 U.S.C. 1451.

(b) Public reporting burden for this information is estimated to vary from 15 minutes to 3 hours per response, with an average of one hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspects of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer, Bureau of Indian Affairs, Mailstop 337–SIB, 18th and C Streets NW., Washington, DC 20240; and the Paperwork Reduction Project (1076–0020), Office of Management and Budget, Washington, DC 20503.

PART 103—[AMENDED]

7. The authority citation for part 103 is revised to read as follows:

Authority: 25 U.S.C. 1498.

8. Section 103.4 is amended by revising the first sentence in paragraph (a) to read as follows:

§ 103.4 Management and technical assistance.

(a) Prior to and concurrent with the issuance of a guaranty certificate for a loan to finance an economic enterprise, the Commissioner will assure under title V of the Indian Financing Act that competent management and technical assistance are available for preparation of the application and/or administration of funds granted consistent with the nature of the enterprise proposed to be or that is in fact funded. * * *

* * * * *

9. Section 103.8 is revised to read as follows:

§ 103.8 Eligible individuals.

Indians who are members of tribes recognized by the federal government as eligible for services from the Bureau of Indian Affairs are eligible for guaranteed or insured loans. Individuals applying for a guaranteed or insured loan to purchase, establish or operate an economic enterprise on a reservation must comply with the requirements of applicable rules, resolutions or ordinances enacted by the governing body of the tribe.

10. Section 103.13 is amended by revising paragrpah (a) to read as follows:

§ 103.13 Amount of guaranty.

(a) The percentage of a loan that is guaranteed shall be the minimum necessary to obtain financing for an applicant, but may not exceed 90 percent of the unpaid principal and interest. The liability under the guaranty shall increase or decrease pro rata with any increase of decrease in the unpaid portion of the principal amount of the obligation. No loan to an individual Indian may be guaranteed for an unpaid principal amount in excess of $500,000.

* * * * *

11. A new § 103.55 is added to read as follows:

§ 103.55 Information collection.

(a) The collection of information contained in § 103.15 has been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1076–0020. The information will be used to rate applicant in accordance with the terms and conditions set forth in §§ 103.4, 103.9, 103.15, 103.36, 103.37, 103.42, 103.43, and 103.52 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* information will be issued to rate applicants in accordance with the terms and conditions set forth in section 103 of the Indian Financing Act, as amended. Response is required to obtain a benefit in accordance with 25 U.S.C. 1451.

(b) Public reporting burden for this information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspects of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer, Bureau of Indian Affairs, Mailstop 337–SIB, 18th and C Streets NW., Washington, DC 20240; and the Paperwork Reduction Project (1076–0020), Office of Management and Budget, Washington, DC 20503.

12. Section 103.15, Application for loans, is amended by removing the last sentence in paragraph (b)(2) and by adding a new paragraph (c) to read as follows:

§ 103.15 [Amended]

* * * * *

(c) The Commissioner will review applications for guaranteed loans individually and independently for the lending institution.

13. Section 103.39 is revised to read as follows:

§ 103.39 Cancellation.

The Secretary may cancel the uncollectable portion of any obligation assigned to the United States or rights to which the United States is subrogated and the security assigned to the United States.

14. Section 103.41 is amended by revising the next to the last sentence to read as follows:

§ 103.41 Interest.

* * * Once a loan is closed the interest rate may not be increased except when a variable interest rate tied to a specified base rate agreed upon by the borrower and the lender has been approved by the Commissioner. * * *

Walter R. Mills,

Acting Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

DEPARTMENT OF THE TREASURY

31 CFR Part 103

Bank Secrecy Act; Geographic Targeting of Certain Domestic Currency Transactions; Correction

AGENCY: Departmental Offices, Treasury.

ACTION: Final rule, correction.

SUMMARY: A final rule was published on August 16, 1989, at 54 FR 33675, amending the Bank Secrecy Act regulations in 31 CFR part 103 relating to the geographic targeting of certain domestic currency transactions. This document corrects two minor errors in the amendatory language.

FOR FURTHER INFORMATION CONTACT: Kathleen A. Scott, Office of the Assistant General Counsel (Enforcement), (202) 566-8947.

SUPPLEMENTARY INFORMATION: A final rule was published on August 16, 1989, at 54 FR 33675, amending the Bank Secrecy Act regulations in 31 CFR part 103 relating to the geographic targeting of certain domestic currency transactions. In that document, three amendments were made, one adding a new § 103.26 describing the procedures used in issuing such orders, and two others amending the present recordkeeping requirements in 31 CFR 103.33 and 103.38. In the amendatory language concerning the latter two amendments, the phrase "It is proposed to amend" is used instead of the proper amendatory language indicating that the sections were in fact being amended by the document.

Correction

On page 33679 of the August 16, 1989, **Federal Register**, amendment to the regulation section, the amendatory language of paragraph #3 should read "§ 103.33 is amended to add at the end a new paragraph (d) to read as follows:". On the same page, the amendatory language of paragraph #4 should read as follows: "Section 103.38 is amended by adding in paragraph (d), after the first sentence, a new sentence to read as follows:".

Dated: August 17, 1989.

Salvatore R. Martoche,

Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Judge Advocate General of the Navy has determined that USS COMSTOCK (LSD-45) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special functions as a naval dock landing ship. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: August 9, 1989.

FOR FURTHER INFORMATION CONTACT: Captain P.C. Turner, JAGC, U.S. Navy Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332-2400. Telephone number; (202) 325-9744.

SUPPLEMENTARY INFORMATION:

Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR part 706. This amendment provides notice that the Judge Advocate General of the Navy, under authority delegated by the Secretary of the Navy, has certified that USS COMSTOCK (LSD-45) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS, Annex I, section 3(a), pertaining to the placement of the after masthead light and the horizontal distance between the forward and after masthead lights, without interfering with its special functions as a Navy ship. The Judge Advocate General the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this ship in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (Water), and vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR part 706 is amended as follows:

1. The authority citation for 32 CFR part 706 continues to read:

Authority: 33 U.S.C. 1605.

2. Table Five of § 706.2 is amended by adding the following vessel:

Vessel	Number	Foward masthead light less than the required height above hull. Annex I, sec. 2(a)(i)	Aft masthead light less than 4.5 meters above forward masthead light. Annex I, sec. 2(a)(ii)	Masthead lights not over all other lights and obstructions. Annex I, sec. 2(f)	Vertical separation of masthead lights used when towing less than required by Annex I, sec. 2(a)(i)	Aft masthead lights not visible over forward light 1,000 meters ahead of ship in all normal degrees of trim. Annex I, sec. 2(b)	Forward masthead light not in forward quarter of ship. Annex I, sec. 3(a)	After masthead light less than ½ ship's length aft of forward masthead Annex I, sec. (3)(a)	Percentage horizontal separation attained
USS COMSTOCK	LSD-45							×	64

Dated: August 9, 1989.

Approved:

J.E. Gordon,

Rear Admiral, JAGC, U.S. Navy Acting Judge Advocate General.

BILLING CODE 3810-AE-M

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1190

Minimum Guidelines and Requirements for Accessible Design; Correction

AGENCY: United States Architectural and Transportation Barriers Compliance Board (ATBCB).

ACTION: Final rule; correction.

SUMMARY: On February 3, 1989, at 54 FR 5434, the Architectural and Transportation Barriers Compliance Board amended its Minimum Guidelines and Requirements for Accessible Design (MGRAD). This document corrects technical errors appearing in that document.

FOR FURTHER INFORMATION CONTACT: Ruth Lusher, Acting Director of Office of Technical and Information Services, Architectural and Transportation Barriers Compliance Board, 1111 18th Street NW., Suite 501, Washington, DC 20036; (202) 653-7834 (voice or TDD).

SUPPLEMENTARY INFORMATION: In rule document 89-2435 beginning on page 5434, in the issue of Friday, February 3, 1989, make the following corrections:

PART 1190—[CORRECTED]

§ 1190.31 [Corrected]

1. On page 5445, in the first column, in amendatory instruction "h.", in the second line, the reference to "Section 1190.100, Platform lifts" should read "Section 1190.110, Platform lifts".

2. On page 5446, in the first column, amendatory instruction "u." was incomplete and should read as follows:

u. Section 1190.31(t) is amended by removing "Section 1190.240, Storage" and "Section 1190.240" wherever each appears and inserting in lieu thereof "ANSI A117.1-1986, section 4.23, Storage. (Incorporated by reference, see 1190.31(a).)"

Dated: August 16, 1989.

James J. Raggio,

Acting Executive Director, Architectural and Transportation Barriers Compliance Board.

[FR Doc. 89-19866 Filed 8-22-89; 8:45 am]

BILLING CODE 6820-BP-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Chapter I

Nomenclature Changes; Technical Amendments

AGENCY: Department of Veterans Affairs.

ACTION: Final technical amendments.

SUMMARY: The Department of Veterans Affairs Act established the Veterans Administration as the Department of Veterans Affairs, an executive-level Department, (see 54 FR 10476). The Department of Veterans Affairs (VA) is making technical amendments to title 38, Code of Federal Regulations, chapter I, to bring its nomenclature into conformance with the changes required by the Act.

EFFECTIVE DATE: These final amendments are retroactively effective to March 15, 1989, the effective date of VA becoming the Department of Veterans Affairs.

FOR FURTHER INFORMATION CONTACT: Lynn H. Covington, Director, Paperwork Management and Regulations Service (73), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233-3616.

SUPPLEMENTARY INFORMATION: VA is updating 38 CFR chapter I nomenclature to conform to the Department of Veterans Affairs, Act, Pub. L. 100-527. However, the Department's reorganization under Public Law 100-527 is not yet totally finalized. Any further changes requiring amendment of 38 CFR chapter I will be published at a later date. Those changes will primarily reflect new titles for personnel responsible for certain functions which appear in 38 CFR. At this time, VA is also taking the opportunity to remove any gender-specific language remaining in 38 CFR as required by 38 CFR 1.13, and is making certain that terms used by the Department are consistent throughout 38 CFR to avoid any confusion. For example, the terms field facility and field station have been used interchangeably in 38 CFR; the term field facility is now used throughout the title.

VA finds that good cause exists for making these amendments final without previous publication of a notice of proposed rulemaking, and for making them retroactively effective to the date of the establishment of the Department of Veterans Affairs, March 15, 1989. All the changes contained in these regulations are technical ones designed to correct erroneous references and eliminate sexually biased language. There are no substantive changes. Public participation in this rulemaking is therefore unnecessary (38 CFR 1.12).

Since a notice of proposed rulemaking is unnecessary and will not be published, these final amendments do not come within the term "rule" as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2), and are therefore not subject to the requirements of the Act. These amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612.

These final regulatory amendments do not contain a major rule as that term is defined by Executive Order 12291, Federal Regulation. The final regulatory amendments will not have a $100 million annual effect on the economy, and will not cause a major increase in costs and prices for anyone. They will have no significant adverse effects on competition employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete in domestic or foreign-based markets.

These final regulatory amendments do not impose any additional reporting or recordkeeping requirements on the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

These amendments are promulgated under the authority granted the Secretary of Veterans Affairs by 38 U.S.C. 210(c).

Approved: August 15, 1989.

Edward J. Derwinski,

Secretary of Veterans Affairs.

38. CFR chapter I, Pensions, Bonuses, and Veterans' Relief, is amended as follows:

38 CFR CHAPTER I—[AMENDED]

1. In 38 CFR chapter I remove the words "Veterans Administration" and "Veterans' Administration" and add, in their place, the words "Department of Veterans Affairs" everywhere they appear.

2. In 38 CFR chapter I remove the words "Department of Medicine and Surgery" and add, in their place, the words "Veterans Health Services and Research Administration" everywhere they appear.

3. In 38 CFR chapter I remove the words "Department of Veterans Benefits" and add, in their place, the words "Veterans Benefits Administration" everywhere they appear.

4. In 38 CFR chapter I remove the words "Department of Memorial Affairs" and add, in their place, the words "National Cemetery System" everywhever they appear.

5. In 38 CFR chapter I remove the acronyms "DM&S", "DVB", and "DMA" and add, in their place, the acronyms "VHS&RA", "VBA", and '"NCS" respectively everywhere they appear.

6. In 38 CFR Chapter I remove the words "Administrator" and "Adminisrator's" and add, in their place, the words "Secretary" and "Secretary's" respectively everywhere they appear.

7. In 38 CFR Chapter I remove the words "Administrator of Veterans' Affairs" and add, in their place, the words "Secretary of Veterans Affairs" everywhere they appear.

8. In 38 CFR Chapter I remove the words "Deputy Administrator" and "Deputy Administrator's" and add, in their place, the words "Deputy Secretary" and "Deputy Secretary's" respectively everywhere they appear.

9. In 38 CFR Chapter I remove the words "Chief Memorial Affairs Director" and add, in their place, the words "Director, National Cemetery System" everywhere they appear.

In addition to the amendments set forth above, 38 CFR Chapter I is further amended as follows:

PART 0—[AMENDED]

1. §§ 0.735–10, 0.735–11, 0.735–21, 0.735–51, 0.735–52, 0.735–53, 0.735–54, and 0.735.56 remove the word "himself" and add in its place, the words "himself or herself" in the following places:

(a) Section 0.735–10(a);
(b) Section 0.735–11(a) introductory text and (c);
(c) Section 0.735–21(f);
(d) Section 0.735–51;
(e) Section 0.735–52(a);
(f) Section 0.735–53;
(g) Section 0.735–54; and
(h) Section 0.735–56.

2. In §§ 0.735–10, 0.735–11, 0.735–12, 0.735–13, 0.735–19, 0.735–20, 0.735–21, 0.735–23, 0.735–51, 0.735–52, 0.735–53, 0.735–54, 0.735–55, 0.735–56, 0.735–57, 0.735–71, 0.735–82, 0.735–83, 0.735–84, and 0.735–85, remove the word "his" and add, in its place, the words "his or her" in the following places:

(a) Section 0.735–19(d);
(b) Section 0.735–11(a) introductory text, (a)(3), (b)(1), and (f);
(c) Section 0.735–12(a) introductory text, (a)(2) and (a)(6);
(d) Section 0.735–13(c);
(e) Section 0.735–19(a);
(f) Section 0.735–20(e)(1), (e)(3), and (g);
(g) Section 0.735–21(c) and (d)(2);
(h) Section 0.735–23(b) (14)(iii);
(i) Section 0.735–51;
(j) Section 0.735–52(a);
(k) Section 0.735–53;
(l) Section 0.735–54;
(m) Section 0.735–55(a), (b), (c)(3), (d); and (e)(2);
(n) Section 0.735–56;
(o) Section 0.735–57;
(p) Section 0.735–71;
(q) Section 0.735–82(b);
(r) Section 0.735–83;
(s) Section 0.735–84; and
(t) Section 0.735–85(d) and (e).

3. In §§ 0.735–10, 0.735–16, 0.735–20, 0.735–21, 0.735–51, 0.735–52, 0.735–53, 0.735–54, 0.735–55, 0.735–83, and 0.735–85 remove the word "he" and add, in its place, the words "he or she" in the following places:

(a) Section 0.735–10(d);
(b) Section 0.735–16(c);
(c) Section 0.735–20(g);
(d) Section 0.735–21(e)(2) and (f);
(e) Section 0.735–51;
(f) Section 0.735–52(a);
(g) Section 0.735–53;
(h) Section 0.735–54;
(i) Section 0.735–55(a), (b), (c)(3), (e) introductory text and (e)(1);
(j) Section 0.735–83; and
(k) Section 0.735–85(d) introductory text.

§§ 0.735–84 and 0.735–85 [Amended]

4. In §§ 0.735–84 and 0.735–85(d) introductory text remove the word "him" and add, in its place, the words "him or her".

5. In §§ 0.735–4(c), 0.735–19(a), 0.735–73(e), and 0.735–75 introductory text remove the word "station" or "stations" and add, in its place, the word "facility" or "facilities."

§§ 0.735–21 and 0.735–75 [Amended]

6. In §§ 0.735–21(m)(2) and 0.735–75 introductory text remove the word "Station" and add, in its place, the word "Facility".

(e) Section 12.5(a);
(f) Section 12.6(a) (1), (2) and (3);
(g) Section 12.8 (a) and (b);
(h) Section 12.9 (a), (c), (d), (e), and (i);
(i) Section 12.12;
(j) Section 12.16(b);
(k) Section 12.17(a);
(l) Section 12.19 (a) and (b); and
(m) Section 12.21.

6. In §§ 12.1(a), 12.2(a), 12.3(a)(1), 12.3(a)(5), 12.4(a) undesignated flush paragraph, 12.6(a)(3), 12.9(a), and 12.16(b) remove the word "he" and add, in its place, the words "he or she".

§ 12.1 [Amended]

7. In § 12.1(a) remove the word "He" and add, in its place, the words "He or she".

§ 12.2 [Amended]

8. In § 12.2(a) remove the word "himself" and add, in its place, the words "himself or herself".

9. In §§ 12.4(c), 12.9(a), 12.10, and 12.16(b) remove the word "him" and add, in its place, the words "him or her".

§ 12.9 [Amended]

10. In § 12.9(a) remove the words "the VA" and add, in their place, the word "VA".

PART 13—[AMENDED]

1. In §§ 13.1, 13.2(a), 13.3 remove the word "station" and add, in its place, the word "facility".

2. In §§ 13.64, 13.71(b), 13.102(a), and 13.108 remove the words "the VA" and add, in their place, the word "VA".

§ 13.109 [Amended]

3. In § 13.109(d)(7) remove the word "title" and add, in its place, the word "chapter".

PART 14—[AMENDED]

1. Section 14.502 is revised to read as follows:

§ 14.502 Requests for legal opinions from Central Office.

Requests for formal legal advice, including interpretation of law or regulations, shall be made only by the Secretary, the Deputy Secretary, the Assistant Secretaries, the Deputy Assistant Secretaries, and the administration head or top staff office official having jurisdiction over the particular subject matter, or by a subordinate acting for any such official.

§§ 14.501 and 14.503 [Amended]

2. In §§ 14.501(e) and 14.503(b) remove the word "department" and add, in its place, the word "administration".

§ 14.503 [Amended]

3. In § 14.503(b) remove the word "benfefits" and add, in its place, the word "benefits".

4. In §§ 14.514(b), 14.515 footnote number 1, 14.518(a), 14.561, 14.605(a) (1) through (4), and 14.632 remove the word "station" and add, in its place, the word "facility".

§ 14.515 [Amended]

5. In § 14.515(c)(1) remove the word "administrator" and add, in its place, the word "Secretary".

§ 14.560 [Amended]

6. In §14.560(b) remove the words "the VA" and add, in their place, the word "VA".

§ 14.600 [Amended]

7. In § 14.600(b)(3) remove the word "withoiut" and add, in its place, the word "without".

§ 14.603 [Amended]

8. In §14.603(a)(5) remove the word "presentd" and add, in its place, the word "presented".

§ 14.605 [Amended]

9. In § 14.605(a)(3) removed the word "stations" and add, in its place the word "facilities".

10. In §§ 14.607(b), 14.606 (a) and (b), and 14.609, remove the word "agency" and add, in its place, the word "Department".

PART 15—[AMENDED]

Section 15.170(c) is revised to read as follows:

§ 15.170 Compliance procedures.

* * * * *

(c) The Deputy Assistant Secretary for Equal Employment Opportunity shall be responsible for coordinating implementation of this section. Complaints may be sent to the Secretary of Veterans Affairs or the Deputy Assistant Secretary for Equal Employment Opportunity at the following address: Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420.

PART 17—[AMENDED]

(74) Section 21.7042(d)(2) introductory text;
(75) Section 21.7050(c);
(76) Section 21.7051 (a) and (a)(2);
(77) Section 21.7072(c)(5) introductory text;
(78) Section 21.7076 (a) introductory text, (b)(1) introductory text, (b)(2) introductory text, (c) introductory text, and (d) introductory text;
(79) Section 21.7100(d);
(80) Section 21.7103;
(81) Section 21.7110(b) introductory text;
(82) Section 21.7120 (b) (1) and (2), and (c);
(83) Section 21.7122 (a), (b), (c), and (e) introductory text;
(84) Section 21.7124;
(85) Section 21.7130;
(86) Section 21.7131 (e)(1)(i) (A) and (B), and (e)(1)(ii) (A) and (B);

(87) Section 21.7133;
(88) Section 21.7137 (e) and (f);
(89) Section 21.7139 (b) introductory text, (e)(1), (f)(1) introductory text, and (g);
(90) Section 21.7140 (a)(1) introductory text, (a)(1) (ii) and (iii), and (d);
(91) Section 21.7153 (a) and (c)(1)(ii);
(92) Section 21.7158 (a) and (b)(1);
(93) Section 21.7220(a)(1)(iii);
(94) Section 21.7520(b)(19)(ii);
(95) Section 21.7530(b);
(96) Section 21.7532 (b) and (c);
(97) Section 21.7551 (a) introductory text, (a)(2) and (c) introductory text;
(98) Section 21.7576 (a), (b)(1) introductory text, (b)(2) introductory text, (c) introductory text, and (d);
(99) Section 21.7600(d);
(100) Section 21.7603;
(101) Section 21.7610(b) introductory text;
(102) Section 21.7620 (b), (c) introductory text, (d)(1) and (d)(2) introductory text;
(103) Section 21.7622 (a), (b), (c), and (d);
(104) Section 21.7624(a);
(105) Section 21.7630;
(106) Section 21.7633;
(107) Section 21.7635(d)(1) (i) and (ii), (d)(2) (i) and (ii);
(108) Section 21.7636(b)(3);
(109) Section 21.7639(b) introductory text and (d)(1) introductory text;
(110) Section 21.7640(a) introductory text, (c)(1), (d) introductory text, (d)(2) introductory text, (d)(4), (d)(6) introductory text, (e), and (f);
(111) Section 21.7653(d)(1)(ii);
(112) Section 21.7658(a), (b)(1) introductory text, and (b)(2);
(113) Section 21.7670(b)(1) introductory text, (c)(1) introductory text, (d)(1) (ii) and (iii), (d)(2) (i) and (ii), and (e) (1) through (4);
(114) Section 21.7672(a) introductory text; and
(115) Section 21.7700 introductory text;
(116) Section 21.7720(a)(1)(iii)

6. In §§ 21.74(c)(3); 21.98 (c) and (d); 21.100(a) introductory text, 21.162(a)(2) and (b) introductory text; 21.258(e); 21.3303(a); 21.4232(d), 21.4250(c)(1); and 21.6050(e) remove the words "Vocational Rehabilitation and Counseling Service" where they appear and add, in their place, the words "Vocational Rehabilitation and Education Service".

7. In §§ 21.100(d), 21.222(c)(3), 21.256(d), 21.258(c)(1) and (e), 21.292(e), 21.382(a) introductory text, 21.390(c), 21.430(c)(4), 21.6050(e), remove the acronym "VR&C" and add, in its place, the acronym "VR&E".

8. In §§ 21.4001 (a), (b), and (c) introductory text; 21.4005(c) (1) and (2); 21.4153(b), (c)(2)(iii) and (c)(4)(ii), and (f); 21.4203(b)(1)(i) (A) and (B); 21.4206 (a) and (b); 21.4205(c)(2)(iv)(A) and (B); 21.4250(c)(2); 21.4251(a)(6)(iv)(B), (f)(1), (g) introductory text and (g)(4); 21.4255 (b)(2), 21.4500(d)(2)(ii); 21.4622(a)(1) introductory text; 21.5901(a); 21.7140(b)(2) (i) and (ii); and 21.7301(a) remove the words "Education Service" and add, in their place, the words "Vocational Rehabilitation and Education Service".

9. In §§ 21.272(f); 21.372(a) and (b)(1)(i); 21.4135(j) (1) and (2), (k) (1) and (2); 21.4137(g)(2)(v); 21.4145(f) and (g)(1) introductory text; 21.4146(f); 21.4153(f) introductory text; 21.4201(c)(4)(ii); 21.4202(b)(8)(ii); 21.4203(b)(1)(i) and (b)(1)(i)(B); 21.4205(c)(2)(iv) introductory text, (iv)(B) and (c)(2); 21.4207(a)(2) introductory text and (a)(4), (e)(1), and (e)(2) (i) through (iii); 21.4255(b)(1) introductory text and (b)(2); 21.4500(d)(2)(i) introductory text, (d)(2)(i)(H), (d)(2) (ii) and (iii); 21.4622(a)(2), (b) introductory text, (b)(1)(iv), (b)(2) introductory text, (b)(3) and (c); 21.4624(a) introductory text and (b) introductory text; 21.7135(i)(1) and (2), (j)(1), and (k) (1) and (2); 21.7139(a)(4)(iv); 21.7140(b)(2) introductory text and (b)(2)(ii); and 21.7302(a) introductory text remove the words "station" or "field station" respectively and add, in their place the word "facility".

§ 21.180 [Amended]

10. In § 21.180(c) remove the phrase "VHS&RA (Veterans Health Services and Research Administration)" and add, in its place, the phrase "Veterans Health Services and Research Administration (VHS&RA)".

§ 21.4150 [Amended]

11. In § 21.4150(c) remove the word "approvin$" and add, in its place, the word "approving".

12. In § 21.4301(a) introductory text, (a)(2) introductory text, (a)(2)(iii), concluding paragraph to (a), (b), (c), and (d), 21.4304, and 21.4305, remove the words "Department of Health, Education, and Welfare" wherever they appear and add, in their place, the words "Department of Health and Human Services".

§ 21.4302 [Amended]

13. In § 21.4302 remove the word "his" in front of the word "designee".

§ 21.4306 [Amended]

14. In § 21.4306(b) remove the word "his" and add, in its place, the words "his or her".

§ 21.7137 [Amended]

15. In § 21.7137(a) table, footnote 1, remove the words "§ 21.713b" and add, in their place, the words "21.7135b".

PART 26—[AMENDED]

1. The title of part 26 is revised to read as follows:

PART 26—ENVIRONMENTAL EFFECTS OF THE DEPARTMENT OF VETERANS AFFAIRS (VA) ACTIONS

§§ 26.1 and 26.4 [Amended]

2. In § 26.1, § 26.4(b)(3), remove the word "agency" and add, in its place, the word "Department".

§ 26.21 [Amended]

3. In § 26.2 remove the word "departments" and add, in its place, the word "administrations".

4. In §§ 26.2, 26.4(a) introductory text, § 26.7(c), § 26.5(a)(4), § 26.8 (c), (d) and (e) remove the words "the VA" and add, in their place, the word "VA".

§§ 26.4 and 26.5 [Amended]

5. In § 26.4(a) and § 26.5(b) remove the words "The VA" and add, in their place, the word "VA".

6. In § 26.5(a)(3), § 26.7(b)(5), and § 26.9(c), remove the word "Secretary" and add, in its place the words "Secretary of Veterans Affairs".

7. Section 26.3(b) is revised to read as follows:

§ 26.3 Definitions.

* * * * *

(b) *VA elements*, for the purposes of this part, means the Veterans Health Services and Research Administration (VHS&RA), the Veterans Benefits Administration (VBA), the National Cemetery System (NCS), and the Office of Facilities.

* * * * *

8. In § 26.6, paragraphs (b)(1) introductory text, (b)(2) introductory text, (b)(3) introductory text, (c)(1) introductory text and (c)(2) introductory text are revised to read as follows:

§ 26.6 Environmental documents.

* * * * *

(b) * * *

(1) Typical classes of action which normally do not require either an Environmental Impact Statement or an Environmental Assessment: * * *

(2) Specific criteria for typical classes of action which normally do not require either an Environmental Impact Statement or an Environmental Assessment: * * *

(3) Extraordinary circumstances that must be considered by a VA element

before categorically excluding a particular Department action: * * *

(c) * * *

(1) Typical classes of action which normally do require Environmental Assessments, but not necessarily Environmental Impact Statements:

* * *

(2) Specific criteria for typical classes of action which normally do require an Environmental Assessment:

* * * * *

PART 36—[AMENDED]

1. In part 36 remove the citation "38 U.S.C. 1819" or the numbers "1819" wherever they appear, and add the citation "38 U.S.C. 1812" or the numbers "1812" in their respective places.

2. In part 36 remove the citation "38 U.S.C. 1816" or the numbers "1816" wherever they appear, and add the citation "38 U.S.C. 1832" or numbers "1832" in their respective places.

3. In § 36.4202(g), 36.4216(a)(1), 36.4301 in the definition "Lender" and "Manufactured home," 36.4306(g)(5), 36.4311(a)(2) and (b), 36.4331(a), remove the words "the VA" and add, in their place, the word "VA".

§ 36.4204 [Amended]

4. In § 36.4204(a)(7) remove the phrase "(1) through (6) of this paragraph" and add, in its place, the phrase "(a)(1) through (6) of this section".

§ 36.4204 [Amended]

5. In § 36.4204(d)(7)(iii)(D) remove the phrase "(7) of this paragraph" and add, in its place, the phrase "(d)(7) of this section".

6. Section 36.4301 is amended as follows:

a. Remove the numbers "1818" in the definition "A period of more than 180 days" and add, in their place, the phrase "1802(a)(2)(C)".

b. Remove the definition "Administrator" and add in alphabetical order the definition "Secretary" to read as follows:

§ 36.4301 Definitions.

* * * * *

Secretary. The Secretary of Veterans Affairs, or any employee of the Department of Veterans Affairs authorized to act in the Secretary's stead.

* * * * *

c. Remove the phrase "1815(a)" in the paragraph (5)(iii) under the definition "Full disbursement" and add, in its place, the phrase "1803(a)(2)".

d. Remove the numbers "1815" in the definition "Insurance" and add, in their place, the phrase "1803(a)(2)".

§ 36.4303 [Amended]

7. In § 36.4303(f) remove the word "be" in the first sentence and add, in its place, the word "by".

§ 36.4323 [Amended]

8. In § 36.4323(f) remove the numbers "1817" and add, in their place, the numbers "1813".

9. In § 36.4323(g) introductory text, remove the phrase "1817(a)" and add, in its place, the numbers "1813".

§§ 36.4342 and 36.4520 [Amended]

10. In §§ 36.4342(c)(1) and 36.4520(c) remove the phrase "1815(b)" and add, in its place the phrase "1803(a)(2)".

PART 39—[AMENDED]

1. In §§ 39.3 (b)(4), (b)(13) and 39.8(f) introductory text remove the words "the VA" and add, in their place, the word "VA".

§ 39.3 [Amended]

2. In § 39.3(b)(10) remove the words "Office of Construction" and add, in their place, the words "Office of Facilities".

§ 39.3 [Amended]

3. In § 39.3(b)(13) remove the word "agency" and add, in its place, the word "Department".

§ 39.5 [Amended]

4. In § 39.5(c) remove the words "The VA" and add, in their place, the word "VA".

§ 39.8 [Amended]

5. In § 39.8(a)(3) remove the phrase "VA (Department of Veterans Affairs)" and add, in its place, the phrase "Department of Veterans Affairs (VA)".

PART 40—[AMENDED]

1. In §§ 40.2(c), 40.4(a), 40.5, 40.7(b), 40.8(b), and 40.9 (c) and (d) remove the word "the VA" and add, in their place, the words "VA".

§ 40.3 [Amended]

2. In § 40.3 remove the words "the VA's" and add, in their place, the word "VA's".

PART 42—[AMENDED]

In § 42.2 remove the definition "Administrator" and add in alphabetical order the definition "Secretary" to read as follows:

§ 42.2 Definitions.

* * *

Secretary means the Secretary of Veterans Affairs.

* * * * *

[FR Doc. 89–19601 Filed 8–22–89; 8:45 am]

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 272

[FRL–3632–4]

Hazardous Waste Management Program Codification of Approved State Hazardous Waste Program for Indiana

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: The Resource Conservation and Recovery Act of 1976, as amended (RCRA), authorizes the United States Environmental Protection Agency (EPA) to grant Final Authorization to States to operate their hazardous waste management programs, in lieu of the Federal program. 40 CFR part 272 codifies EPA's prior authorization of State programs and incorporates by reference those provisions of the State statutes and regulations that EPA will enforce under RCRA section 3008. Thus, EPA intends to codify the Indiana authorized States program in part 272.

DATES: The codification of Indiana's authorized hazardous waste program shall be effective October 23, 1989 unless EPA publishes a prior **Federal Register** action withdrawing this immediate final rule. All comments on Indiana's codification must be received by the close of business September 22, 1989. The incorporation of certain publications listed in the regulations is approved by the Director of the **Federal Register** as of October 23, 1989.

ADDRESS: Written comments should be sent to George Woods at the address listed below.

FOR FURTHER INFORMATION CONTACT: George Woods, Indiana Regulatory Specialist, Office of RCRA, U.S. EPA Region V, 230 South Dearborn Street, 5HR–JCK–13, Chicago Illinois 60604, (312) 886–6134, (FTS: 8–886–6134).

SUPPLEMENTARY INFORMATION:

Background

Section 3006 of the Resource Conservation and Recovery Act of 1976, as amended (RCRA), 42 U.S.C. 6926 *et seq.*, allows the U.S. Environmental Protection Agency (EPA) to authorize State hazardous waste programs to

operate in the State in lieu of the Federal hazardous waste program. The purpose of today's **Federal Register** notice is to codify EPA's approval of Indiana's base hazardous waste management program and two revisions to this program.

On January 31, 1986, EPA published a **Federal Register** notice announcing its decision to grant final authorization to Indiana (see 51 FR 3953, January 31, 1986). On October 31, 1986 and January 5, 1988, EPA published **Federal Register** notices announcing its decisions to grant Indiana final authorization for two separate program revisions to its hazardous waste management program (see 51 FR 39752, October 31, 1986 and 53 FR 128, January 5, 1988). The October 31, 1986, **Federal Register** announced EPA's approval of changes to the name and organization of the lead State agency. Effective April 1, 1986, Indiana Public Law 112–1986 (Act) amended Indiana Public Law 143–1985 (Act) reorganizing the Indiana agency responsible for administering the hazardous waste management program. Prior to April 1, 1986, the Indiana hazardous waste management program was the responsibility of the Indiana State Board of Health (ISBH); the program was implemented by ISBH's Division of Land Pollution Control. On April 1, 1986, Indiana Public Law 143–1985, as amended by Indiana Public Law 112–1986, created a new State agency entitled the Indiana Department of Environmental Management (IDEM). The Division of Land Pollution Control became an office within the IDEM entitled the Office of Solid and Hazardous Waste Management. The organizational structure, the staff composition, and most importantly, the State's regulatory and statutory equivalence to the Federal RCRA program were in no way altered by this statutory reorganization of the RCRA program to the new agency. The final authorization for this program revision became effective on December 31, 1986.

The January 5, 1988, **Federal Register** announced EPA's approval of Indiana's equivalent rules for the following Federal hazardous waste regulatory amendments:

(1) Exclusion of Household Waste (49 FR 44980, November 13, 1984);

(2) Interim Status Standards Applicability (49 FR 46095, November 21, 1984);

(3) Corrections to the Test Methods Manual (49 FR 47391, December 4, 1984);

(4) Satellite Accumulation (49 FR 47391, December 20, 1984);

(5) Redefinition of Solid Waste (50 FR 614, January 4, 1985);

(6) Interim Status Standards for Landfill Cover Design Standards (50 FR 16044, April 23, 1985);

(7) Design Standards (50 FR 16044, April 23, 1985);

(8) Correction to Redefinition of Solid Waste (50 FR 33541, August 20, 1985), and;

(9) Clarification of Spent Pickle Liquor Listing (51 FR 19320, May 28, 1986).

Indiana submitted an application requesting approval of these rule changes on June 29, 1987. That application contained a description of the rule changes, a revised Memorandum of Agreement, an Attorney General's Statement certifying the equivalence of the State rules and a copy of the rules. EPA approved of the rule changes and the State application in the January 5, 1988, **Federal Register**. The final authorization for this program revision became effective on January 19, 1988.

EPA has decided to codify its approval of State programs in part 272 of title 40, Code of Federal Regulations (CFR) and to incorporate by reference therein the State statutes and regulations that EPA will enforce under section 3008 of RCRA. The intended codification reflects the State program that was in effect when EPA granted Indiana final authorization under section 3006(b) for its revised hazardous waste program. This effort will provide clearer notice to the public of the scope of the authorized program in each State. Such notice is particularly important in light of the Hazardous and Solid Waste Act Amendments of 1984 (HSWA), Public Law 98–616. Revisions to State hazardous waste programs are necessary when Federal statutory or regulatory authority is modified. Because HSWA extensively amended RCRA, State programs must be modified to reflect those amendments. By codifying the authorized Indiana program and by amending the Code of Federal Regulations whenever a new or different set of requirements is authorized in Indiana, the status of federally approved requirements of the Indiana program will be readily discernible.

The Agency will only codify for enforcement purposes those provisions of the Indiana hazardous waste management program for which authorization approval has been granted by EPA. Concerning HSWA, some State requirements may be similar to HSWA requirements that are in effect under Federal statutory authority in that State. However, a State's HSWA-type requirements are not authorized and will not be codified into the CFR until the Regional Administrator publishes his final decision to authorize the State for specific HSWA requirements. Until such time, EPA will enforce the HSWA requirements and not the State analogues.

To codify Indiana's authorized hazardous waste program, EPA will add subpart P to part 272 of Title 40 of the CFR. Subpart P has previously been reserved for Indiana. Sections 272.751(a)(1)–(3), and 272.751 (b)–(d) intend to codify for enforcement purposes, the State statutes and regulations, the Memorandum of Agreement, the Attorney General's Statements, the Program Descriptions, and a letter from the State Health Commissioner which are authorized and made part of the hazardous waste management program under Subtitle C of RCRA.

The Agency retains the authority under Sections 3007, 3008, 3013 and 7003 of RCRA to undertake enforcement actions in authorized States. With respect to such enforcement action, the Agency will rely on Federal sanctions, Federal inspection authorities, and the Federal Administrative Procedures Act rather than the authorized State analogues to these requirements. Therefore, the Agency does not intend to codify for purposes of enforcement such particular, authorized Indiana enforcement authorities. Section 272.751(a)(2) lists those authorized Indiana authorities that would fall into this category.

The public also needs to be aware that some provisions of the State's hazardous waste management program are not part of the Federally authorized State program. These non-authorized provisions are not part of the RCRA Subtitle C program because they are "broader in scope" than RCRA Subtitle C (see 40 CFR 271.1(i)). As a result, State provisions which are "broader in scope" than the Federal program are not codified for purposes of enforcement in part 272. Section 272.751(a)(3) of the intended codification simply lists for reference and clarity the Indiana statutory and regulatory provisions which are "broader in scope" than the Federal program and which are not, therefore, part of the authorized program being codified. "Broader in scope" provisions will not be enforced by EPA; the State, however, will continue to enforce such provisions.

As noted above, the Agency is not amending part 272 to include HSWA requirements and prohibitions that are immediately effective in Indiana and other States. Section 3006(g) of RCRA provides that any requirement or prohibition of HSWA (including implementing regulations) takes effect in authorized States at the same time that it takes effect in non-authorized States. Thus, EPA has immediate authority to implement a HSWA requirement or prohibition once it is effective. A HSWA requirement or prohibition supersedes any less stringent or inconsistent State provision which may have been previously authorized by EPA (See 50 FR 28702, July 15, 1985).

Because of the vast number of HSWA statutory and regulatory requirements taking effect over the next few years, EPA expects that many previously authorized and codified State provisions will be affected. The States are required to revise their programs to adopt the HSWA requirements and prohibitions by the deadlines set forth in 40 CFR 271.21, and then to seek authorization for those revisions pursuant to part 271. EPA expects that the States will be modifying their programs substantially and repeatedly. Instead of amending the part 272 codification every time a new HSWA provision takes effect under the authority of RCRA 3006(g), EPA will wait until the State receives authorization for its analog to the new HSWA provision before amending the State's Part 272 codification. In the interim, persons wanting to know whether a HSWA requirement or prohibition is in effect should refer to 40 CFR 271.1(j), as amended, which lists each such provision.

The codification of State authorized programs in the CFR should substantially enhance the public's ability to discern the current status of the authorized State program and clarify the extent of Federal enforcement authority. This will be particularly true as more State program revisions to adopt HSWA provisions are authorized.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this action will not have a significant economic impact on a substantial number of small entities. It intends to codify the decision already made to authorize Indiana's program and has no separate effect on handlers of hazardous waste in the State or upon small entities. This rule, therefore, does not require a regulatory flexibility analysis.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Paperwork Reduction Act

Under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, Federal agencies must consider the paperwork burden imposed by any information request contained in a proposed rule or a final rule. This rule will not impose any information requirements upon the regulated community.

List of Subjects in 40 CFR Part 272

Administrative practice and procedure, Confidential business information, Hazardous waste transportation, Hazardous waste, Incorporation by reference, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Dated: July 20, 1989.

Frank M. Covington,

Acting Regional Administrator.

For the reasons set forth in the preamble, 40 CFR part 272 is amended as follows:

PART 272—APPROVED STATE HAZARDOUS WASTE MANAGEMENT PROGRAMS

1. The authority for part 272 continues to read as follows:

Authority: Secs. 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. 6912(a), 6926, and 6974(b).

2. Subpart P of part 272 is amended by adding §§ 272.750 and 272.751 and by reserving §§ 272.752 through 272.799 to read as follows:

Subpart P—Indiana

272.750 State authorization
272.751 State-administered program: Final Authorization
272.752–272.799 [Reserved]

§ 272.750 State authorization.

(a) The State of Indiana is authorized to administer and enforce a hazardous waste management program in lieu of the Federal program under subtitle C of the Resource Conservation and Recovery Act of 1976 (RCRA), 42 U.S.C. 6921 *et seq.*, subject to the Hazardous and solid Waste Amendments of 1984 (HSWA), (Pub. L. 98–616, Nov. 8, 1984), 42 U.S.C. 6926(c) and (g)). The Federal program for which a State may receive authorization is defined in 40 CFR part 271. The State's base program and revisions to that program, as administered initially by the Indiana State Board of Health and later by the Indiana Department of Environmental Management, were approved by EPA pursuant to 42 U.S.C. 6926(b) and part 271 of this chapter. EPA's approval of Indiana's base program was effective on January 31, 1986. EPA's approval of revisions to Indiana's base program were effective on December 31, 1986, and January 19, 1988.

(b) Indiana is not authorized to implement any HSWA requirements in lieu of EPA unless EPA has explicitly indicated its intent to allow such action in a **Federal Register** notice granting Indiana authorization.

(c) Indiana has primary responsibility for enforcing its hazardous waste program. However, EPA retains the authority to exercise its enforcement authorities under sections 3007, 3008, 3013, and 7003 of RCRA, 42 U.S.C. 6927, 6928, 6934, and 6973, as well as under other Federal laws and regulations.

(d) Indiana must revise its approved program to adopt new changes to the Federal subtitle C program in accordance with section 3006(b) of RCRA and 40 CFR part 271, subpart A. Indiana must seek final authorization for all program revisions pursuant to section 3006(b) of RCRA but, on a temporary basis, may seek interim authorization for revisions required by HSWA pursuant to section 3006(g) of RCRA, 42 U.S.C. 6926(g). If Indiana obtains final authorization for the revised requirements pursuant to section 3006(b), the newly authorized provisions will be listed in § 272.751 of this subpart. If Indiana obtains interim authorization for the revised requirements pursuant to section 3006(g), the newly authorized provisions will be listed in § 272.752.

§ 272.751 State-administered program: Final authorization.

Pursuant to section 3006(b) of RCRA, 42 U.S.C. 6926(b), Indiana has final authorization for the following elements submitted to EPA in Indiana's base program and base program revision applications for final authorization and approved by EPA effective on January 31, 1986, December 31, 1986, and January 19, 1988.

(a) *State Regulations.* (1) The following Indiana regulations are incorporated by reference and codified as part of the hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*: Indiana Administrative Code, title 320, articles 4.1–1–3 through 4.1–37–4, 4.1–37–6 through 4.1–39–12, and 4.1–40–1 through 4.1–54–8 (1987 Cumulative Supplement, Volume 2, as supplemented by Indiana Register, Volume 10, Number 8, pages 1563–1690, May 1, 1987). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a). Copies of the Indiana regulations that are incorporated by reference in this paragraph are available for the Indiana Legislative Services Agency, Administrative Code and Register Division, 302 State House, Indianapolis, Indiana 46204.

(2) The following statutes and regulations concerning State enforcement, although not codified herein, are part of the authorized State program:

(i) Indiana Code, title 4, article 21.5, chapters 1 through 4; title 13, article 6, chapter 1, section 6; and title 13, article 7, chapters 1 through 7, 8.5, 10 through 13 (except for chapter 13, Section 2(a)), and 16 (effective July 1, 1987).

(ii) Indiana Administrative Code, title 320, articles 4.1–1–1, 4.1–1–2, 4.1–37–5, and 4.1–39–13 through 4.1–39–21 (1987 Cumulative Supplement, Volume 2, as supplemented by Indiana Register, Volume 10, Number 8, pages 1563–1690, May 1, 1987).

(3) The following statutory provisions of the Indiana Code are broader in scope than the Federal program, are not part of the authorized program, and are not codified herein for enforcement purposes: Indiana Code, title 13, article 7, chapter 8.7 and chapter 13, section 2(a) (effective July 1, 1987).

(b) *Memorandum of Agreement.* The Memorandum of Agreement between EPA Region V and the Indiana Department of Environmental Management, signed by the EPA Regional Administrator on July 18, 1986, is codified as part of the authorized hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921*et seq.*

(c) *Statements of Legal Authority.* The Indiana Attorney General's Statements for final authorization signed by the Attorney General of Indiana on June 28, 1985, August 28, 1986, and June 1, 1987, are codified as part of the authorized hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

(d) *Program Description.* Program Descriptions dated August 5, 1985, April 24, 1986, and June 29, 1987, and any other materials submitted as part of, or as supplements to, the original application or revision applications are codified as part of the authorized hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

(e) *Letter from State Health Commissioner.* The letter from the State Health Commissioner, Indiana Board of Health to the Regional Administrator, EPA Region V dated November 4, 1985, as an addendum to the Indiana Final Authorization Application, is codified as part of the authorized hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

40 CFR Part 300

[FRL-3634-1]

National Priorities List for Uncontrolled Hazardous Waste Sites—Final Update #5; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: EPA is correcting an error in the final rule #5 updating the National Priorities List which appeared in the **Federal Register** on March 31, 1989 (54 FR 13296).

FOR FURTHER INFORMATION CONTACT: Robert Myers at (202) 475–9702.

SUPPLEMENTARY INFORMATION: EPA has promulgated revisions to the National Priorities List on March 31, 1989 (54 FR 13296). The preamble to this final rule contained an error which is identified below and corrected by this notice.

Dated: August 16, 1989.

Elizabeth LaPointe,

Acting, Director, Resource Management Staff, Office of Solid Waste and Emergency Response.

The following correction is made in FRL 3546–3, the National Priorities List for Uncontrolled Hazardous Waste Sites—Final Update #5; Final Rule published in the **Federal Register** on March 31, 1989 (54 FR 13296):

PART 300—[CORRECTED]

On page 13305, in the third column, under PART 300—[AMENDED], item 2, "Appendix B of Part 300 is revised to read as set forth below" should read "Appendix B of Part 300 is amended to revise only the National Priorities List by rank, as set forth below. The National Priorities List, Federal Section (By Group) remains the same".

40 CFR Part 799

[OPTS–42059E; FRL 3634–6]

Testing Consent Order for 1,1,1-Trichloroethane and Response to the Interagency Testing Committee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule announces that EPA has signed an enforceable testing consent order with five manufacturers of 1,1,1-trichloroethane (TCEA) (CAS No. 71–55–6), who have agreed to perform mutagenicity and neurotoxicity tests with TCEA. TCEA is added to the list of Testing Consent Orders in 40 CFR 799.5000 for which the export notification requirements of 40 CFR part 707 apply. This rule constitutes an additional EPA response to the Interagency Testing Committee's (ITC) recommendation that EPA consider health effects testing of TCEA. In October 1984, EPA issued a final Phase I test rule requiring that manufacturers perform a developmental toxicity test with TCEA.

EFFECTIVE DATE: August 23, 1989.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, Environmental Assistance Division (TS–799), Office of Toxic Substances, Room EB–44, 401 M Street SW., Washington, DC 20460, (202) 554–1404. TDD (202) 554–0551.

SUPPLEMENTARY INFORMATION: Under procedures described in 40 CFR part 790, The Dow Chemical Company, ICI Americas, Inc., Vulcan Chemicals, Occidental Chemical Corp., and PPG Industries, Inc., (the Companies) have entered into a Testing Consent Order with EPA in which these companies have agreed to perform mutagenicity and neurotoxicity testing of TCEA. This rule amends subpart C of 40 CFR part 799 to add TCEA to the list of chemical substances and mixtures subject to testing consent orders.

I. ITC Recommendation

In its Second Report to EPA, published in the **Federal Register** of April 19, 1978 (43 FR 16684), the ITC recommended that TCEA be considered for health effects testing.

In the **Federal Register** of October 10, 1984 (49 FR 39810), EPA issued a final phase I rule requiring manufacturers and processors of TCEA to perform a developmental toxicity test. The Agency deferred inclusion of mutagenicity and neurotoxicity testing because the tiered testing scheme for mutagenicity testing and the neurotoxicity test guidelines had not been sufficiently developed. Both the test scheme and guidelines are now available, the EPA is, therefore, requiring that this testing be performed.

II. Testing Consent Order Negotiations

In the **Federal Register** of August 20, 1987 (52 FR 31445), and in accordance with the procedures established in 40 CFR 790.28, EPA requested persons interested in participating in or monitoring testing negotiations on TCEA to contact the Agency. EPA held public meetings with interested parties on September 10 and October 29, 1987; August 4 and November 28 through 29, 1988; and February 3, 1989, to discuss the testing appropriate for TCEA. In July and August 1989, five TCEA manufacturers and EPA signed a Testing Consent Order for TCEA. Under the Order, the manufacturers agreed to conduct or provide for the conduct of an in vivo mammalian cytogenetics micronucleus assay, a rodent dominant lethal test (if triggered), and six neurotoxicity tests: Functional observational battery (acute and subchronic), sensory evoked potential battery (acute and subchronic), neuropathology, and a developmental neurotoxicity screen. The specific test standards to be followed and the testing schedule for each test were included in the Order. Procedures for submitting study plans, modifying the Order, monitoring the testing and other provisions were also included in the Order.

III. Use and Exposure

The final phase I test rule on TCEA issued on October 10, 1984, was issued under section 4(a)(1)(B) of TSCA. In that rule, EPA found that TCEA was produced in substantial quantities and there was substantial occupational and consumer exposure to TCEA resulting from its manufacture, processing, and use. The bases for the findings were presented in the final rule and the support document for the rule (Ref. 1). Additional information is now available which further documents the extent of consumer and general population exposure to TCEA (Refs. 2 through 4).

It is also worth noting that TCEA, because of its contribution to chlorine in the stratosphere, is under review for possible inclusion in future revisions to the Montreal Protocol on Substances That Deplete the Ozone Layer (April 17, 1989; 54 FR 15228). Although it is not now clear what controls the Parties to the Protocol will agree to, TCEA will continue to be used to some extent in the near future. In addition, due to the physicial and chemical properties of TCEA and its predominant use as an expendable solvent, even a major reduction in production volume would still result in substantial human exposure. Residual amounts of TCEA will remain in the environment contributing to human exposure and supporting the need for these data. Therefore, the tests specified in this consent order remain essential.

IV. Testing Program

A. Mutagenicity

The mutagenicity potential of TCEA and the limitations of the available studies have been adequately reviewed in EPA's "Health Assessment Document for 1,1,1-Trichloroethane (Methyl Chloroform)" (Ref. 5) and in EPA's support document for the phase I test rule for TCEA (Ref. 1). In brief, TCEA is mutagenic in *Salmonella typhimurium* strains TA 1535, TA 1537, and TA 100 both with and without metabolic activation (Refs. 6 and 7). In addition, in the *Drosophila* sex-linked recessive lethal study sponsored by EPA, TCEA was reported to induce recessive lethal mutations in spermatocytes when administered by feeding (Ref. 8). However, although there is some indication that TCEA may induce lethal mutations in this *Drosophila* study, the data indicate at most a weak response and are insufficient in themselves to warrant proposing that the mouse visible specific locus test be required at this time (Ref. 9).

Concerning chromosomal effects, three in vivo cytogenetics tests have been conducted with TCEA (Refs. 10 through 12). These tests, however, were not conducted well enough to evaluate the potential of TCEA to cause chromosomal effects. In the studies by Gocke et al. (Ref. 10) and Tsuchimoto and Matter (Ref. 11), the bone marrow was harvested too soon (only 6 hours) after the last dose. In the study by Salamone (Ref. 12), only male mice were tested. A dominant lethal test has also been conducted with TCEA as part of a two-generation fertility study in mice (Ref. 13). Statistically significant differences were reported in the ratio of dead to live fetuses; however, both increases and decreases were observed. This screening level study was judged to be inadequate because animals were not given doses high enough to produce overt signs of toxicity and because there is uncertainty over the dose the animals actually received (Ref. 5). In addition, the purity of the TCEA (95 percent TCEA, 3 percent dioxane) and route of administration (oral) are not comparable to the test substance and route specified in this Order. Other mutagenicity studies that have been identified and reviewed by EPA (Refs. 1 and 5) have been judged inadequate because conventional protocols were used that did not adjust test conditions and procedures to accommodate TCEA's high volatility and low water solubility; controls were not included in the experimental design; and/or too few animals were used in the study to provide adequate data.

The available studies are inadequate to fully characterize and evaluate the potential of TCEA to cause chromosomal effects.

Under the Consent Order, the Companies have agreed to a tiered testing program. The first tier test is a micronucleus test to be conducted according to an HSIA protocol. EPA has accepted this alternative methodology because it believes the test will provide reliable and adequate data equal to that which would be obtained from testing according to the TSCA guideline. The second tier test is the dominant lethal test which shall be conducted according to the TSCA guideline. The tests agreed upon are presented in IV.B. below.

B. Neurotoxicity

TCEA has been shown to produce non-specific central nervous system (CNS) depression in humans after exposure to doses ranging from 500 through 2,650 ppm (Refs. 14 through 17). Only one of these studies (Ref. 16) had an exposure duration of more than 1 day. In this study, CNS depression was observed after exposure to 500 ppm for 7 hours/day for 5 days. The other three studies utilized short-term exposures which varied from a few minutes to several hours. None of the studies were adequate to characterize either short- or long-term neurologic effects of exposure to TCEA. Of particular note, CNS effects were noted for the 5-day exposure to 500 ppm TCEA (Ref. 16) but not for the 78-minute exposure (Ref. 15) to this concentration, suggesting that exposure longer than 5 days may cause CNS effects at even lower concentations. In addition, 350 to 550 ppm TCEA have been shown to impair perceptual speed, manual dexterity and reaction time (Refs. 18 and 19).

A number of neuropathological and behavioral disorders are associated with chronic exposure to organic solvents such as TCEA. The effects noted in workers exposed to solvents include: decreased concentration ability, memory, learning ability, impulse control, and motivation; emotional instability; and impaired peripheral nerve function (Refs. 20 and 21). These disorders (referred to as solvent syndrome) can persist for years after cessation of exposure and may be irreversible. In addition, EPA has been informed of neurological problems (CNS depression, reoccurring loss of motor activity, and loss of memory) in workers exposed to TCEA (Refs. 22 and 23). Although these reports are anecdotal, they further support EPA's concern for the effects of TCEA on the nervous system.

Available animal studies of TCEA's effects on the nervous system and behavior are summarized in reference 5. Effects reported were on motor activity, vestibular control, and fixed-interval response rate. However, the endpoints measured in these studies were evaluated in only a preliminary manner and no-effect levels were not determined. Although these studies further support concern for the neurotoxicity potential of TCEA, they are inadequate to fully characterize the acute and chronic neurotoxic potential of TCEA, especially behavioral and developmental neurotoxicity effects. No adequate studies on the potential of TCEA to cause neurophysiological, neuropathological, or neurobehavioral effects were identified.

In the Consent Order, the Companies agreed to conduct six neurotoxicity tests with TCEA, and systems development and positive control verification of the developmental neurotoxicity test. These six tests will be conducted according to protocols submitted by HSIA, and approved by EPA. EPA has agreed to testing by these protocols because it believes that they will provide equally reliable and adequate data to evaluate the neurotoxic effects of TCEA. Some of these tests may provide better data than the current TSCA guidelines but EPA cannot determine this until the data have been thoroughly evaluated. The tests agreed upon are presented in the following table.

TABLE—TESTING PLAN FOR TCEA

	Test methods	Report date [1]
Tier 1 tests:		
Functional observational battery, acute and subchronic	HSIA Protocol [2], [3]	21
Sensory evoked potential battery, acute and subchronic	HSIA Protocol [2], [3]	21
Neuropathology, subchronic	HSIA Protocol [3]	21
Systems development and positive control verification of developmental neurotoxicity test	See Appendix 3	[4] 18
Developmental neurotoxicity test	HSIA Protocol [5]	36
Micronucleus test	HSIA Protocol [6]	14
Tier 2 test: Dominant lethal [7]	40 CFR 798.5450	24

[1] Number of months after the effective date of the Consent Order when the final test results must be submitted to EPA.

[2] Halogenated Solvents Industry Alliance (HSIA) Protocol entitled "Acute Motor Activity and Neurophysiologic Effects of 1,1,1-Trichloroethane in Rats", Appendix 1 to the Consent Order.

[3] HSIA Protocol entitled "Neurotoxicologic Examination of Rats Exposed to 1,1,1-Trichloroethane Vapor for 13 weeks", Appendix 2 to the Consent Order.

[4] An unaudited draft report will be submitted for review at this time. A final report will be prepared concurrently with the developmental neurotoxicity test of TCEA.

[5] HSIA Protocol entitled "Examination of Rats for Developmental Neurotoxicologic Effects from Maternal Exposure to 1,1,1-Trichloroethane", Appendix 4 to the Consent Order.

[6] HSIA Protocol entitled "An Inhalation Mouse Bone Marrow Micronucleus Test on 1,1,1-Trichloroethane", Appendix 5 to the Consent Order.

[7] This test must be conducted only if EPA notifies the Companies.

In this consent agreement, EPA has approved the use of test protocols specifically developed to evaluate the mutagenic and neurotoxic potential of TCEA. The data generated by these tests will be used to determine the risk of mutagenic and neurotoxic effects associated with the manufacture, processing, use, and disposal of TCEA. Until the results of the testing required by this consent order have been fully evaluated by EPA, EPA will probably not consider using these methods for neurotoxicity and mutagenicity testing in any other consent order under TSCA section 4.

V. Export Notification

In addition to the Phase I test rule, the issuance of the Consent Order subjects any person who exports or intends to export TCEA to the export notification requirements of section 12(b) of TSCA. The specific requirements are listed in 40 CFR part 707. In the June 30, 1986 (51 FR 23706), Interim Rule establishing the Testing Consent Order process, EPA added and reserved subpart C of part 799 for listing of testing consent orders issued by EPA. This listing serves as notification to persons, who export or intend to export chemical substances or mixtures which are the subject of testing consent orders, that 40 CFR part 707 applies.

VI. Rulemaking Record

EPA has established a record for this rule and the Consent Order (docket number OPTS-42059E). This record contains the basic information considered by EPA in developing this rule and the Testing Consent Order. This record includes the following information:

A. Supporting Documentation

(1) Testing Consent Order between five TCEA manufacturers and the EPA.

(2) **Federal Register** notices pertaining to this rule and consent order consisting of:

(a) Notice of final rule on EPA's TSCA Good Laboratory Practice Standards (48 FR 53922; November 29, 1983).

(b) Notice of interim final rule on procedures governing Testing Consent Agreements and Test Rules and Exemption Procedures (51 FR 23706; June 30, 1986).

(c) Toxic Substances Control Act Test Guidelines; Final Rules (50 FR 39252; September 27, 1985).

(d) Notice of final rule revising the Toxic Substances Control Act Test Guidelines (52 FR 19056; May 20, 1987).

(e) Notice containing the ITC recommendation of TCEA to the Priority List (43 FR 16684; April 19, 1978).

(f) Notice of proposed test rule for 1,1,1-trichloroethane (46 FR 30300; June 5, 1981).

(g) Notice of final Phase I test rule for 1,1,1-trichloroethane (49 FR 39810; October 10, 1984).

(h) Notice of final Phase II test rule for 1,1,1-trichloroethane (50 FR 51683; December 19, 1985).

(i) Notice of proposed test rule for triethylene glycol monomethyl, monoethyl, and monobutyl ethers (51 FR 17883; May 15, 1986).

(j) Notice soliciting interested parties for developing a consent order for 1,1,1-trichloroethane (52 FR 31445; August 20, 1987).

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[General Docket 87–14; FCC 89–206]

Allocation of the 216–225 MHz Band

AGENCY: Federal Communications Commission.

ACTION: Final rule; petitions for reconsideration.

SUMMARY: This action affirms the Commission's August 4, 1988, Report and Order (53 FR 36287, Sept. 19, 1988), which amended the Commission's Rules, § 2.106 (Table of Frequency Allocations), by reallocating the 220–225 MHz band. In the Report and Order the 220–222 MHz band was allocated to the land mobile service for government and nongovernment use and the 222–225 MHz band was allocated to the amateur service. This action responds to petitions for reconsideration filed by amateur licenses, amateur groups and the National Communications System which requested the Commission to allocate the entire 220–225 MHz band to the amateur service. It also responds to a petition for reconsideration filed by TV Answer, Inc. which requested a fixed allocation of one-half megahertz for a viewer-response service in the 220–222 MHz band.

EFFECTIVE DATE: August 23, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Fred Thomas, telephone (202) 653–8112.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order in General Docket 87–14, FCC 89–206, Adopted June 15, 1989, and Released August 17, 1989.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 239), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Final Rule

1. By this action the Commission responds to petitions for reconsideration by affirming its decision to: (1) Maintain the existing 216–220 MHz band allocation; (2) allocate the 220–222 MHz band to the land mobile service for both government and nongovernment operations; and, (3) allocate the 222–225 MHz band to the amateur service.

2. The Commission is unpersuaded by the petitions for reconsiderations to make any change to the decision of the Report and Order. It believes that all of the relevant issues were adequately addressed in the

Report and Order

3. In taking this action, the Commission considered a variety of factors, including the need to provide for narrowband land mobile operations, actions of the 1979 World Administrative Radio Conference (1979 WARC), potential interference to TV broadcasting, the impact on the amateur use of the 220–225 MHz band and other factors. The Commission concludes that the above allocations are in the public interest. In making this determination the Commission is particularly sensitive to the concerns expressed by amateur community in this proceeding. The Commission states that it will continue to support the spectrum needs of the amateur service. It believes that this service is important to promote the development of individuals schooled in the radio art, to advance radio technology and to provide public service, particularly in times of emergencies.

4. Government and non-government users will not be allowed access to the 220–222 MHz band until final service rules have been adopted by the Commission. Amateur stations may continue to use the 220–220 MHz band until that time. Amateur operators are cautioned, however, to refrain from making any investments in equipment that would be only suitable for operation in this band. Amateur stations should begin an orderly transition of on-going operations in the 220–222 MHz band to other amateur service frequency bands so that an abrupt termination of such activities will not be necessary. Additionally, the amateur community may wish to address any changes to the amateur service rules that it finds desirable in preparation of the removal of the 220–222 MHz band, yet are beyond the scope of this proceeding. For example, the lifting of the prohibition on auxiliary link operation on some or all of the longer wavelength bands and secondary amateur fixed use of a portion of the 216–220 MHz band are two matters the community may wish to consider and petition for amendment. However, with regard to amateur secondary fixed use of the 216–220 MHz band the Commission notes that such a proposal would need to provide support for why an allocation is needed and show how amateur operations could use this band without causing interference to existing users of the 216–220 MHz band and also to adjacent TV channel 13 operations in the 210–216 MHz band.

5. One other petition was received from TV Answer (TVA). It requested the Commission to reconsider its decision to the extent that the reallocation precludes the grant of TVA's Petition for Rule Making, RM–6196, which seeks a fixed allocation of one-half megahertz in the 216–222 MHz band for a television viewer-response radio service. TVA's Petition for Rule Making is being denied with regard to the 220–222 MHz band in this Memorandum Opinion and Order. TVA's request for use of the spectrum below 220 MHz for a viewer-response service will be considered in a separate item.

6. The Commission also denies a "Request For Oral Arguments" filed by the American Radio Relay League (ARRL). The Commission notes that it is not its policy to grant routinely oral arguments in rulemaking proceedings, particularly in proceedings that have a full written record as in the case of this proceeding. Further, the Commission states that oral *ex parte* presentations may be made to the Commissioners during the course of rulemaking proceeding. In this proceeding a number of such oral *ex parte* presentations were made to each of the Commissioners, including several presentations by the ARRL.

Ordering Clauses

7. Accordingly, *it is ordered,* That the petitions for reconsideration filed in this proceeding are denied.

8. *It is further ordered,* That TV Answer's Petition for Rule Making, RM-6196, is Denied with regard to an allocation of 0.5 MHz in the 220–222 MHz band.

9. *It is further ordered,* That this proceeding is terminated.

47 CFR Part 97

[PR Docket No. 88–467; FCC 89–266]

Amateur Radio Services; Use of the 17 Meter Band

AGENCY: Federal Communications Commission.

ACTION: Final rule; petition for reconsideration.

SUMMARY: Petitioner Dennis Murphy requested reconsideration of the Commission's refusal to allow Novice and Technician Class operators access to the 17 meter band. The Commission affirmed its refusal holding that Novice and Technician Class operators should be excluded because they had recently received enhanced privileges and because of the small size of the band. The refusal minimizes the possibility of interference in that band because Novices and Technicians are not as skillful as higher grade operators.

EFFECTIVE DATE: August 23, 1989.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR INFORMATION CONTACT: Maurice J. DePont, Federal Communications Commission, Washington, DC 20554 (202) 632–4964.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 97

Amateur radio, Frequencies, Radio.

Memorandum Opinion and Order

Adopted: August 4, 1989. Released: August 15, 1989.

By the Commission:

I. Introduction

1. On January 31, 1989, we released a Report and Order[1] that authorized access to the 17 meter band[2] to all General, Advanced and Amateur Extra Class operator licensees. Dennis Murphy has requested reconsideration of the Commission's refusal also to allow access to the 17 meter band by Novice and Technician Class operators.

II. Background

2. The 17 meter band is one of three new high frequency (HF) bands allocated to the amateur service by the 1979 World Administrative Radio Conference.[3] The allocation for the 17 meter band generally followed the pattern of the amateur service rules for the seven other HF bands, with operating privileges based on the class of operator license, separation of analog and digital emission types, and maximum transmitter power.

III. Petition For Reconsideration

3. The petitioner asks that the 18.068–18.110 MHz segment of the 17 meter band, where telegraphy (A1A) and digital (F1B) emission types are permitted for stations with higher grade control operators, also be authorized with a 200 watt power limit for amateur stations whose control operators hold either a Novice or Technician Class operator license. Mr. Murphy states that there should be equal access to the 17 meter band by all amateur operator classes in order to enhance amateur station participation in the use of the 17 meter band. The American Radio Relay League, Inc., filed an opposition to the petition for reconsideration noting that the Commission had thoroughly considered the matter of access to the band by license class.

IV. Decision

4. The petitioner has not presented any facts or arguments that have not previously been considered. In fact, we discussed at length in our Report and Order the operator license classes that should be allowed access to the new 17 meter band, and concluded, *inter alia,* that Novice and Technician Class operators should be excluded from the 17 meter band in view of the enhanced privileges that they had recently received and because of the band's small size. In addition, we reiterate our belief that the potential for interference in the 17 meter band will be minimized if the skills associated with the General Class or higher operator license are required.[4]

V. Ordering Clauses

5. Accordingly, *it is ordered,* Pursuant to the authority contained in section 4(i) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), that the petition for reconsideration is denied.

6. *It is further ordered,* That this proceeding is terminated.

Federal Communications Commission.

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

1 CFR Part 305

Agency Administration of Failed or Failing Depository Institutions

AGENCY: Administrative Conference of the United States.

ACTION: Request for public comments

SUMMARY: The Administrative Conference's Special Committee on Financial Services has under consideration a draft recommendation on agency administration of failed or failing depository institutions. Interested persons are invited to comment on the draft recommendation.

DATES: Please submit comments by September 22, 1989.

ADDRESSES: Send comments to Brian C. Murphy, office of the Chairman, Adminsitrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Brian C. Murphy (202) 254–7065.

SUPPLEMENTARY INFORMATION: The Administrative Conference's Special Committee on Financial Services has under consideration a draft recommendation on agency administration of failed or failing depository institutions, based on a report prepared by Professors Jonathan R. Macey, of Cornell University Law School, and Geoffrey P. Miller, of the University of Chicago Law School. Copies of the report are available from the Office of the Chairman of the Administrative Conference.

The Administrative Conference of the United States is an independent federal agency, established to promote improvements in the efficiency, adequacy and fairness of governmental processes (5 U.S.C. 571–576). In 1987, the Conference established the Special Committee on Financial Services to examine issues relating to procedural fairness and efficiency in the U.S. financial services industry. The Committee has taken up several issues, including the adjudication practices and procedures of the federal bank regulatory agencies, the Federal Reserve Board's handling of applications under the Bank Holding Company Act, and the resolution of claims against savings receiverships.

The Committee currently is examining the enforcement powers of the federal bank regulatory agencies; the informal audit and settlement practices of the bank regulatory agencies; and the role of those agencies in enforcing the Securities and Exchange Act of 1934, as well as the subject of the draft recommendation set forth below.

Draft Recommendation: Agency Administration of Failed or Failing Depository Institutions

Special Committee on Financial Services

Introduction

Not since the Great Depression has there been such concern about the fundamental stability of the U.S. banking industry. The apparent decline in public confidence stems from the unprecedented increase in the incidence of bank failures in the past decade and also from the heavy losses in the insurance funds overseen by the bank and thrift regulatory agencies that were designed to protect depositors from losses in such failures. One hundred twenty banks failed in 1985; 145 failed in 1986; 184 failed in 1987; and 200 failed in 1988.

The situation is even more grave in the savings and loan industry, in which a wave of failures and insolvencies has led to the passage of costly legislation to bail out failed thrifts which revamped the regulatory structure by abolishing the Federal Home Loan Bank Board and placing the replenished thrift insurance fund under the control of the banking regulators of the Federal Deposit Insurance Corporation.

The large stake that the Federal Government has in the finanical stability of depository institutions, as well as the current system of regulation that imposes many of the costs of depository institution failures on the general public, suggest that the administrative procedures used by the Federal bank regulatory agencies in administering failed or failing depository institutions warrant special attention. For the purposes of this discussion, the federal bank regulatory agencies that may be involved in administering failed or failing institutions include the Federal Deposit Insurance Corporation, the Office of Thrift Supervision in the Department of the Treasury, the National Credit Union Administration, and the Farm Credit Administration. Other fedeal agencies such as the Comptroller of the Currency and the Federal Reserve Board do not administer failed institutions *per se,* but play an important role in approving mergers and acquisitions of institutions.

The federal bank regulatory agencies use a variety of different methods for administering failed or failing depository institutions. The following methods used by the Federal Deposit Insurance Corporation are illustrative:

Payoff and liquidation. In a straight liquidation of a bank that has been declared insolvent, the FDIC, acting in its corporate capacity, pays off insured depositors. In its capaicty as receiver of an insured closed bank, the FDIC acts as trustee of the insolvent estate for the benefit of creditors, including the FDIC insurance fund. To the extent that funds are disbursed to insured depositors, the FDIC assumes the rights of such depositors as creditors. As receiver, the FDIC liquidates the bank's assets for the benefit of all creditors, including the insurance fund.

Modified payoffs. In a modified payoff, the FDIC makes full payments to insured depositors and partial payments to uninsured depositors, based on the FDIC's estimate of the proceeds from liquidation of the failed bank. The FDIC then liquidates the institution, and any excess is paid over to the uninsured depositors and other bank creditors.

Purchase-and-assumption transactions. In a purchase-and-assumption (P & A) transaction, deposit accounts and certain other liabilities of the failed depository institution are assumed by another institution, which also purchases some of the failed institution's assets. Thus, such a transaction essentially involves the merger of a failed institution into a solvent one. Usually only performing assets (that is, loans that are being paid off) are purchased. Any shortfall between the value of the assets purchased and the value of the liabilities assumed is made up by the FDIC. The

FDIC as receiver generally purchases all poor and non-performing assets and seeks to collect on those assets to offset its losses.

Open bank assistance. Before a troubled bank has been formally declared insolvent, the FDIC may, in certain circumstances, provide it with direct financial assistance to prevent it from failing. The FDIC also has authority to purchase a bank's bad loans and to buy its preferred stock or other securities (not including common stock).

Bridge banks. Under powers granted by the Competitive Equality Banking Act of 1987, the FDIC may establish bridge banks, which purchase the assets and assume the deposits and certain other liabilities of the failed institution and continue to provide banking services. Such bridge banks may be operated for three years (an original two-year term, with the possibility of a one-year extension). Bridge banks are not required to have any capital and receive operating funds from the FDIC, as the Board of Directors deems "necessary or advisable." The bridge banks allows the FDIC more time to facilitate an acquisition.

The FDIC and the other agencies involved in administering failed or failing institutions should keep the following objectives in mind when selecting methods and procedures:

Minimizing the cost to the deposit insurance funds. In determining a procedure for handling a depository institution failure, the agency should consider which method will result in the least cost to the Federal insurance funds. No two insolvencies are identical. It is essential that the agency evaluate each failure on a case-by-case basis and not rule out any particular procedure because of possibly unfavorable experiences in the past. Where methods that involve full payouts to uninsured depositors are considered, the goal of minimizing the burden on the insurance funds can only be accomplished if the agency weighs the expected benefits of such procedures, including the potentially increased stability of the banking system as a whole, against the costs of such procedures, including the additional drain on the deposit insurance funds and the potential loss of market discipline in the form of monitoring by large uninsured depositors and other creditors. Open bank assistance, in particular, needs to be used with caution because of the risk that a depository institution will eventually fail, notwithstanding the infusion of new capital.

Protecting small depositors. Because small depositors may find it more difficult than large depositors to obtain access to funds during the interim period between bank failure and repayment, the agency should remain sensitive to their need to obtain early access to their funds during the liquidation process, for example, by expediting payments to small depositors who may have to make home mortgage, tuition or other highly time-sensitive payments.

Ensuring efficient auctions for failed institutions. The process by which the agency determines who is eligible to bid at an auction for a failed depository institution is not clearly delineated. The agency conducting the auction normally does not give general public notice of impending auctions, but instead selectively contacts potential bidders. For example, established institutions are sometimes the only entities to participate in FDIC-managed auctions, while individual entrepreneurs and other potential bidders who might enter the industry by bidding on an insolvent bank are sometimes excluded. The reduction in the number of bidders may lower the amount paid for a failed bank, thus further straining the federal deposit insurance funds. On the other hand, selectivity in designating bidders may tend to weed out unreliable or inexperienced operators who might drive the institution into failure once again. Speedy actions may also be desirable in order to maintain public confidence in the banking system and ensure that insured depositors are paid off as rapidly as possible. The agencies might benefit from further study of alternatives available to auction procedures in order to weigh the costs and benefits of the existing system against the potential costs and benefits of increasing the number of bidders at auctions for failed depository institutions.

The acquisition of banking institutions while still solvent can forestall potential insolvencies. Thus the procedures for regulating such acquisitions deserve examination as part of the overall problem of how the Federal bank regulatory agencies proceed in the administration of failing institutions.

At present parties wishing to acquire a solvent depository institution must comply with a highly complex set of rules. The complexity and long lead time required for such acquisitions are potential deterrents to friendly as well as unfriendly acquisitions.

Three statutes control takeover activity for commercial banks:

The Change in Bank Control Act (12 U.S.C. 1817(i)) makes it impossible for someone to take control of a commercial bank without prior regulatory review. The Act prevents any person from acquiring control of an FDIC-insured bank, unless the appropriate Federal bank regulatory agency has been given 60 days' prior written notice of the proposed acquisition, although the FDIC frequently exercises its authority to reduce or extend this time limitation. Except as provided by regulation of the appropriate agency, the Change in Bank Control Act also requires that the acquiror disclose to the agency significant information about itself and the proposed acquisition, including its identity and the identity of each entity on whose behalf the acquisition is being made, and any strategic plans regarding disposition of the acquired bank.

The Bank Merger Act (12 U.S.C. 1828(c)) requires the prior approval of the relevant Federal bank regulatory agency before one bank may merge or consolidate with another bank. In addition, the agency must notify the Attorney General and other bank regulatory agencies of the proposed transaction. These agencies must prepare reports on the competitive factors involved in the proposed merger.

The Bank Holding Company Act (12 U.S.C. 1842) governs bank acquisitions by corporations, including bank holding companies. A corporation or bank holding company must obtain approval from the Federal Reserve Board to acquire more than twenty-five percent or more of a bank's stock (or where the Board determines that control will exist), to acquire all or substantially all of a bank's assets, or to merge or consolidate with another bank holding company. A minimum of 30 days' notice to the regulator is required before approval of a transaction may be given. Thus, the Act grants the Federal Reserve Board considerable power over certain proposed takeovers of banks by bank holding companies and other corporations.

Under this regulatory structure, every transfer of control of an insured bank involves regulatory review or approval under varying criteria and uncertain time frames. By increasing the costs of acquiring banks, this structure might reduce the incentives of prospective bidders to engage in monitoring activities that serve the desirable goal of identifying undervalued and mismanaged banks. On the other hand, Congress established this regulatory structure in order to accomplish policy objectives that may require some impediments to bank takeovers as compared with firms in other fields. There is no justification, however, for procedures that deter bank takeovers if such procedures are not reasonably related to countervailing policy concerns. Similarly, there is no

justification for inconsistent or non-uniform policies and procedures for the approval of proposed mergers.

Accordingly, Congress should authorized [1] the Federal bank regulatory agencies to consider establishing an interagency task force to rationalize and streamline the process for changes in bank control by merger, acquisition, or any other means, both in hostile and friendly situations. Such an interagency task force should have the goal of rationalizing and streamlining the bank acquisition, change in control and merger process. Clear and consistent rules among agencies would provide greater certainty to potential bidders and targets as to their legal rights and obligations. If appropriate, the task force should recommend legislative solutions.

Recommendation

I. Procedures for Administering Failed or Failing Depository Institutions

1. Federal bank regulatory agencies should not display a general preference for any particular method of administering failed or failing depository institutions. Instead, all strategies should be evaluated in light of the facts and circumstances of each case, in order to ensure safer and more competent management, preserve the insurance funds, and maintain speed of insured deposit payoffs.

2. In determining procedures for dealing with failed or failing depository institutions, the Federal bank regulatory agencies should consider the extent to which protecting uninsured depositors might impose unnecessary costs on the insurance funds and reduce institutional incentives to avoid excessive risk-taking.

3. Before granting open bank assistance, the relevant Federal bank regulatory agency should: (1) Determine that there is a substantial probability that the institution will return to profitable operations within a reasonable time; (2) determine that the total costs of the open bank assistance will clearly be lower than the costs of any alternative procedure; (3) insist as a prerequisite to such assistance that the depository institution also receive a significant infusion of capital from non-government sources; and (4) ordinarily require replacement of top management, unless the agency concludes that the problems of the depository institution were clearly beyond the control or influence of such management.

4. The relevant Federal bank regulatory agencies should study the process by which ownership of failed institutions is transferred to outside buyers. Specifically, the agencies should weigh the costs and benefits of (a) extending the length of time for bidding for the assets of failed institutions, and (b) ensuring that all eligible parties are notified and given an opportunity to bid.

II. Protection of Small Depositors

The Federal bank regulatory agencies should be sensitive to the needs of small, insured depositors in failed depository institutions who need immediate access to funds to make home mortgage payments, tuition payments or other highly time-sensitive obligations.

III. Procedures for Administering Acquisitions of Solvent Institutions

1. The Federal bank regulatory agencies should review their procedures for approving acquisitions or other ownership changes of solvent depository institutions in order to streamline such procedures and provide potential acquirors and targets with clear guidelines regarding the approval process.

2. Congress should authorize the Federal bank reglatory agencies to establish an interagency task force to review and evaluate acquisition, change in control, and merger applications in order to shorten, harmonize and rationalize such procedures for both hostile and friendly situations.

Dated: August 17, 1989.

Jeffrey S. Lubbers,

Research Director.

BILLING CODE 6110-01-M

---

[1] Although such a task force could be established without the need for legislation, legislation would likely facilitate the agency process.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 981

[FV–89–089PR]

Expenses and Assessment Rate for Almonds Grown in California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate for the 1989–90 crop year under the marketing agreement and order for California almonds. Funds to administer this program are derived from assessments on handlers. This action is needed in order for the Almond Board of California (Board), the agency responsible for local administration of the order, to have sufficient funds to meet the expenses of operating the program. Expenses are incurred on a continuous basis.

DATES: Comments must be received by September 5, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, F&V, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Allen Belden, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone: (202) 447–5120.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Agreement and Order No. 981 (7 CFR part 981), both as amended, regulating the handling of almonds grown in California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 115 handlers of California almonds, and there are approximately 7,500 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR

121.1) as those having average gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of almond handlers and producers may be classified as small entities.

The marketing order for California almonds requires that the assessment rate for a particular crop year shall apply to all assessable almonds handled from the beginning of such year. An annual budget of expenses is prepared by the Board and submitted to the U.S. Department of Agriculture for approval. The members of the Board are handlers and producers of regulated almonds. They are familiar with the Board's needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate an appropriate budget. The budget is formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the Board is derived by dividing anticipated expenses by expected shipments of assessable almonds. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the Board's expected expenses. The recommended budget and rate of assessment are usually acted upon by the Board shortly after July 1 of each crop year, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the Board will have funds to pay its expenses.

The Board met on July 21, 1989, and unanimously recommended 1989–90 marketing order program expenditures of $12,339,618, and an assessment rate for the 1989–90 crop year of 2.75 cents per pound (kernelweight basis). The Board also recommended that handlers should be eligible to receive credit for their own marketing promotion activities for up to 2.50 cents of this 2.75-cent-per-pound assessment rate.

The 2.75-cent-per-pound 1989–90 assessment rate compares with a 1988–89 assessment rate of 2.65 cents per pound. While the 2.50-cent-per-pound creditable rate is the same as the 1988–89 rate, the 0.25-cent per-pound non-creditable portion of the total assessment, which handlers must pay to the Board, is 0.10 cents higher than the 0.15-cent-per-pound 1988–89 rate.

Projected expenses of $12,339,618 for 1989–90 compare with 1988–89 budgeted expenses of $16,130,309. Budget categories for 1989–90 are $890,200 for administrative expenses, $352,018 for production research, $937,700 for public relations, and $59,700 for the 1990 crop estimate. Comparable actual expenditures for the 1988–89 crop were $779,561, $197,101, $996,900, and $56,800, respectively. The remaining $10,100,000 of proposed 1989–90 expenses is the estimated amount which handlers would spend on their own marketing promotion activities based on a projected 1989–90 marketable California almond production of 404,000,000 kernelweight pounds and assumes that all handlers receive full credit against their 2.50-cent-per-pound creditable assessment obligations. For the 1988–89 crop year, $13,925,000 was budgeted for handler marketing promotion activities based on a projected marketable production of 557,000,000 kernelweight pounds. An actual figure is not yet available because handlers have until December 31, 1989, to complete marketing promotion activities for which they may receive credit toward their 1988–89 crop year creditable assessment obligations.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. Further, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the budget and assessment rate approval for this program needs to be expedited. The Board must have sufficient funds to pay its expenses, which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 981

Almonds, California, and Marketing agreements and orders.

For the reasons set forth in the preamble, 7 CFR part 981 is proposed to be amended as follows:

PART 981—[AMENDED]

1. The authority citation for 7 CFR part 981 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 981.336 is revised to read as follows:

Almonds Grown in California

§ 981.336 Expenses and assessment rate.

Expenses of $12,339,618 by the Almond Board of California are authorized for the crop year ending June 30, 1990. An assessment rate for that crop year payable by each handler in accordance with § 981.81 is fixed at 2.75 cents per pound of almonds (kernelweight basis) less any amount credited pursuant to § 981.41, but not to exceed 2.50 cents per pound of almonds (kernelweight basis).

Dated: August 17, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89–NM–144–AD]

Airworthiness Directives; Boeing Model 757 and 767 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to certain Boeing Model 757 and 767 series airplanes, which would require the replacement of the autopilot-flight control computer (FCC) with modified units. This proposal is prompted by reports of intermittent altitute capture/hold and anomalous flight director airspeed command in the FCC. This condition, if not corrected, could lead to navigational errors affecting air traffic aircraft separation, or an incorrect airspeed at single engine takeoff, resulting in a reduced climb gradient.

DATES: Comments must be received no later than October 16, 1989.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM–103, Attention: Airworthiness Rules Docket No. 89–NM–144–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA,

Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Frank venLeyneele, Systems and Equipment Branch, ANM–130S; telephone (206) 431–1948. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspect of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–144–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

Boeing Model 757 and 767 airplanes equipped with FCC's, part numbers (P/N) S241R100–103, –105, and –106, have been shown to have anomalous flight director commands. This is caused by a software error which can result in the flight director commanding a 15 knot high airspeed under a single engine takeoff condition. If the crew does not detect this anomaly by cross checking the primary flight display with raw data, the takeoff climb could then follow a flight path below the takeoff obstacle clearance height. In addition, P/N S241T100–105 and 106 FCC's may, at times, have the condition that the autopilot or the flight director does not capture the altitude that was selected on the mode control panel. This condition could compromise the airplane's airspace tolerances, if not corrected by the crew. This condition is the result of a modified memory storage device in the FCC that does not always initialize at zero.

The FAA has reviewed and approved Boeing Service Bulletins 767–22–0029 and 757–22–0921, both dated January 26, 1989, which provides instructions for replacing the FCC's with modified units that are not subject to these anomalies. Collins Service Bulletin FCC–701–22–16 provides instructions to rework the FCC's to the S241T100–108 configuration.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require replacement of the FCC's with modified units, in accordance with the service bulletins previously mentioned.

There are approximately 165 Model 757 series airplanes and 239 Model 767 series airplanes of the affected design in the worldwide fleet. It is estimated that 109 Model 757 series airplanes and 106 Model 767 series airplanes of U.S. registry would be affected by this AD. It would take approximately 3 manhours per airplane to accomplish the required actions and the average labor cost would be $40 per manhour. Collins, the manufacturer of the FCC, would modify the affected units at no charge to operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $25,800.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 757 and 767 series airplanes, equipped with Collins flight control computer (FCC), certificated in any category. Compliance required within 12 months after the effective date of this AD, unless previously accomplished.

To prevent intermittent altitude hold, altitude capture, and/or flight director mistracking anomalies, accomplish the following:

A. Remove Collins manufactured FCC's which have Boeing P/N/ S241T100–103, –105, and –106, and replace with units reworked to P/N S241T100–108, in accordance with Boeing Service Bulletins 757–22–0021 or 767–22–0029, both dated January 26, 1989, as appropriate.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Avionics Inspector, who will either concur or comment and then send it to the Manager, Seattle Aircraft Certification office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office,

BEST COPY AVAILABLE

FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 15, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89-NM-122-AD]

Airworthiness Directives; CASA Model C-212 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to all CASA Model C-212 series airplanes, which would require modification of the automatic power reserve (APR) system and revision to the Airplane Flight Manual that would provide new procedures for setting power. This proposal is prompted by reports that improper function of the APR system can cause improper thrust levels or engine overtorque. This condition, if not corrected, could, in the event of an engine failure on takeoff, result in the remaining engine exceeding maximum allowable torque levels and damage to or failure of that engine.

DATE: Comments must be received no later than October 16, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-122-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Contrucciones Aeronauticas, S.A. (CASA), Getafe, Madrid, Spain. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert McCracken, Standardization Branch, ANM-113; telephone (206) 431-1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-122-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

The Dirección General de Aviacion Civil (DGAC), which is the airworthiness authority of Spain, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on CASA Model C-212 series airplanes. The manufacturer has reported that improper function of the Automatic Power Reserve (APR) system, can cause improper thrust levels or engine overtorque. This condition, if not corrected, could, in the event of an engine failure on takeoff, result in the remaining engine exceeding maximum allowable torque levels and damage to or failure of that engine.

CASA has issued Service Bulletin 212-72-05, Revision 1, dated June 1, 1989, which describes procedures for replacing a switch and modifying the wiring of the APR system to provide fuel enrichment in the "Override" mode, and stipulates revisions to the Airplane Flight Manual, describing new procedures for setting power. The DGAC has classified this service bulletin as mandatory and has issued Spanish Airworthiness Directive 02-89 addressing this subject.

This airplane model is manufactured in Spain and Indonesia and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of this same type design registered in the United States, an AD is proposed which would require modification of the APR system and incorporation of a revision into the FAA-approved Airplane Flight Manual, describing new procedures for setting power, in accordance with the service bulletin previously described.

It is estimated that 43 airplanes of U.S. registry would be affected by this AD, that it would take approximately 6 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The estimated cost for the required parts is $350 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $25,370.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

CASA: Applies to all Model C-212 series airplanes, certificated in any category. Compliance required within 60 days after the effective date of this AD, unless previously accomplished.

To prevent, following an engine failure on takeoff, damage to or failure of the remaining engine caused by overtorquing, accomplish the following:

A. Modify the Automatic Power Reserve (APR) system in accordance with CASA Service Bulletin 212-72-05, Revision 1, dated June 1, 1989.

B. Upon accomplishment of the modification required by paragraph A., above, revise the FAA-approved Airplane Flight Manual to include the appropriate revision, which provides new procedures for setting power, as specified in Paragraph 1.B. of CASA Service Bulletin 212-72-05, Revision 1, dated June 1, 1989.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Contrucciones Aeronauticas, S.A. (CASA), Getafe, Madrid, Spain. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 15, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 73

[Airspace Docket No. 89-ASO-34]

Proposed Establishment of Restricted Area R-7105; PR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish Restricted Area R-7105 located in the vicinity of Lajas, PR. The restricted area is necessary to provide airspace to contain an aerostat radar surveillance (ASR) system for drug interdiction purposes. This action is in support of a project linked to the Customs Service Southern Border Drug Interdiction Strategy.

DATE: Comments must be received on or before October 2, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, ASO-500, Docket No. 89-ASO-34, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-34." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendent to part 73 of the Federal Aviation Regulations (14 CFR part 73) to establish Retricted Area R-7105 located in the vicinity of Lajas, PR. The restricted area is required to provide the necessary airspace to activate an ASR system for drug interdiction purposes. This project is part of the Customs Service Southern Border Drug Interdiction Strategy. Section 73.71 of part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 73 of the Federal Aviation Regulations (14 CFR Part 73) as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for part 73 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 73.71 [Amended]

2. Section 73.71 is amended as follows:

R-7105 Lajas, PR [New]

Boundaries. That airspace within a 3-nautical-mile radius centered on lat. 17°58'45" N., long. 67°04'55" W.

Designated altitudes. Surface to and including 15,000 feet MSL.

Times of designation. Continous.

Controlling agency. FAA, San Juan CERAP.

Using agency. Puerto Rico Police Department.

Issued in Washington, DC, on August 14, 1989.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 73

[Airspace Docket No. 89-ASO-33]

Proposed Establishment of Restricted Area R-2936; West Palm Beach, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish Restricted Area R-2936 West Palm Beach, FL, located approximately 4 miles west of the William P. Gwinn Airport, Jupiter, FL. The Pratt and Whitney Company, a division of United Technologies, is developing a turbopump for the main engine of the Space Shuttle. Ground test firing of hydrogen gas, through an exhaust stack, would create significant turbulence and ambient air temperature increase which would be hazardous up to and including 10,000 feet.

DATE: Comments must be received on or before October 2, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, ASO-500, Docket No. 89-ASO-33, Federal Aviation Administration, P. O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-33." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 73 of the Federal Aviation Regulations (14 CFR part 73) to establish Restricted Area R-2936. The Pratt and Whitney Company, a division of United Technologies, has requested the establishement of the restricted area. Pratt and Whitney has been awarded a contract to develop a turbopump for the main engine of the Space Shuttle. During test firing the hydrogen gas is released through an exhaust stack. Calculations indicate that significant turbulence and high air temperatures would be hazardous up to and including 10,000 feet. Section 73.29 of part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routing amendmets are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routing matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 73 of the Federal Aviation Regulations (14 CFR part 73) as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 73.29 [Amended]

2. Section 73.29 is amended as follows:

R-2936 West Palm Beach, FL [New]

Boundaries. That airspace within a 1-nautical-mile radius centered at lat. 26°54'09"N., long 80°22'56"W.

Designated altitudes. Surfaced to and including 10,000 feet MSL.

Time of designation. Intermittent, by NOTAM.

Controlling agency. FAA, Palm Beach ATCT.

Using agency. United Technologies, Pratt and Whitney Company, West Palm Beach, FL.

Issued in Washington, DC, on August 10, 1989.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

[FR Doc. 89-19797 Filed 8-22-89; 8:45 am]

BILLING CODE 4910-13-M

Office of the Secretary

14 CFR Parts 380 and 399

[OST Docket No. 46410; Notice No. 89-6A]

RIN 2105-AB50

Price Advertising

AGENCY: Office of the Secretary, DOT.

ACTION: Extension of comment period.

SUMMARY: This notice extends the comment period from August 25, 1989 until September 25, 1989 on the DOT's Price Advertising rulemaking (54 FR 31052, July 26, 1989). In the rulemaking, the Department is proposing to amend its rule and policy statement with respect to air transportation price advertising under 14 CFR parts 380 and 399 to comport with its current enforcement policy. The proposal would allow advertisers to list government-imposed and government-approved charges that are levied on a per passenger basis separately in price advertisements. It also would codify current practice allowing the advertisement of one-way fares that are available only on a round-trip basis, provided the ads are clear with regard to the round-trip conditions.

DATES: Comments are due on or before September 25, 1989.

ADDRESSES: Comments must be filed in Room 4107, Docket 46410, U.S. Department of Transportation, 400 7th St., SW., Washington DC 20590. Late-filed comments will be considered to the extent possible.

FOR FURTHER INFORMATION CONTACT: Samuel E. Whitehorn, Office of the General Counsel, C-50, (202) 366-9307, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: On August 15, 1989, the Attorney General of the State of Texas (Texas AG), on behalf of California, Iowa, Kansas, and New York, submitted a request for an extension of the comment period for 90 days. The Texas AG claims that the extension is needed because the rulemaking is a significant change from existing law, other organizations have indicated to the Texas AG that they also need additional time, and the State of Texas needs information recently requested from the Department under the Freedom of Information Act to prepare an adequate comment.

We do not believe that a 90 day extension is warranted. First, the rulemaking "merely codifies existing practices and enforcement policies" (54 FR at 31054), and does not constitute a change from existing law. Second, to date no other requests for extensions have been filed. Third, while the State has filed a FOIA request, the mere filing does not justify an extension. Allowing persons to seek more time on that basis would provide an avenue for others to seek delays in the rulemaking process. Finally, even under the Department's Regulatory Policies and Procedures, significant rulemakings are generally afforded only a 60-day comment period (44 FR 11044, Feb. 26, 1979). However, we have decided to exercise our discretion and provide an additional 30 days for persons to comment. Comments are now due on or before September 25, 1989.

Issued in Washington, DC on August 21, 1989.

Jeffrey N. Shane,

Assistant Secretary for Policy and International Affairs.

[FR Doc. 89-19999 Filed 8-21-89; 1:51 pm]

BILLING CODE 4910-62-M

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 0

[Order No. 1360-89]

Establishment of User Fees

AGENCY: Office of the Attorney General, Justice.

ACTION: Proposed rule.

SUMMARY: The Department of Justice, United States National Central Bureau (USNCB)—INTERPOL is proposing to amend its regulations to establish a system of user fees for the noncriminal inquiries it processes yearly. The effect of the change will permit the USNCB to recover the administrative costs the USNCB incurs when processing these noncriminal inquiries.

DATES: Comments must be received on or before September 22, 1989.

ADDRESSES: Interested persons are invited to submit written comments regarding this change to Chief, United States National Central Bureau (INTERPOL), U.S. Department of Justice, Washington, DC 20530. All comments received will be available for public inspection only in the U.S. National Central Bureau (INTERPOL), 600 E Street, NW., Suite 600, Washington, DC 20530, and only between the hours of 9:00 a.m. through 5:00 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: Ronald B. Abrams, Counsel to the U.S. National Central Bureau (INTERPOL), (202) 272-8383. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The regulation is being expanded to permit the collection of user fees for noncriminal inquiries to the USNCB, such as background checks pertaining to adoptions, gaming licensing, and state bar examination applicants. The fees are intended to recover the administrative costs the USNCB incurs in processing the noncriminal inquiries.

This is not a major rule within the meaning of Executive Order 12291. This will not have an impact on a significant number of small businesses. 5 U.S.C. 901.

List of Subjects in 28 CFR Part 0

Authority: delegations (Government agencies).

By the authority vested in me including 28 U.S.C. 509, and 5 U.S.C. 301, subpart F-2 of part 0 of title 28 of the Code of Federal Regulations is proposed to be amended as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

1. The authority citation for part 0 continues to read as follows:

Authority: 5 U.S.C. 301, 2303, 3101; 8 U.S.C. 1103, 1324A, 1427(g); 15 U.S.C. 644(k); 18 U.S.C. 2254, 3621, 3622, 4001, 4041, 4042, 4044, 4201 et seq., 6003(b); 21 U.S.C. 871, 881(d), 904; 22 U.S.C. 263a, 1621–1645o, 1622 note; 28 U.S.C. 509, 510, 515, 516, 519, 524, 543, 552, 552a, 569; 31 U.S.C. 1108, 3801 et seq.; 50 U.S.C. App. 1989b, 2001–2017p; Pub. L. 91–513, sec. 501; E.O. 11919; E.O. 11267; E.O. 11300.

2. Subpart F–2, § 0.34 is amended by adding a new paragraph (g) to read as follows:

0.34 General functions.

* * * * *

(g) Establish and collect user fees to process name checks and background records for licensing, humanitarian and other non-law enforcement purposes.

Dated: August 15, 1989.

Dick Thornburgh,

Attorney General.

BILLING CODE 4410-01-M

DEPARTMENT OF VETERANS AFFAIRS

DEPARTMENT OF DEFENSE

38 CFR Part 21

RIN 2900–AD88

Veterans Education; State Approving Agencies and the Post-Vietnam Era Veterans' Educational Assistance Program

AGENCY: Department of Veterans Affairs and the Department of Defense.

ACTION: Proposed regulations.

SUMMARY: The Veterans' Employment, Training and Counseling Amendments of 1988 contain several provisions which affect the Department of Veterans Affairs' (VA's) relationships with the State approving agencies (SAAs). In order to implement the new provisions of law VA has proposed a new section, § 21.4155, in 38 CFR part 21, subpart D. (See 54 FR 21230, May 17, 1989.) In administering Chapter 32, Title 38, United States Code, VA will apply the provisions of that new section in the same manner that it will be applied in the administration of chapters 34 and 36.

DATES: VA the Department of Defense are proposing to make the proposed amendment to § 21.5150, like the provision of law it implements, retroactively effective on May 20, 1988. Comments must be received on or before September 22, 1989. Comments will be available for public inspection until October 2, 1989.

ADDRESSES: Send written comments to: The Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420. All written comment received will be available for public inspection only in the Veterans Services Unit, room 132 of the above address, between the hours of 8 a.m. to 4:30 p.m., Monday through Friday (except holidays) until October 2, 1989.

FOR FURTHER INFORMATION CONTACT: Alan R. Zoeckler, Acting Assistant Director for Education Policy and Program Administration, Vocational Rehabilitation and Education Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–2092.

SUPPLEMENTARY INFORMATION: The Veterans' Employment, Training and Counseling Amendments of 1988 (Pub. L. 100–323) contain several provisions which affect VA's relationships with the various SAAs. Previously, the law provided that no department, agency, or officer of the United States could exercise any supervision or control over a State approving agency. This provision was the foundation of VA's relationships with SAAs.

Public Law 100–323 envisions a substantially new relationship. In particular, the law requires the Secretary of Veterans Affairs to conduct, in conjunction with SAAs, an annual evaluation of each SAA on the basis of standards developed by VA with the cooperation of the SAAs and to give each SAA an opportunity to comment on its evaluation. VA must take into account the results of the annual evaluation of the SAA when negotiating the terms and conditions of a contract or agreement with the SAA. VA may now supervise functionally the providing of approval services by the SAAs. VA must cooperate with SAAs in developing and implementing, to the extent practicable, a uniform national curriculum for training new SAA employees and for the continuing training of SAA employees. VA with the SAAs will sponsor the providing of this training. Finally, VA will prescribed prototype qualification and performance standards, developed in conjunction with SAAs, for use by the SAAs in the development of individual qualification and performance standards for SAA personnel carrying out approval duties.

In order to implement many of these new provisions of law, VA has proposed a new section, § 21.4155. In administering the Post-Vietnam Era Veterans' Educational Assistance Program (VEAP) the Department intends to apply the provisions of § 21.4155 in the same manner as it is applied to the administration of the Vietnam Era GI Bill.

VA and the Department of Defense find that good cause exists for making the amendment to § 21.5150, like the provision of law it implements, retroactively effective on May 20, 1988. To achieve the maximum benefit of this legislation for the State approving agencies it is necessary to implement these provisions of law as soon as possible. A delayed effective date would be contrary to statutory design; and would complicate administration of these provisions of law.

VA and the Department of Defense have determined that this amended regulation does not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulation will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Secretary of Veterans Affairs and Secretary of Defense have certified that this amended regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the amended regulation, therefore, is exempt from the initial and final regulatory flexibility analyses requirements of §§ 603 and 604.

This certification can be made because the regulation affects only State approving agencies. It will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance number for the program affected by this regulation is 64.120.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: May 26, 1989.

Edward J. Derwinski,

Secretary of Veterans Affairs.

Approved: June 30, 1989.

Donald W. Jones,

Lieutenant General, USA, Deputy Assistant Secretary, (Military Manpower & Personnel Policy).

PART 21—[AMENDED]

In 38 CFR part 21, Vocational Rehabilitation and Education, § 21.5150 is revised to read as follows:

§ 21.5150 State approving agencies.

In administering chapter 32, title 38, United States Code, VA will apply the provisions of the following paragraphs in the same manner as they are applied for the administration of chapters 34 and 36:

(a) Section 21.4150 (except par. (e))—Designation

(b) Section 21.4151—Cooperation

(c) Section 21.4152—Control by agencies of the United States

(d) Section 21.4153—Reimbursement of expenses

(e) Section 21.4154—Report of activities

(f) Section 21.4155—Evaluations of State approving agency performance

(Authority: 38 U.S.C. 1641, 1770–1774, 1774A; Pub. L. 94–502, Pub. L. 100–323)

BILLING CODE 8320-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA–6965]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed modified base (100-year) flood elevations listed below for selected locations in the nation These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of modified base (100-year) flood elevations for selected locations in the nation, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the floodplain management required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents. Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed modified flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinacnes, which, if adopted by a local community, will govern future construction within the floodplain area. The local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not prescribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2 and 15

[Gen. Docket No. 89-354 FCC 89-254]

Spread Spectrum Systems

AGENCY: Federal Communications Commission.

ACTION: Proposed rules.

SUMMARY: The notice of proposed rule making proposes to clarify the rules concerning the operation of spread spectrum systems under the part 15 rules by specifying the minimum length for the spreading codes for direct sequence spread spectrum systems. A minimum spreading code of 127 pseudorandomly generated bits is proposed. This requirement appears necessary to provide guidance to the industry and to minimize the potential interference that could be generated from the 1 watt transmitter power which these systems are authorized to transmit. The notice of proposed rule making also proposes to increase the maximum hopping channel bandwidth for frequency hopping systems from 25 kHz to 500 kHz. As the maximum transmitted power limit of 1 watt will be retained for these systems, the proposed increase in channel bandwidth would in most cases decrease potential interference by spreading the transmitted power over a larger bandwidth.

DATES: Comments are due on or before October 2, 1989, and Reply Comments are due on or before October 17, 1989.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Dr. Joseph F. McNulty, Engineering Evaluation Branch, Office of Engineering and Technology, (301) 725-1585.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's notice of proposed rule making in GEN Docket No. 89-354, FCC 89-254 adopted August 9, 1989, and released August 16, 1989. The full text of the Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of the Notice of Proposed Rule Making

1. Spread spectrum systems are communications systems in which information is conveyed by modulation of a carrier by some conventional means, but the bandwidth is deliberately broadened by means of a spreading function over a much wider bandwidth than that which would be needed to convey the information alone. On May 9, 1985, in the First Report and Order in General Docket No. 81-413 (50 FR 25234, June 18, 1985), the Commission adopted provisions for the use of spread spectrum emissions under § 15.126 of the rules. The rules allowed direct sequence and frequency hopping spread spectrum systems to operate in the 902-928 MHz, 2400-2483.5 MHz and 5725-5850 MHz frequency bands. Since that time, the Commission has received many requests for clarification of the minimum length of the spreading code.

2. In our analysis to determine an appropriate minimum length for the spreading code of direct sequence systems, the rules governing spread spectrum operation in the Amateur Radio Service were reviewed. The Amateur Radio rules require that a minimum spreading code length of 127 bits be used. This minimum length also appears a reasonable choice as the minimum length standard for part 15 direct sequence systems. Pseudorandomly generated codes of this length will provide an adequate and uniform spreading of the transmitted energy. As such codes are fairly easy to generate, the proposed rules would not be expected to impose a new technological burden upon industry. Therefore, we are proposing a minimum pseudorandomly generated code length of 127 bits.

3. To further encourage the development of this technology, the proposed rules would allow frequency hopping sytems to operate in the 902-928 MHz, 2400-2483.5 MHz and 5725-5850 MHz bands with hopping channel bandwidths of 500 kHz. As the maximum output power for these systems will still be maintained at 1 Watt, the larger hopping channel bandwidth would in most cases reduce any potential interference from these systems since the transmitted power is being spread over a larger bandwidth. However, to accommodate nonoverlapping hopping channels of 500 kHz bandwidth in the 902-928 MHz band, the minimum number of hopping frequencies prescribed for a frequency hopping system operating in this band would be reduced from 75 to 50. To further reduce potential interference to other communications systems operating within these bands, the new rules propose that the channel occupancy time for frequency hopping systems be averaged over a 5 second interval in the 902-928 MHz band and a 7.5 second interval in the 2400-2483.5 MHz and 5725-5850 MHz bands rather than the present 30 second interval.

4. This is a non-restricted notice and comment rule making proceeding. See § 1.1231 of the Commission's rules, 47 CFR 1.1231 for rules governing permissible ex parte contacts.

5. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, the proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities because it provides guidance and minimum standards consistent with the industry's needs. Public comment is requested on the initial regulatory flexibility analysis set out in full in the Commission's complete decision.

6. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose no additional information collection requirement on the public.

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419, interested parties may file comments on or before October 2, 1989, and reply comments on or before October 17, 1989. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

Rule Changes

A. Title 47 of the Code of Federal Regulations, part 2, is proposed to be amended as follows:

PART 2—[AMENDED]

1. The authority citation for part 2 would continue to read as follows:

Authority: Sec. 4, 302, 303, and 307 of the Communications Act of 1934, as amended, 47 U.S.C. 154, 302, 303, and 307.

2. Section 2.1 would be amended by adding the following definition in alphabetical order:

§ 2.1 Terms and definitions.

* * * * *

Pseudorandom sequence. A pseudorandom sequence is a sequence of data which has some of the characteristics of a random sequence but also has some characteristics which are not random. It resembles a true random sequence in that the one bits and zero bits of the sequence are distributed randomly throughout every length, N, of the sequence and the total numbers of the one and zero bits in that length are approximately equal. It cannot be called a true random sequence however because it consists of a fixed number (or length) of coded bits which repeats itself exactly whenever that length is exceeded, and because it is generated by a fixed algorithm from some fixed initial state.

* * * * *

B. Title 47 of the Code of Federal Regulations, part 15, is proposed to be amended as follows:

PART 15—[AMENDED]

1. The authority citation for part 15 would continue to read as follows:

Authority: Sec. 4, 302, 303, 304, and 307 of the Communications Act of 1934, as amended, 47 U.S.C. 154, 302, 303, 304, and 307.

2. Section 15.247 would be amended by revising paragraph (a)(1) and adding paragraph (d) to read as follows:

§ 15.247 Operation within the Bands 902-928 MHz, 2400-2483.5 MHz, and 5725-5850 MHz.

(a) * * *

(1) Frequency hopping systems shall have non-overlapping hopping channels and the 20 dB bandwidth of the hopping channel shall not exceed 500 kHz. The hopping channel carrier frequencies shall be separated by at least 25 kHz, or the 20 dB bandwidth of the hopping channel, whichever is greater. At least 50 hopping frequencies shall be used for frequency hopping systems operating in the 902-928 MHz band; at least 75 hopping frequencies shall be used for frequency hopping systems operating in the 2400-2483.5 MHz and 5725-5850 MHz bands. The average time of occupancy on any frequency shall not be greater than 100 milliseconds within a 5 second period for frequency hopping systems operating in the 902-928 MHz band, and 100 milliseconds within any 7.5 second period for frequency hopping systems operating in the 2400-2483.5 MHz and 5725-5850 MHz bands. Each hopping frequency must be selected at least once in the hopping sequence before it repeats.

* * * * *

(d) For direct sequence systems, a pseudorandom spreading code which generates at least 127 binary bits before repeating shall be used. Alternative codes to produce the spreading for direct sequence systems will be accepted provided that the spreading of the resulting emissions is at least as random as that which would be produced using a code which generates 127 bits before repeating.

47 CFR Part 73

[MM Docket No. 88-516, RM-6123]

Television Broadcasting Services; Yreka City, CA, and Medford, OR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; Further Notice.

SUMMARY: The Commission is issuing a Further Notice in the above-referenced proceeding to provide an opportunity to comment on a proposal by Junko and Bobby C. Shehan to substitute Channel 26 for Channel 27 at Medford, Oregon, and to modify their application accordingly. Petitioners' original proposal to substitute Channel *35 for Channel *20+ at Yreka City, California, to accommodate their intended site for Channel 27 at Medford was withdrawn. See 53 FR 45524, November 10, 1988. Coordinates for Channel 26 at Medford are 42-17-54 and 122-44-59.

Although the Commission has imposed a freeze on TV allotments, or applications therefor in specified metropolitan areas pending the outcome of an inquiry into the uses of advanced television systems (ATV) in broadcasting, this proposal is not affected thereby.

DATES: Comments must be filed on or before October 6, 1989, and reply comments on or before October 23, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

In addition to filing comments with the FCC, interested parties should serve the petitioners, as follows: Junko and Bobby C. Shehan, 2032 Amsterdam Lane, Modesto, CA 95356.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 88-518, adopted August 1, 1989, and released August 15, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

47 CFR Part 100

[MM Docket No. 89-355; FCC 89-256]

Policies and Requirements Regarding Potential Uses of Certain Orbital Allocations by Operators in the Direct Broadcast Satellite Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rules; policies and requirements.

SUMMARY: This action solicits comment on what policies to adopt and requirements to impose in connection with the possible use of Direct Broadcast Satellite (DBS) signals that cover the entire continental United States with single DBS channels at the eastern DBS orbital positions, and corresponding use of western DBS orbital positions for alternative services. This mode of transmission had not been heretofore authorized, so the possible effects, including ancillary services now possibly available, had not been

previously considered. The Commission intends to adopt requirements and policies to govern such alternative services from the western DBS orbital locations, and in so doing will consider the effects of its action on possible DBS service to Alaska and Hawaii.

DATES: Comments must be submitted on or before October 13, 1989, and reply comments on or before November 13, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Distribution Services Branch, Bruce Romano, (202) 632–9356.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking, in MM Docket No. 89–355, FCC 89–258, Adopted August 2, 1989, and Released August 15, 1989.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rulemaking in MM Docket No. 89–355

1. In this notice of proposed rulemaking, the Commission is seeking comment on the requirements or policies that may be appropriate to govern the services which may be offered on DBS frequencies from the western DBS orbital locations if full DBS service is provided from the DBS eastern orbital locations via full-CONUS signals.

2. The notice is issued in conjunction with Continental Satellite Corporation, FCC 89–257, adopted August 2, 1989, released August 15, 1989, in which the Commission formalized the requirement that DBS orbit/channel allocations be made in east/west pairs, provided for DBS service via full-CONUS signals, and granted a number of conditional construction permits for DBS systems.

3. The Commission seeks comment on a variety of issues implicated by its action in Continental Satellite Corporation, including application and licensing requirements and operational restrictions for service from the western DBS orbital allocations. It also seeks comment on the effects of full-CONUS signals and alternative services from western DBS orbital allocations on DBS service to Alaska and Hawaii, and what provisions, if any, may be appropriate to affect the provision of such service.

4. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposals will not, if promulgated, have a significant economic impact on a substantial number of small entities, as only a small number of entities are potentially affected by the proposals, and most of those affected will not be small entities.

5. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and will not increase or decrease the burden hours imposed on the public.

6. This is a restricted notice and comment rule making proceeding. See § 1.1229 of the Commission's rules, 47 CFR 1.1229, for rules regarding permisible *ex parte* contacts.

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments on or before October 13, 1989, and reply comments on or before November 13, 1989. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

BILLING CODE 6712-01-M

PANAMA CANAL COMMISSION

48 CFR Ch. 35

RIN 3207–AA10

Acquisition Regulation; Establishment of Chapter 35

AGENCY: Panama Canal Commission.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on the Panama Canal Commission proposal to establish the Panama Canal Commission Acquisition Regulation (PAR) as chapter 35 of the Federal Acquisition Regulations System.

The proposed PAR implements and supplements the Federal Acquisition Regulation (FAR), which is the primary acquisition regulation that governs the contracting process of all executive agencies or otherwise controls the relationship between such agencies and their contractors or prospective contractors. This action is necessary to provide regulatory coverage pertinent to Commission acquisitions that is not otherwise provided in the FAR.

DATE: Written comments must be submitted not later than October 23, 1989, for consideration in the formulation of a final rule.

ADDRESS: The full text of the PAR proposed rule is available upon request, by telephoning Barbara Fuller at (202) 634–6441, or writing to Michael Rhode, Jr., Assistant to the Chairman and Secretary, Panama Canal Commission, 2000 L Street NW., Suite 550, Washington, DC 20036–4996.

Written comments should be submitted to Richard D. Morgan, Procurement Executive, Panama Canal Commission, at the above address.

FOR FURTHER INFORMATION CONTACT: Barbara Fuller, Assistant to the Secretary for Commission Affairs, Panama Canal Commission, telephone (202) 634–6441, or Jim Doyle, Assistant Procurement Executive, telephone in Balboa, Republic of Panama, 011–507–52–4074.

SUPPLEMENTARY INFORMATION:

I. Background
II. Procedural Requirements
A. Executive Order 12291
B. Regulatory Flexibility Act
C. Paperwork Reduction Act
III. Public Comments

I. Background

The Federal Acquisition Regulation (FAR) is the uniform acquisition regulation for all executive agencies of the United States Government. The FAR is codified as chapter 1 of title 48 of the Code of Federal Regulations.

Because of differing statutory authorities among Federal agencies and because as a practical matter the FAR cannot contain all the procedural details of how to implement a particular policy, the FAR authorizes agencies to issue implementing and supplementing regulations. The regulation being proposed here represents the Commission's necessary implementation and supplementation of the FAR.

Since the FAR is the uniform Government-wide acquisition regulation, reviewers of the proposed PAR are advised that lack of coverage of a particular topic in the PAR means that the Commission shall use the FAR coverage of the topic without further implementing detail.

II. Procedural Requirements

A. *Executive Order 12291.* The proposed rule is not classified as a major rule because it does not meet the criteria for a major rule established in the executive order.

B. *Regulatory Flexibility Act.* The Panama Canal Commission certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities because the rule serves only to implement or supplement the Federal Acquisition Regulation.

C. *Paperwork Reduction Act.* The information collection and recordkeeping requirements that are imposed on the public by the proposed rule were approved by the Office of Management and Budget (OMB) and have been assigned OMB Control No. 3207–0007.

III. Public Comments

Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments in writing with respect to the proposed PAR. Any information considered confidential must be so identified and submitted in writing, one copy only. The Commission reserves the right to determine the confidential status of the information and to treat it according to its determination. Comments should be submitted to Richard D. Morgan at the address indicated under the "**ADDRESS**" caption of this preamble. All comments received not later than the date under the "DATE" caption of the preamble will be considered prior to publication of the PAR as a final rule.

BILLING CODE 3640-04-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 85–18; Notice 03]

Federal Motor Vehicle Safety Standards; Reflecting Surfaces

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Termination of rulemaking.

SUMMARY: This notice terminates a rulemaking action commenced by the agency in a notice of proposed rulemaking (NPRM) that would have extended Standard No. 107, *Reflecting Surfaces,* to non-metallic materials used in the list of components already specified in the standard. In view of the lack of substantiation of a problem, the apparent insignificance of any problem that does exist, and the costliness of developing and using a more complex test procedure, NHTSA has determined that extending the standard is not appropriate. This conclusion is reinforced by resource considerations. Given the amount of resources already committed to the agency's other safety rulemaking priorities, NHTSA cannot justify the substantial additional resource commitment which would be required to extend Standard No. 107 to non-metallic components.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin Cavey, Crash Avoidance Division, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington DC 20590. Telephone: (202) 366–5271.

SUPPLEMENTARY INFORMATION:

Background

Federal Motor Vehicle Safety Standard No. 107, *Reflecting Surfaces,* (49 CFR 571.107) specifies reflecting surface requirements and a test procedure for certain bright metal vehicle components in the driver's field of view. The components listed in the standard, and therefore subject to its requirements, are the windshield wiper arms and blades, inside windshield moldings, horn ring and the hub of the steering wheel assembly, and the inside rearview mirror frame and mounting bracket. The standard applies to passenger cars, multipurpose passenger vehicles, trucks and buses, but does not apply to items of motor vehicle equipment.

Standard No. 107's intended purpose is to prevent glare (i.e., reflected sunlight) from the surfaces of the above mentioned components in the driver's field of view from hindering the safe and normal operation of a motor vehicle. The standard does this by regulating the specular gloss, which is the amount of light reflected from a test specimen. The specular gloss of the covered components must not exceed a specified test value referred to in the standard.

On February 14, 1985, Ms. Patricia Hill petitioned the agency to amend the standard, claiming that it was "obsolete, excessively specific, and unresponsive to changes in design, styling, and materials application that have occurred" since its issuance. The petitioner sought to expand the standard to any highly reflective component within the driver's field of view, and in the alternative, to high gloss non-metallic materials used in components specified in the standard.

On January 7, 1986, the agency granted the petition and issued a notice requesting comments concerning the effect of glare from unregulated components within the driver's field of view. 51 FR 657. In this notice, the agency specifically asked for comments concerning (1) whether the standard should be expanded to include additional components in the driver's field of view other than those currently listed in S4; (2) whether the standard should be expanded to include non-metallic components; (3) whether the incorporation by reference of the ASTM Standard established in 1962 to test the specular gloss should be updated to the 1980 revised ASTM Standard; and (4) whether Standard No. 107 should be revised to add a certification and marking requirement for manufacturers of the listed components. Given the absence of information regarding the need to regulate non-metallic components, the notice also raised the larger question of whether a safety need existed to retain the performance criteria of the existing standard.

On November 13, 1987, NHTSA issued a notice of proposed rulemaking (NPRM) proposing to revise Standard No. 107 to extend the specular gloss requirements to non-metallic materials used in parts that are currently listed in the standard. 52 FR 43628. The agency tentatively concluded that (1) "the absence of accidents or consumer complaints attributed to glare from components subject to Standard No. 107 [was] an insufficient basis to conclude that a safety hazard would not exist in the absence of the standard." (2) there was "no valid reason to distinguish between the safety hazards that could be caused by highly reflective metallic components versus highly reflective non-metallic components," and (3) that "no safety need has been demonstrated that would warrant adding components to Standard No. 107 at the time" because the identified components were the principal sources of glare. Accordingly, while proposing to extend the standard to those non-metallic surfaces already specified in Standard No. 107, the agency declined to propose rescinding the standard or expanding it to additional parts within the driver's field of view. The agency also did not propose any additional labeling or certification requirements.

II. Summary of Comments

NHTSA received six comments in response to the NPRM. The commenters were all motor vehicle manufacturers:

Blue Bird, Chrysler Motors, Mazda. Volkswagen of America, General Motors, and Ford. The commenters typically restated their views made to the request for comments in Docket 85–18, Notice 1. Twelve vehicle manufacturers, a testing laboratory, and an individual submitted comments to that earlier docket.

A. Safety Need and Costs

General Motors, Chrysler, and Mazda stated that there was no safety need and no benefits to justify extending the standard to non-metallic materials used in parts currently specified in the standard. These commenters believed that the costs related to extending the standard in this manner were unnecessary and excessive. Accordingly, they concluded that extending Standard No. 107 to parts made with non-metallic materials was not warranted.

Chrysler, Mazda, and General Motors further commented that Standard No. 107 should be rescinded because there is no safety need to support its retention.

Chrysler argued that there was no safety need for retaining or extending the standard. In particular, they stated that they were "not aware of any safety problems or complaints from the reflection of logos or trademarks which have been made from nonmetallic materials." Chrysler concluded that "(t)he additional cost from amending FMVSS No. 107 as proposed has not been supported by a safety need and will not provide an equivalent safety benefit."

Mazda argued that the agency's proposal to expand the standard "establishes a poor precedent by establishing stricter compliance requirements without evidence that additional requirements are needed." Mazda further stated that "Data does exist showing that there have been zero claims of unsafe glare from surfaces within the view of the driver." (emphasis in original). As a result, Mazda claimed that unnecessary costs related to certification and compliance testing, quality assurance testing, and recordkeeping would be passed to the consumer. Mazda further argued that extending the standard to non-metallic components would be based on an "undefined subjective analysis" rather than data and thus would be contrary to the Motor Vehicle Safety Act. These factors led Mazda to conclude that the agency should "delete FMVSS 107 or, at the very least, retain it unchanged."

General Motors stated that there are not any data establishing a correlation between glare from non-metallic components and motor vehicle accidents, and without such cause and effect evidence, the standard should not be expanded. Similarly, they argued that no data exist showing glare from presently unregulated components has presented a safety hazard. General Motors concluded that while "lack of evidence demonstrates current specifications are doing their job, one cannot argue that the lack of evidence justifies an expansion of the applicability of these same requirements." General Motors disagreed with the NPRM's statement that the costs necessary to comply with the extended standard would be minimal. They argued that the agency did not to provide documentation and claimed that adopting the proposal would impose a substantial burden on them. In particular, General Motors stated that the amendment "would require General Motors to scrap a significant amount of tooling * * * and * * * redesign the affected components for approximately one-half of all General Motors vehicles [and that] [t]he costs associated with these actions would be substantial."

On the other hand, Blue Bird stated without elaboration that the proposed rule appear(s) logical and in the best interest of safety. Volkswagen stated that it would not oppose the proposed extension to non-metallic components, provided that additional components were not added to the list of regulated components. Ford generally agreed with the proposal, commenting that glare could be caused as easily by non-metallic as by metallic surfaces.

B. Adequacy of Test

Chrysler and Ford questioned whether the procedures in ASTM Standard D523–62T (June 1962), which is incorporated by reference in Standard No. 107, are objective and meet the need for motor vehicle safety. Ford noted that this standard requires use of specially prepared samples that must be flat and a minimum size. Based on the limitations in the current test, Ford commented that the standard should more closely reflect real world conditions in vehicles. Chrysler and Ford contended that the test has the following shortcomings: (1) The test is inappropriate to measure the actual gloss on non-metallic surfaces, (2) it is inappropriate to measure the gloss on components such as logos on the vehicle steering wheels that are composed of both metallic and non-metallic surfaces, (3) it is inappropriate to measure smaller components, (4) it is inappropriate to test curved or transparent components, and (5) it is inappropriate for the standard to test surrogate rather than actual parts. These alleged deficiencies in the test led Ford to state that NHTSA must provide a test that will adequately measure these types of surfaces and that extending the requirement to non-metallic components raises unique problems.

As a result of these doubts, Chrysler requested an exception for the corporate logos because they would be difficult to measure. Similarly, General Motors noted that these emblems would be the component most affected by this rule and anticipated that 50 percent of their steering wheel pads would be in non-compliance with the new standard.

III. NHTSA Determination to Terminate Rulemaking

The agency begins its discussion of the public comments by noting that decision making regarding crash avoidance rulemaking is inherently difficult. While engineering and crash analyses can clearly demonstrate that certain vehicle improvements (e.g., better braking, better lighting) will facilitate the performance of the driver's task and thereby should improve safety, at times it is virtually impossible to isolate and quantify the individual factors leading to crashes and arrive at precise and certain conclusions about the quantified benefits that will accrue from those improvements. Accordingly, the existence or nonexistence of data or analyses linking vehicle components and performance to crash causation is not necessarily determinative of the outcome of decisions concerning crash avoidance rulemaking. Given NHTSA's duty to act in the area of crash avoidance notwithstanding an inherent measure of imprecision and uncertainty, the agency has developed and issued crash avoidance standards while attempting within its capabilities to quantify the benefits of the standards and thus limit the uncertainty. The agency emphasizes that those rulemakings depend in part on policy judgment regarding the significance of the safety problem and other factors such as the degree of difficulty in developing performance requirements and compliance test procedures.

In this rulemaking, the agency is confronted with an alleged problem which is unconfirmed by either crash causation data and analysis or consumer complaints. Further, any problem that might exist would appear to be relatively insignificant compared to the crash avoidance problems presented by other vehicle systems and components such as brake systems, lights and tires.

The agency is also confronted with a variety of criticisms regarding the test procedure. NHTSA recognizes that the sample currently used in compliance test procedure is not fully representative of the size and shape of some of the components regulated by the standard. However, the agency regards the test as an appropriate balance between representativeness on the one hand and cost and ease of testing on the other. By specifying what might be characterized as "worst case" testing, the standard seeks to ensure that all covered components, regardless of their individual peculiarities in size and/or shape, comply with the limits on glare. However, extending the standard to non-metallic components, which are apparently often smaller and more frequently curved than metallic components, might make it appropriate for the agency to develop a potentially much more complex test procedure that provides for testing of samples smaller and more curved than the currently specified samples. The development of such a test would be a costly and time consuming task.

In view of the lack of substantiation of the problem, the apparent insignificance of the problem, and the costliness of developing and using a more complex test procedure, NHTSA has determined that extending the standard is not appropriate and is therefore terminating this rulemaking. This conclusion is reinforced by resource considerations Given the amount of resources already committed to the agency's other safety rulemaking priorities, NHTSA cannot justify the substantial additional resource commitment which would be required to extend Standard No. 107 to non-metallic components.

IV. Miscellaneous Issues

Commenters raised additional issues such as harmonization, leadtime, consumer preferences, the standards's applicability to original parts but not aftermarket parts, and consumer preferences. NHTSA notes that the termination of this rulemaking renders these issues moot.

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

Issued on August 18, 1989.

BILLING CODE 4910–59–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Foreign Proposals To Amend Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of proposed amendments to appendices.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates international trade in certain animals and plants. Species for which trade is controlled are listed in Appendices I, II, and III to CITES. Any nation that is a Party to CITES may propose amendments to Appendix I or II for consideration by the other Parties.

This notice announces proposals submitted by Parties other than the United States and the Service's tentative negotiating positions, and invites information and comments on them in order to develop negotiating positions for the United States delegation. The proposals will be considered at the seventh regular meeting of the Conference of the Parties to be held in Lausanne, Switzerland from October 9–20, 1989.

DATE: The U.S. Fish and Wildlife Service (Service) will consider all comments received by September 22, 1989 in developing final negotiating positions. The Service plans to publish a notice of its decisions on the positions prior to the meeting of the Parties.

ADDRESSES: Please send correspondence concerning this notice to the Office of Scientific Authority; Mail Stop: Room 725, Arlington Square; U.S. Fish and Wildlife Service; Department of the Interior; Washington, DC 20240. Background materials will be available for public inspection from 8:00 a.m. to 4:00 p.m., Monday through Friday, in Room 750, 4401 Fairfax Drive, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Dr. Charles W. Dane at the address given above, or telephone (703) 358–1708.

SUPPLEMENTARY INFORMATION:

Background

CITES regulates import, export, reexport, and introduction from the sea of certain animal and plant species. Species for which trade is controlled are included in three appendices. Appendix I includes species threatened with extinction that are or may be affected by trade. Appendix II includes species that although not necessarily threatened with extinction may become so unless trade in them is strictly controlled. It also lists species that must be subject to regulation in order that trade in other currently or potentially threatened species may be brought under effective control (e.g., because of difficulty in distinguishing specimens of currently or potentially threatened species from those of other species). Appendix III includes species that any Party nation identifies as being subject to regulation within its jurisdiction for purposes of preventing or restricting exploitation, and for which it needs the cooperation of other Parties in controlling trade.

Any Party nation may propose amendments to Appendices I and II for consideration of meetings of the Conference of the Parties. The text of any proposal must be communicated to the CITES Secretariat at least 150 days before the meeting. The Secretariat must then consult the other Parties and appropriate intergovernmental agencies, and communicate their responses and the Secretariat's own findings and recommendations to all Parties no later than 30 days before the meeting. Amendments are adopted by a two-thirds majority of the Parties present and voting.

Information Sought

This notice announces proposals submitted by Parties other than the United States for consideration at the forthcoming meeting of the Parties, and sets forth tentative negotiating positions of the United States delegation on them. The Service solicits comments on its tentative negotiating positions and on the biological status of these species, on the amount and type of trade in specimens of these species, and on the impact of trade on the populations, especially on the survival of the species. Comments that relate this information to the criteria for adding or removing species from the Appendices would be especially helpful.

It is neither practical nor in the best interest of the United States to establish inflexible negotiating positions on proposals in advance of the meeting. The Service based the present tentative positions mainly on a review of information presented by proponents in terms of criteria adopted at previous meetings of the Conference of the Parties of CITES. Some of the proposals have had to be translated into English from Spanish or French (also official languages under CITES). Supporting statements for proposals by Japan and

Indonesia have not been submitted, although brief statements proposing certain species for the appendices have been received by the CITES Secretariat from those countries. How the Secretariat and Parties will deal with these proposals is unknown. Except for one or two species for which information comparable to the supporting statement is available the tentative negotiating position is to oppose the proposed amendment, and in fact the final position may be to oppose all proposals without supporting statements unless the best available scientific information supports the proposal.

Because information provided in many of the proposals and otherwise currently available to the Service is too incomplete to allow clear judgments about their merits, several of the tentative negotiating positions presented are likely to be revised as further biological and trade data are obtained. Final guidance for the delegation is to be based on the best available biological and trade information, including comments received in response to this notice.

Proposals

In accordance with the provisions of Article XV, paragraph 1(a), of the Convention; Austria, Belgium, Botswana, China, Denmark, Ethiopia, the Federal Republic of Germany, Gambia, Guatemala, Hungary, India, Indonesia, Israel, Japan, Kenya, Madagascar, Malawi, Mozambique, Netherlands, Paraguay, Philippines, Portugal, Somalia, Sweden, Switzerland, Tanzania, Thailand, United Kingdom, Uruguay, and Zambia, all Parties to the Convention, have communicated to the Secretariat the following proposals for amendment of Appendices I and II of the Convention. These proposals will be considered at the seventh meeting of the Conference of the Parties to the Convention, to be held in Lausanne, Switzerland, from October 9–20, 1989.

A total of 75 foreign proposals on both plant and animal species were submitted of which 14 were submitted by Switzerland based on a 10-year review of the listings that was adopted at the 1981 Conference of the Parties in New Delhi, India. The proposals by Switzerland recommend the removal of those species from the Appendices that have never been reported in trade and which the chairman of the 10-year review committee believed should be considered for deletion from the Appendices, unless the species should be included in Appendix II because they are very similar in appearance to related taxa that do appear in trade.

We point out, however, that the lack of reported trade for some species proposed for removal from the Appendices may be due to (1) their rarity, (2) the possibility that their listing in the Appendices has inhibited trade, or (3) the lack of proper documentation or reporting of trade. Consequently, the Service does not believe lack of appearance in trade is by itself a sufficient reason to warrant the removal of a taxon from the Appendices. In establishing the tentative negotiating position of these 10-year review, delisting proposals, the Service considered the degree of vulnerability of the species and the possibility of its being in trade.

Proposals by Parties other than the United States are listed in the following table. Tentative negotiating positions and the basis for them also are indicated. These positions were taken largely on the basis of the information contained in the proposal. If inadequate population and/or trade information was provided, the Service's position was usually opposed to the proposal. However, the Service was slightly more accepting of limited data and of data from other sources when considering uplisting proposals. The complete text of each proposal will be available for public inspection at the Service's Office of Scientific Authority (see address above).

Species	Proposed amendment	Proponent	Tentative U.S. position

Peteropus pilosus (Large Palau flying fox)	do	do	Do.
Peteropus samoensis (Samoan flying fox)	do	do	Do.
Peteropus tokudae (Little Mariana flying fox)	do	do	Oppose (8).
Peteropus tonganus (Insular flying fox)	do	do	Oppose (9).
Order Carnivora			
Melursus ursinus (Sloth bear)	Add to I	Federal Republic of Germany, India	Support (7).
Ursus americanus (Black bear)	Add to II	Japan	Oppose (1,14).
Ursus arctos (Brown bear)	Retain populations of Afghanistan, India, Mexico, Nepal, and Pakistan in I; include all other populations in II.	China, Denmark	Oppose (15).
Ursus arctos spp. (Brown bear)	Inclusion in II	Japan	Oppose (1,14).
Aonyx cinerea (Asian small-clawed otter)	Transfer from II to I	India	Support (6,7).
Lutra perspicillata (Smooth-coated otter)	Transfer from II to I	India	Do.
Felis pardalis (Ocelot)	Transfer from II to I	Federal Republic of Germany	Do.
Felis pardinus (Iberian lynx)	Transfer from II to I	Federal Republic of Germany	Do.
Felis tigrina (Little spotted cat)	do	Portugal, Federal Republic of Germany.	Do.
Felis weidii (Margay)	do	do	Do.
Order Proboscidea			
Loxodonta africana (African elephant)	do	Austria, Gambia, Hungary, Kenya, Somalia, Tanzania.	Do.
Order Artiodactyla			
Cephalophus jentinki (Jentink's duiker)	Transfer from II to I	Federal Republic of Germany	Oppose (9).
BIRDS			
Order Rheiformes			
Rhea americana (Rhea)	Add to II	Japan	Support (1,10).

Species	Proposed amendment	Proponent	Tentative U.S. position
Order Tinamiformes			
Rhynchotus rufescens (3 ssp.) (Rufous tinamous).	Remove from II	Uruguay	Support (2,3).
Order Ciconiiformes			
Ciconia ciconia (white stork)	Add to II	Federal Republic of Germany	Support (10).
Order Galliformes			
Francolinus ochropectus (Djibouti francolin)	Remove from II	Switzerland	Support (3,12).
Francolinus swierstrai (Swierstra's francolin)	do	do	Do.
Order Psittaciformes			
Agapornis cana (Grey-headed lovebird)	Remove from II (if accepted Madagascar has indicated that they would request inclusion on Appendix III.	Madagascar	Oppose (2,9).
Ara maracana (Illiger's macaw)	Transfer from II to I	Paraguay	Support (2,7).
Amazona tucumana (Tucuman Amazon)	do	Denmark	Support (6,16).
Cacatua moluccensis (Moluccan cockatoo)	do	Switzerland	Support (6,7).
Order Coraciiformes			
Buceros bicornis (Great pied hornbill)	Remove from I	Switzerland	Support (3,12).
Buceros spp. (Hornbills)	Add to II	do	Support (10).
Buceros rhinoceros (Rhinoceros hornbill)	do	Belgium	Support (10).
Order Passeriformes			
Pitta gurneyi (Gurney's pitta)	Add to I	Thailand	Support (7).
Pitta guajana (Banded pitta)	Add to II	do	Oppose (9).
Pseudochelion sirintarae (White-eyed river martin).	Add to I	do	Oppose (12,17).
REPTILES			
Order Crocodylia			
Crocodylus niloticus (Nile crocodile)	Transfer Botswana population from I to II, pursuant to resolution Conf. 3.15 on ranching.	Botswana	Support (4).
Crocodylus niloticus (Nile crocodile)	Transfer of the Ethiopian population from I to II, pursuant to resolution Conf. 5.21 subject to an annual Export quota of 2845.	Ethiopia	Oppose (5,9).
Crocodylus niloticus (Nile crocodile)	Transfer Kenya's population from I to II, pursuant to resolution Conf. 3.15 on ranching.	Kenya	Oppose (1,14).
Crocodylus niloticus (Nile crocodile)	Transfer of Madagascar's population from I to II, pursuant to resolution Conf. 3.15 on ranching.	Madagascar	Oppose (18).
Crocodylus niloticus (Nile crocodile)	Transfer of the Malawian population from I to II, pursuant to resolution Conf. 3.15 on ranching.	Malawi	Support (4).
Crocodylus niloticus (Nile crocodile)	Transfer of Mozambique's population from I to II, pursuant to resolution Conf. 3.15 on ranching, subject to an annual export quota of 1,000.	Mozambique	Support (4,22).
Crocodylus niloticus (Nile crocodile)	Transfer of the Somalian population from I to II subject to an annual export quota of 2000 specimens.	Somalia	Oppose (5,9).
Crocodylus niloticus (Nile crocodile)	Maintenance of the Tanzanian population in II subject to an export quota of 3500 specimens.	Tanzania	Support (5,7,22).
Crocodylus niloticus (Nile crocodile)	Transfer of Zambian population from I to II pursuant to resolution Conf. 3.15 on ranching.	Zambia	Support (4).
Crocodylus porosus (Saltwater crocodile)	Proposal submitted pursuant to resolution Conf. 5.21 with export quota of 5000 specimens.	Indonesia	Oppose (1,14).
Order Testudinata			
Chelonia mydas (Green sea turtle)	Transfer from I to II; Proposal submitted pursuant to resolution Conf. 5.21; export quota of 3,000 specimens. Proposal also submitted pursuant to resolution Conf. 3.15 on ranching.	do	Oppose (1,14).
Eretmochelys imbricata (Hawksbill sea turtle)	Transfer from I to II; Proposal submitted pursuant to resolution Conf. 5.21; export quota of 3,000 specimens. Proposal also submitted pursuant to resolution Conf. 3.15 on ranching.	do	Oppose (1,14).
Order Squamata			
Dracaena paraguayensis (Caiman lizard)	Add to II	Paraguay	Support (2,7).
Naja Naja (Cobra)	do	India	Support (7).
Ophiophagus hannah (King cobra)	do	do	Do.
Ptyas mucosus (Oriental ratsnake)	do	do	Do.
Shinisaurus crocodilurus (Chinese crocodile lizard).	do	Federal Republic of Germany	Do.
Varanus bengalensis (Bengal Monitor)	Transfer from I to II	Japan	Oppose (1,14).
Varanus grayi (Gray's monitor)	Transfer from II to I	Federal Republic of Germany	Support (11).
Varanus griseus (Desert monitor)	Transfer from I to II	Japan	Oppose (1,14).
FISHES (PISCES)			
Cynolebias spp. (Pearlfishes)	Remove from II	Switzerland	Support (3,12).
Latimeria chalumnae (Coelacanth)	Transfer from II to I	Federal Republic of Germany	Support (7,11).
Scleropages formosus (Asian bony-tongue)	Transfer from I to II pursuant to resolution Conf. 5.21, subject to an annual export quota of 2,500 specimens.	Indonesia	Oppose (1,14).
Corals (CNIDARIA)			
Athecata spp.	Add to II	Israel, Philippines	Oppose (19).
Coenothecalia spp.	do	do	Do.
Scleractinia spp.	do	do	Do.
Stolonifera spp.	do	do	Do.

Species	Proposed amendment	Proponent	Tentative U.S. position
PLANTS			
Family Amaryllidaceae:			
Sternbergia spp. (sternbergias)	Add to II	United Kingdom	Support (7).
Family Apocynaceae:			
Rauvolfia serpentina (snake-root devil-pepper)	Add to II	India	Support (7).
Family Aristolochiaceae:			
Aristolochia indica (Indian birthwort)	Add to II	do	Support (7).
Family Berberidaceae:			
Podophyllum hexandrum (Himalayan mayapple)	Add to I	do	Oppose (9,20).
Family Droseraceae:			
Drosera burmannii (Burmann's sundew)	Add to II	do	Oppose (9).
D. indica (Indian sundew)	do	do	Oppose (9).
D. peltata (shield sundew)	do	do	Oppose (9).
Family Fagaceae:			
Quercus copeyensis (copey oak)	Remove from II	Switzerland	Support (3).
Family Gentianaceae:			
Gentiana kurroo (Indian gentian)	Add to II	India	Support (7).
Family Humiriaceae:			
Vantanea barbourii (caracolillo)	Remove from I	Switzerland	Support (3).
Family Juglandaceae:			
Oreomunnea (*Engelhardia*) *pterocarpa* (gavil'n blanco).	do	do	Oppose (3,21).
Family Leguminosae (Fabaceae):			
Cynometra hemitomophylla (guapinol negro)	do	do	Support (3).
Platymiscium pleiostachyum (cristobal)	do	do	Oppose (3,21).
Tachigali versicolor (cañ fistula)	do	do	Oppose (3,21).
Family Liliaceae:			
Gloriosa superba (Malabar gloriosa-lily)	Add to II	India	Oppose (9).
Family Moraceae:			
Batocarpus costaricensis (ojoche macho)	Remove from I	Switzerland	Support (3).
Family Orchidaceae:			
Eriopsis biloba (Guatemalan pop.) (bilobed eriopsis).	Transfer from II to I	Guatemala	Support (7).
Lemboglossum (-*Odontoglossum*) *majale* (May lemboglossum).	do	do	Do.
L. uro-skinneri (Skinner's lemboglossum)	do	do	Do.
Paphiopedilum spp. (Asian tropical lady-slipper orchids).	do	Netherlands	Support (7,13).
Phragmipedium spp. (New World tropical lady-slipper orchids).	do	Federal Republic of Germany	Support (7).
Rossioglossum (-*Odontoglossum*) *williamsianum* (Williams rossioglossum).	do	Guatemala	Do.
Family Podocarpaceae:			
Podocarpus costalis (costal podocarp)	Remove from I	Switzerland	Support (3).
Family Podophyllaceae: see Family Berberidaceae			
Family Ranunculaceae:			
Aconitum deinorrhizum (then-rooted monkshood).	Add to II	India	Support (7).
Family Sterculiaceae:			
Pterygota (-*Basiloxylon*) *excelsa* (castano)	Remove from II	Switzerland	Support (3).
Family Valerianaceae:			
Nardostachys grandiflora (Indian nard)	Add to II	India	Support (7).

The basis for the tentative U.S. position on each proposal.

(1) While this amendment to the appendices has been proposed, the CITES Secretariat has not received any supporting documentation, as of July 25, 1989.

(2) The original proposal is in French or Spanish. The Service will provide an English translation upon request.

(3) Submitted as part of the 10-year review of listings for downlisting or removal from the Appendices. The Service either supports the proposal believing the information presented to be an accurate interpretation of the likely effect of trade or opposes the proposal because the lack of reported trade for some species proposed for removal may be due to their rarity or lack of proper documentation or reporting of trade.

(4) Transfer of certain Nile Crocodile populations from Appendix I to II pursuant to Resolution Conf. 3.15 on Ranching; some subject to annual export quotas as indicated. While the Service opposes the ranching proposals in general, the Service would support continuation of the downlisting from Appendix I to Appendix II with country by country export quotas, probably under an extension of the provisions of Conf. 5.21. The Service has several concerns about the ranching proposals. Most have inadequate biological information to support an actual downlisting, and some do not have sufficient information to justify adoption of the ranching proposal. Further, a patchwork pattern of countries with unrestricted export (accepted with ranching proposal) or with restricted trade with quotas or without authorized commercial trade might complicate implementation.

(5) Transfer of certain Nile Crocodile and sea turtle populations from Appendix I to II pursuant to Resolution Conf. 5.21, subject to annual export quotas.

(6) The intention of this proposal is to transfer the taxon from Appendix II to I since continued trade may threaten the species with possible extinction.

(7) Listing of the taxon, as proposed, appears to be justified by information in the proposal or currently available to the Service.

(8) While this species is probably extinct, any trade is likely to be internal to the United States and its separate listing on Appendix I does not seem warranted.

(9) The population status (i.e., degree of threat of extinction of the entire species) does not appear to warrant listing, downlisting, or delisting as proposed.

(10) Listing of this species or taxon appears justified because of the similarity of appearance of this species to others that are subject to trade.

(11) The Service would support listing this taxon in Appendix I on the basis of resolution Conf. 2.19 (i.e., due to the taxon's rarity any trade in the species would be detrimental) and trade has been documented and may increase.

(12) Available information suggests that there is little likelihood that there has been or will be any significant international trade in this species.

(13) More than half of the species in the genus are believed to be threatened with extinction. Resolution Conf. 6.19 provides for the artificially propagated hybrids to be treated as if on Appendix II. As a general matter, artificially propagated specimens of Appendix I species can be exported from the United States under a renewable export permit valid for multiple shipments during 6 months.

(14) The Service opposes this proposal until supporting documentation and additional biological and trade data become available.

(15) The listing of the taxon, as proposed, generally appears to be justified by the information in the proposal or currently available to the Service, but the proposal also transfers the Chinese and Russian populations of *Ursus arctos pruinosus* and *U. a. isabellinus* from Appendix I to II which does not appear to be warranted.

(16) Population information is limited although the information presented in the proposal suggests a small and declining population within its restricted range. Furthermore, trade appears sufficiently large to be affecting the survival of the species.

(17) One might presume that this species is sufficiently rare to be included in Appendix I under provisions of Conf. 2.19. However, the population information presented in the proposal is not adequate to make this determination.

(18) Population and internal trade information needs to be clarified, but information available suggests that trade should be curtailed.

(19) Biological and trade information presented on individual genera is not sufficient to meet the Berne criteria. However, we recognize that enough information may become available to support the addition of some genera to Appendix II.

(20) Biological and trade information presented do not appear to support listing in Appendix I. However, enough information may become available to support listing the species in Appendix II.

(21) Submitted as part of the 10-year review of the listing for removal from the Appendices because the species is believed to be more common and/or no trade has been documented. However, the species is sufficiently rare and/or the possibility of international trade sufficiently likely that our tentative position is to oppose complete removal from the Appendices, but to accept a downlisting of the species to Appendix II.

(22) Proposed quota consistent with quota adopted at COP6.

Future Actions

The next regular meeting of the Parties is scheduled to be held in Lausanne, Switzerland from October 9–20, 1989. The Service will develop final negotiating positions and announce these decisions prior to the meeting of the Parties. These negotiating positions will be based on the best available biological and trade information, taking into account comments received in response to this notice. If further information is presented at the meeting in Switzerland, the U.S. delegation will take it into account in determining whether these positions remain appropriate.

This notice was prepared by Dr. Richard M. Mitchell, Staff Zoologist, Office of Scientific Authority, under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*)

List of Subjects in 50 CFR Part 23

Endangered and threatened plants, Endangered and threatened wildlife, Exports, Fish, Imports, Marine mammals, Plants (agriculture), Treaties.

Dated: August 15, 1989.

Notices

Federal Register

Vol. 54, No. 162

Wednesday, August 23, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Supplement to the White Stallion Draft Environmental Impact Statement; Bitterroot National Forest, Ravalli County, MT

AGENCY: Forest Service, USDA.

ACTION: Notice; intent to prepare a supplement to the draft environmental impact statement.

SUMMARY: The Forest Service will prepare a Supplement to the White Stallion Draft Environmental Impact Statement (DEIS) that was available to the public on April 21, 1989. The supplement is being prepared because of new information regarding the purchase of adjacent private lands and the harvest of commercial timber from these lands in the next 5 years. The Draft Environmental Impact Statement disclosed effects of removing timber from the adjacent private lands at a lower amount and over a longer time period. The supplement will consider alternatives with the effects of an accelerated rate of harvest from private land as additions to the original range of alternatives in the DEIS.

DATE: Public comments concerning the supplement and the scope of the analysis should be submitted by September 15, 1989.

ADDRESS: Send written comments to District Ranger, Darby Ranger District, P.O. Box 266, Darby, MT 59829.

FOR FURTHER INFORMATION CONTACT: Questions about the supplement to the White Stallion DEIS should be directed to Tim Trotter, Darby Ranger District, Phone: (406) 821–3913.

SUPPLEMENTARY INFORMATION: The supplement will address the environmental effects of accelerated removal of timber and associated access road construction on adjacent private lands to the proposed action in the White Stallion DEIS. The private lands are located within the area of the White Stallion DEIS in sections. 1, 3 and 11, T. 3 N., R. 19 W. Approximately 800 acres of this private land is within the Sleeping Child Roadless Area (X1074).

Scoping and identification of the environmental issues for the White Stallion proposed action were disclosed in the DEIS.

One of the issues identified was what will be the effects from planned timber cutting on private lands in the area? The supplement will address this issue in light of the new information.

Public participation is welcome during the analysis for the supplement. The Forest Service is seeking information and comments from Federal, State, local agencies and other individuals or organizations who may be interested in or affected by the new information.

The DEIS Supplement is expected to be available to the public in mid-October 1989. The comment period on the supplement to the White Stallion DEIS will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**. To be most helpful, comments should be focused on the supplement. Comments received previously on the original DEIS will receive responses in the Final EIS, as will the comments to the DEIS Supplement.

The responsible official will consider the comments and responses to the DEIS and Supplement; environmental consequences discussed in the FEIS; and applicable laws, regulations, and policies in making a decision regarding the White Stallion proposal.

The responsible official will document the decision and reasons for the decision in the Record of Decision. The decision will be subject to review under applicable Forest Service Regulations.

Dated: August 5, 1989.

Bertha C. Gillam,

Forest Supervisor, Bitterroot National Forest.

[FR Doc. 89–19806 Filed 8–22–89; 8:45 am]

BILLING CODE 3410-11-M

Vegetation Management Activities, Intermountain Region

AGENCY: Forest Service, USDA.

ACTION: Cancellation of Notice of Intent to prepare Environmental Impact Statement.

SUMMARY: The Department of Agriculture, Forest Service, has withdrawn its intent to prepare an Environmental Impact Statement (EIS) for a programmatic vegetation program in the Intermountain Region. As a result of scoping (public participation in developing issues) it was determined that the issues and concerns would be more appropriately considered and addressed in the NEPA Process at the site-specific analysis for each individual Forest vegetation project. The Notice of Intent, published in the **Federal Register** of August 4, 1988, is hereby rescinded (53 FR 293549).

The Region will continue to involve the public in the development of a Human Health Risk Assessment for selected chemicals (herbicides) suitable for vegetation management. The Risk Assessment will provide sufficient analysis to evaluate the adverse impacts of the covered chemicals on the human environment. This analysis will be used by the responsible official to make a reasoned choice among alternatives considering herbicides and other vegetative treatments at the site specific project level. There will be no programmatic decisions other than those already made at the Forest Plan level

FOR FURTHER INFORMATION CONTACT: Warren Ririe, Vegetation Management Team Leader, U.S. Forest Service, 324 25th Street, Ogden, Utah 84401; telephone (801) 625–5255 or 8–586–5255.

Dated: August 9, 1989.

Clair C. Beasley,

Deputy Regional Forester.

[FR Doc. 89–19807 Filed 8–22–89; 8:45 am]

BILLING CODE 3410-11-M

Snowbasin Land Exchange; Wasatch-Cache National Forest, Weber County, Utah; Intent To Prepare an Environmental Impact Statement; Correction

AGENCY: Forest Service, USDA.

ACTION: Final environmental impact statement scheduled completion date; correction.

SUMMARY: This notice corrects the date previously published in the **Federal Register** July 21, 1989 (54 FR 30583) for scheduled completion of the Final Environmental Impact Statement. On page 30583, in the third column on the last line the completion date should read 1989 instead of 1990.

Dated: August 11, 1989.

Dale N. Bosworth,

Forest Supervisor.

[FR Doc. 89–19830 Filed 8–22–89; 8:45 am]

BILLING CODE 3410-11-M

Intermountain Region; Fee Schedule for Communications Uses

AGENCY: Forest Service, USDA.

ACTION: Notice of fee schedule for communication uses.

SUMMARY: The Regional Forester, Intermountain Region, USDA Forest Service, is adopting a new fee schedule for communication site uses for National Forest System Lands which includes National Forest System lands in the States of Nevada, Utah, and portions of California, Colorado, Idaho, and Wyoming. The intent of the new fee schedule is to assess fees which are based on the Fair Market Value of the rights and privileges authorized, as mandated by the Federal Land Policy and Management Act, October 26, 1976.

EFFECTIVE DATE: September 22, 1989.

FOR FURTHER INFORMATION CONTACT: Frank Elder or Lynn Bidlack, Recreation and Lands Staff, Federal Building, 324 25th Street, Ogden, UT 84401, (801) 625–5150.

SUPPLEMENTARY INFORMATION: On July 28, 1988, the Regional Forester for the Intermountain Region published a notice of a proposed fee schedule for communications uses (53 FR No. 145, pages 28615 to 28619). The comment period for this notice was 60 days. This comment period was extended for an additional 60 days (53 FR 38759 dated October 3, 1988).

The proposed fee schedule and policy were based on categories of use with individual fees to be determined by population, number of licensed transmitter frequencies, or the nature of the use. The proposal also called for annual adjustments of the scheduled fees based upon the Consumer Price Index—Urban (CPI–U) and provided for a phase-in of fee increases. The proposal was published simultaneously with the proposals of five other Regions, who had coordinated their proposals to achieve Service-wide consistency where possible.

Analysis of Public Comment

The Intermountain Region received 110 written responses to the proposal. The number and percentage of comments by respondents were:

Use categories	No. of comments	Percent
Amateur radio	7	6
Broadcast translator	14	13
Mobile radio; commercial communications	25	23
Mobile radio; internal communications	13	12
Common carrier microwave relay	4	4
Industrial microwave	10	9
Natural resource and environmental monitoring	3	2
Radio broadcast	12	11
Television broadcast	18	16
Other	4	4
Total	110	100

All of the comments received have been reviewed and given consideration in reaching the final decision. A summary of the major comments received and the Forest Service response by topic follows. It should be noted that the Intermountain Region has coordinated its review and response to the comments with the other Regions in order to achieve as much consistency Service-wide as possible.

The Forest Service has made adjustments in some of the communications site categories after review of comments and additional information which was submitted by the respondents. The revised fee schedule is responsive to industry and other concerns and is fully supported by the market data.

1. *Fee levels.* A number of respondents felt that the proposed fees are extreme and unreasonable. Many individuals and small businesses indicated that the proposed fees would be too great a burden for them and that they would have to abandon their sites if the schedule is implemented. Some suggested a re-evaluation and reduction in the proposed fees. Others recommended lower fee increases and a longer phase-in.

A few respondents said that the proposed fee rates were too low and thus amount to public subsidies. Several suggested alternative methods for determining fees, some of which would return many times the proposed rates to the Federal Government. Among alternatives proposed were: to adopt a fee policy based on site rental income (assess a percentage of gross rental income derived from the site); to consider site value in light of the alternative cost of constructing competitive towers on private lands; to base fee as a percentage of the user's investment in improvements and equipment; to use per capita income multipliers to adjust for differences between geographical areas; and to use private management companies, with no vested interest in the site, to establish individual fees.

After analysis of these comments, the Intermountain Region has made the following changes in the proposed communications use fee schedule:

a. To be consistent with other Regions, the fees for cable and subscription television will be based upon numbers of subscribers. In most situations this method reduces the fees charged to companies whose service is to small populations and offers more stratification of fees for the mid-size companies. In the proposed schedule, fees were based on the census population within the franchise or service area. The change allows the fee to be based on actual use.

b. The same fee structure is adopted for Mobile Radio: Commercial Communications and Mobile Radio: Internal Communications. There will be a $700 fee for the first transmitting frequency plus a $200 fee for each additional transmitting frequency. This will result in a reduction of fees for smaller operations, but will result in a slight increase for some large operations.

There were few responses with regard to the proposed fees in the following use categories; Amateur Radio, Cellular Telephone, Common Carrier Microwave Relay, Industrial Microwave, Personal/Private "Receive Only", Natural Resource and Environmental Monitoring, and Passive Reflector. The fees as proposed in the above categories will remain the same.

2. *Market Survey.* A number of respondents felt that the market survey used to develop the proposed fee schedule was inadequate. Some indicated that the market survey and resulting fees did not give credit for enhancing public lands, used ability-to-pay rather than fair market value to determine the fees, and others felt that the survey should have included all private land leases including donated (no charge) sites, used insufficient market data, and did not correlate fees with investment values and site improvement costs. Less than 7 percent of the respondents provided data supporting their position.

The Intermountain Region coordinated with the other Forest Service Regions in reviewing and re-analyzing the market data utilized in compiling the proposed fees. No major discrepancies were found in the market data compiled by the Forest Service.

The data was found to be adequate for fee determination.

For the purposes of determining fair market value, we examined available market leases to see if the expense of developing facilities, access, and power was a factor influencing private lease rates. We found no useable correlation. The private sector leases used to establish fair market value fees do not clearly discount the site rental because of the development cost incurred by the lessee.

3. *Fee Exemption/Waivers.* Under the proposed policy, exemptions from fees and fee waivers would remain a decision of the authorized officer (36 CFR 251.57(b)). A number of respondents objected to the Forest Service policy of charging fees for communications uses on National Forest System land. Others felt that fees should be waived for any use that provides a public benefit, whether that use is of a commercial nature or not. Most respondents on this issue found the current fee waiver policy unclear, vague, and subject to inconsistent application. They requested a clear, consistent statement of a National fee waiver policy for specific categories of use. Some respondents felt that government and public agencies, as well as certain other users (utilities, public broadcasters etc.) should be exempt from fees as a matter of national policy.

We agree that there should be national fee waivers established for specific categories of use or type of holder when the entire class of use or holder meets the rental fee waiver criteria. Therefore, national direction will be issued concerning fee waivers for specific categories of use and type of holder. The direction, which follows, is intended to clarify the intent of the waiver policy; it does not contain any substantive changes in current policy.

a. *Fee exemption.* Exemptions are determinations that certain classes of users will not be required to pay an annual rental fee. Most such exemptions are statutory, i.e., they derive from specific fee exemption language in Public Law, and are not subject to the discretion of the authorized officer. However, holders may be assessed an amount sufficient to reimburse the cost of administering the use. Holders exempt from fees include:

—Federal agencies;

—Facilities established by Rural Electrification Administration financing;

—Public telecommunication systems identified and licensed as such by the Federal Communications Commission (FCC) for educational, cultural, instructional, and institutional purposes and as described in the Communications Act of 1934, and the Federal Communications Regulations granting waiver of license fees; i.e., non-commercial educational broadcast stations as defined in part 15 CFR 2301–Public Telecommunications Facilities Program, Subpart A–Definitions, Program Purposes, and Special consideration.

b. *Fee Waiver.* Waivers are discounts or reductions from payment of the full annual rental fee, by provision of law and regulation, and at the discretion of the authorized officer. The Forest officer delegated the authority to issue the permit and establish the fee is also the officer authorized to determine if a holder qualifies for a fee waiver. Fee waivers may be full or partial, and must be equitable and in the public interest. (36 CFR 251.57(b)).

(1) *State and Local Government.* The authorized officer shall waive fees in full for telecommunications facilities and systems owned and operated by a State or local government agency or instrumentality thereof, when:

—The state or local government agencies or instrumentalities thereof do not charge the Forest Service for similar services;

—The use is not installed, maintained, or otherwise financed by means of customer charges, which include but are not limited to subscription fees, membership fees or dues, or special tax assessments, and;

The use furthers the public health, safety or welfare, or is otherwise to the benefit of the general public or the programs of the Secretary of Agriculture.

(2) *Other Holders.* Waivers for other holders will be considered by the authorized officer on a case-by-case basis. If granted, fees for other holders will not be waived below $75, which represents the cost to the Forest Service for administration of the authorization. This rate is, however, subject to revision on the basis of change in administrative costs.

There were also a number of responses, as well as comments sent to the Chief of the Forest Service on the proposals by all Regions, which requested a review of the Forest Service's rental fee waiver policy for radio broadcast (commercial), television broadcast (commercial), and associated broadcast translators. The respondents felt that a partial or full waiver should be granted based on the public service requirements of the Communications Act of 1934 and the provisions of the Federal Land Policy and Management Act of 1976.

As a result of these requests, the Forest Service is reviewing the National rental fee waiver policy for these categories of use. As a part of the review, the Forest Service is working with the Radio and Television Broadcasters to review the type and amount of public service provided.

Rental fees for these categories of use will remain at current levels until the review is completed and a final fee is established in the schedule. We anticipate fees for these uses will be established prior to January 1, 1990. All authorization holders and others expressing an interest in the fee schedules will be notified when the final fees are established.

4. *Categories of Use.* In the proposal, fees were based on categories of communications uses of National Forest System land. Each category was defined in the fee schedule to assure proper classification.

A number of respondents, including those for other Region's felt that the categories of uses were too narrowly defined. Various respondents urged separation of uses such as: (1) Specialized mobile radios from other uses; (2) commercial communication systems used for profit from those used for public services, and; (3) Cable TV enterprises serving major population centers from those serving sparsely populated rural areas.

After considering all comments, the categories of "Commercial Communicator" and "Internal Two-Way Radio Repeater" were changed to "Mobile Radio: Commercial Communications" and "Mobile Radio: Internal Communications. In addition, definitions for these categories were modified for clarification at the request of industry respondents. The other categories are adopted as proposed.

5. *Definitions.* Several respondents found certain definitions and terms inadequate or confusing. Industry suggested definitions and terms that more clearly define commercial communications and internal radio communication uses.

In coordination with other Regions and the Washington Office, the Intermountain Region has adopted terminology defining the various types of communication uses.

Most of the proposed definitions for the categories of use remain unchanged or slightly modified. Modifications were in response to reviewers' comments or to improve clarity.

Slight changes were made in the following definitions (changes to improve clarity not noted):

—A definition for Natural Resource and Environmental Monitoring is provided as follows: "This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations."

—All references to appurtenant uses are eliminated from the definition of Radio and Television Broadcast. Appurtenant uses are discussed in the Forest Service Manual Supplement.

Major changes were made in the definitions of Commercial Communicator and Internal Two-way Radio. We agree with the reviewers who commented that the original definitions did not adequately describe the two categories of uses. In the final policy, the terms are defined as follows:

Mobile Radio: Commercial Communications. This includes communication equipment which is used to provide communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMRs), private carrier two-day radio systems, and private carrier paging systems (PCPs). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

Mobile Radio: Internal Communications. A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

5. *Phase-in of Fee Increases.* The proposed fee schedule provided for a 3- or 5-year phased-in of fees for current holders. It was based on the percentage and amount of increase. There was concern that the phase-in did not adequately consider the financial impacts of the increases on some holders. There were examples of fees which exceeded 100 percent of the existing fee in each year of the phase-in. It was feared that the rapid increase would adversely affect the holders and their customers. As a result, the phase-in has been modified to allow a longer phase-in period.

The new phase-in will provide for a maximum increase of 25 percent of the previous year's fees with a minimum increase of $100 per year. The number of years it takes to reach the scheduled fee will vary. However, most of the fee increases should be phase-in within 10 years. New holders and holders adding new uses are not covered by the phase-in.

7. *Implementation.* Having considered the comments the Intermountain Region is adopting the fee schedule with the changes noted in the foregoing discussion of comments. The policy and procedures to guide Forest Service employees in implementing the Communications Use Fee Schedule will be issued as a Regional Supplement to Forest Service Manual Chapter 2720. The text of the supplement is set out at the end of this notice.

The fee schedule will apply immediately to all new authorizations issued on and after the effective date of this policy. The fee schedule will be implemented for all existing special use authorizations with the billings for calendar year 1990.

Dated: May 26, 1989.

T.A. Roederer,

Deputy Regional Forester.

Fee Schedule Policy and Procedures for Communication Uses

Note: The Forest Service uses alphanumeric codes and subject headings to organize the text of direction. Only those sections of the Forest Service Manual that would be revised are set out here. Readers should keep in mind that the audience of this direction is Forest Service employees charged with issuing and administering communication use authorizations.

Title 2700—Special Uses Management

2728—COMMUNICATIONS

2728.1—Communications Sites

2. Fee Determinations

c. Regional Fee Schedule—Communications use special use fees will be charged at the annual rates shown in the schedule below. These rates will apply without CPI–U adjustment for new authorizations issued during the remainder of C.Y. 1989, and with CPI–U adjustment beginning in C.Y. 1990 for all authorizations. The schedule will not affect fees which have been established through appraisal, competitive bid, negotiation, or other sound business management principles; fees for these uses will be updated in accordance with the terms of the authorization.

(1) *Individual Authorization*

Final Fee Schedule—Intermountain Region

Use Category	
Radio Broadcast (AM & FM)	
Service Area Population	
Less than 50,000	
50,000 to 100,000	*
More than 100,000	*
(For AM radio, sites exceeding one acre will require a separate feet determination)	
Television Broadcast	
Service Area Population	
Less than 50,000	*
50,000 to 100,000	*
More than 100,000	*
Mobile Radio: Commercial Communications	
—First licensed transmitter frequency	$700
—Each additional licensed transmitter frequency	$200
(This amount is not discounted in multiple-user situations)	
Common Carrier Microwave Relay	
Service Area Population	
Less than 50,000	$1,600
More than 50,000	$300
Passive Reflector	$600
TV or Radio Broadcast Translators [1]	
Service Area Population	
0–100	*
1001–2000	*
2001–3000	*
3001–4000	*
4001–5000	*
5001–6000	*
6001–14,000	*
14,001–50,000	*
Over 50,000	*
Cable and Subscription Television	
Number of Subscribers:	
Less than 200	$400
201–500	$700
501–1,500	$1,400
1,501–2,500	$2,000
More than 2,500	$2,400
Industrial Microwave	
Service Area Population	
Less than 50,000	$1,100
More than 50,000	$1,500
Mobile Radio: Internal Communication	
—First licensed transmitting frequency	$700
—Each additional licensed transmitter frequency	$200
(This amount is not discounted in multiple-user permit situations)	
Miscellaneous Communication Uses	$75
Examples:	
—Personal/Private Receive-Only	
—Amateur Radio Service	
—Natural Resource & Environmental Monitoring	

* Fee of these categories of use will be established prior to 1/1/89.

[1] Multiple broadcast translators (frequencies) in the same facility and operated by a single FCC licensee will be considered a single use for fee calculations.

(2) *Definitions*

(a) *Amateur Radio.* Equipment used by individuals or groups who are licensed by FCC as amateur radio operators.

(b) *Broadcast Translator.* This category of use consists of receiving a television or FM radio broadcast signal and rebroadcasting it on a different channel or frequency for local reception. In some cases the translator relays the signal to another amplifier or translator. This category of use includes translators associated with public telecommunications service.

BEST COPY AVAILABLE

(c) *Cable and Subscription Television.* This category includes cable TV head-end antenna or satellite dish receivers used for community television pickups which retransmit by cable or any other means whereby subscribers pay periodic fees to receive the signal. These systems normally operate as a commercial entity within an authorized franchise area.

(d) *Cellular.* This is a specialized service provided by commercial communicators which involves a mobile (vehicular) radio telephone system. A cell is the area covered by one transmitter/receiving site. Radio signals are automatically picked up by another cell's receiver as the radio telephone transmitter passes from cell area to cell area.

(e) *Common Carrier Microwave Relay.* This use typically includes long line carriers which relay intrastate and interstate telephone, television, information, and data transmissions using point to point microwave networks or systems. These uses are regulated by state public utility commissions and must provide service to any consumer with the ability to pay according to published rate schedules.

(f) *Industrial Microwave.* This use includes microwave communication equipment not regulated by state public utility commissions. Users in this group may include pipeline and power companies, railroads and land resource management agencies or firms.

(g) *Mobile Radio: Commercial Communications.* This includes communications equipment which primarily provides communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMRs), private carrier two-way systems, and private carrier paging systems (PCPs). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

(h) *Mobile Radio: Internal Communications.* A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

(i) *Natural Resource and Environmental Monitoring.* This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations.

(j) *Passive Reflector.* Passive reflectors include various types of non-powered reflector devices used to bend or ricochet electronic signals between active relay stations or between an active relay station and terminal. The reflector requires point-to-point line-of-sight with the connecting relay stations, but does not require electric power. Maintenance is minimal and reflectors seldom require visitation.

(k) *Personal/Private "Receive Only".* These include radio and TV receiving antennas, satellite dishes and other equipment/facilities designed for the reception of electronic signals, serving private homes, including recreation residences. These facilities are personally owned and not operated for profit.

(l) *Radio Broadcast.* This category includes FCC authorized facilities that broadcast AM and FM audio signals for general public reception. Users include radio stations which generate revenues from commercial advertising and public radio stations whose revenues are supported by subscriptions, grants and donations. Broadcast areas often overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(m) *Television Broadcast.* This category includes FCC authorized facilities that broadcast UHF and VHF audio and video signals for general public reception. Users include television stations (Major and independent networks) who generate income through commercial advertisement and public television stations whose operations are supported by subscriptions, grants and donations. Broadcast areas may overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(3) *Individual Authorizations Within Facilities Owned by Others.* When shared facility occupancy is authorized and each user has an authorization, the fee shall be 100% of the fee for each authorized use. There will be no $75 discount.

(4) *Fees under Multiple-User Authorizations.* To improve administration of communications sites, Forest Service policy encourages shared-facility occupancies under a single authorization. In these situations, the holder, rather than the Forest Service, authorizes and administers the use of the facilities by others, and serves as the facility manager.

The annual fee due from the holder of a multiple-user authorization is the total of the fees from the fee schedule for each individual use, at the full schedule value for the first use, and with a $75 discount applied to each subsequent use. (In the case of mobile radio users with multiple frequencies, the $75 discount applies to the base $700 for the first frequencies; the additional frequency charge remains at $200.

Example: Five individual uses; service area population = 38,900.

Category of Use	Fees if under separate permits	Fee if under one multiple-user permit
Industrial Microwave.	$1,100	$1,100 (1st use @ 100%).
Common Carrier Microwave.	1,600	1,525 (1600 − 75).
Mobile Radio: Commercial Communications, using 4 frequencies..	1,300 (700 + (200 × 3)).	1,225 (700 − 75 + (200 × 3)).
Amateur	75	0 (75 − 75).
Mobile Radio: Internal Communications (local non-profit Search & Rescue Association.	75 (700—625 waiver.	0 (75 − 75).
Total	$4,150	$3,850.

(5) *Discounts for Consolidation and Efficient Management.* There are situations where site or facility consolidation and efficient site management is intended to meet Forest Service objectives. In these situations, fees may be temporarily discounted to reflect the benefits received by the Forest Service. Annual fee discounts cannot exceed the holder's costs or the annual fee for use of the site. The fee discounts must be considered on a case-by-case basis and approved by the Regional Forester.

Efficient site management may include the formation of user associations which assume administrative duties traditionally completed by the Forest Service.

(6) *Use of Government Owned Facilities.* In addition to prescribed fees, authorized officers will require users occupying Forest Service facilities to perform or share in the costs of building or facility maintenance and repair, as provided by section 7, Act of April 24, 1950 (Granger-Thye Act) and FSM 2711.7.

(7) *Ancillary and Appurtenant Communication Uses.* Ancillary uses are those uses which provide support or intertie with another communication system on the site. The fee would be for the highest valued communications use of the holder. For example, a holder has installed a mobile radio used for internal communications which interties with an industrial microwave system in the same facility. In this case, the holder would be issued one authorization and charged a fee for industrial microwave.

Appurtenant uses are those communications uses incidential to another non-communications use of the National Forest System land, such as a ski resort or marina.

No fees will be charged for ancillary/appurtenant uses.

(8) *Phase-in of Fee Increases.* Fee increases for current holders will be phased-in at a rate of 25 percent of the previous year's fee with a minimum increase of $100 per year. The 25 percent increase will continue until the current scheduled fee is reached.

For example: Current fee is $300 and the scheduled fee is $800

Year	Phased-in Fee	Scheduled Fee*
1	$400 ($100 min.)	$800
2	500	832
3	625	865
4	781	900
5	936	936

*Indexed using a 4 percent CPI–U

The phase-in does not apply to new holders or existing holders adding new uses.

(9) *Annual Fee Schedule Adjustment.* All communication use fees are subject to annual adjustment. The U.S. Department of Labor Consumer Price Index for All Urban Consumers (CPI–U) for July of the current year will be divided by the CPI–U for July of the previous year to yield a CPI–U multiplier which will be used to annually update the Communications Use Fee Schedule.

(10) *Other Methods of Establishing Fees.* Fees for atypical sites, or categories of use which were not established in the schedule, or sites servicing high populations, or AM radio broadcast sites exceeding 1 acre will be determined on an individual case basis.

The authorized officer may use site-specific appraisals, sound business management principles, and/or rental analysis as coordinated with the Regional Reviewing Appraiser to determine fees for individual sites when market evidence, such as leases for similarly used sites, demonstrate the inapplicability of the fee schedule.

Appraisals provided by the holder or other groups may be used to determine fees if the Regional Reviewing Appraiser establishes that the appraisal meets Forest Service appraisal standards and the report is approved.

Competitive bidding may be used to establish fees for new sites (and new development on established sites (FSM 2712.2).

(11) *Periodic Review of Fee Schedule.* The Intermountain Region shall, by December 31, 1994, review this schedule to determine whether market conditions and business practices have changed sufficiently to warrant a fee schedule revision. Fee waivers will also be reviewed at this time to ascertain holder's qualifications. Holders will be given an opportunity to provide data which might have a bearing on the review.

[FR Doc. 89–19856 Filed 8–22–89; 8:45 am]

BILLING CODE 3410-11-M

Northern Region; Fee Schedule for Communications Uses

AGENCY: Forest Service, USDA.

ACTION: Notice; adoption of fee schedule for communications uses.

SUMMARY: The Regional Forester, Northern Region, Forest Service, is adopting a new fee schedule for communications uses on National Forest System land in Montana, North Dakota, part of South Dakota and north Idaho. The intent of the new fee schedule is to assess fees that are based on fair market value of the rights and privileges as mandated by the Federal Land Policy and Management Act, October 21, 1976.

EFFECTIVE DATE: September 22, 1989.

FOR FURTHER INFORMATION CONTACT: Questions about this policy should be addressed to Jim Schoenbaum or Jim Hathaway, Lands Staff, Forest Service, U.S.D.A., Federal Building, P.O. Box 7669, Missoula, Montana, 59807, (406) 329–3601 or 3110.

SUPPLEMENTARY INFORMATION: On July 28, 1988, the Regional Forester for the Northern Region published a notice withdrawing the Northern Region Communications Fee Schedule and announced a new proposed fee schedule for communications uses (53 FR 28606) with request for comments. By notice published in the **Federal Register** (53 FR 38759) October 3, 1988 the comment period was extended.

The proposed fee schedule and policy was based on categories of use with individual fees to be determined by population, number of licensed transmitter frequencies, number of subscribers, or the nature of the use. The proposal also called for annual adjustments of the scheduled fees based upon the Consumer Price Index—Urban (CPI–U) and provided for a phase-in of fees. The proposal was published simultaneously with the proposals by 5 other Regions, which had coordinated their proposals to achieve nation-wide consistency where possible.

Analysis of Public Comment

The Northern Region received 52 responses to the proposal. The number and percentage of comments by respondents were:

Use categories	Number of respondents	Percent of total
Amateur radio	3	6
Broadcast translator	1	2
Cable & subscription TV	0	0
Cellular telephone	0	0
Mobile radio; commercial communications	8	15
Mobile radio; internal communications	6	11
Common carrier microwave relay	3	6
Industrial microwave	2	4
Natural resource and environmental monitoring	0	0
Passive reflector	0	0
Personal/private "Receive Only"	1	2
Radio broadcast	2	4
Television broadcast	1	2
Other	25	48

All of the comments received have been reviewed and given consideration in reaching the final decision. A summary of the major comments received and the Forest Service response by topic follows. It should be noted that the Northern Region has coordinated its review and response to the comments with the other Regions in order to achieve as much consistency Service-wide as possible.

1. *Fee levels.* A number of respondents felt that the proposed fees were extreme and unreasonable. Some individuals and small businesses indicated that the proposed fees would be too great a burden for them and that they would have to abandon their sites if the schedule were implemented. Some suggested a re-evaluation and reduction in the proposed fees. Others recommended lower fees and a longer phase-in period.

A few respondents said that the proposed fee rates were too low and thus amount to public subsidies. Several suggested alternative methods for determining fees, some of which would return many times the proposed rates to the Federal Government. Among alternatives proposed were: to adopt a fee policy based on site rental income (assess a percentage of gross rental income derived from the site); to consider site value in light of the alternative cost of constructing competitive towers on private lands; to base fee as a percentage of the user's investment in improvements and equipment; to use per capita income multipliers to adjust for differences between geographical areas; and to use private management companies, with no vested interest in the site, to establish individual fees. After analysis of these comments, the Northern Region is making the following changes in the proposed communication site fee schedule:

a. To be consistent with other Regions, the fees for cable and subscription television will be based on numbers of subscribers. In most situations, this method reduces the fees charged to companies who service small populations and offers more stratification of fees for the mid-size companies. In the proposed schedule, fees were based on the census population within the franchise or service area. The change allows the fee to be based on actual use.

b. The same fee structure is adopted for both Mobile Radio: Commercial Communication and Mobile Radio: Internal Communication. There will be a base fee for the first transmitting frequency plus a $200 fee for each additional transmitting frequency. This will result in a reduction of fees for smaller operations, but will result in a slight increase for some large operations.

A few respondents also commented that proposed fees were too high in the categories of: Amateur Radio, Common Carrier Microwave Relay, Industrial Microwave, and Mobile Radio: Commercial Communications. The claims of high fees were not supported by market data or were insufficient to warrant changing the fees in the final schedule. Therefore, the Region is adopting fees for these categories as proposed.

2. *Market Survey.* A number of respondents felt that the market survey used to develop the proposed fee schedule was inadequate. Most indicated that the market survey and resulting fees did not give credit for enhancing public lands, used ability to pay rather than fair market value to determine the fees, did not include comparable leases for the use of private land, used insufficient market data, and did not correlate fees with investment values and site improvement costs. Less than 3 percent of the respondents provided data supporting their position.

The Northern Region coordinated with the other Forest Service Regions in reviewing and re-analyzing the market data utilized in compiling the proposed fees. No major discrepancies were found in the market data compiled by the Forest Service. The data was found to be adequate for fee determination.

For the purposes of determining fair market value, we examined available market leases to see if the expense of developing facilities, access, and power was a factor influencing private lease rates. We found no useable correlation. The private sector leases used to establish fair market value do not clearly discount the site rental because of the development cost incurred by the lessee.

3. *Fee Exemption/Waivers.* Under the proposed policy, exemptions from fees and fee waivers would remain a decision of the authorizing officer (36 CFR 251.57(b)). A number of respondents objected to the Forest Service policy of charging fees for communication uses on National Forest System land. Others felt that fees should be waived for any use that provides a public benefit, whether that use is of a commercial nature or not. Most respondents to this issue found the current fee waiver policy unclear, vague, and subject to inconsistent application. They requested a clear, consistent statement of a national fee waiver policy for specific categories of use. Some respondents felt that government and public agencies, as well as certain other users (utilities, public broadcasters, etc.) should be exempt from fees as a matter of National policy.

We agree that there should be national fee waivers established for specific categories of use or type of holder when the entire class of use or holder meets the rental fee waiver criteria. Therefore, national direction will be issued concerning fee waivers for specific categories of use and/or type of holder. The direction, which follows, is intended to clarify the intent of the waiver policy, it does not contain any substantive changes in current policy.

a. *Fee exemption.* Exemptions are determinations that certain classes of users will not be required to pay an annual rental fee. Most such exemptions are statutory; i.e., they derive from specific fee exemption language in Public Law, and are not subject to the discretion of the authorized officer. However, holders may be assessed an amount sufficient to reimburse the cost of administering the use. Holders exempt from fees include:

—Federal agencies
—Facilities established by Rural Electrification Administration
—Public telecommunication systems identified and licensed as such by the Federal Communications Commission (FCC) for educational, cultural, instructional, and institutional purposes, and as described in the Communications Act of 1934, and the Federal Communications Regulations granting waiver of license fees; i.e., non-commercial educational broadcast stations as defined in 15 CFR part 2301—Public Telecommunications Facilities Program, Subpart A-Definitions, Program Purposes, and Special consideration.

b. *Fee Waiver.* Waivers are discounts or reductions from payment of the full annual rental fee, by provisions of law and regulation, and at the discretion of the authorized officer. The Forest Officer delegated the authority to issue the permit and establish the fee is also the officer authorized to determine if a holder qualifies for a fee waiver. Fee waivers must be equitable and in the public interest (36 CFR 251.57(b)).

(1) State and Local Government. The authorized officer shall waive fees for telecommunication facilities and systems owned and operated by a State or local government agency or instrumentality thereof, when:

—State or local government or instrumentalities thereof do not charge the Forest Service for similar services.
—The use is not installed, maintained, or otherwise financed by means of customer charges, which include but are not limited to subscription fees, membership fees or dues, or special tax assessments; and
—The use furthers the public health, safety, or welfare, or is otherwise to the benefit of the general public or the programs of the Secretary of Agriculture.

(2) Other Holders. Waivers for other holders will be considered by the authorized officer on a case by case basis. If granted, fees will not be waived below $75, which currently represents the cost to the Forest Service for administration of the authorization. This rate is, however, subject to revision on the basis of change in administrative costs.

There were also a number of responses, as well as comments sent to the Chief of the Forest Service on the proposals by all Regions, which requested a review of the Forest Service's rental fee waiver policy for radio broadcast (commercial), television broadcast (commercial) and associated broadcast translators. The respondents felt that a partial or full waiver should be granted based on the public service requirements of the Communications Act of 1934 and the provisions of the Federal Land Policy and Management Act of 1976.

As a result of these requests, the Forest Service is reviewing the National rental fee waiver policy for these categories of use. As a part of the review, the Forest Service is working with the Radio and Television Broadcasters to review the type and amount of public service provided.

Rental fees for these categories of use will remain at current levels until the review is completed and a final fee is established in the schedule. We anticipate fees for these uses will be established prior to January 1, 1990. All authorization holders and others expressing an interest in the fee schedules will be notified when the final fees are established.

4. *Categories of Use.* In the proposal, fees were based on categories of communication uses on National Forest System land. Each category was defined in the fee schedule to ensure proper classification.

A number of respondents felt that the categories of uses were too narrowly defined. Some respondents urged separation of uses such as: (1) Specialized mobile radios from other uses, (2) commercial communication systems used for profit from those used for public services, and (3) TV cable enterprises serving major population centers from those serving sparsely populated rural areas.

After considering comments, the categories of "Commercial Communicator" and "Internal Two-Way Radio" in the proposal have been changed to "Mobile Radio: Commercial Communications" and "Mobile Radio: Internal Communications". In addition, definitions for these categories have been modified for clarification at the request of industry respondents. The other categories are adopted as proposed.

5. *Definitions.* Several respondents found certain definitions and terms inadequate or confusing. Industry suggested definitions and terms that more clearly define commercial communications and internal radio communication uses.

In coordination with other Regions and the Washington Office, the Northern Region has adopted common terminology defining the various types of communication uses.

Most of the proposed definitions for the categories of use remain unchanged or slightly modified. Modifications were in response to reviewers comments or to improve clarity.

Slight changes were made in the following definitions (changes to improve clarity not noted):

—A definition for Natural Resource and Environmental Monitoring is provided as follows: "This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations."
—All references to appurtenant uses are eliminated from the definition of Radio and Television Broacast. Appurtenant uses are discussed in the Forest Service manual supplement.

Major changes were made in the definitions of Commercial Communicator and Internal Two-Way Radio. We agree with the reviewers who commented that the original definitions did not adequately describe the two categories of uses. In the final policy, the terms are defined as follows:

Mobile Radio: Commercial Communications. This includes communication equipment which is used to provide communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMR's), private carrier two-way radio systems, and private carrier paging systems (PCPS). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

Mobile Radio: Internal Communications. A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

6. *Phase-in of Fee Increases.* The proposed fee schedule provided for a 3 or 5 year phase-in of fees for current holders. It was based on the percentage and amount of increase. There was concern that the phase-in did not adequately consider the financial impacts of the increases on some holders. There were examples of fees which exceeded 100 percent of the existing fee in each year of the phase-in. It was feared that the rapid increase would adversely affect the holders and their customers. As a result, the phase-in has been modified to allow a longer phase-in period.

The new phase-in will provide for a maximum increase of 25 percent of the previous year's fees with a minimum increase of $100 per year. The number of years it takes to reach the scheduled fee will vary. However, most of the fee increases should be phased-in within 10 years. New holders and holders adding new uses are not covered by the phase-in.

7. *Implementation.* Having considered the comments received, the Northern Region is adopting the fee schedule with the changes noted in the foregoing discussion of comments. The policy and procedures to guide Forest Service employees in implementing the Communications Use Fee Schedule will be issued as a Regional Supplement to Forest Service Manual Chapter 2720. The text of the supplement is set out at the end of this notice.

The fee schedule will apply immediately to all new permits issued on and after the effective date of this policy. The fee schedule will be implemented for all existing special use authorizations with the billings for calendar year 1990.

Dated: May 24, 1989.

John W. Mumma,
Regional Forester.

Fee Schedule Policy and Procedures for Communications Uses

Note: The Forest Service uses alphanumeric codes and subject headings to organize the text of direction. Only those sections of the Forest Service Manual that would be revised are set out here. Readers should keep in mind that the audience of this direction is Forest Service employees charged with issuing and administering communication use authorizations.

Title 2700—Special Uses Management

2728—Communications

2729.1—Communications Sites

2. *Fee Determinations.*

c. Regional Fee Schedule—Communications use special use fees will be charged at the annual rates shown in the schedule below. These rates will apply without CPI—U adjustment for new authorizations issued during the remainder of C.Y. 1989, and with CPI—U adjustment in C.Y. 1990 for all authorizations. The schedule will not affect fee which have been established through appraisal, competitive bid, negotiation, or other sound business management principles; fees for these uses will be updated in accordance with the terms of the authorization.

(1) *Individual Authorization*

Final Fee Schedule—Northern Region

Use Category	Fee
Radio Broadcast (AM & FM) Service Area Population	*
(Not applicable for AM radio sites over one acre)	
Television Broadcast Service Area Population	*
Broadcast Translator	*
Cable and Subscription TV Number of subscribers:	
Less that 200	$400
201–500	$700
501–1,500	$1,400
1,501–2,500	$2,000
More than 2,500	$2,400
Common Carrier Microwave	
Relay	$1,500
Industrial Microwave	$1,000
Mobile Radio:	
Commercial Communication	
First licensed transmitter frequency	$700
Each additional licensed transmitter frequency	$200
Mobile Radio:	
Internal Communications	
First licensed transmitter frequency	$500
Each additional licensed transmitter frequency	$200
Cellular	
Passive Reflector	$500
Amateur Radio	$75
Personal/Private "Receive Only"	$75
Natural Resource and Environmental Monitoring	$75

* Fees of these categories of use will be established prior to 1/1/90.

(2) *Definitions*

(a) *Amateur Radio.* Equipment used by individuals or groups who are Licensed by FCC as amateur radio operators.

(b) *Broadcast Translator.* This category of use consists of receiving a television or FM radio broadcast signal and rebroadcasting it on a different channel or frequency for local reception. In some cases the translator relays the signal to another amplifier or translater. This category of use includes translators associated with public telecommunications service.

(c) *Cable and Subscription Television.* This category includes cable TV head-end antenna or satellite dish receivers used for community television pickups which retransmit by cable or any other means whereby subscribers pay periodic fees to receive the signal. These systems normally operate as a commercial entity within an authorized franchise area.

(d) *Cellular.* This is a specialized service provided by commercial communications which involves a mobile (vehicular) radio telephone system. A cell is the area covered by one transmitter/receiving site. Radio signals are automatically picked up by another cell's receiver as the radio telephone transmitter passes from cell area to cell area.

(e) *Common Carrier Microwave Relay.* This use typically includes long line carriers which relay intrastate and interstate telephone, television, information, and data transmissions using point to point microwave networks or systems. These uses are regulated by state public utility commissions and must provide service to any consumer with the ability to pay according to published rate schedules.

(f) *Industrial Microwave.* This use includes microwave communication equipment not regulated by state public utility commissions. Users in this group may include pipeline and power companies, railroads and land resource management agencies or firms.

(g) *Mobile Radio: Commercial Communications.* This includes communications equipment which primarily provides communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMRs), private carriers two-way systems, and private carriers paging systems (PCPs). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

(h) *Mobile Radio: Internal Communications.* A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

(i) *Natural Resource and Environmental Monitoring.* This use includes the transmission of telemetery data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations.

(j) Passive Reflector. Passive reflectors include various types of non-powered reflector devices used to bend or ricochet electronic signals between active relay stations or between an active relay station and terminal. The reflector requires point-to-point line-of-sight with the connecting relay stations, but does not require electric power. Maintenance is minimal and reflectors seldom require visitation.

(k) *Personal/Private "Receive Only"* These include radio and TV receiving antennas, satellite dishes and other equipment/facilities designed for the reception of electronic signals, serving private homes, including recreation residences. These facilities are personnally owned and not operated for profit.

(l) *Radio Broadcast.* This category includes FCC authorized facilities that broadcast AM and FM audio signals for general public reception. Users include radio stations which generate revenues from commercial advertising and public radio stations whose revenues are supported by subscriptions, grants and donations. Broadcast areas often overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(m) *Television Broadcast.* This category includes FCC authorized facilities that broadcast UHF and VHF audio and video signals for general public reception. Users include television stations (Major and independent networks) who generate income through commercial advertisement and public television stations whose operations are supported by subscriptions, grants and donations. Broadcast areas may overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(3) *Individual Authorizations Within Facilities Owned by Others*

When shared facility occupancy is authorized and each user has an authorization, the fee shall be 100% of the fee for each authorized use. There will be no $75 discount.

(4) *Fees under Multiple-User Authorizations*

To improve administration of communications sites, Forest Service policy provides for authorizing shared facility occupancies under a single authorization. By the terms and conditions, these authorization holders, rather than the Forest Service, authorize and administer the use of their facilities by others. Collection of Forest Service fees required under this type of authorization, are burdens of the holder.

Fees for such a multiple-user authorization:

First use = 100% of fee schedule

All other uses are subject to a $75 discount, except for additional frequencies in the case of mobile radios. These additional frequencies are charged the full rate per the following example:

Mobile radio use will be $700 as listed in the schedule for first frequency (less $75 discount) plus $200 for each additional frequency.

(5) *Discounts for Consolidation and Efficient Management*

There are situations where site or facility consolidation and efficient site management is intended to meet Forest Service objectives. In these situations, fees may be temporarily discounted to reflect the benefits received by the Forest Service. Annual fee discounts cannot exceed the holders' costs or the annual fee for use of the site. The fee discounts must be considered on a case-by-case basis and approved by the Regional Forester in advance.

Efficient site management may include the formation of user associations which assume administrative duties traditionally completed by the Forest Service

(6) *Use of Government Owned Facilities*

In addition to prescribed fees, authorized officers will require users occupying Forest Service facilities to perform or share in the costs of building or facility maintenance and repair, as provided by Section 7, Act of April 24, 1950 (Granger-Thye and FSM 2711.7).

(7) *Ancillary and Appurtenant Communication Uses*

Ancillary uses are those uses which provide support or intertie with another communication system on the site. The fee would be calculated based on the highest value of the uses. For example, a holder has installed a mobile radio used for internal communications which interties with an industrial microwave system in the same facility. In this case, the holder would be issued one authorization and charged a fee for Industrial Microwave.

Appurtenant uses are those communication uses incidental to another non-communication use of the National Forest System land, such as a ski resort or marina.

No fees will be charged for ancillary/appurtenant uses.

(8) *Phase-in of Fee Increases*

Fee increases for current holders will be phased-in at a rate of 25 percent of the previous year's fee with a minimum increase of $100 per year. The 25 percent increase will continue until the current scheduled fee is reached.

For example: Current fee is $300 and the scheduled fee is $800

	Phased-in Fee	Scheduled Fee*
Year:		
1	$400 ($100 min.)	$800
2	500	832
3	625	865
4	781	900
4	936	936

*Indexed using a 4 percent CPI-U.

The phase-in does not apply to new holders or existing holders adding new uses.

(9) *Annual Fee Schedule Adjustment*

All communication use fees are subject to annual adjustment. The U.S. Department of Labor Consumer Price Index for All Urban Consumers (CPI-U) for July of the current year will be divided by the CPI-U for July of the previous year to yield a CPI-U multiplier which will be used to annually update the Communications Use Fee Schedule.

(10) *Periodic Review of Fee Schedule*

The Northern Region shall, by December 31, 1994, reviews this schedule to determine whether market conditions and business practices have changed sufficiently to warrant a fee schedule revision. Fee waivers will also be reviewed at this time to ascertain holder's qualifications. Holders will be given an opportunity to provide data which might have a bearing on the review.

(11) *Other Methods of Establishing Fees*

Fees for atypical sites, for categories of use which were not established in the schedule, for sites servicing high populations, or AM radio broadcast sites exceeding 1 acre will be determined on an individual case basis.

The authorized officer may use site-specific appraisals, sound business management principles, and/or rental analysis as coordinated with the Regional Reviewing Appraiser to determine fees for new categories of use or individual sites when market evidence, such as leases for similarly used sites, demonstrates the inapplicability of the fee schedule.

Appraisals provided by the holder or other groups may be used to determine fees if the Regional reviewing Appraiser establishes that the appraisal meets Forest Service appraisal standards and the report is approved.

Competitive bidding may be used to establish fees for new sites, (FSM 2712.2).

[FR Doc. 89–19857 Filed 8–22–89; 8:45 am]

BILLING CODE 3410-11-M

Rocky Mountain Region; Fee Schedule for Communications Uses

AGENCY: Forest Service, USDA.

ACTION: Notice; adoption of fee schedule for communications uses.

SUMMARY: The Regional Forester, Rocky Mountain Region, Forest Service, is adopting a new fee schedule for communications uses on National Forest System land in the states of Colorado, Kansas, Nebraska, South Dakota and Wyoming. The intent of the new fee schedule is to assess fees that are based on fair market value of the rights and privileges as mandated by the Federal Land Policy and Management Act, October 21, 1976.

EFFECTIVE DATE: September 22, 1989.

FOR FURTHER INFORMATION CONTACT: Questions about this policy should be addressed to Ben Wallingford, Lands Staff, Forest Service, Rocky Mountain Region, 11177 West 8th. Ave., Box 25127, Lakewood, CO 80225, (303) 236–9511.

SUPPLEMENTARY INFORMATION: On July 28, 1988, the Regional Forester for the Rocky Mountain Region published a notice of a proposed fee schedule for communications uses (53 FR 28026) with request for comment. By notice published in the **Federal Register** (53 FR 38759) October 3, 1988 the comment period was extended.

The proposed fee schedule and policy was based on categories of use with individual fees to be determined by population, number of licensed transmitter frequencies, number of subscribers, or the nature of the use. The proposal also called for annual adjustments of the scheduled fees based upon the Consumer Price Index—Urban (CPI–U) and provided for a phase-in of fees. The proposal was published simultaneously with the proposals by 5 other Regions, who had coordinated their proposals to achieve nation wide consistency where possible.

Analysis of Public Comment

The Rocky Mountain Region received 82 responses to the proposal. The number and percentage of comments by respondents were:

Use categories	No. of respondents	Percent of total
Amateur Radio	5	6
Broadcast Translator	7	9
Mobile Radio; Commercial Communications	14	17
Mobile Radio; Internal Communications	36	43
Common Carrier Microwave Relay	3	4
Industrial Microwave	1	1
Radio Broadcast	7	9
Television Broadcast	7	9
Other	2	2

All of the comments received have been reviewed and given consideration in reaching the final decision. A summary of the major comments received and the Forest Service response by topic follows. It should be noted that the Rocky Mountain Region has coordinated its review and response to the comments with the other Regions in order to achieve as much consistency Service wide as possible.

1. *Fees levels.* A number of respondents felt that the proposed fees were extreme and unreasonable. Many individuals and small businesses indicated that the proposed fees would be too great a burden for them and that they would have to abandon their sites if the schedule were implemented. Some suggested a re-evaluation and reduction in the proposed fees. Others recommended lower fees and a longer phase-in period.

A few respondents said that the proposed fee rates were too low and thus amount to public subsidies. Several suggested alternative methods for determining fees, some of which would return many times the proposed rates to the Federal Government. Among alternatives proposed were: to adopt a fee policy based on site rental income (assess a percentage of gross rental income derived from the site); to consider site value in light of the alternative cost of constructing competitive towers on private lands; to base fee as a percentage of the user's investment in improvements and equipment; to use per capita income multipliers to adjust for differences between geographical areas; and to use private management companies, with no vested interest in the site, to establish individual fees.

After analysis of these comments, the Rocky Mountain Region is making the following changes in the proposed communications use fee schedule:

a. To be consistent with other Regions, the fees for cable and subscription television will be based on a different stratification of numbers of subscribers. In most situations, this method reduces the fees charged to companies who service small populations and offers more stratification of fees for the mid-size companies. In the proposed schedule, fees were based on the census population within the franchise or service area. The change allows the fee to be based on actual use.

b. The same fee structure is adopted for both Mobile Radio: Commercial Communication and Mobile Radio: Internal Communication. There will be a base fee for the first transmitting frequency plus a $200 fee for each additional transmitting frequency. This will result in a reduction of fees for smaller operations, but will result in a slight increase for some large operations.

A few respondents also commented that proposed fees were too high in the categories of: Amateur Radio, Common Carrier Microwave Relay, Industrial Microwave, and Mobile Radio: Commercial Communications. The claims of high fees were not supported by market data or was insufficient to warrant changing the fees in the final schedule. Therefore the Region is adopting fees for these categories as proposed.

2. *Market Survey.* A number of respondents felt that the market survey used to develop the proposed fee schedule was inadequate. Most indicated that the market survey and resulting fees did not give credit for enhancing public lands, used ability to pay rather than fair market value to determine the fees, did not include comparable leases for the use of private land, used insufficient market data, and did not correlate fees with investment values and site improvement costs. Less than 8 percent of the respondents provided data supporting their position.

The Rocky Mountain Region coordinated with the other Forest Service Regions in reviewing and re-analyzing the market data utilized in compiling the proposed fees. No major discrepancies were found in the market data compiled by the Forest Service. The data was found to be adequate for fee determination.

For the purposes of determining fair market value, we examined available market leases to see if the expense of developing facilities, access, and power was a factor influencing private lease rates. We found no useable correlation. The private sector leases used to establish fair market value do not clearly discount the site rental because of the development cost incurred by the lessee.

3. *Fee Exemption/Waivers.* Under the proposed policy, exemptions from fees and fee waivers would remain a decision of the authorized officer (36 CFR 251.57(b)). A number of respondents objected to the Forest Service policy of charging fees for communication uses on National Forest System land. Others felt that fees should be waived for any use that provides a public benefit, whether that use is of a commercial nature or not. Most respondents to this issue found the current fee waiver policy unclear, vague, and subject to inconsistent application. They requested a clear, consistent statement of a national fee waiver policy for specific categories of use. Some respondents felt that government and public agencies, as well as certain other users (utilities, public broadcasters, etc.) should be exempt from fees as a matter of National policy.

We agree that there should be national fee waivers established for specific categories of use or type of holder when the entire class of use or holder meets the rental fee waiver criteria. Therefore, national direction will be issued concerning fee waivers for specific categories of use and/or type of holder. The direction, which follows, is intended to clarify the intent of the waiver policy, it does not contain any substantive changes in current policy.

a. *Fee exemption*—Exemptions are determinations that certain classes of users will not be required to pay an annual rental fee. Most such exemptions are statutory; i.e., they derive from specific fee exemption language in Public Law, and are not subject to the discretion of the authorized officer. However, holders may be assessed an amount sufficient to reimburse the cost of administering the use. Holders exempt from fee include:

—Federal agencies

—Facilities established by Rural Electrification Administration

—Public telecommunication systems identified and licensed as such by the Federal Communications Commission (FCC) for educational, cultural, instructional, and institutional purposes, and as described in the Communications Act of 1934, and the Federal Communications Regulations granting waiver of license fees; i.e., non-commercial educational broadcast stations as defined in 15 CFR part 2301–Public Telecommunications Facilities Program, Subpart A–Definitions, Program Purposes, and Special consideration.

b. *Fee Waiver*—Waivers are discounts or reductions from payment of the full annual rental fee, by provisions of law and regulation, and at the discretion of the authorized officer. The Forest officer delegated the authority to issue the permit and establish the fee is also the officer authorized to determine if a holder qualifies for a fee waiver. Fee waivers must be equitable and in the public interest (36 CFR 251.47(b)).

(1) *State and Local Government.* The authorized officer shall waive fees in full for telecommunication facilities and systems owned and operated by a State or local government agency or instrumentality thereof, when:

—State or local government or instrumentalities thereof do not charge the Forest Service for similar services; and

—The use is not installed, maintained, or otherwise financed by means of customer charges, which include but are not limited to subscription fees, membership fees or dues, or special tax assessments; and

—The use furthers the public health, safety, or welfare, or is otherwise to the benefit of the general public or the programs of the Secretary of Agriculture.

(2) *Other Holders.* Waivers for other holders will be considered by the authorized officer on a case by case basis. If granted, fees will not be waived below $75, which currently represents the cost to the Forest Service for administration of the authorization. This rate is, however, subject to revision on the basis of change in administrative costs.

There were also a number of responses, as well as comments sent to the chief of the Forest Service on the proposals by all Regions, which requested a review of the Forest Service's rental fee waiver policy for radio broadcast (commercial), television broadcast (commercial) and associated broadcast translators. The respondents felt that a partial or full waiver should be granted based on the public service requirements of the Communications Act of 1934 and the provisions of the Federal land Policy and Management Act of 1976.

As a result of these requests, the Forest Service is reviewing the national rental fee waiver policy for these categories of use. As a part of the review, the Forest Service is working with the Radio and Television Broadcasters to review the type and amount of public service provided.

Rental fees for these categories of use will remain at current levels until the review is completed and a final fee is established in the schedule. We anticipate fees for these uses will be established prior to January 1, 1990. All authorization holders and others expressing an interest in the fee schedules will be notified when the final fees are established.

4. *Categories of Use.* In the proposal, fees were based on categories of communications uses on National Forest System land. Each category was defined in the fee schedule to ensure proper classification.

A number of respondents felt that the categories of uses were too narrowly defined. Some respondents urged separation of uses such as: (1) Specialized mobile radios from other uses, (2) commercial communication systems used for profit from those used for public services, and (3) TV cable enterprises serving major population centers from those serving sparsely populated rural areas.

After considering comments, the categories of "Commercial Communicator" and "Internal Two-Way Radio" in the proposal have been changed to "Mobile Radio: Commercial Communications" and "Mobile Radio: Internal Communications". In addition, definitions for these categories have been modified for clarification at the request of industry respondents. The other categories are adopted as proposed.

To maintain consistency between the Regions, internal microwave has been changed to industrial microwave.

5. *Phase-in of Fee Increases.* The proposed fee schedule provided for a 3 or 5 year phase-in of fees for current holders. It was based on the percentage and amount of increase. There was concern that the phase-in did not adequately consider the financial impacts of the increase on some holders. There were examples of fees which exceeded 100 percent of the existing fee in each year of the phase-in. It was feared that the rapid increase would adversely affect the holders and their customers. As a result, the phase-in has been modified to allow a longer phase-in period.

The new phase-in will provide for a maxium increase of 25 percent of the previous year's fees with a minimum increase of $100 per year. The number of years it takes to reach the scheduled fee will vary. However, most of the fee

increases should be phased-in within 10 years. New holders and holders adding new uses are not covered by the phase-in.

6. *Definitions.* Several respondents found certain definitions and terms inadequate or confusing. Industry suggested definitions and terms that more clearly define commerical communications and internal radio communication uses.

In coordination with other Regions and the Washington Office, the Rocky Mountain Region has adopted common terminology defining the various types of communications uses.

Most of the proposed definitions for the categories of use remain unchanged or slightly modified. Modifications were in response to reviewers comments or to improve clarity.

Slight changes were made in the following definitions (changes to improve clarity not noted):

—A definition for Natural Resource and Environmental Monitoring is provided as follows: "This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations."

—All references to appurtenant uses are eliminated from the definition of Radio and Television Broadcast. Appurtenant uses are discussed in the Forest Service manual supplement.

Major changes were made in the definitions of Commercial Communicator and Internal Two-Way Radio. We agree with the reviewers who commented that the original definitions did not adequately describe the two categories of uses. In the final policy, the terms are defined as follows:

Mobile Radio: Commerical Communications. This includes communication equipment which is used to provide communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or many not be regulated by a state public utility commission. The use requires an FCC license. Example of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMR's), private carrier two-way radio systems, and private carrier paging system (PCPS). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

Mobile Radio: Internal Communications. A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

6. *Implementation.* Having considered the comments received, the Rocky Mountain Region is adopting the fee schedule with the changes noted in the foregoing discussion of comments. The policy and procedures to guide Forest Service employees in implementing the Communications Use Fee Schedule will be issued as a Regional Supplement to Forest Service Manual Chapter 2720. The text of the supplement is set out at the end of this notice.

The fee schedule will apply immediately to all new permits issued on and after the effective date of this policy. The fee schedule will be implemented for all existing special use authorizations with the billings for calendar year 1990.

Dated: May 18, 1989.

Sidney H. Hanks,

Deputy Regional Forester.

Fee Schedule Policy and Procedures for communications uses

(**Note:** The Forest Service uses alphanumeric codes and subject headings to organize the text of direction. Only those sections of the Forest Service Manual that would be revised are set out here. Readers should keep in mind that the audience of this direction is Forest Service employees charged with issuing and administering communication use authorizations.)

Title 2700—Special Uses Management

2728—COMMUNICATIONS

2728.1—Communications Sites

2. *Fee Determinations*

c. Regional Fee Schedule—Communications use special use fees will be charged at the annual rates shown in the schedule below. These rates will apply without CPI–U adjustment for new authorizations issued during the remainder of C.Y. 1989, and with CPI–U adjustment beginning in C.Y. 1990 for other authorizations. The schedule will not affect fees which have been established through appraisal, competitive bid, negotiation, or other sound business management principles; fees for these uses will be updated in accordance with terms of the authorization.

(1) *Individual Authorization*

Final Fee Schedule—Rocky Mountain Region

Use Category	Fee Schedule
Radio Broadcast (AM & FM) *Service Area Population*	*
(Not applicable for AM radio sites over one acre)	
Television Broadcast *Service Area Population*	*
Broadcast Translator	*
Cable and Subscription TV	
Number of subscribers:	
Less than 200	$400
201–500	$700
501–1,500	$1,400
1,501–2,500	$2,000
More than 2,500	$2,400
Common Carrier Microwave Relay	$1,500
Industrial Microwave	$1,000
Mobile Radio:	
Commercial Communication	
First licensed transmitter frequency	$700
Each additional licensed transmitter frequency	$200
Mobile Radio:	
Internal Communications	
First licensed transmitter frequency	$700
Each additional licensed transmitter frequency	$200
Passive Reflector	$500
Amateur Radio	$75
Personal/Private *"Receive Only"*	$75
Natural Resource and *Environmental Monitoring*	$75

* Fees of these categories of use will be established prior to 1/1/90.

(2) *Definitions*

(a) *Amateur Radio.* Equipment used by individuals or groups who are Licensed by FCC as amateur radio operators.

(b) *Broadcast Translator.* This category of use consists of receiving a television or FM radio broadcast signal and rebroadcasting it on a different channel or frequency for local reception. In some cases the translator relays the signal to another amplifier or translator. This category of use includes translators associated with public telecommunications service.

(c) *Cable and Subscription Television.* This category includes cable TV head-end antenna or satellite dish receivers used for community television pickups which retransmit by cable or any other means whereby subscribers pay periodic fees to receive the signal. These systems normally operate as a commercial entity within an authorized franchise area.

(d) **Cellular.** This is a specialized service provided by commercial communicators which involves a mobile (vehicular) radio telephone system. A cell is the area covered by one transmitter/receiving site. Radio signals are automatically picked up by another cell's receiver as the radio telephone transmitter passes from cell area to cell area.

(e) *Common Carrier Microwave Relay.* This use typically includes long line carriers which relay intrastate and interstate telephone, television, information, and data transmissions using point to point microwave networks or systems. These uses are regulated by state public utility commissions and must provide services to any consumer with the ability to pay according to published rate schedules.

(f) *Industrial Microwave.* This use includes microwave communication equipment not regulated by state public utility commissions. Users in this group may include pipeline and power companies, railroads and land resource management agencies or firms.

(g) *Mobile Radio: Commercial Communications.* This includes communications equipment which primary provides communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMRs), private carrier two-way systems, and private carrier paging systems (PCPs). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

(h) *Mobile Radio: Internal Communications.* A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

(i) *Natural Resources and Environmental Monitoring.* This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations.

(j) *Passive Reflector.* Passive reflectors include various types of non-powered reflector devices used to bend or ricochet electronic signals beteen active relay stations or between an active relay station and terminal. The reflector requires point-to-point line-of-sight with the connecting relay stations, but does not require electric power. Maintenance is minimal and reflectors seldom require visitation.

(k) *Personal/Private "Receive Only".* These include radio and TV receiving antennas, satellite dishes and other equipment/facilities designed for the reception of electronic signals, serving private homes, including recreation residences. These facilities are personally owned and not operated for profit.

(l) *Radio Broadcast.* This category includes FCC authorized facilities that broadcast AM and FM audio signals for general public reception. Users include radio stations which generate revenues from commercial advertising and public radio stations whose revenues are supported by subscriptions, grants and donations. Broadcast areas often overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(m) *Television Broadcast.* This category includes FCC authorized facilities that broadcast UHF and VHF audio and video signals for general public reception. Users include television stations (Major and independent networks) who generate income through commercial advertisement and public television stations whose operations are supported by subscriptions, grants and donations. Broadcast areas may overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(3) Individual Authorizations Within Facilities Owned by Others

When shared facility occupancy is authorized and each user has an authorization, the fee shall be 100% of the fee for each authorized use. There will be no $75 discount.

(4) Fees under Multiple-User Authorizations

To improve adminstration of communications sites, Forest Service policy provides for authorizing shared facility occupancies under a single authorization. By the terms and conditions, these authorization holders, rather than the Forest Service, authorize and administer the use of their facilities by others. Collection of Forest Service fees required under this type of authorization, are burdens of the holder.

Fees for such a multiple-user authorization:

First use=100% of fee schedule

All other uses are subject to a $75 discount, except for additional frequencies in the case of mobile radios. These additional frequencies are charged the full rate per the following example:

Mobile radio use will be $300 to $2,000 as listed in the schedule for first frequency (less $75 discount) plus $200 for each additional frequency.

(5) Discounts for Consolidation and Efficient Management

There are situations where site or facility consolidation and efficient site management is intended to meet Forest Service objectives. In these situations, fees may be temporarily discounted to reflect the benefits received by the Forest Service. Annual fee discounts cannot exceed the holder costs or the annual fee for use of the site. The fee discounts must be considered on a case-by-case basis and approved by the Regional Forester.

Efficient site management may include the formation of user associations which assume administrative duties traditionally completed by the Forest Service.

(6) Use of Government Owned Facilities

In addition to prescribed fees, authorized officers will require users occupying Forest Service facilities to perform or share in the costs of building or facility maintenance and repair, as provided by section 7, Act of April 24, 1950 (Granger-Thye and FSM 2711.7).

(7) Ancillary and Appurtenant Communication Users

Ancillary uses are those uses which provide support or intertie with another communication system on the site. The fee would be for the highest valued communication use of the holder. For example, a holder has installed a mobile radio used for internal communications which interties with an industrial microwave system in the same facility. In this case the holder would be issued one authorization and charged a fee for industrial microwave.

Appurtenant uses are those communication uses incidental to another non-communication use of the National Forest System land, such as a ski resort or marina.

No fees will be charged for ancillary/appurtenant uses.

(8) Phase-in of Fee Increases

Fee increases for current holders will be phased-in at a rate of 25 percent of the previous year's fee with a minimum increase of $100 per year. The 25 percent increase will continue until the current scheduled fee is reached.

For example: Current fee is $300 and the scheduled fee is $800

	Phased-in fee	Scheduled fee*
Year 1	[1] $400	$800
Year 2	500	832
Year 3	625	865
Year 4	781	900
Year 5	936	936

*Indexed using a 4 percent CPI–U.

[1] $100 min.

The phase-in does not apply to new holders or existing holders adding new uses.

(9) Annual Fee Schedule Adjustment

All communication use fees are subject to annual adjustment. The U.S. Department of Labor Consumer Price Index for All Urban Consumers (CPI–U) for July of the current year will be divided by the CPI–U for July of the previous year to yield a CPI–U multiplier which will be used to annually update the Communications Use Fee Schedule.

(10) Periodic Review of Fee Schedule

The Rocky Mountain Region shall, by December 31, 1993, review this schedule to determine whether market conditions and business practices have changed sufficiently to warrant a fee schedule revision. Fee waivers will also be reviewed at this time to ascertain holder's qualifications. Holders will be given an opportunity to provide data which migh have a bearing on the review.

(11) Other Methods of Establishing Fees

Fees for atypical sites, or categories of use which were not established in the schedule, or sites servicing high populations, or AM radio broadcast sites exceeding 1 acre, will be determined on an individual case basis.

The authorized officer may use site-specific appraisals, sound business management principles, and/or rental analysis as coordinated with the Regional Reviewing Appraiser to determine fees for individual sites when market evidence, such as leases for similarly used sites, demonstrate the inapplicability of the fee schedule.

Appraisals provided by the holder or other groups may be used to determine fees if the Regional Reviewing Appraiser establishes that the appraisal meets Forest service appraisal standards and the report is approved.

Competitive bidding may be used to establish fees for new sies, (FSM 2712.2).

[FR Doc. 89–19854 Filed 8–22–89; 8:45 am]
BILLING CODE 3410-11-M

Pacific Southwest Region; Fee Schedule for Communications Uses

AGENCY: Forest Service, USDA.

ACTION: Notice; adoption of fee schedule for communications uses.

SUMMARY: The Regional Forester, Pacific Southwest Region, Forest Service, is adopting a new fee schedule for communications uses on National Forest System Lands within the Pacific Southwest Region. The intent of the new fee schedule is to assess fees that are based on fair market value of the rights and privileges as mandated by the Federal Land Policy and Management Act, October 21, 1976.

EFFECTIVE DATE: September 22, 1989.

FOR FURTHER INFORMATION CONTACT: Questions about this policy should be addressed to Adele H. Goss or Paul Tittman, U.S. Forest Room 1016, 630 Sansome St., San Francisco, CA, 94111.—(415/556–3415 or 556–4202).

SUPPLEMENTARY INFORMATION: On July 28, 1988, the Regional Forester for the Pacific Southwest Region published a notice of a proposed fee schedule for communications uses (53 FR 28620) with request for comment. By notice published in the **Federal Register** (53 FR 38759 October 3, 1988) the comment period was extended.

The proposed fee schedule and policy was based on categories of use with individual fees to be determined by population, number of licensed transmitter frequencies, number of subscribers, or the nature of the use. The proposal also called for annual adjustments of the scheduled fees based upon the Consumer Price Index—Urban (CPI–U) and provided for a phase-in statement. The proposal was published simultaneously with the proposals by 5 other Regions who had coordinated their proposals to achieve nationwide consistency where possible.

Analysis of Public Comment

Analysis of Public Comment:

The Pacific Southwest Region received 612 responses to the proposal. The number and percentage of comments by respondents were:

Use categories	Respondents percent	
	No.	Percent
Respondent:		
Amateur radio	10	2
Broadcast translator	3	
Cable and Subscription TV	9	1
Cellular telephone	8	1
Mobile radio: Commercial communications	520	85
Mobile radio: Internal communications	23	4
Common carrier microwave relay	3	
Industrial microwave	11	2
Natural resource and environmental monitoring	0	
Passive reflector	1	
Personal/private "receive only"	1	
Radio broadcast	12	2
Television broadcast	10	2
Other	1	

All of the comments received have been reviewed and given consideration in reaching the final decision. A summary of the major comments received and the Forest Service response by topic follows. It should be noted that the Pacific Southwest Region has coordinated its review and response to the comments with the other Regions in order to achieve as much consistency Service wide as possible.

1. *Fee levels.* A number of respondents felt that the proposed fees were extreme and unreasonable. Many individuals and small businesses indicated that the proposed fees would be too great a burden for them and that they would have to abandon their site if the schedule were implemented. Some suggested a re-evaluation and reduction in the proposed fees. Others recommended lower fees and a longer phase-in period.

A few respondents said that the proposed fee rates were too low and thus amount to public subsidies. Several suggested alternative methods for determining fees, some of which would return many times the proposed rates to the Federal Government. Among alternatives proposed were: to adopt a fee policy based on site rental income (assess a percentage of gross rental income derived from the site); to consider site value in light of the alternative cost of constructing competitive towers on private lands; to base fee as a percentage of the user's investment in improvements and equipment; to use per capita income multipliers to adjust for differences between geographical areas; and, to use private management companies, with no vested interest in the site, to establish individual fees.

After analysis of these comments, the Pacific Southwest Region is making the following changes in the proposed communications use fee schedule:

a. To be consistent with other Regions, the fee for cable and subscription television will be based on numbers of subscribers. In most situations, this method reduces the fees charged to companies who service small populations and offers more stratification of fees for the mid-size companies. In the proposed schedule, fees were based on the census population within the franchise or service area. The change allows the fee to be based on actual use.

b. Also, for consistency among the Regions, Common Carrier Microwave Relay and Industrial Microwave Relay have been separated and re-evaluated.

c. As a result of comments concerning the market survey, the market survey was re-evaluated and additional information from the western United States was reviewed. This has resulted in the following changes from the fee schedule published in the July, 1988 Draft Federal Notice for Common Carrier Microwave Relay:

North Zone—fee lowered from $3,500 to $3,000
South Zone—fee lowered from $6,500 to $5,500

For Industrial Microwave Relay the following changes have been made:

North Zone—fee lowered from $1,500 to $1,000
Central Zone—fee lowered from $4,000 to $3,000
South Zone—fee raised from $3,600 to $5,000

d. The fee schedule is based upon three zones as published in the July, 1988 draft **Federal Register** Notice. There was one modification made in the zones, Inyo County was changed from the South Zone to the Central Zone.

e. In the July 28, 1988 Draft **Federal Register** Notice, the Pacific Southwest Region based the fee structure for "Commercial Communicator" and "internal Two Way" use categories on 25% of total gross income from on-site equipment, space or frequency rentals, whichever was greater. To be consistent with other Regions and to be responsive to the mobile radio industry, the Pacific Southwest Region is adopting the same fee structure as other Regions.

The same fee structure is adopted for both Mobile Radio: Commercial Communication and Mobile Radio: Internal Communication. There will be a base fee for the first transmitting frequency plus a $200 fee for each additional transmitting frequency.

A few respondents also commented that proposed fees were too high in the categories of Amateur Radio and Cellular Telephone. The claims of high fees were not supported by market data or were insufficient to warrant changing the fees in the final schedule. Therefore the Region is adopting fees for these categories as proposed.

2. *Sites Not Included In The Schedule.* In the July 1988 draft **Federal Register** Notice, the Pacific Southwest Region addressed the issue of site specific appraisals for unique communications sites or sites servicing high populations such as Mt. Wilson and other sites servicing the Los Angeles Area. Mt. Wilson, Sunset Ridge, Mt. Lukins, Johnston Peak, Magic Mountain, Santiago Peak, Sierra Peak, and Strawberry Peak are not covered by this schedule. Fees for existing uses on these sites will continue at the current rate until the authorized officer determines the fair market value. Fees for new uses and Re-evaluation of existing fees may be established using site specific market analysis or other sound business management principles. Authorization holders will be notified of any proposed changes in fees.

3. *Market Surveys.* A number of respondents felt that the market survey used to develop the proposed fee schedule was inadequate. Most indicated that the market survey and resulting fees did not give credit for enhancing public lands, used ability to pay rather than fair market value to determine the fees, did not include comparable leases for the use of private land, used insufficient market data, and did not correlate fees with investment values and site improvement costs. Less than 1 percent of the respondents provided data supporting their position.

The Pacific Southwest Region coordinated with the other Forest Service Regions in reviewing and re-analyzing the market data utilized in compiling the proposed fees. The Region reviewed additional data from the western United States. Based on this review, some fees were adjusted. Most of the fees were adjusted down, refer to section 2 which describes fee levels.

For the purposes of determining fair market value, we examined available market leases to see if the expense of developing facilities, access, and power was a factor influencing private lease rates. We found no useable correlation. The private sector leases used to establish fair market value fees do not clearly discount the site rental because of the development cost incurred by the lessee.

4. *Fee Exemption/Waivers.* Under the proposed policy, exemptions from fees and fee waivers would remain a decision of the authorized officer (36 CFR 251.57(b)). A number of respondents objected to the Forest Service policy of charging fees for communications uses on National Forest System land. Others felt that fees should be waived for any use that provided a public benefit, whether that use is of a commercial fee waiver policy unclear, vague and subject to inconsistent application. They requested a clear, consistent statement of a national fee waiver policy for specific categories of use. Some respondents felt that government and public agencies, as well as certain other users (utilities, public broadcasters, etc.) should be exempt from fees as a matter of National policy.

We agree that there should be national fee waivers established for specific categories of use or type of holder when the entire class of use or holder meets the rental fee waiver criteria. Therefore, national direction will be issued concerning fee waivers for specific categories of use and/or type of holder. The direction, which follows, is intended to clarify the intent of the waiver policy, it does not contain any substantive changes in current policy.

a. *Fee Exemption*—Exemptions are determinations that certain classes of users will not be required to pay an annual rental fee. Most such exemptions are statutory; i.e., they derive from specific fee exemption language in Public Law, and are not subject to the discretion of the authorized officer. Holders may be assessed an amount sufficient to reimburse the cost of administering the use. Holders exempt from fees include:

—Federal agencies.
—Facilities financed by Rural Electrification Administration.
—Public telecommunication systems identified and licensed as such by the Federal Communications Commission (FCC) for educational, cultural, instructional, and institutional purposes, and as described in the Communications Act of 1934, and the Federal Communications Regulations granting waiver of license fees; i.e., non-commercial educational broadcast stations as defined in 15 CFR part 2301—Public Telecommunications Facilities Program-subpart A—Definitions, Program Purposes, and Special consideration.

b. *Fee Waiver*—Waivers are discounts or reductions from payment of the full annual rental fee, and at the discretion of the authorized officer. The Forest Officer delegated the authority to issue the permit and establish the fee is also the officer authorized to determine if a holder qualifies for a fee waiver. Fee waivers must be equitable and in the public interest (36 CFR 251.57 (b)).

(1) State and Local Government. The authorized officer shall waive fees for telecommunication facilities and systems owned and operated by a State or local government agency or instrumentality thereof, when:

—State or local government or instrumentalities thereof do not charge the Forest Service for similar services.
—The use is not installed, maintained, or otherwise financed by means of customer charges, which include but are not limited to subscription fees, membership fees or dues, or special tax assessments, and
—The use furthers the public health, safety or welfare, or is otherwise to the benefit of the general public or the programs of the Secretary of Agriculture.

(2) Other Holders. Waivers for other holders will be considered by the authorized officer on a case by case basis. If granted, fees will not be waived below $75, which currently represents the cost to the Forest Service for administration of the authorization. This rate is, however, subject to revision on the basis of change in administrative costs.

There were also a number of responses, as well as comments sent to the Chief of the Forest Service on the proposals by all Regions, which requested a review of the Forest Service's rental fee waiver policy for radio broadcast (commercial), television broadcast (commercial) and associated broadcast translators. The respondents felt that a partial or full waiver should be granted based on the public service requirements of the Communications Act of 1934 and the provisions of the Federal Land Policy and Management Act of 1976.

As a result of these requests, the Forest Service is reviewing the national rental fee waiver policy for these categories of use. As a part of the review, the Forest Service is working with the Radio and Television Broadcasters to review the type and amount of public service provided.

Rental fees for these categories of use will remain at current levels until the review is completed and a final fee is established in the schedule. We anticipate fees for these uses will be established prior to January 1, 1990. All authorization holders and others expressing an interest in the fee schedules will be notified when the final fees are established.

5. *Categories of Use.* In the proposal, fees were based on categories of communications uses of National Forest System land. Each category was defined in the fee schedule to ensure proper classification.

A number of respondents felt that the categories of uses were too narrowly defined. Some respondents urged separation of uses such as: (1) Commercial communication microwave uses from industrial microwave uses, (2) specialized mobile radios from other uses, (3) commercial communication systems used for profit from those used for public services, and (4) TV cable enterprises serving major population centers from those serving sparsely populated rural areas.

As noted under the earlier discussion of fees, Industrial Microwave uses have been placed in a separate category from Common Carrier Microwave uses in the final policy.

After considering comments, the categories of "Commercial Communicator" and "Internal Two-Way Radio" in the proposal have been changed to "Mobile Radio: Commercial Communications". In addition, definitions for these categories have been modified for clarification at the request of industry respondents. The other categories are adopted as proposed.

6. *Definitions.* Several respondents found certain definitiosn and terms inadequate or confusing. Industry representatives suggested definitions and terms that would more clearly define commercial communications and internal radio communication uses.

In coordination with other Regions and the Washington Office, the Pacific Southwest Region adopted terminology defining the various types of communication uses.

Most of the proposed definitions for the categories of use remain unchanged or slightly modified. Modifications were in response to reviewers comments or to improve clarity.

Slight changes were made in the following definitions (changes to improve clarity not noted):

—A definition for Natural Resource and Environmental Monitoring is provided as follows: "This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations."
—All references to appurtenant uses are eliminated from the definition of Radio and Television Broadcast. Appurtenant uses are discussed in the Forest Service manual supplement.

Major changes were made in the definitions of Commercial Communicator and Internal Two-Way Radio. We agree with the reviewers who commented that the original definitions did not adequately describe the two categories of uses. In the final policy, the terms are defined as follows:

Mobile Radio: Commercial Communications. This includes mobile radio equipment which is used to provide communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMR's), private carrier two-way radio systems, and private carrier paging systems (PCPS). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

Mobile Radio: Internal Communications. A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purposes of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

6. *Phase-in of Fee Increases.*

The proposed fee schedule provided for a 3 or 5 year phase-in of fees for current holders. It was based on the percentage and amount of increase. There was concern that the phase-in did not adequately consider the financial impacts of the increases on some holders. There were examples of fees which exceeded 100 percent of the existing fee in each year of the phase-in. It was feared that the rapid increase would adversely affect the holders and their customers. As a result, the phase-in has been modified to allow a longer phase-in period.

The new phase-in will provide for a maximum increase of 25 percent of the previous year's fees with a minimum increase of $100 per year. The number of years it takes to reach the scheduled fee will vary. However, most of the fee increase should be phase-in within 10 years. New holders and holders adding new uses are not covered by the phase-in.

8. *Implementation.* Having considered the comments received, the Pacific Southwest Region is adopting the fee schedule with the changes noted in the foregoing discussion of comments. The policy and procedures to guide Forest Service employees in implementing the Communications Use Fee Schedule will be issued as a Regional Supplement to Forest Service Manual Chapter 2720. The text of the supplement is set out at the end of this notice.

The fee schedule will apply immediately to new permits issued on and after the effective date of this Policy. However, the authorized officer may use site specific analysis or other sound business management principles when it is determined that the schedule is inapplicable. Fees which have been established through competitive bid, appraisal, negotiation, or other sound business management practices are not covered by the schedule and will be updated in acordance with the terms of the authorization.

The fee schedule will be implemented for existing special use authorizations with the billings for calendar year 1990.

Dated: July 14, 1989.

Norwood F. Robertshaw,

Assistant Regional Forester, Lands and Real Estate Management.

Fee Schedule Policy and Procedures for Communication Uses

Note: The Forest Service uses alphanumeric codes and subject headings to organize the text of direction. Only those sections of the Forest Service Manual that would be revised are set out here. Readers should keep in mind that the audience of this direction is Forest Service employees charged with issuing and administering communication use authorizations.

Title 2700—Special Uses Management

2728—Communications

2728.1—Communications Sites

2. *Fee Determinations*

c. Regional Fee Schedule—Communications site special use fees will be charged at the annual rates shown. These rates will apply without CPI–U adjustment for new authorizations issued during the remainder of C.Y. 1989, and with CPI–U adjustment in C.Y. 1990 for other authorizations. The schedule will not affect fees which have been established through appraisal, competitive bid, negotiation, or other sound business management principles; fees for these uses will be updated in accordance with terms of the authorization.

(1) *Individual Authorization*

FINAL FEE SCHEDULE—PACIFIC SOUTHWEST REGION

Use Category	
Amateur Radio: All zones	$75
Broadcast Translator	*
Cable and Subscription Television All zones:	
Number of subscribers served	
Less than 200	400
201–500	700

FINAL FEE SCHEDULE—PACIFIC SOUTHWEST REGION—Continued

Use Category	
501–1,500	1,400
1,501–2,500	2,000
More than 2,500	2,400
Cellular Telephone: Regionwide	5,000
Common Carrier Microwave Relay [1]	
North Zone	3,000
Central Zone	5,500
South Zone	5,500
Industrial Microwave:	
North Zone	1,000
Central Zone	3,500
South Zone	5,000

Note:*—Fees of these categories of use will be established prior to 1/1/90.

[1] Fees for local exchange communications facilities which provide service to small populations.

Mobile Radio: Commercial Communications

North Zone $700 for the 1st transmitting frequency, plus
$200 each subsequent transmitting frequency.
Central Zone $1,500 for the 1st transmitting frequency, plus
$200 each subsequent transmitting frequency
South Zone $2,500 for the 1st transmitting frequency, plus
$200 each subsequent transmitting frequency

Mobile Radio: Internal Communications

North Zone $700 for 1st transmitting frequency, plus
$200 each-subsequent transmitting frequency
Central Zone $1,500 for 1st transmitting frequency, plus
$200 each subsequent transmitting frequency.
South Zone $1,500 for 1st transmitting frequency, plus
$200 each subsequent transmitting frequency

Natural Resource and Environmental Monitoring.

Use Category	
All Zones	$75
Passive Reflector: [1] All Zones	500
Personal/Private "Receive Only": All Zones.	75
Radio Broadcast (AM/FM)	*
Television Broadcast	*
All Zones:	
0–100	75
101—300	250
301—500	300
500—1,000	500
over 1,000 refer to the scheduled fee.	

Note:*—Fees of these categories of use will be established prior to 1/1/90.

[1] Fees for local exchange communications facilities which provide service to small populations.

The zone descriptions are as follows:

Northern Zone: Del Norte, Siskiyou, Modoc, Humboldt, Trinity, Shasta, Lassen (portion), Tehama, Plumas (portion), Mendicino, Butte, Glenn, Colusa, Lake and Yuba (that portion of the Plumas NF);

Central Zone: Sonoma, Napa, Sacramento, Sutter, Yuba (portion), Sierra, Nevada, Placer, Eldorado, Amador, Solano, Stanislaus, San Francisco, San Mateo, Santa Cruz, Santa Clara, Alameda, Contra Costa, San Joaquin, Calaveras, Alpine, Tuolomne, Monterey, San Benito, Merced, Mariposa, Madera, Fresno, Tulare, Kings, Yolo, Marin, Kern (except that portion within Los Padres NF), Plumas (that portion of the Tahoe NF), and the Lassen (except that portion of the Toiyabe NF);

Southern Zone: San Luis Obispo, Orange, Santa Barbara, Imperial, Ventura, San Diego, Kern (that portion of Los Padres NF), Los Angeles, San Bernardino, and Riverside.

(2) *Definitions*

(a) *Amateur Radio.* Equipment used by individuals or groups who are licensed by FCC as amateur radio operators.

(b) *Broadcast Translator.* This category of use consists of receiving a television or FM radio broadcast signal and rebroadcasting it on a different channel or frequency for local reception. In some cases the translator relays the signal to another amplifier or translator. This category of use includes translators associated with public telecommunications service.

(c) *Cable and Subcription Television.* This category includes cable TV head-end antenna or satellite dish receivers used for community television pickups which retransmit by cable or any other means whereby subscribers pay periodic fees to receive the signal. These systems normally operate as a commercial entity within an authorized franchise area.

(d) *Cellular.* This is a specialized service provided by commercial communicators which involves a mobile (vehicular) UHF radio telephone system. A cell is the area covered by one transmitter/receiving site. Radio signals are automatically picked up by another cell's receiver as the radio telephone transmitter passes from cell area to cell area.

(e) *Common Carrier Microwave Relay.* This use typically includes long line carriers which relay intrastate and interstate telephone, television, information, and data transmissions using point to point microwave networks or systems. These uses are regulated by state public utility commissions and must provide service to any consumer with the ability to pay according to published rate schedules.

(f) *Industrial Microwave.* This use includes microwave communication equipment not regulated by state public utility commissions. Users in this group may include pipeline and power companies, railroads and land resource management agencies or firms.

(g) *Mobile Radio: Commercial Communications.* This includes communications equipment which primarily provides communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMRs), private carrier two-way systems, and private carrier paging systems (PCPs). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

(h) *Mobile Radio: Internal Communications.* A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

(i) *Natural Resource and Environmental Monitoring.* This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations.

(j) *Passive Reflector.* Passive reflectors include various types of non-powered reflector devices used to bend or ricochet electronic signals between active relay stations or between an active relay station and terminal. The reflector requires point-to-point line-of-site with the connecting relay stations, but does not require electric power. Maintenance is minimal and reflectors seldom require visitation.

(k) *Personal/Private "Receive Only".* These include radio and TV receiving antennas, satellite dishes and other equipment/facilities designed for the reception of electronic signals, serving private homes, including recreation residences. These facilities are personally owned and not operated for profit.

(1) *Radio Broadcast.* This category includes FCC authorized facilities that broadcast AM and FM audio signals for general public reception. Users include radio stations which generate revenues from commercial advertising and public radio stations whose revenues are supported by subscriptions, grants and donations. Broadcast areas often overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(m) *Television Broadcast.* This category includes FCC authorized facilities that broadcast UHF and VHF audio and video signals for general public reception. Users include television stations (Major and independent networks) who generate income through commercial advertisement and public television stations whose operations are supported by subscriptions, grants and donations. Broadcast areas may overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(3) *Individual Authorizations Within Facilities Owned by Others*

When shared facility occupancy is authorized and each user has an authorization, the fee shall be 100% of the fee for each authorized use. There will be no $75 discount.

(4) *Fees under Multiple-User Authorizations*

To improve administration of communications sites. Forest Service policy provides for authorizing shared facility occupancies under a single authorization. By the terms and conditions, these authorization holders, rather than the Forest Service,

authorize and administer the use of their facilities by others. Collection of Forest Service fees required under this type of authorization, are burdens of the holder.

Fees for such a multiple-user authorization:
First use = 100% of fee schedule

All other uses are subject to a $75 discount, except for additional frequencies in the case of mobile radios. These additional frequencies are charged the full rate per the following example.

Mobile radio use is $700 as listed in the schedule for first frequency (less $75 discount) plus $200 for each additional frequency.

(5) *Discounts for Consolidation and Efficient Management*

There are situations where site or facility consolidation and efficient site management is intended to meet Forest Service objectives. In these, situations, fees may be temporarily discounted to reflect the benefits received by the Forest Service. Annual fee discounts cannot exceed the holders costs or the annual fee for use of the site. The fee discounts must be considered on a case-by-case basis and approved by the Regional Forester.

Efficient site management may include the formation of user associations which assume administrative duties.

(6) *Use of Government Owned Facilities*

In addition to prescribed fees, authorized officers will require users occupying Forest Service facilities to perform or share in the costs of building or facility maintenance and repair, as provided by section 7, Act of April 24, 1950 (Granger-Thye and FSM 2711.7).

(7) *Ancillary and Appurtenant Communication Uses*

Ancillary uses are those uses which provide support or intertie with another communication system on the site. The fee would be for the highest valued communications use of the holder. For example, a holder has installed a mobile radio used for internal communications which interties with an industrial microwave system in the same facility. In this case, the holder would be issued one authorization and charged a fee for industrial microwave.

Appurtenant uses are those communication uses incidental to another non-communication use of National Forest System land, such as a ski resort or marina.

No fees will be charged for ancillary/appurtenant uses.

(8) *Phase-in of Fee Increases*

Fee increases for current holders will be phased-in at a rate of 25 percent of the previous year's fee with a minimum increase of $100 per year. The 25 percent increase will continue until the current schedule fee is reached.

For example: Current fee is $300 and the scheduled fee is $800

	Phased-in Fee	Scheduled Fee*
Year:		
1	$400 ($100 min.)	$800
2	500	832
3	625	865
4	781	900
5	936	936

*Indexed using a 4 percent CPI–U.

The phase-in does not apply to new holders or existing holders adding new uses.

(9) *Annual Fee Schedule Adjustment*

All communication use fees are subject to annual adjustment. The U.S. Department of Labor Consumer Price Index for All Urban Consumers (CPI–U) for July of the current year, will be divided by the CPI–U for July of the previous 1-year to yield a CPI–U multiplier which will be used to annually update the Communication Fee Schedule.

(10) *Other Methods of Establishing Fees*

Fees will be determined on individual case basis for: (1) Sites identified as atypical (currently Mt. Wilson, Sunset Ridge, Mt. Lukins, Johnston Peak, Magic Mountain, Santiago, Sierra Peaks, and Strawberry Peak are considered atypical); (2) Categories of use which were not established in the schedule; (3) Sites servicing high populations; and (4) AM radio braodcast sites exceeding 1 acre.

The authorized officer may use site-specific appraisals, sound business management principles, and/or rental analysis as coordinated with the Regional Appraiser to determine fees for individual sites when market evidence, such as leases for similarly used sites, demonstrate the inapplicability of the fee schedule.

Appraisals provided by the holder or other groups may be used to determine fees if the Regional Appraiser establishes that the appraisal meets Forest service appraisal standards and the report is approved.

Competitive bidding may be used to establish fees for new sites (FSM 2712.2).

(11) *Periodic Review of Fee Schedule*

The Pacific Southwest Region shall, by December 31, 1994, review this schedule to determine whether market conditions and business practices have changed sufficiently to warrant a fee schedule revision. Fee waivers will also be reviewed at this time to ascertain holder's qualifications. Holders will be given an opportunity to provide data which might have a bearing on the review.

[FR Doc. 89–19858 Filed 8–22–89; 8:45 am]

BILLING CODE 3410–11–M

Southern Region; Fee Schedule for Communications Uses

AGENCY: Forest Service, USDA.

ACTION: Notice; adoption of fee schedule for communications uses.

SUMMARY: The Regional Forester, Southern Region, Forest Service, is adopting a new fee schedule for communications uses on National Forest System Lands in the Southeastern States and Puerto Rico. The intent of the new fee schedule is to assess fees that are based on fair market value of the rights and privileges as mandated by the Federal Land Policy and Management Act, October 21, 1976.

EFFECTIVE DATE: September 22, 1989.

FOR FURTHER INFORMATION CONTACT: Questions about this policy should be addressed to Vince McCormack or George Hemingway, Lands Staff, Forest Service, U.S.D.A., 1720 Peachtree Rd., NW, Atlanta, Georgia 30367, (404) 347–2373.

SUPPLEMENTARY INFORMATION: On July 26, 1988, the Regional Forester for the Southern Region published a notice of a proposed fee schedule for communications uses (53 FR 28026) with request for comment. By notice published in the Federal Register (53 FR 38759 October 3, 1988) the comment period was extended.

The proposed fee schedule and policy was based on categories of use with individual fees to be determined by population, number of licensed transmitter frequencies, number of subscribers, or the nature of the use. The proposal also called for annual adjustments of the scheduled fees based upon the Consumer Price Index—Urban (CPI–U) and provided for a phase-in statement. The proposal was published simultaneously with the proposals by 5 other Regions who had coordinated their proposals to achieve nation wide consistency where possible.

Analysis of Public Comment

The Southern Region received 60 responses to the proposal. The number and percentage of comments by respondents were:

Use categories	No. of respondents	Percent of total
Amateur radio	5	8
Broadcast translator	2	3
Cable and subscription TV	5	8
Cellular telephone	0	0
Mobile radio; commercial communications	9	15
Mobile radio; internal communications	18	30
Common carrier microwave relay	1	2
Industrial microwave	7	12
Natural resources and environmental monitoring	0	0
Passive reflector	0	0
Personal/private "receive only"	0	0
Radio broadcast	5	8
Television broadcast	6	10
Other	2	4

All of the comments received have been reviewed and given consideration in reaching the final decision. A summary of the major comments received and the Forest Service response by topic follows. It should be noted that the Southern Region has coordinated its review and response to the comments with the other Regions in order to achieve as much consistency Service wide as possible.

1. *Fees levels.* A number of respondents felt that the proposed fees

were extreme and unreasonable. Many individuals and small businesses indicated that the proposed fees would be too great a burden for them and that they would have to abandon their sites if the schedule were implemented. Some suggested a re-evaluation and reduction in the proposed fees. Others recommended lower fees and a longer phase-in period.

A few respondents said that the proposed fee rates were too low and thus amount to public subsidies. Several suggested alternative methods for detemining fees, some of which would return many times the proposed rates to the Federal Government. Among alternatives proposed were: To adopt a fee policy based on site rental income (assess a percentage of gross rental income derived from the site); to consider site value in light of the alternative cost of constructing competitive towers on private lands; to base fee as a percentage of the user's investment in improvements and equipment; to use per capita income multipliers to adjust for differences between geographical areas; and to use private management companies, with no vested interest in the site, to establish individual fees.

After analysis of these comments, the Southern Region is making the following changes in the proposed communication site fee schedule:

a. To be consistent with other Regions, the fees for cable and subscriber television will be based on numbers of subscribers. In most situations, this method reduces the fees charged to companies who service small populations and offers more stratification of fees for the mid-size companies. In the proposed schedule, fees were based on the census population within the franchise or service area. The change allows the fee to be based on actual use.

b. Also, for consistency among the Regions, common carrier Microwave Relays and Industrial Microwave Relays have been separated and re-evaluated. This results in lower fees for Industrial Microwave Relays on those sites in the mountain areas of the Southern Region (AR, GA, KY, NC, TN, VA and PR).

c. The same fee structure is adopted for both Mobile Radio: Commercial Communication and Mobile Radio: Internal Communication. There will be a base fee for the first transmitting frequency plus a $200 fee for each additional transmitting frequency. This will result in a reduction of fees for smaller operations but will result in a slight increase for some large operations.

A few respondents also commented that proposed fees were too high in the categories of: Amateur Radio, Common Carrier Microwave Relay, Industrial Microwave, and Mobile Radio: Commercial Communications. The claims of high fees were not supported by market data or were insufficient to warrant the fees in the final schedule. Therefore the Region is adopting fees for these categories as proposed.

2. *Market Survey.* A number of respondents felt that the market survey used to develop the proposed fee schedule was inadequate. Most indicated that the market survey and resulting fees did not give credit for enhancing public lands, used ability to pay rather than fair market value to determine the fees, did not include comparable leases for the use of private land, used insufficient market data, and did not correlate fees with investment values and site improvement costs. Less than 8% of the respondents provided data supporting their position.

The Southern Region coordinated with the Forest Service Regions in reviewing the re-analyzing the market data utilized in compiling the proposed fees. No major discrepancies were found in the market data compiled by the Forest Service. The data was found to be adequate for fee determination.

For the purposes of determining fair market value, we examined available market leases to see if the expense of developing facilities, access, and power was a factor influencing private leases rates. We found no usable correlation. The private sector leases used to establish fair market value fee do not clearly discount the site rental because of the development cost incurred by the lessee.

3. *Fee Exemptions/Waivers.* Under the proposed policy, exemptions from fees and fee waivers would remain a decision of the authorized officer (36 CFR 251.57(b)). A number of respondents objected to the Forest Service policy of charging fees for communications uses on National Forest System land. Others felt that fees should be waived for any use that provides a public benefit, whether that use is of a commercial nature or not. Most respondents to this issue found the current fee waiver policy unclear, vague and subject to inconsistent application. They requested a clear, consistent statement of a national fee waiver policy for specific categories of use. Some respondents felt that government and public agencies, as well as certain other users (utilities, public broadcasters, etc.) should be exempt from fees as a matter of National policy.

We agree that there should be national fee waivers established for specific categories of use or type of holder when the entire class of use or holder meets the rental fee waiver criteria. Therefore, national direction will be issued concerning fee waivers for specific categories of use and/or type of holder. The direction, which follows, is intended to clarify the intent of the waiver policy, it does not contain any substantive changes in current policy.

a. *Fee exemption*—Exemptions are determinations that certain classes of users will not be required to pay an annual rental fee. Most such exemptions are statutory; i.e., they derive from specific fee exemption language in Public Law, and are not subject to the discretion of the authorized officer. However, holders may be assessed an amount sufficient to reimburse the cost of administering the use. Holders exempt from fees include:

—Federal agencies

—Facilities established by Rural Electrification Administration

—Public telecommunication systems identified and licensed as such by the Federal Communications Commission (FCC) for educational, cultural, instructional, and institutional purposes, and as described in the Communications Act of 1934, and the Federal Communications Regulations granting waiver of license fees; i.e., non-commercial educational broadcast stations as defined in 15 CFR Part 2301—Public Telecommunications Facilities Program, Subpart A—Definitions, Program Purposes, and Special consideration.

b. *Fee Waiver*—Waivers are discounts or reductions from payment of the full annual rental fee, by provisions of law and regulation, and at the discretion of the authorized officer. The Forest Officer delegated the authority to issue the permit and establish the fee is also the officer authorized to determine if a holder qualifies for a fee waiver. Fee waivers must be equitable and in the public interest. (36 CFR 251.57(b)).

(1) State and Local Government. The authorized officer shall waive fees for telecommunication facilities and systems owned and operated by a State or local government agency or instrumentality thereof, when:

—State or local government or instrumentalities thereof do not charge the Forest Service for similar services

—The use is not installed, maintained, or otherwise financed by means of customer charges, which include but are not limited to subscription fees, membership fees or dues, or special tax assessments; and

—The use furthers the public health, safety, or welfare, or is otherwise to the benefit of the general public or the programs of the Secretary of Agriculture.

(2) Other Holders. Waivers for other holders will be considered by the authorized officer on a case by case basis. If granted, fees will not be waived below $75, which currently represents the cost to the Forest Service for administration of the authorization. This rate is, however, subject to revision on the basis of change in administrative costs.

There were also a number of responses, as well as comments sent to the Chief of the Forest Service on the proposals by all Regions, which requested a review of the Forest Service's rental fee waiver policy for radio broadcast (commercial), television broadcast (commercial) and associated broadcast translators. The respondents felt that a partial or full waiver should be granted based on the public service requirements of the Communications Act of 1934 and the provisions of the Federal Land Policy and Management Act of 1976.

As a result of these requests, the Forest Service is reviewing the national rental fee waiver policy for these categories of use. As a part of the review, the Forest Service is working with the Radio and Television Broadcasters to review the type and amount of public service provided.

Rental fees for these categories of use will remain at current levels until the review is completed and a final fee is established in the schedule. We anticipate fee for these uses will be established prior to January 1, 1990. All authorization holders and others expressing an interest in the fee schedules will be notified when the final fees are established.

4. *Categories of Use.* In the proposal, fees were based on categories of communication uses on National Forest System land. Each category was defined in the fee schedule to ensure proper classification.

A number of respondents felt that the categories of uses were too narrowly defined. Some respondents urged separation of uses such as: (1) Commercial communication microwave uses from industrial microwave uses, (2) specialized mobile radios from other uses; (3) commercial communication systems used for profit from those used for public services, and (4) TV cable enterprises serving major population centers from those serving sparsely populated rural areas.

As noted under the earlier discussion of fees, industrial microwave uses have been placed in a separate category from common carrier microwave uses in the final policy.

After considering comments, the categories of "Commercial Communicator" and "Internal Two-Way Radio" in the proposal have been changed to "Mobile Radio: Commercial Communications" and "Mobile Radio: Internal Communications". In addition, definitions for these categories have been modified for clarification at the request of industry respondents. The other categories are adopted as proposed.

5. *Definitions.* Several respondents found certain definitions and terms inadequate or confusing. Industry suggested definitions and terms that more clearly define commercial communications and internal radio communication uses.

In coordination with other Regions and the Washington Office, the Southern Region has adopted common terminology defining the various types of communciation uses.

Most of the proposed definitions for the categories of use remain unchanged or slightly modified. Modifications were in response to reviewers comments or to improve clarity.

Slight changes were made in the following definitions (changes to improve clarity not noted):

—A definition for Natural Resource and Environmental Monitoring is provided as follows: "This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations."

—All references to appurtenant uses are eliminated from the definition of Radio and Television Broadcast. Apputenant uses are discussed in the Forest Service manual supplement.

Major changes were made in the definitions of Commerical Communicator and Internal Two-Way Radio. We agree with the reviewers who commented that the original definitions did not adequately describe the two categories of uses. In the final policy, the terms are defined as follows:

Mobile Radio: Commercial Communications. This includes communication equipment which is used to provide communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMR's), private carrier two-way radio systems, and private carrier paging systems (PCPS). Some entities in this category own and lease building, tower, an related facility space as part of their business enterprise and may act as facility managers.

Mobile Radio: Internal Communications. A private mobile radio system licensed by the Federal Communication Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

6. *Phase-in of Fee Increases.*

The proposed fee schedule provided for a 3 or 5 year phase-in of fees for current holders. It was based on the percentage and amount of increase. There was concern that the phase-in did not adequately consider the financial impacts of the increases on some holders. There were examples of fees which exceeded 100 percent of the existing fee in each year of the phase-in. It was feared that the rapid increase would adversely affect the holders and their customers. As a result, the phase-in has been modified to allow a longer phase-in period.

The new phase-in will provide for a maximum increase of 25 percent of the previous year's fees with a minimum increase of $100 per year. The number of years it takes to reach the schedule fee will vary. However, most of the fee increases should be phased-in within 10 years. New holders and holders adding new uses are not covered by the phase-in.

7. *Implementation.* Having considered the comments received, the Southern Region is adopting the fee schedule with the changes noted in the foregoing discussion of comments. The policy and procedures to guide Forest Service employees in implementating the Communications Use Fee Schedule will be issued as a Regional Supplement to Forest Service Manual Chapter 2720. The text of the supplement is set out at the end of this notice.

The fee schedule will apply immediately to all new permits issued on and after the effective date of this policy. The fee schedule will be implemented for all existing special use authorizations with the billings for calendar year 1990.

Dated: May 23, 1989.

should keep in mind that the audience of this

schedule below. These rates will apply

Dated: May 23, 1989.

Robert B. Erickson,

Deputy Regional Forester.

Fee Schedule Policy and Procedures for Communications Uses

Note: The Forest Service uses alphanumeric codes and subject headings to organize the text of direction. Only those sections of the Forest Service Manual that would be revised are set out here. Readers should keep in mind that the audience of this direction is Forest Service employees charged with issuing and administering communication use authorizations.)

Title 2700—Special Uses Management

2728—COMMUNICATIONS
2728.1—Communications Sites

2. *Fee determinations*

c. Regional Fee Schedule—Communications use special use fees will be charged at the annual rates shown in the schedule below. These rates will apply without CPI–U adjustment for new authorizations issued during the remainder of C.Y. 1989, and with CPI–U adjustment in C.Y. 1990 for all authorizations. The schedule will not affect fees which have been established through appraisal, competitive bid, negotiation, or other sound business management principles; fees for these uses will be updated in accordance with terms of the authorization.

(1) Individual Authorizaiton

FINAL FEE SCHEDULE—SOUTHERN REGION

Use Category	AL	AR	FL	GA, NC, SC, TN, VA	KY	LA	MS	TX	PR

Natural Resource and Environmental Monitoring	75	75	75	75	75	75	75	75	75

*Fees of these categories of use will be established prior to 1/1/90

(2) Definitions

(a) *Amateur Radio.* Equipment used by individuals or groups who are licensed by FCC as amateur radio operators.

(b) *Broadcast Translator.* This category of use consists of receiving a television or FM radio broadcast signal and rebroadcasting it on a different channel or frequency for local reception. In some cases the translator relays the signal to another amplifier or translator. This category of use includes translators associated with public telecommunications service.

(c) *Cable and Subscription Television.* This category includes cable TV head-end antenna or satellite dish receivers used for community television pickups which retransmit by cable or any other means whereby subscribers pay periodic fees to receive the signal. These systems normally operate as a commercial entity within an authorized franchise area.

(d) *Cellular.* This is a specialized service provided by commercial communicators which involves a mobile (vehicular) radio telephone system. A cell is the area covered by one transmitter/receiving site. Radio signals are automatically picked up by another cell's receiver as the radio telephone transmitter passes from cell area to cell area.

(e) *Common Carrier Microwave Relay.* This use typically includes long line carriers which relay intrastate and interstate telephone, television, information, and data transmissions using point to point microwave networks or systems. These uses are regulated by state public utility commissions and must provide service to any consumer with the ability to pay according to published rate schedules.

(f) *Industrial Microwave.* This use includes microwave communication equipment not regulated by state public utility commissions. Users in this group may include pipeline and power companies, railroads and land resource management agencies or firms.

(g) *Mobile Radio: Commercial Communications.* This includes communications equipment which primarily provides communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMRs), private carrier two-way systems, and private carrier paging systems (PCPs). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

(h) *Mobile Radio: Internal Communications.* A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

(i) *Natural Resource and Environmental Monitoring.* This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations.

(j) *Passive Reflector.* Passive reflectors include various types of non-powered reflector devices used to bend or ricochet electronic signals between active relay stations or between an active relay station and terminal. The reflector requires point-to-point line-of-sight with the connecting relay stations, but does not require electric power. Maintenance is minimal and reflectors seldom require visitation.

(k) *Personal/Private "Receive Only".* These include radio and TV receiving antennas, satellite dishes and other equipment/facilities designed for the reception of electronic signals, serving private homes, including recreation residences. These facilities are personally owned and not operated for profit.

(l) *Radio Broadcast.* This category includes FCC authorized facilities that broadcast AM and FM audio signals for general public reception. Users include radio stations which generate revenues from commercial advertising and public radio stations whose

revenues are supported by subscriptions, grants and donations. Broadcast areas often overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(m) *Television Broadcast.* This category includes FCC authorized facilities that broadcast UHF and VHF audio and video signals for general public reception. Users include television stations (Major and independent networks) who generate income through commercial advertisement and public television stations whose operations are supported by subscriptions, grants and donations. Broadcast areas may overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(3) Individual Authorizations Within Facilities Owned by Others

When shared facility occupancy is authorized and each user has an authorization, the fee shall be 100% of the fee for each authorized use. There will be no $75 discount.

(4) Fees Under Multiple-User Authorizations

To improve administration of communications sites, Forest Service policy provides for authorizing shared facility occupancies under a single authorization. By the terms and conditions, these authorization holders, rather than the Forest Service, authorize and administer the use of their facilities by others. Collection of Forest Service fees required under this type of authorization, are burdens of the holder.

Fees for such a multiple-user authorization:

First use = 100% of fee schedule

All other uses are subject to a $75 discount, except for additional frequencies in the case of mobile radios. These additional frequencies are charged the full rate per the following example:

Mobile radio use will be $300 to $500 as listed in the schedule for first frequency (less $75 discount) plus $200 for each additional frequency.

(5) Discounts for Consolidation and Efficient Management

There are situations where site or facility consolidation and efficient site management is intended to meet Forest Service objectives. In these situations, fees may be temporarily discounted to reflect the benefits received by the Forest Service. Annual fee discounts cannot exceed the holders costs or the annual fee for use of the site. The fee discounts must be considered on a case-by-case basis and approved by the Regional Forester.

Efficient site management may include the formation of user associations which assume administrative duties traditionally completed by the Forest Service.

(6) Use of Government Owned Facilities

In addition to prescribed fees, authorized officers will require users occupying Forest Service facilities to perform or share in the costs of building or facility maintenance and repair, as provided by section 7, Act of April 24, 1950 (Granger-Thye and FSM 2711.7).

(7) Ancillary and Appurtenant Communication Uses

Ancillary uses are those uses which provide support or intertie with another communication system on the site. The fee would be for the highest valued communications use of the holder. For example, a holder has installed a mobile radio used for internal communications which interties with an industrial microwave system in the same facility. In this case, the holder would be issued one authorization and charged a fee for industrial microwave.

Appurtenant uses are those communication uses incidental to another non-communication use of the National Forest System land, such as a ski resort or marina.

No fees will be charged for ancillary/appurtenant uses.

(8) Phase-in of Fee Increases

Fee increases for current holders will be phased-in at a rate of 25 precent of the previous year's fee with minimum increase of $100 per year. The 25 percent increase will continue until the current scheduled fee is reached.

For example: Current fee is $300 and the scheduled fee is $800

	Phased-in fee	Scheduled fee*
Year 1	[1] $400	$800
Year 2	500	832
Year 3	625	865
Year 4	781	900
Year 5	936	936

* Indexed using a 4 percent CPI–U.
[1] $100 min.

The phase-in does not apply to new holders or existing holders adding new uses.

(9) Annual Fee Schedule Adjustment

All communication use fees subject to annual adjustment. The U.S. Department of Labor Consumer Price Index for All Urban Consumers (CPI–U) for July of the current year will be divided by the CPI–U for July of the previous year to yield a CPI–U multiplier which will be used to annually update the Communications Use Fee Schedule.

(10) Periodic Review of Fee Schedule

The Southern Region shall, by December 31, 1994, review this schedule to determine whether market conditions and business practices have changed sufficiently to warrant a fee schedule revision. Fee waivers will also be reviewed at this time to ascertain holder's qualifications. Holders will be given an opportunity to provide data which might have a bearing on the review.

(11) Other Methods of Establishing Fees

Fees will be determined on individual case basis for: (1) Atypical sites (the Mt. Pisgah Communications Site in North Carolina, the Puerto Rico Telephone Company Facility on the El Yunque Communications Site in Puerto Rico and the Federal Communications uses on East Peak in Puerto Rico); (2) Categories of use which were not established in the schedule; (3) Sites servicing high populations; and (4) AM radio broadcast sites exceeding 1 acre.

The authorized officer may use site-specific appraisals, sound business management principles, and/or rental analysis as coordinated with the Regional Reviewing Appraiser to determine fees for individual sites when market evidence, such as leases for similarly used sites, demonstrate the inapplicability of the fee schedule.

Appraisals provided by the holder or other groups may be used to determine fees if the Regional Appraiser establishes that the appraisal meets Forest Service appraisal standards and the report is approved.

Competitive bidding may be used to establish fees for new sites, (FSM 2712.2).

[FR Doc. 89–19859 Filed 8–22–89; 8:45 am]

BILLING CODE 3410-11-M

Southwestern Region; Fee Schedule for Communications Uses

AGENCY: Forest Service, USDA.

ACTION: Notice; adoption of fee schedule for communications uses.

SUMMARY: The Regional Forester, Southwestern Region, Forest Service, is adopting a new fee schedule for communications uses on National Forest System lands in New Mexico and Arizona. The intent of the new fee schedule is to assess fees that are based on fair market value of the rights and privileges authorized as mandated by the Federal Land Policy and Management Act, October 21, 1976.

EFFECTIVE DATE: September 22, 1989.

FOR FURTHER INFORMATION CONTACT: Questions about this policy should be addressed to Art Maynard, Recreation Staff, or Ray Woodbury, Lands and Minerals Staff, 517 Gold Avenue, SW, Albuquerque, New Mexico 87102, (505) 842–3156.

SUPPLEMENTARY INFORMATION: On July 28, 1988, the Regional Forester for the Southwestern Region published a notice of a proposed fee schedule for communications uses (53 FR 28026) with request for comment. By notice published in the **Federal Register** (53 FR 38759 October 3, 1988 the comment period was extended.

The proposed fee schedule and policy was based on categories of use with individual fees to be determined by population, number of licensed transmitter frequencies, number of subscribers, or the nature of the use. The proposal also called for annual adjustments of the scheduled fees based upon the Consumer Price Index—Urban (CPI–U) and provided for a phase-in of fees. The proposal was published simultaneously with the proposals by 5 other Regions, who had coordinated their proposals to achieve nationwide consistency where possible.

Analysis of Public Comment

The Southwestern Region received 50 responses to the proposal. The number and percentage of comments by respondents were:

Use categories	Total No. of respondents	No. of percent
Amateur Radio	2	1
Radio Broadcast	16	8
Independent TV Broadcaster	6	3
Low Power TV Broadcaster	2	1
Mobile Radio: Commercial Communications	18	9
Mobile Radio: Internal Communications	12	6
Common Carrier Microwave Relay	6	3
Industrial Microwave	6	3
Natural Resource and Environmental Monitoring	2	1
Translator (Broadcast)	10	5
Translator (TV)	10	5
Translator (FM)	8	4
Other (Communications Management Consultant)	2	1

All of the comments received have been reviewed and given consideration in reaching the final decision. A summary of the major comments received and the Forest Service response by topic follows. It should be noted that the Southwestern Region has coordinated its review and response to the comments with the other Regions in order to achieve as much consistency Servicewide as possible.

1. *Fee levels.* A number of respondents felt that the proposed fees were extreme and unreasonable. Many individuals and small businesses indicated that the proposed fees would be too great a burden for them and that they would have to abandon their sites if the schedule were implemented. Some suggested a re-evaluation and reduction in the proposed fees. Others recommended lower fees and a longer phase-in period.

A few respondents said that the proposed fee rates were too low and thus amount to public subsidies. Several suggested alternative methods for determining fees, some of which would return many times the proposed rates to the Federal Government. Among alternatives proposed were: to adopt a fee policy based on site rental income (assess a percentage of gross rental income derived from the site); to consider site value in light of the alternative cost of constructing competitive towers on private lands; to base fee as a percentage of the user's investment in improvements and equipment; to use per capita income multipliers to adjust for differences between geographical areas; and to use private management companies, with no vested interest in the site, to establish individual fees.

After anlysis of these comments, the Southwestern Region is making the following changes in the proposed communication site fee schedule:

a. To be consistent with other Regions, the fees for cable and subscription television will be based on numbers of subscribers. In most situations, this method reduces the fees charged to companies who service small populations and offers more stratification of fees for the mid-size companies. In the proposed schedule, fees are based on the census population within the franchise or service area. The change allows the fee to be based on actual use.

b. Also, for consistency among the Regions, common carrier Microwave Relays and Industrial Microwave Relays have been separated and re-evaluated.

c. The same fee structure is adopted for both Mobile Radio: Commercial Communications and Mobile Radio: Internal Communications. There will be a base fee for the first transmitting frequency plus a $200 fee for each additional transmitting frequency. These changes were made based on public comment and to achieve consistency between all of the Regions. For the Mobile Radio: Internal Communications, this will result in a reduction of fees for smaller operations, but may result in a slight increase for some large operations. Subatantial savings are possible when users agree to be included under a multiple user authorization. For Mobile Radio: Commercial Communications, the fee was changed from a fee per frequency with a minimum fee level established, to a base fee plus a fee for each additional transmitting frequency. The base fee will not apply to each tenant under the holder's multiple user authorization. These changes may result in slightly higher fees than proposed in earlier proposals; however, this will depend on the type and size of the business.

A few respondents also commented that proposed fees were too high in the categories of: Common Carrier Microwave Relay, Industrial Microwave, Commercial Communications, Industrial Communications, Radio and TV Broadcasters, and TV and FM Translators. The claims of high fees were not supported by market data or the data was insufficient to warrant changing the fees in the final schedule. Therefore the Region is adopting fees for these categories as proposed. Most of the FM and television broadcast authorizations in the Region are located on Sandia Crest, Peralta Ridge or the Santa Catalina Mountains; which are atypical sites. A proposed fee schedule for these atypical sites was announced in August of 1988 by a Regional Forester letter. Final fee schedules for atypical sites and translator users throughout all value zones will be announced by a Regional Forester Decision Notice at a later date.

2. *Market Survey.* A number of respondents felt that the market survey used to develop the proposed fee schedule was inadequate. Most indicated that the market survey and resulting fees did not give credit for enhancing public lands, used ability to pay rather than fair market value to determine the fees, did not include comparable leases for the use of private land, used insufficient market data, and did not correlate fees with investment values and site improvement costs. Some users suggested that fees be based on the square footage occupied or that fees be based on grazing land value and cost to administer (purported to be a sound business management practice). Less than 3% of the respondents provided data supporting their position.

The Southwestern Region coordinated with the other Forest Service Regions in reviewing and re-analyzing the market data utilized in compiling the proposed fees. No major discrepancies were found in the market data compiled by the Forest Service. The data was found to be adequate for fee determination.

For the purposes of determining fair market value, we examined available market leases to see if the expense of developing facilities, access, and power was a factor influencing private lease rates. The private sector leases used to establish fair market value do not clearly discount the site rental because of the development cost incurred by the lessee.

3. *Fee Exemption/Waivers.* Under the proposed policy, exemptions from fees and fee waivers would remain a decision of the authorized officer (36 CFR 251.57(b)). A number of respondents objected to the Forest Service policy of charging fees for communication uses on National Forest System land. Others felt that fees should be waived for any use that provides a public benefit, whether that use is of a commercial nature or not. Most respondents to this issue found the current fee waiver policy unclear, vague and subject to inconsistent application. They requested a clear, consistent

statement of a national fee waiver policy for specific categories of use. Some respondents felt that government and public agencies, as well as certain other users (utilities, public braodcasters, etc.) should be exempt from fees as a matter of National policy.

We agree that there should be national fee waivers established for specific categories of use or type of holder when the entire class of use or holder meets the rental fee waiver criteria. Therefore, national direction will be issued concerning fee waivers for specific categories of use and/or type of holder. The direction, which follows, is intended to clarify the intent of the waiver policy, it does not contain any substantive changes in current policy.

a. *Fee exemption*—Exemptions are determinations that certain classes of users will not be required to pay an annual rental fee. Most such exemptions are statutory; i.e., they derive from specific fee exemption language in Public Law, and are not subject to the discretion of the authorized officer. However, holders may be assessed an amount sufficient to reimburse the cost of administering the use. Holders exempt from fees include:

—Federal agencies
—Facilities established by Rural Electrification Administration
—Public telecommunication systems identified and licensed as such by the Federal Communications Commission (FCC) for educational, cultural, instructional, and institutional purposes, and as described in the Communications Act of 1934, and the Federal Communications Regulations granting waiver of license fees; i.e., non-commerical educational broadcast stations as defined in 15 CFR Part 2301—Public Telecommications Facilities Program, Subpart A—Definitions, Program Purposes, and Special consideration.

b. *Fee Waiver*—Waivers are discounts or reductions from payment of the full annual rental fee, by provisions of law and regulation, and at the discretion of the authorized officer. The Forest officer delegated the authority to issue the permit and establish the fee is also the officer authorized to determine if a holder qualifies for a fee waiver. Fee waivers must be equitable and in the public interest. (36 CFR 251.57(b)).

(1) State and Local Government: The authorized officer shall waive fees for telecommuication facilities and systems owned and operated by a State or local government agency or instrumentality thereof, when:

—State or local government or instrumentalities thereof do not charge the Forest Service for similar services;
—The use is not installed, maintained, or otherwise financed by means of customer charges, which include but are not limited to subscription fees, membership fees or dues, or special tax assessments; and
—The use furthers the public health, safety, or welfare, or is otherwise to the benefit of the general public or the programs of the Secretary of Agriculture.

(2) *Nonprofit Holders:* The holder is a nonprofit association or nonprofit corporation which is not controlled or owned by profit making corporations of business enterprises and which is engaged in public or semi-public activity to further public health, safety, or welfare, etc.

(3) *Other Holders:* Waivers for other holders will be considered by the authorized officer on a case by case basis. If granted, fees will not be waived below $75, which currently represents the cost to the Forest Service for administration of the authorization. This rate is, however, subject to revision on the basis of change in administrative costs.

There were also a number of responses, as well as comments sent to the Chief of the Forest Service on the proposals by all Regions, which requested a review of the Forest Service's rental fee waiver policy for radio broadcast (commerical), television broadcast (commercial) and associated broadcast translators. The respondents felt that a partial or full waiver should be granted based on the public service requirements of the Communications Act of 1934 and the provisions of the Federal Land Policy and Management Act of 1976.

As a result of these requests, the Forest Service is reviewing the national rental fee waiver policy for these categories of use. As a part of the review, the Forest Service is working with the Radio and Television Broadcasters to review the type and amount of public service provided.

Rental fees for these categories of use will remain at current levels until the review is completed and a final fee is established in the schedule. We anticipate fees for these uses will be established prior to January 1, 1990. All authorization holders and others expressing an interest in the fee schedules will be notified when the final fees are established.

4. *Categories of Use.* In the proposal, fees were based on categories of communication uses on National Forest System land. Each category was defined in the fee schedule to ensure proper classification.

A number of respondents felt that the categories of uses were too narrowly defined. Some respondents urged separation of uses such as: (1) Commercial communication microwave uses from industrial microwave uses, (2) specialized mobile radios from other uses, (3) commercial communication systems used for profit from those used for public services, and (4) TV cable enterprises serving major population centers from those serving sparsely populated rural areas.

As noted under the earlier discussion of fees, industrial microwave uses have been placed in a separate category from common carrier microwave uses in the final policy.

After considering comments, the categories of "Commercial Communicator' and "Internal Two-Way Radio" in the proposal have been changed to "Mobile Radio: Commercial Communications" and "Mobile Radio: Internal Communications". In addition, definitions for these categories have been modified for clarification at the request of industry respondents. The other categories are adopted as proposed.

5. *Phase-in of Fee Increases.* The proposed fee schedule provided for a 3 or 5 year phase-in of fees for current holders. It was based on the percentage and amount of increase. There was concern that the phase-in did not adequately consider the financial impacts of the increases on some holders. There were examples of fees which exceeded 100 percent of the existing fee in each year of the phase-in. It was feared that the rapid increase would adversely affect the holders and their customers. As a result, the phase-in has been modified to allow a longer phase-in period.

The new phase-in will provide for a maximum increase of 25 percent of the previous year's fees with a minimum increase of $100 per year. The number of years it takes to reach the scheduled fee will vary. However, most of the fee increases should be phased-in within 10 years. New holders and holders adding new uses are not covered by the phase-in.

6. *Definitions.* Several respondents found certain definitions and terms inadequate or confusing. Industry suggested definitions and terms that more clearly define commercial communications and internal radio communications uses.

In coordination with other Regions and the Washington Office, the Southwestern Region has adopted

BEST COPY AVAILABLE

common terminology defining the various types of communications uses.

Most of the proposed definitions for the categories of use remain unchanged or slightly modified. Modifications were in response to reviewers comments or to improve clarity.

Slight changes were made in the following definitions (changes to improve clarity not noted):

—A definition for Natural Resource and Environmental Monitoring is provided as follows: "This use includes the transmission of telemetry data from a remote site to a central station. Uses may include weather stations, seismic stations, and snow measuring stations.

—All references to appurtenant uses are eliminated from the definition of Radio and Television Broadcast. Appurtenant uses are discussed in the Forest Service manual supplement.

Major changes were made in the definitions of Commercial Communicator and Internal Two-Way Radio. We agree with the reviewers who commented that the original definitions did not adequately describe the two categories of uses. In the final policy, the terms are defined as follows:

Mobile Radio: Commercial Communications. This includes communication equipment which is used to provide communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMR's), private carrier paging systems (PCPS). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

Mobile Radio: Internal Communications. A private mobile radio system licensed by the Federal Communications Commission (FCC) and used a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the permittee (license holder).

6. *Implementation.* Having considered the comments received, the Southwestern Region is adopting the fee schedule with the changes noted in the foregoing discussion of comments. The policy and procedures to guide Forest Service employees in implementing the Communications Use Fee Schedule will be issued as a Regional Supplement to Forest Service Manual Chapter 2720. The text of the supplement is set out at the end of this notice.

The fee schedule will apply immediately to all new permits issued on and after the effective date of this policy. The fee schedule will be implemented for all existing special use authorizations with the billings for calendar year 1990.

Dated: July 17, 1989.

David F. Jolly

Regional Forester

Fee Schedule Policy and Procedures for Communications Uses

Note: The Forest Service uses alphanumeric codes and subject headings to organize the test of direction. Only those sections of the Forest Service Manual that would be revised are set out here. Readers should keep in mind that the audience of this direction is Forest Service employees charged with issuing and administering communications use authorizations.

Forest Service Manual

Title 2700—Special Uses Management

2728—Communications

2728.1—Comunications Sites

2. *Fee Determinations*

c. Regional Fee Schedule—Communications use special use fees will be charged at the annual rates shown in the schedule below. These rates will apply without CPI–U adjustment for new permits issued during the remainder of C.Y. 1989, and with CPI–U adjustment beginning in C.Y. 1990 for all permits. The schedule does not affect fees established through appraisal, competitive bid, negotiation, or other sound business management principle. In these situations, fees will be updated in accordance with the terms of the authorization.

(1) *Individual Authorization*

FINAL FEE SCHEDULE—SOUTHWESTERN REGION

Use category	New Mexico				Arizona		
	Value Zone 2	Value Zone 3	Value Zone 4	Value Zone 5	Ord & Elden	Intermediate	Rural
Amateur Radio	75	75	75	75	75	75	75

* Fees of these categories of use will be established prior to 1/1/90.

** Fees will be established when authorizations are issued.

---

(2) *Definitions*

(a) *Amateur Radio.* Equipment used by individuals or groups who are Licensed by FCC as amateur radio operators.

(b) *Broadcast Translater.* This category for use consists of receiving a television or FM radio broadcast signal and rebroadcasting it on a different channel or frequency for local reception. In some cases the translator relays the signal to another amplifier or translator. This category of use includes translators associated with public telecommunications service.

(c) *Cable and Subscription Television.* This cateogy includes cable TV head-end antenna or satellite dish receivers used for community television pickups which retransmit by cable or any other means whereby subscribers pay period fees to receive the signal.

These systems normally operate as a commercial entity within an authorized franchise area.

(d) *Cellular.* This is a specialized service provided by commercial communicators which involves a mobile (vehicular) radio telephone system. A cell is the area covered by one transmitter/receiving site. Radio signials are automatically picked up by another cell's receiver as the radio telephone transmitter passes from cell area to cell area.

(e) *Common Carrier Microwave Relay.* This use typically includes long line carriers which relay intrastate and interstate telephone, television, information, and data transmissions using point to point microwave networks or systems. These uses are regulated by state public utility commissions and must provide service to any consumer with the ability to pay according to published rate schedules.

(f) *Industrial Microwave.* This use includes microwave communication equipment not regulated by the public utility commissions. Users in this group may include pipeline and power companies, railroads and land resource management agencies or firms.

(g) *Mobile Radio: Commercial Communications.* This includes communications equipment which primarily provides communications service to others. This use may be on either a for-profit or not-for-profit basis, and may or may not be regulated by a state public utility commission. The use requires an FCC license. Examples of mobile radio systems in this category are common carrier systems, community repeaters, specialized mobile radio systems (SMRs), private carrier two-way systems, and private carrier paging systems (PCPs). Some entities in this category own and lease building, tower, and related facility space as part of their business enterprise and may act as facility managers.

(h) *Mobile Radio: Internal Communications.* A private mobile radio system licensed by the Federal Communications Commission (FCC) and used by a single entity for the purpose of internal communications in support of business, community activities, or other organizational objectives. The communications service is not sold to others and is limited to the user.

(i) *Natural Resource and Environmental Monitoring.* This use includes the transmission of telemetry data from a remote site to a central receiving station. Uses may include weather stations, seismic stations, and snow measuring stations.

(j) *Passive Reflector.* Passive reflectors include various types of non-powered reflector devices used to bend or richochet electronic signals between active relay stations or between an active relay station and terminal. The reflector requires point-to-point line-of-sight with the connecting relay stations, but does not require electric power. Maintenance is minimal and reflectors seldom require visitation.

(k) *Personal/Private "Receive Only".* These include radio and TV receiving antennas, satellite dishes and other equipment/facilities designed for the reception of electronic signals, serving private homes, including recreation residences. These facilities are personally owned and not operated for profit.

(l) *Radio Broadcast.* This category includes FCC authorized facilities that broadcast AM and FM audio signals for general public reception. Users include radio stations which generate revenues from commercial advertising and public radio stations whose revenues are supported by subscriptions, grants and donations. Broadcast areas often overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(m) *Television Broadcast.* This category includes FCC authorized facilities that broadcast UHF and VHF audio and video signals for general public reception. Users include television stations (Major and independent networks) who generate income through commercial advertisement and public television stations whose operations are supported by subscriptions, grants and donations. Broadcast areas may overlap state boundaries. It relates only to primary transmitters and not any rebroadcast systems such as translators.

(3) Individual Authorizations Within Facilities Owned by Others

When shared facility occupancy is authorized and each user has an authorization, the fee shall be 100% of the fee for each authorized use. There will be no $75 discount.

(4) Fees Under Multiple-User Authorizations

To improve administration of communications sites, Forest Service policy provides for authorizing shared facility occupancies under a single authorization. By the terms and conditions, these authorization holders, rather than the Forest Service, authorize and administer the use of their facilities by others. Collection of Forest Service fees required under this type of authorization, are burdens of the holder.

Fees for such a multiple-user authorization:

First use = 100% of fee schedule

All other uses are subject to a $75 discount, except for additional frequencies in the case of mobile radios. These additional frequencies are charged the full rate per the following example.

Mobile radio use will be $400 to $1,200 as listed in the schedule for first frequency (less $75 discount) plus *$200* for each additional frequency.

(5) Discounts for Consolidation and Efficient Management

There are situations where site or facility consolidation and efficient site management is intended to meet Forest Service objectives. In these situations, fees may be temporarily discounted to reflect the benefits received by the Forest Service. Annual fee discounts cannot exceed the holders cost or the annual fee for use of the site. The fee discounts must be considered on a case-by-case basis and approved by the Regional Forester.

Efficient site management may include the formation of user associations which assume administrative duties traditionally performed by the Forest Service.

(6) Use of Government Owned Facilities

In additional to prescribed fees, authorized officers will require users occupying Forest Service facilities to perform or share in the costs of building or facility maintenance and repair, as provided by Section 7, Act of April 24, 1950 (Granger-Thye and FSM 2711.7).

(7) Ancillary and Appurtenant Communication Users

Ancillary uses are those on site uses which provide support or intertie with another communication system on the site. The fee would be for the highest valued use of the holder. For example, a holder has installed a mobile radio for internal communication which interties with an industrial microwave system in the same facility. In this case, the holder would be issued one authorization and charged a fee for industrial microwave.

Appurtenant uses are those communcation uses incidental to another non-communication use of the National Forest System land, such as a ski resort or marina.

No fees will be charged for ancillary/appurtenant uses.

(8) Phase-in of Fee Increases

Fee increases for current holders will be phased-in at a rate of 25 percent of the previous year's fee with a minimum increase of $100 per year. The 25 percent increase will continue until the current scheduled fee is reached.

For example: Current fee is $300 and the scheduled fee is $800.

	Phased-in fee	Scheduled fee*
Year 1	$400	$800
Year 2	500	832
Year 3	625	865
Year 4	781	900
Year 5	936	936

*Indexed using a 4 percent CPI–U.

[1] $100 min.

The phase-in does not apply to new holders or existing holders adding new uses.

(9) Annual Fee Schedule Adjustment

All communication use fees are subject to annual adjustment. The U.S. Department of Labor Consumer Price Index for All Urban Consumers (CPI–U) for July of the current year will be divided by the CPI-U for July of the previous year to yield a CPI-U multiplier which will be used to annually update the Communications Use Fee Schedule.

(10) Other Methods of Establishing Fees

Fees for atypical sites (currently identified as Sandia Peak, Peralta Ridge, and Santa Catalina Mountain), categories of use which were not established in the schedule, or AM radio broadcast sites exceeding 1 acre will be determined on individual case basis.

The authorized officer may use site-specific appraisals, sound business management principles, and/or rental analysis as coordinated with the Regional Appraiser to determine fees for individual sites when market evidence, such as leases for similarly used sites, demonstrate the inapplicability of the fee schedule.

Appraisals provided by the holder or other groups may be used to determine fees if the Regional Appraiser establishes that the appraisal meets Forest service appraisal standards provides a better supported fee estimate than the market survey, and the report is approved.

Competitive bidding may be used to esablish fees for new sites, (FSM 2712.2).

(11) Periodic Review of Fee Schedule

The Soutwestern Region intends, by December 31, 1994, to review this schedule to determine whether market conditions and business practices have changed sufficiently to warrant a fee schedule revision. Fee waivers will also be reviewed at this time to ascertain holder's qualifications. Holders will be given an opportunity to provide data which might have a bearing on the review.

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: Survey of Pollution Abatement Costs and Expenditures.

Form Number: MA-200.

Agency Approval Number: 0607-0176.

Type of Request: Revision of a currently approved form.

Burden: 21,250 hours.

Number of Respondents: 17,000.

Avg hours per response: One hour and fifteen minutes.

Needs and Uses: This survey is used to determine what effect pollution spending has on the U.S. economy, to forecast growth, to measure productivity determinants, and to assist in the calculation of the gross national product. Government agencies, industrial forms, and trade associations are the primary users of the data.

Affected Public: Businesses or other for-profit organizations.

Frequency: Annually.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room H6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Don Arbuckle, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: August 16, 1989.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

Bureau of Export Administration

Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Computer Peripherals, Components, and Related Test Equipment Technical Advisory Committee will be held September 12, 1989, 9:30 a.m., Herbert C. Hoover Building, Room 1617-F, 14th Street and Constitution Avenue NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect controls applicable to computer peripherals, components and related test equipment or technology.

Agenda

General Session

1. Opening Remarks by the Chairman & Commerce Representative.
2. Introduction of Members and Visitors.
3. Annual Report and Annual Plan.
4. Discussion of Effective Utilization of TACs Document.
5. Review of Newly-Assigned Control List Items.
6. Discussion of 10MB Bulgarian Hard File.
7. Subcommittee Report on Workstations 8.
8. Forming Working Groups.
9. Discussion of G-COCOM and AT Findings.
10. Presentation of Papers or Comments by the Public.

Executive Session

11. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control programs and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, in order to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that you forward your public presentation materials two weeks prior to the meeting to the below listed address: Ms. Ruth D. Fitts, U.S. Department of Commerce/BXA, Office of Technology & Policy Analysis, 14th & Constitution Avenue NW., Room 4069A, Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C. 552(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commmerce, Washington, DC. For further information or copies of the minutes call Ruth D. Fitts, 202-377-4959.

Dated: August 17, 1989.

Betty A. Ferrell,

Director, Technical Advisory Committee Unit, Office of Technology and Policy Analysis.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to the Office of Management and Budget for Review

ACTION: Notice.

The Department of Defense has submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Diagnostic Evaluation, Program for the Handicapped; DD Form 2451; and OMB Control Number 0704-0098.

Type of Request: Extension.

Average Burden Hours/Minutes Per Response: 1 Hour.

Frequency of Response: Once per year.

Number of Respondents: 840.

Annual Burden Hours: 840.

Annual Responses: 840.

Needs and Uses: The Diagnostic Evaluation, Program for the Handicapped Form is used to provide medical information for periodic reviews on benefits provided to physically handicapped or mentally retarded CHAMPUS beneficiaries. The form is used to determine whether services/ supplies provided under the Program for the Handicapped are cost effective and efficient.

Affected Public: Individuals or households, businesses or other for-profit, non profit institutions and small businesses or organizations.

Frequency: Continuing.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Dr. J. Timothy Sprehe. Written comments and recommendations on the proposed information collection should be sent to Dr. J. Timothy Sprehe at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison. Written request for copies of the information collection proposal should be sent to Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302.

Dated: August 18, 1989.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Public Information Collection Requirement Submitted to the Office of Management and Budget for Review

ACTION: Notice.

The Department of Defense has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Public Official's Statement; CHAMPUS Form 769; and No OMB Control Number.

Type of Request: New Collection.

Average Burden House/Minutes Per Response: 2 hours.

Frequency of Response: Once per year (annually).

Number of Respondents: 2,500.

Annual Burden Hours: 5,000.

Annual Responses: 2,500.

Needs and Uses: The information collection requirement is necessary to obtain a public official's statement/ certification that public factilities are/ are not available or are/are not adequate to meet the needs of the handicapped dependent, and that public funds are/are not available for support of the needs of the handicapped dependent in alternative adequate facilities. This statement/certification must accompany all requests for CHAMPUS benefits under the program for the handicapped.

Affected Public: Individuals or households and State and local governments.

Frequency: Continuing.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Dr. J. Timothy Sprehe. Written comments and recommendations on the proposed information collection should be sent to Dr. J. Timothy Sprehe at the Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison. Written request for copies of the inforamtion collection proposal should be sent to Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302.

Dated: August 18, 1989.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Department of the Army

Availability; Record of Decision for Remediation of Landfill No. 26, Hamilton Air Force Base, Novato, California

The Department of Army will release copies of the Record of Decision for the selection of the remedial alternatives for the remediation of Landfill 26, Hamilton Air Force Base, Novato, California on August 17, 1989.

The Record of Decision specifically describes and addresses the selected remedial alternatives to clean up the landfill and the associated groundwater. The landfill was identified in the 1987 remedial investigation at Hamilton AFB as a site containing soil and refuse that, in some locations exceeds criteria developed by the State of California for identification of hazardous waste. The Feasibility Study released to the public on January 9, 1989, describes eight remedial alternatives for addressing contamination in the soil/refuse. These alternatives range from no action (requiring continued groundwater monitoring) to excavation and disposal of contaminated soil/refuse in appropriate commercial landfills and range in costs from $2.8 million to $53.5 million.

Remediation of soil/refuse will subsequently require localized groundwater remediation at the landfill. The Draft Feasibility Study described six groundwater remedial alternatives utilizing various processes ranging in cost from $4.7 million to $18 million. A wetlands mitigation plan will be required for the selected remedial alternatives and will undergo a subsequent review period.

The Record of Decision selects Fixation and Class II Closure of the Landfill (Alternative 4A) and Trickling Filter—Equalization (Alternative 6B) for the soil/refuse operable unit and groundwater operable unit, respectively. Here is a brief description of the alternatives:

Landfill Soil-Refuse Operable Unit—Alternative 4A: All contaminated soil/ refuse exceeding levels appropriate for Class II landfill closure will be excavated and fixed with Portland cement or similar reagents. This fixed material would be redeposited into Landfill 26. A variance from the State of California for Class II closure would be required as fixed contaminants would still exceed Class II closure level requirements. The landfill would be capped and closed as a Class II landfill. Estimated cost—$13.2 million.

Groundwater Operate Unit—Alternative 6B: Contaminated groundwater will be extracted from wells located both downgradient and within Landfill 26. Extracted water will pass through and oil/water separator to capture free hydrocarbons and then be treated in a trickling filter to remove trace organics. Treated effluent will be stored on-site in an equalization tank for pH control and time-released to a sanitary treatment facility. Estimated cost—$4.7 million.

The Corps of Engineers has been conducting environmental investigations at Hamilton AFB since May, 1985. To date, clean up actions on the property have included removal of containerized hazards (1985) and removal of 65 underground fuel structures (1986). Total expenditure for the Hamilton AFB cleanup and investigations to date have been $13.8 million.

Copies of the Record of Decision for Landfill 26 may be obtained by calling the Sacramento District Corps of Engineers, (916) 551–2254, or by writing the Sacramento District Corps of Engineers, ATTN: CESPK–ED–M (ISS), 650 Capitol Mall, Sacrameto, California 95814–4794. A limited number of copies of the Record of Decision will also be available at the Hamilton Army Airfield Installation Manager's Office, Building No. 501, Hamilton Army Airfield.

Lewis D. Walker,

Deputy Assistant Secretary of the Army (Environmental, Safety and Occupational Health), OASA(I&L).

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

CFDA: 84.116A & B]

Invitation of Preapplications and Applications for New Awards under the Comprehensive Program of the Fund for the Improvement of Postsecondary Education (FIPSE) for Fiscal Year 1990

Purpose of Program: Provides grants to or enters into cooperative agreements with institutions of postsecondary education and other public and private institutions and agencies to improve postsecondary education and educational opportunities.

Deadline for Transmittal of Preapplications: October 17, 1989.

Deadline for Transmittal of Final Applications: March 2, 1990.

Deadline for Intergovernmental Review: May 2, 1990.

Application Available: August 25, 1989.

Estimated Range of Awards: $5,000 to $200,000.

Estimated Size of Awards: $65,000.

Estimated Number of Awards: 70.

Project Period: 12 to 36 months.

Available Funds: The President's Budget for fiscal year 1990 includes $11,856,000 for FIPSE. Of this amount, approximately $4,250,000 would be available for an estimated 70 new awards under the Comprehensive Program. The Congress has not yet completed action on the 1990 appropriation. The estimates above assume passage of the President's budget. These estimates, however, do not bind the Department of Education to a specific number of grants or to the amount of any grant.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, and 85; and (b) the regulations for this program in 34 CFR part 630.

Priorities: The Secretary supports a broad range of programs that seek to improve postsecondary education. In accordance with 34 CFR 75.105(c)(1), the Secretary invites applications addressing the following priorities. However, the list is not meant to be exhaustive. Projects that do not meet any of these priorities are also eligible for support if they address other immediate problems or issues in postsecondary education. Applications are invited that seek to—

(1) Ensure that undergraduate curricula provide the knowledge and skills which an educated citizen needs, including knowledge of our intellectual and cultural heritage;

(2) Ensure that recent increases in access to postsecondary education are made meaningful by improving retention and completion rates without compromising program standards;

(3) Develop a learning friendly campus ethos;

(4) Improve the scope and quality of international education;

(5) Improve the quality of undergraduate education by raising academic standards for the bachelors degree, strengthening the liberal arts component of undergraduate professional programs, developing means of assessing and comparing programs and institutions, and recognizing and rewarding outstanding undergraduate teaching through hiring, tenure, and promotion policies;

(6) Reform the education of school teachers by making it easier for able people, who have earned degrees in fields other than education and who currently lack pedagogical training, to qualify as teachers, increasing current and prospective teachers' mastery of the subjects they teach, ensuring that prospective teachers have a solid grounding in the liberal arts, and attracting more people, of commitment and high intellectual ability to the teaching profession;

(7) Reform graduate education by fostering the teaching skills of Ph.D. candidates bound for careers in teaching, and broadening the social and ethical perspectives of students in professional graduate programs generally;

(8) Improve financing and educational reform;

(9) Strengthen postsecondary educational institutions and organizations by providing incentives to develop the abilities of their leaders, administrators, faculty, and staff;

(10) Provide education for a changing economy by offering educational programs and services for workers, unemployed individuals, businesses, and communities;

(11) Develop educational uses of technology, including computers, television, and other electronic media.

Selection Criteria: Applications will be evaluated on the basis of the following selection criteria chosen from those listed in 34 CFR 630.32.

(a) *Significance for Postsecondary Education.* Each proposed project will be reviewed for its significance in improving postsecondary education by determining the extent to which it would—

(1) Address an important problem or need;

(2) Represent an improvement upon, or important departure from, existing practice;

(3) Involve learner-centered improvements;

(4) Achieve far-reaching results through improvements that will be useful in a variety of ways and in a variety of settings; and

(5) Increase the cost-effectiveness of services.

(b) *Feasibility.* Each proposed project will be reviewed for its feasibility by determining the extent to which—

(1) The proposed project represents an appropriate response to the problem or need addressed;

(2) The applicant is capable of carrying out the proposed project as evidenced by, for example—

(i) The applicant's understanding of the problem or need;

(ii) The quality of the project design, including objectives, approaches, and evaluation plan;

(iii) The adequacy of resources, including money, personnel, facilities, equipment, and supplies;

(iv) The qualifications of key personnel who would conduct the project; and

(v) The applicant's relevant prior experience;

(3) The applicant and any other participating organizations are committed to the success of the proposed project, as evidenced by, for example—

(i) Contribution of resources by the applicant and by participating organizations;

(ii) Their prior work in the area; and

(iii) The potential for continuation of the proposed project beyond the period of funding (unless the project would be self-terminating); and

(4) The proposed project demonstrates potential for dissemination to or adaptation by other organizations, and shows evidence of interest by potential users.

(c) *Appropriateness of funding projects.* The Secretary reviews each application to determine whether support of the proposed project by the Secretary is appropriate in terms of the availability of other funding sources for the proposed activities.

For preliminary proposals, the selection criteria under significance are more important than those under feasibility and appropriateness, which are equally important. For final proposals, all criteria are equally important. Within each of these criteria, equal weight will be given to each of the subcriteria. In applying the criteria, the Secretary first analyzes an application in terms of each individual criterion. The Secretary then bases the final judgement of an application on an overall assessment of the degree to which the applicant addresses all selection criteria.

FOR APPLICATIONS AND INFORMATION CONTACT: The Fund for the Improvement of Postsecondary Education, 400 Maryland Avenue, SW., Room 3100, ROB–3, Washington, DC 20202. Telephone (202) 732–6001.

Authority: 20 U.S.C. 1135

Dated: August 16, 1989

James B. Williams,

Acting Assistant Secretary for Postsecondary Education.

BILLING CODE 4000–01–M

[CFDA No.: 84.116F]

Invitation of Applications for New Awards under the Innovative Projects for Student Community Service Competition conducted by the Fund for the Improvement of Postsecondary Education

Purpose of Program: Provides grants to institutions of higher education and other public and private, non-profit institutions and agencies to support projects encouraging students to participate in community service activities in exchange for educational services or financial assistance in order to reduce the debt incurred by these students for attendance at institutions of higher education.

Deadline for transmittal of Applications: December 19, 1989.

Deadline for Intergovernmental Reveiw: February 19, 1990.

Applications Available: August 25, 1989.

Estimated Range of Awards: $10,000 to $70,000.

Estimated Size of Awards: $45,000.

Estimated Number of Awards: 12.

Project Period: 12 to 24 months.

Available Funds: The President's Budget for fiscal year 1990 does not include funds for this program. However, applications are invited to allow for sufficient time to evaluate applications and complete the grant process before the end of the fiscal year, should the Congress appropriate funds for the program. The estimates above are based on the FY 1989 appropriation of $1,454,000.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, and 85; and (b) the regulations for this program in 34 CFR part 630.

Selection Criteria: Applications will be evaluated on the basis of the following selection criteria chosen from those listed in 34 CFR 630.32.

(a) *Significance for Postsecondary Education.* Each proposed project will be reviewed for its significance in improving postsecondary education by determining the extent to which it would—

(1) Achieve the purposes of the Innovative Projects for student Community Service Program, as referenced in 34 CFR 630.11;

(2) Address an important problem or need;

(3) Represent an important improvement upon, or important departure from, existing practice; and

(4) Achieve far-reaching results through improvements that will be useful in a variety of ways and a variety of settings.

(b) *Feasibility.* Each proposed project will be reviewed for its feasibility by determining the extent to which—

(1) The proposed project represents an appropriate response to the problem or need addressed;

(2) The applicant is capable of carrying out the proposed project as evidenced by, for example—

(i) The applicant's understanding of the problem or need;

(ii) The quality of the project design, including objectives, approaches, and evaluation plan;

(iii) The adequacy of resources, including money, personnel, facilities, equipment, and supplies;

(iv) The qualifications of key personnel who would conduct the project; and

(v) The applicant's relevant prior experience;

(3) The applicant and any other participating organizations are committed to the success of the proposed project, as evidenced by, for example—

(i) Contribution of resources by the applicant and by participating organizations;

(ii) Their prior work in the area; and

(iii) The potential for continuation of the proposed project beyond the period of funding (unless the proejct would be self-terminating);

(4) The proposed project demonstrates potential for dissemination to or adaptation by other organizations, and shows evidence of interest by potential users.

(c) *Appropriateness of funding projects.* Each proposed project will be reviewed to determine whether support of the proposed project by the Secretary is appropriate in terms of the availability of other funding sources for the proposed activities.

The Secretary will give equal weight to the selection criteria on significance, feasibility, and appropriateness. Within each of these criteria, the Secretary will give equal weight to each of the subcriteria. In applying the criteria the Secretary first analyzes an application in terms of each individual criterion. The Secretary then bases the final judgement of an application on an overall assessment of the degree to which the applicant addresses all selection criteria.

National Institute of Disability and Rehabilitation Research

[CFDA No. 84.224A]

Invitation of Applications for New Awards Under the State Grants Program for Technology-Related Assistance for Individuals With Disabilities for Fiscal Year 1990

AGENCY: Department of Education.

Purpose of Program: This program provides financial assistance to States to assist each State to develop and implement a consumer-responsive, comprehensive statewide program of technology-related assistance for individuals with disabilities.

Deadline for Transmittal of Applications: December 1, 1989.

Deadline for Intergovernmental Review: February 1, 1990.

Applications Available: September 1, 1989.

Available Funds: $5,000,000.

Estimated Number of Awards: 9.

Estimated Range of Awards: $500,000–$600,000.

Estimated Average Award: $550,000.

Project Period: Up to 36 months, with the possibility of a 24-month extension.

Note: The Department of Education is not bound by any estimates in this notice, except as otherwise provided by statute.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR), in 34 CFR parts 74, 75, 77, 79, 80 (with exceptions as noted in the following program regulations), 81, and 85, and (b) The regulations for this program in 34 CFR part 345 as published on August 9, 1989 at 54 FR 32770.

FOR APPLICATIONS CONTACT: National Institute on Disability and Rehabilitation Research, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC. 20202-2601, Attention: Peer Review Unit. Telephone: (202) 732–1141; deaf and hearing-impaired individuals may call (202) 732–1198 for TDD services.

BILLING CODE 4001-01-M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

DEPARTMENT OF JUSTICE

Agreement to Delegate Certain Civil Rights Compliance Responsibilities for Elementary and Secondary Schools and Institutions of Higher Education

A. Purpose

Section 1–207 of Executive Order 12250 authorizes the Attorney General to initiate cooperative programs among Federal agencies responsible for enforcing Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, as amended, and section 504 of the Rehabilitation Act of 1973, as amended, and similar provisions of Federal Law prohibiting discrimination on the basis of race, color, national origin, sex, handicap, or religion in programs or activities receiving Federal financial assistance.

This agreement will promote consistent and coordinated enforcement of covered nondiscrimination provisions as required in the Coordination of Enforcement of Nondiscrimination in Federally Assisted Programs (28 CFR 42.401–42.415), increase the efficiency of compliance activity, and reduce burdens on recipients, beneficiaries, and Federal agencies by consolidating compliance responsibilities, by eliminating duplication in civil rights reviews and data requirements, and by promoting consistent application of enforcement standards.

B. Delegation

By this agreement the National Endowment for the Humanities and the National Endowment for the Arts designate the Department of Education as the agency responsible for the specific civil rights compliance duties, as enumerated below, with respect to elementary and secondary schools and institutions of higher education. Responsibility for the following covered nondiscrimination provisions are delegated:

1. Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d to 2000d–4); and
2. Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794).

This agreement specifies the duties to be performed by each agency. It does not alter the requirements of the joint Department of Justice/Equal Employment Opportunity Commission regulation concerning procedures for handling compliants of employment discrimination filed against recipients of Federal financial assistance. 28 CFR 42.601–42.613, 29 CFR 1691.1–1697.13, 48 FR 3570 (January 25, 1983). Complaints covered by the above regulation filed with the National Endowment for the Humanities or the National Endowment for the Arts against a recipient of Federal financial assistance, solely alleging employment discrimination against an individual, are to be referred directly to the Equal Employment Opportunity Commission (EEOC) by the National Endowment for the Humanities or the National Endowment for the Arts.

C. Duties of the Department of Education

The National Endowment for the Humanities and the National Endowment for the Arts assign the following compliance activities and duties to the Department of Education with respect to elementary and secondary schools and institutions of higher education. Specifically the Department of Education shall:

1. Maintain current files on all activities undertaken pursuant to this agreement and on the compliance status of applicants and recipients with respect to their programs or activities receiving Federal financial assistance resulting from preapproval and postapproval reviews, complaint investigations, and actions to resolve noncompliance. A summary of these activities and the compliance status of applicants and recipients shall be reported at least at the end of every fiscal year to the National Endowment for the Humanities and the National Endowment for the Arts.

2. Develop and use information for the routine, periodic monitoring of compliance by elementary and secondary schools and institutions of higher education with respect to their programs or activities receiving Federal financial assistance subject to this agreement.

3. Perform, upon request by the National Endowment for the Humanities or the National Endowment for the Arts, preapproval reviews for which supplemental information or field reviews are necessary to determine compliance.

4. Conduct an effective program of postapproval reviews of recipients with respect to their programs or activities receiving Federal financial assistance subject to this agreement.

5. Receive complaints alleging that recipients subject to this agreement have discriminated in violation of covered nondiscrimination provisions in

their programs or activities receiving Federal financial assistance, and attempt to obtain information necessary to make complaints complete, and investigate complete complaints.

6. Issue a written letter of findings of compliance or a letter of findings of noncompliance that (a) advises the recipient and, where appropriate, the complainant of the results of the postapproval review or complaint investigation, (b) provides recommendations, where appropriate, for achieving voluntary compliance, and (c) offers the opportunity to engage in negotiations for achieving voluntary compliance. The governor of the state in which the applicant or recipient is located will be notified if the letter of findings of noncompliance is made pursuant to a statute requiring that the governor be given an opportunity to secure compliance by voluntary means. The Department of Education promptly shall provide a copy of its letter of findings to the National Endowment for the Humanities or the National Endowment for the Arts and to the Assistant Attorney General for Civil Rights.

7. Conduct, after a letter of findings of noncompliance, negotiations seeking voluntary compliance with the requirements of covered nondiscrimination provisions.

8. (a) If compliance cannot be voluntarily achieved, and the Department of Education does not fund the applicant or recipient, refer the matter to the National Endowment for the Humanities or the National Endowment for the Arts for its own independent action and notify the Assistant Attorney General for Civil Rights of the referral. (b) If compliance cannot be achieved and both the Department of Education and the National Endowment for the Humanties or the National Endowment for the Arts fund the applicant or recipient, initiate formal enforcement action. When the Department of Education initiates formal enforcement action by providing the applicant or recipient with an opportunity for an administrative hearing, provide the National Endowment for the Humanities or the National Endowment for the Arts with an opportunity to participate as a party in a joint administrative hearing. When the Department of Education initiates formal enforcement action by referring the matter to the Department of Justice for appropriate judicial action, notify the National Endowment for the Humanities or the National Endowment for the Arts of the referral.

9. Notify the National Endowment for the Humanities or the National Endowment for the Arts and the Assistant Attorney General for Civil Rights of the outcome of the hearing, including the reasons for finding the applicant or recipient in noncompliance, and any action taken against the applicant or recipient.

D. Duties of the National Endowment for the Humanities and the National Endowment for the Arts

The National Endowment for the Humanities and the National Endowment for the Arts shall:

1. Issue and provide to the Department of Education all regulations, guidelines, reports, orders, policies, and other documents that are needed for recipients to comply with covered nondiscrimination provisions and for the Department of Education to administer its responsibilities under this agreement.

2. Provide the Department of Education with information, technical assistance, and training necessary for the Department of Education to perform the duties delegated under this agreement. This information shall include, but is not limited to, a list of recipients receiving Federal financial assistance from the National Endowment for the Humanities or the Nation Endowment for the Arts, the types of assistance provided, compliance information solely in the National Endowment for the Humanities' or the National Endowment for the Arts' possession or control, and data on program eligibility and/or actual participants in assisted programs or activities.

3. Perform preapproval reviews of applicants for assistance, as required by 28 CFR 42.407(b), that do not require supplemental information or field reviews. The reviews may require information to be supplied by the Department of Education. If the National Endowment for the Humanities or the National Endowment for the Arts requests the Department of Education to undertake an onsite review because it has shown it has reason to believe discrimination is occurring in a program or activity that is either receiving Federal financial assistance or that is the subject of an application, the National Endowment for the Humanities or the National Endowment for the Arts shall supply information necessary for the Department of Education to undetake such a review.

4. Refer to the Department of Education all complaints alleging discrimination under covered nondiscrimination provisions filed with the National Endowment for the Humanities or the National Endowment for the Arts against a recipient subject to this delegation and determine, if possible, whether program involved receives Federal financial assistance from the National Endowment for the Humanities or the National Endowment for the Arts.

5. Where the Department of Education has notified the applicant or recipient in writing that compliance cannot be achieved by voluntary means and the Department of Education has referred the matter to the National Endowment for the Humanities or the National Endowment for the Arts, make the final compliance determination and:

(a) If the National Endowment for the Humanities or the National Endowment for the Arts wishes to initiate formal enforcement action by providing the applicant or recipient with an opportunity for an administrative hearing, notify the Department of Education if the National Endowment for the Arts will either join as a party in Department of Education hearing or will conduct its own administrative hearing.

(b) When the National Endowment for the Humanities or the National Endowment for the Arts initiates formal enforcement action by referring the matter to the Department of Justice for appropriate judicial action, the agency shall notify the Department of Education of the referral.

(c) If the National Endowment for the Humanities or the National Endowment for the Arts conducts its own hearing, the agency will notify the Department of Education and the Assistant Attorney General for Civil Rights of the outcome of the hearing, including the reasons for finding the applicant or recipient in noncompliance, and any action taken against the applicant or recipient. The agency may request the Department of Education to act as counsel in its administrative hearing.

(d) If the National Endowment for the Humanities or the National Endowment for the Arts neither initiates steps to deny or terminate Federal financial assistance nor refers the matter to the Department of Justice, the agency will notify the Department of Education and the Assistant Attorney General for Civil Rights, in writing, within 15 days after notification from the Department of Education that voluntary compliance cannot be achieved.

E. Effects on Prior Delegations

This agreement supersedes and replaces the delegation agreements regarding elementary and secondary schools and institutions of higher education entered into between the National Endowment for the Humanities and the National Endowment for the

Arts and the Department of Health, Education, and Welfare dated January 26, 1976 and November 19, 1975, respectively, and accepted by Department of Health, Education and Welfare on June 8, 1976.

F. Redelegation

Duties delegated herein to the Department of Education may be redelegated to the Department of Health and Human Services or the Veterans Administration. The Department of Education shall notify the National Endowment for the Humanities or the National Endowment for the Arts of any such redelegation prior to its effective date.

G. Approval

This agreement shall be signed by the Assistant Attorney General for Civil Rights. It shall be signed by all parties and become effective 30 days from publication in **Federal Register.**

H. Termination

This agreement may be terminated by the Department of Education, the National Endowment for the Humanities or the National Endowment for the Arts after written notice to the other agencies and to the Assistant Attorney General for Civil Rights.

Dated: March 1, 1989

Lynn V. Cheney,

chairman National Endowment for the Humanities

Dated: February 23, 1989.

Frank Hodsoll,

Chairman National Endowment for the Arts.

Dated: July 28, 1989.

James Turner

Acting Assistant Attorney General Civil Rights Division Department of Justice

Dated: April 27, 1989.

Lauro F. Cavazos,

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER89-601-000, et al.]

Florida Power & Light Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

August 15, 1989.

Take notice that the following filings have been made with the Commission:

1. Florida Power & Light Company

[Docket No. ER89-601-000]

Take notice that on August 10, 1989, Florida Power & Light Company (FP&L), tendered for filing a document entitled Amendment Number Ten to Revised Agreement to Provide Specified Transmission Service Between Florida Power & Light Company and Florida Power Corporation (Rate Schedule FERC No. 61).

FRL states that under Amendment Number Ten, FPL will transmit power and energy for Florida Power Corporation as is required in the implementation of its interchange agreement with Jacksonville Electric Authority.

FPL requests that waiver of § 35.3 of the Commission's Regulations be granted and that the proposed Amendment be made effective immediately. FPL states that a copy of the filing was served on Florida Power Corporation.

Comment date: August 19, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. Washington Water Power Company

[Docket No. ER89-602-000]

Take notice that on August 10, 1989, Washington Water Power Company (WWP) tendered for filing eleven (11) agreements which have been terminated according to the terms of the individuals agreements.

Comment date: August 29, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Southern California Edison Company

[Docket No. ER89-597-000]

Take notice that on August 9, 1989, Southern California Edison Company (Edison) tendered for filing, as an initial rate schedule, the following agreement, executed on July 25, 1989, by the respective parties: Edison-NCPA, Southern California Edison Company, and Northern California Power Agency.

The filed Agreement establishes the terms and conditions under which Interruptible Transmission Service will be proved to NCPA from Edison over certain Edison facilities.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: August 29, 1989, in accordance with Standard Paragraph E at the end of this notice.

4. Nantahala Power & Light Company

[Docket No. ER89-595-000]

Take notice that on July 31, 1989, Nantahala Power & Light Company (Nantahala) tendered for filing computations showing the calculation of the cost for the period July 1, 1988 to June 30, 1989 utilizing the billing format resulting from the New Fontana Agreement (NFA), the 1971 Apportionment Agreement as modified by the FERC, and the 1971 Power Purchase Contract with TVA.

Comment date: August 29, 1989, in accordance with Standard Paragraph E at the end of this notice.

5. Gulf States Utilities Company

[Docket No. ER89-603-000]

Take notice that Gulf States Utilities Company (Gulf States) on August 11, 1989, tendered for filing rate schedule changes applicable to (1) the City of Newton, Texas, (2) the City of Kirbyville, Texas, (3) the City of Caldwell, Texas, (4) the City of Gueydan, Louisiana, (5) the City of Erath, Louisiana, (6) the City of Kaplan, Louisiana, and (7) Brazos Electric Power Cooperative, Inc. (collectively referred to as the "Wholesale Customers").

The rate schedule changes included Amended Agreements for Wholesale Electric Service ("Amended Agreements") for each of the Wholesale Customers. The Amended Agreements extend the terms of the wholesale electric service contracts between Gulf States and the Wholesale Customers through March 31, 2000. In consideration of the extension of the terms of the contracts, Gulf States is providing the Wholesale Customers, effective April 1, 1990, a rate reduction which is reflected in a new Rate Schedule WPS. The rate schedule changes also include various other miscellaneous agreements concerning substation facilities charges for Gueydan, Erath, and Kaplan, certain debts of Kaplan and the deferral of certain billings, and the purchase of power from the Southwest Power Administration by Brazos.

Gulf States states that the rates contained in Rate Schedule WPS were offered to all wholesale electric service customers of Gulf States that would agree to an extension of the term of their contract for wholesale electric service as described above.

Gulf States requests an effective date for the Amended Agreements of October 17, 1989. The effective date for Rate Schedule WPS under the terms of the Amended Agreements will be April 1, 1990. Gulf States requests an effective date for its letter agreement with Kaplan regarding the deferral of certain billings of July 20, 1989, and requests pursuant to section 35.11 of the Commission's regulations a waiver of the notice requirements of the Federal Power Act and the Commission's regulations to allow the effective date.

Copies of the filing were served on all of Gulf States' customers purchasing wholesale electric service and the Louisiana Public Service Commission and the Public Utility Commission of Texas.

Comment date: August 29, 1989, in accordance with Standard Paragraph E at the end of this notice.

6. Southern California Edison Company

[Docket No. ER89-598-000]

Take notice that on August 9, 1989, Southern California Edison Company (Edison) tendered for filing Amendment No. 1 to the Los Angeles-Edison Exchange Agreement (Amendment), designated Rate Schedule FERC No. 219, which has been executed by Edison and the Department of Water and Power of the City of Los Angeles (Los Angeles): Amendment No. 1 to the Los Angeles-Edison Exchange Agreement.

This Amendment modifies the Exchange Agreement to reflect the delay of the in-service date of the Devers-Palo Verde No. 2 Transmission Line (DPV2 Line) from June 1, 1990, to June 1, 1993. This Amendment includes the following:

—Los Angeles' right to build the line is delayed from July 1, 1989, to June 1, 1990, if Edison has not begun construction of the DPV2 Line by said date;

—Edison will make available to Los Angeles 368 MW of firm bidirectional transmission service between Palo Verde and Devers over the Devers-Palo Verde No. 1 Transmission Line (DPV1 Line);

—The 368 MW of firm bidirectional transmission service to Los Angeles between Devers and Sylmar will commence June 1, 1990;

—The 100 MW of firm bidirectional transmission service to Los Angeles between Palo Verde and Sylmar will commence June 1, 1990, and will terminate May 31, 2012;

—The 320/500 MW Northwest transmission exchange will commence June 1, 1990; and

—The Castaic Base Service is deemed to have started May 8, 1988. The Castaic Additional Service will commence January 1, 1990.

The Amendment is proposed to become effective when executed by the Parties and accepted for filing by the Commission.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the City of Los Angeles.

Comment date: August 29, 1989, in accordance with Standard Paragraph E at the end of this notice.

7. PacifiCorp, doing business as Pacific Power & Light Company and Utah Power & Light Company

[Docket No. ER89-600-000]

Take notice that on August 10, 1989, PacifiCorp doing business as Pacific Power & Light Company and Utah Power & Light Company tendered for filing a Notice of Termination of PacifiCorp/Utah Power & Light Company Rate Schedule FERC No. 144.

Pacific requests an effective date of June 1, 1989, and therefore requests waiver of the Commission's notice requirements.

Comment date: August 29, 1989, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-19772 Filed 8-22-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER89-596-000, et al.]

New England Power Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

August 14, 1989.

Take notice that the following filings have been made with the Commission:

1. New England Power Company

[Docket No. ER89-596-000]

Take notice that New England Power Company (NEP) on August 1, 1989 tendered for filing a proposed change in its Service Agreement for Primary Service for Resale with the Narragansett Electric Company (Narragansett). The proposed change would increase the fixed credits allowed Narragansett on its purchased power billing by NEP in the amount of $3,048,300 annually based on the 12-month period ending December 31, 1990.

NEP requests an effective date of October 1, 1989. However, NEP requests that the amendment be suspended for three months to become effective January 1, 1990, in order to coincide with the effective date of its W-11 wholesale rate filing also filed on August 1, 1989.

Comment date: August 28, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. Tucson Electric Power Company

[Docket No. ER89-599-000]

Take notice that on August 10, 1989, Tucson Electric Power Company (Tucson) tendered for filing an economy Energy Agreement (the Agreement) between Tucson and the City of Burbank; City of Glendale and the City of Pasadena. Tucson states that services may be provided under Service Schedule A to the Agreement entitled "Economy Energy Interchange."

Tucson requests an effective date of June 22, 1989, and therefore requests waiver of the Commission's notice requirements.

Tucson states that copies of the filing were served upon the City of Burbank; City of Glendale and City of Pasadena.

Comment date: August 28, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Kansas Power and Light Company

[Docket No. ER89-455-000]

Take notice that on August 8, 1989, the Kansas Power and Light Company (KPL) tendered for filing an amendment to its proposed changes in its schedule of rates and charges applicable to its partial requirements municipal customers located in the State of Kansas, as follows:

Partial requirements municipal customer	FERC rate schedule No.
City of Burlingame	250
City of Clay Center	241
City of Ellingwood	242
City of Herington	209
City of Holton	226
City of Larned	240
City of Minneapolis	211
City of Osage City	249
City of Sabetha	235
City of St. John	252
City of Stafford	243
City of Sterling	237
City of Wamego	184

KPL states that the amendment is necessary to reflect modifications to the proposed rate schedule requested by the Commission Staff.

Copies of the filing were served upon each affected customer and the Kansas Corporation Commission.

Comment date: August 28, 1989, in accordance with Standard Paragraph E at the end of this notice.

4. Pacific Gas and Electric Company

[Docket No. ER89-538-000]

Take notice that on August 4, 1989, Pacific Gas and Electric Company (PG&E) tendered for filing an amendment to its July 5, 1989 filing.

Copies of this filing were served upon CCSF, the California Public Utilities Commission, Turlock Irrigation District, Modesto Irrigation District and NI Industries.

Comment date: August 28, 1989, in accordance with Standard Paragraph E at the end of this notice.

5. Washington Water Power Company

[Docket No. ER89-385-000]

Take notice that on August 10, 1989, Washington Water Power Company (Washington) amended its filing in this docket for a firm capacity and energy sale which Washington refers to as a Letter Agreement between Washington and Sierra Pacific Power Company (SPP). Washington states that energy deliveries associated with capacity deliveries will be made available to SPP from December 27, 1988 through January 2, 1989 and January 23 through December 31, 1989.

Washington requests that the requirements of prior notice be waived and the effective date be made retroactive to December 27, 1988.

Comment date: August 28, 1989, in accordance with Standard Paragraph E at the end of this notice.

6. Northeast Utilities Service Company

[Docket No. ER89-590-000]

Take notice that on August 4, 1989, Northeast Utilities Service Company as agent for the Connecticut Light and Power Company (CP&L) and Western Massachusetts Electric Company (WMECO) tendered for filing Notices of Termination of the following rate schedules:

Rate schedule	Termination date
CL&P Rate Schedule FERC No. 367.	July 7, 1989
CL&P Rate Schedule FERC No. 384.	Do.
CL&P Rate Schedule FERC No. 198.	Do.
CVPS Rate Schedule FERC No. 98.	Do.
CL&P Rate Schedule FERC No. 357.	Do.
CL&P Rate Schedule FERC No. 168.	Do.
GMP Rate Schedule FERC No. 71.	Do.
CL&P Rate Schedule FERC No. 123.	Do.
LILCO Rate Schedule FERC No. 22.	Do.
CL&P Rate Schedule FERC No. 129.	Do.
WMECO Rate Schedule FERC No. 112.	Do.
LILCO Rate Schedule FERC No. 23.	Do.
CL&P Rate Schedule FERC No. 147.	Do.
LILCO Rate Schedule FERC No. 25.	Do.
CL&P Rate Schedule FERC No. 212.	Do.
WMECO Rate Schedule FERC No. 177.	Do.
LILCO Rate Schedule FERC No. 31.	Do.
CL&P Rate Schedule FERC No. 360.	Do.
CL&P Rate Schedule FERC No. 362.	Do.
PSNH Rate Schedule FERC No. 118.	Do.

Comment date: August 28, 1989, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-19773 Filed 8-22-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP89-1918-000 et al.]

Panhandle Eastern Pipe Line Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Panhandle Eastern Pipe Line Company

[Docket No. CP89-1918-000]

August 11, 1989.

Take notice that on August 8, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77152-1642, filed in Docket No. CP89-1918-000 an application pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Access Energy Corporation (Access), a marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle proposes to transport, on a firm basis, up to 5,000 Dt. equivalent of natural gas per day for Access. Panhandle states that construction of facilities would not be required to provide the proposed service.

Panhandle further states that the maximum day, average day, and annual transportation volumes would be approximately 5,000 Dt. equivalent, 5,000 Dt. equivalent and 1,825,000 Dt. equivalent respectively.

Panhandle advises that service under Section 284.223(a) commenced July 1, 1989, as reported in Docket No. ST89-4316.

Comment date: September 25, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Panhandle Eastern Pipe Line Company

[Docket No. CP89-1922-000]

August 11, 1989.

Take notice that on August 8, 1989, Panhandle Eastern Pipe Line Company (Panhandle) P.O. Box 1642, Houston, Texas, 77251-1642, filed in Docket No. CP89-1922-000, a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act, to transport natural gas on an interruptible basis, under its blanket certificate issued in Docket No. CP86-585-000, a maximum of 6,000 Dt. per day on behalf of Centran Corporation (Centran) a shipper, all as more fully set forth in the request on file with the Commission and open to public inspection.

Panhandle indicates that service commended July 1, 1989, under §284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-4318 and estimates the volumes transported to be 6,000 Dt. on peak day,

5,000 Dt. on an average day and 1,825,000 Dt. on an annual basis. It is asserted that Panhandle would receive gas from various existing points of receipt on its system and would transport and redeliver the subject gas, less fuel and unaccounted line loss gas, to Northern Natural-Greensburg in Kiowa County, Kansas.

Comment date: September 25, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Panhandle Easter Pipe Line Company

[Docket No. CP89-1923-000]

August 14, 1989.

Take notice that on August 8, 1989, Panhandle Eastern Pipe Line Company (Panhandle) P.O. Box 1642, Houston, Texas, 77251-1642, filed in Docket No. CP89-1923-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to trransport gas on an interruptible basis for Amgas, Inc. (Amgas) under the blanket certificate issued in Docket No. CP89-585-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Panhandle states that it proposes to transport up to 2,345 Dt per day on an interruptible basis on behalf of Amgas pursuant to a Transportation Agreement dated June 9, 1989 between Panhandle and Amgas (Transportatin Agreement). The Transportation Agreement provides for Panhandle to receive gas from various existing points of receipt on its system. Panhandle will then transport and redeliver subject gas, less fuel used and unaccounted for line loss, to Union Electric—Curryville in Pike County, Missouri.

Panhandle states that the estimated daily and estimated annual quantities would be 1,173 dt and 428,145 dt, respectively.

Panhandle further states it commenced service on July 1, 1989, as reported in Docket No. ST89-4332-000.

Comment date: September 28, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Northern Natural Gas Company Division of Enron Corp.

[Docket No. CP89-1932-000]

August 14, 1989.

Take notice that on August 10, 1989, Northern Natural Gas Company, Division of Enron Corp., (Northern) 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188 filed in Docket No. CP89-1932-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Texas Eastern Services Company (Texas Eastern), under the authorization issued in Docket No. CP86-435-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern would perform the proposed interruptible transportation service for Texas Eastern, a marketer of natural gas, pursuant to an interruptible transportation agreement IT-1 dated July 10, 1989 (transportation agreement number 72741). The term of the transportation agreement is for one year from the date of initial delivery, and month to month thereafter unless terminated upon 30 days prior written notice to the other party. Northern proposes to transport on a peak day up to 50,000 MMBtu; on an average day up to 37,500 MMBtu; and on an annual basis 18,250,000 MMBtu of natural gas for Texas Eastern. It is stated that unless Northern agrees in writing to a lower rate, Texas Eastern shall pay Northern each month for transportation service at the maximum rates or charges in effect from time to time under Rate Schedule IT-1, or any effective superseding rate schedule on file with the Commission. Northern proposes to receive the subject gas from various existing receipt points on its system for transportation to various existing delivery points on its system. Northern avers that construction of facilities would not be required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's regulations. Northern commenced such self-implementing service on July 10, 1989, as reported in Docket No. ST89-4274-000.

Comment date: September 28, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Panhandle Eastern Pipe Line Company

[Docket No. CP89-1925-000]

August 14, 1989.

Take notice that on August 8, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-1925-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Mountain Iron & Supply Company (Mountain Iron), a shipper and marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Panhandle states that pursuant to Transportation Agreement dated June 20, 1989, between Panhandle and Mountain Iron (Agreement), it would transport up to 2,000 dekatherms (dt) per day equivalent of natural gas, on an interruptible basis, for Mountain Iron. Panhandle further states that the Agreement provides for Panhandle to receive the natural gas from various existing points of receipt on its system in the states of Colorado, Illinois, Kansas, Michigan, Ohio, Oklahoma, Texas and Wyoming. Panhandle would then transport and redeliver the natural gas, less fuel used and unaccounted-for line loss, to the Village of Divernon in Sangamon County, Illinois.

Panhandle states that Mountain Iron has indicated that the estimated daily and estimated annual quantities would be 260 dt and 94,900 dt, respectively.

Panhandle states that it commenced the transportation of natural gas for Mountain Iron on July 1, 1989, as reported in Docket No. ST89-4325-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations (18 CFR 284.223(a)).

Comment date: September 28, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Panhandle Eastern Pipe Line Company

[Docket No. CP89-1917-000]

August 14, 1989.

Take notice that on August 8, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-1917-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to provide transportation service for Access Energy Corporation (Access), a shipper and marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Panhandle requests authorization to transport, on a firm basis, up to a maximum of 4,880 dt equivalent of natural gas per day for Access pursuant to a transportation agreement dated July 1, 1989. Panhandle states that it would receive the gas from Haven Pool in Reno County, Kansas and redeliver the gas, less fuel and unaccounted for line loss, to Central Illinois Public Service Company—Quincy in Adams County, Illinois. Panhandle indicates that the total volume of gas to be transported for Access on a peak day would be 4,880 dt; on an average day would be 4,880 dt; and on an annual basis would be 1,781,200 dt.

Panhandle states that it commenced the transportation of natural gas for Access on July 1, 1989, at Docket No. ST89–4317–000 for a 120-day period pursuant to § 284.223(a)(1) of the Commission's Regulations. Panhandle indicates that it proposes no new facilities in order to provide this transportation service.

Comment date: September 28, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. El Paso Natural Gas Company

[Docket No. CP89–1942–000]

August 15, 1989.

Take notice that on August 11, 1989, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978 filed in Docket No. CP89–1942–000 an application pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Access Energy Corporation (Access), a marketer of natural gas, under El Paso's blanket certificate issued in Docket No. CP88–433–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

El Paso proposes to transport, on an interruptible basis, up to 211,000 MMBtu of natural gas per day for Access. El Paso states that construction of facilities would not be required to provide the proposed service.

El Paso further states that the maximum day, average day, and annual transportation volumes would be approximately 211,000 MMBtu, 52,750 MMBtu and 19,253,750 MMBtu respectively.

El Paso advises that service under § 284.223(a) commenced June 16, 1989, as reported in Docket No. ST89–4191.

Comment date: September 28, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Natural Gas Pipeline Company of America

[Docket No. CP89–1952–000]

August 15, 1989.

Take notice that on August 15, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 2nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–1952–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for American Central Gas Marketing Company (American Central), a marketer, under the blanket certificate issued in Docket No. CP86–582–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Natural states that pursuant to a transportation service agreement dated June 6, 1989, under its Rate Schedule ITS, it proposes to transport up to 50,000 MMBtu per day equivalent of natural gas for American Central. Natural states that it would transport the gas (plus any additional volumes accepted pursuant to the overrun provisions of Natural's Rate Schedule ITS) from receipt points in New Mexico, Texas, offshore Texas, Oklahoma, Louisiana, offshore Louisiana, Illinois, Arkansas, Kansas, Nebraska and Wyoming, and would deliver the gas to a delivery point in Oklahoma.

Natural advises that service under § 284.223(a) commenced June 9, 1989, as reported in Docket No. ST89–4467–000. Natural further advises that it would transport 20,000 MMBtu on an average day and 7,300,000 MMBtu annually.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. Tennessee Gas Pipeline Company

[Docket No. CP89–1941–000]

August 15, 1989.

Take notice that on August 11, 1989, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89–1941–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service for Panhandle Trading Company (Panhandle), a marketing company, under Tennessee's blanket certificate issued in Docket No. CP87–115–000, pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee states that, pursuant to a transportation agreement dated June 21, 1989, as amended, it proposes to transport up to 100,000 Dt. per day of natural gas for Panhandle. Tennessee further states that the agreement provides for it to receive the gas from various receipt points located Offshore Louisiana and to redeliver the gas to various points of delivery along Tennessee's system. Panhandle has informed Tennessee that it expects to have the full 100,000 Dt. transported on an average day and, based thereon, estimates that 3,650,000 Dt. would be transported annually. Tennessee advises that, the service commenced July 2, 1989, as reported in Docket No. ST89–4308 (filed July 28, 1989), pursuant to § 284.223 of the Commission's Regulations.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Tennessee Gas Pipeline Company

[Docket No. CP89–1940–000]

August 15, 1989.

Take notice that on August 11, 1989, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed a request pursuant to § 157.205 of the Commission's Regulations (18 CFR 157.205) to construct and operate metering facilities for the delivery of natural gas to two existing customers at three delivery points under Tennessee's blanket certificate issued in Docket No. CP82–413–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is one file with the Commission and open to public inspection.

Tennessee proposes to replace existing metering facilities for the delivery of gas to Boston Gas Company at Arlington and Reading in Middlesex County, Massachusetts, and to Concord Gas Company at Concord, Merrimack County, New Hampshire. It is stated that the replacement facilities are required to more accurately measure daily variances in deliveries and to reflect the differences in delivery pressures. It is estimated that the cost of installing the facilities would be $438,000. It is asserted that there would be no change in the authorized quantities delivered at the three points and that there would be no impact on Tennessee's peak day and annual deliveries.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

---

11. Natural Gas Pipeline Company of America

[Docket No. CP89–1943–000]

August 15, 1989.

Take notice that on August 11, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois, 60148 filed in Docket No. CP89–1943–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport natural gas for Shell Gas Trading Company (Shell), a marketer of natural gas, under Natural's blanket certificate issued in Docket No. CP86–582–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Natural proposes to transport on a firm basis up to 25,000 MMBtu, plus any additional volumes accepted pursuant to the overrun provision of Natural's Rate Schedule FTS, on behalf of Shell pursuant to a gas transportation agreement dated April 19, 1989, between Natural and Shell. Natural would receive the gas at various existing points of receipt on its system in Texas and redeliver equivalent volumes, less fuel and lost and unaccounted for volumes, at various existing delivery points in Louisiana.

Natural further states that the estimated average daily and annual quantities would be 25,000 MMBtu and 9,125,000 MMBtu respectively. Service under § 284.223(a) commenced on July 1, 1989, as reported in Docket No. ST89–4288–000, it is stated.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Northern Natural Gas Company Division of Enron Corp.

[Docket No. CP89–1944–000]

August 15, 1989.

Take notice that on August 11, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No. CP89–1944–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Centran Corporation (Centran), a marketer, under the blanket certificate issued in Docket No. CP86–435–000, pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern states that pursuant to a transportation agreement dated July 2, 1989, under its Rate Schedule IT–1, it proposes to transport up to 5,000 MMBtu per day equivalent of natural gas for Centran. Northern states that it would transport the gas from multiple receipt points as shown in Appendix "A" of the transportation agreement and would deliver the gas to multiple delivery points also shown in Appendix "A" of the agreement. Northern also states that the proposed service may involve the compression of gas at its Fort Buford Compressor Station for delivery to Northern Border Pipeline Company.

Northern advises that service under § 284.223(a) commenced July 2, 1989, as reported in Docket No. ST89–4238–000 (filed July 21, 1989). Northern further advises that it would transport 3,750 MMBtu on an average day and 1,825,000 MMBtu annually.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. Paiute Pipeline Company

[Docket No. CP89–1946–000]

August 15, 1989.

Take notice that on August 14, 1989, Paiute Pipeline Company (Paiute), P.O. Box 94197, Las Vegas, Nevada 89193–4197, filed in Docket No. CP89–1946–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for KTM, Inc. (KTM), a marketer, under the blanket certificate issued in Docket No. CP87–309–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Paiute states that pursuant to a transportation agreement dated July 1, 1989, under its Rate Schedule IT–1, it proposes to transport up to 22,193 MMBtu per day equivalent of natural gas for KTM. Paiute states that it would transport the gas through its system from the existing interconnection between the facilities of Paiute and Northwest Pipeline Corporation at the Idaho-Nevada border, and would redeliver the gas to KTM at the delivery points identified in the transportation agreement.

Paiute advises that service under § 284.223(a) commenced July 2, 1989, as reported in Docket No. ST89–4334–000 (filed July 31, 1989). Paiute further advises that it would transport 2,019 MMBtu on an average day and 737,000 MMBtu annually.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

14. Paiute Pipeline Company

[Docket No. CP89–1945–000]

August 15, 1989.

Take notice that on August 14, 1989, Paiute Pipeline Company (Paiute), P.O. Box 94197, Las Vegas, Nevada 89103–4197, filed in Docket No. CP89–1945–000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to perform an interruptible transportation service for High Sierra Hotel/Casino, (High Sierra), an end-user, under Paiute's blanket certificate issued in Docket No. CP87–307–000, pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Paiute states that pursuant to a transportation service agreement dated May 18, 1989, it proposes to receive up to 200 dt equivalent of natural gas per day from High Sierra at the Idaho-Nevada interconnection between Paiute and Northwest Pipeline Corporation and redeliver the gas at a specified point in Douglas County, Nevada. Paiute estimates that the peak day, average day, and annual volumes would be 200 million Btu, 33 million Btu, and 12,000 million Btu, respectively. It is indicated that on June 29, 1989, Paiute initiated a 120-day transportation service for High Sierra under § 284.223(a) as reported in Docket No. ST89–4226–000.

Paiute further states that no facilities need be constructed to implement the service. Paiute states that the primary term of the service would expire on October 31, 1991, but that the service would continue on a month-to-month basis until terminated by either party on thirty days written notice. Paiute proposes to charge rates and abide by the terms and conditions of its Rate Schedule IT–1.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

15. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP89–1949–000]

August 15, 1989.

Take notice that on August 14, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No.

CP89–1949–000 a request pursuant to

delivery points shown in Exhibit "B" of

convenience and necessity (OEC)

CP89–1949–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Vantage Pipeline Systems, Inc. (Vantage), a marketer of natural gas, under Northern's blanket certificate issued in Docket No. CP86–435–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern proposes to transport, on an interruptible basis, up to 15,000 MMBtu equivalent of natural gas on a peak day, 11,250 MMBtu equivalent on an average day, and 5,475,000 MMBtu equivalent on an annual basis for Vantage. It is stated that Northern would receive the gas for Vantage's account at designated points on Northern's system and would deliver equivalent volumes at designated points on Northern's system. It is asserted that the service would be effected using existing facilities and would require no construction of additional facilities. It is explained that the transportation service commenced July 1, 1989, under the self-implementing authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–4235.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

16. United Gas Pipe Line Company

[Docket No. CP89–1950–000]

August 15, 1989.

Take notice that on August 14, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–1950–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Exxon Corporation (Exxon), a producer, under the blanket certificate issued in Docket No. CP88–6–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

United states that pursuant to a transportation agreement dated June 9, 1989, under its Rate Schedule ITS, it proposes to transport up to 103,000 MMBtu per day equivalent of natural gas for Exxon. United states that it would transport the gas from multiple receipt points as shown in Exhibit "A" of the transportation agreement and would deliver the gas to multiple delivery points shown in Exhibit "B" of the agreement.

United advises that service under § 284.223(a) commenced July 1, 1989, as reported in Docket No. ST89–4281–000 (filed July 24, 1989). United further advises that it would transport 103,000 MMBtu on an average day and 37,595,000 MMBtu annually.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

17. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP89–1948–000]

August 15, 1989.

Take notice that on August 14, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No. CP89–1948–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Adobe Gas Marketing Co. (Adobe), under Northern's blanket certificate issued in Docket No. CP89–435–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern requests authorization to transport, on an interruptible basis, up to a maximum of 150,000 MMBtu of natural gas per day for Adobe, a marketer of natural gas, from receipt points located in Texas, Oklahoma, Kansas and Iowa to delivery points located in Texas, Oklahoma and Kansas. Northern anticipates transporting 112,500 MMBtu on an average day and an annual volume of 54,750,000 MMBtu.

Northern states that the transportation of natural gas for Adobe commenced July 1, 1989, as reported in Docket No. ST89–4236–000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Northern in Docket No. CP86–435–000.

Comment date: September 29, 1989, in accordance with Standard Paragraph G at the end of this notice.

18. El Paso Natural Gas Company

[Docket No. CP89–1909–000]

August 15, 1989.

Take notice that on August 4, 1989, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas, 79978, filed an application in Docket No. CP89–1909–000, under sections 7(b) and 7(c) of the Natural Gas Act, for an optional certificate of public convenience and necessity (OEC) authorizing (i) the construction and operation of certain facilities, with appurtenances; (ii) the firm transportation certificate and (iii) conditional pregranted abandonment of the facilities and related application on file with the Commission and open to public inspection.

The application states that El Paso proposes to expand its interstate pipeline system by up to 600 MMcf/d, primarily to meet principal market area of California. The expansion will serve shippers desiring firm transportation service for gas to be delivered at or in the vicinity of the western terminus of El Paso's mainline system at Topock, Arizona, including shippers engaged in enhanced oil recovery (EOR) operations in central California.

El Paso's expanded system would be connected at or near El Paso's Topock delivery point with the existing utility systems of Pacific Gas and Electric Company and Southern California Gas Company, as well as with the facilities to be constructed and operated by Mojave Pipeline Company, for the ultimate delivery of gas to shippers utilizing such systems, principally EOR and associated cogeneration users operating in the heavy oil fields in Kern County, California.

El Paso further states that its proposal has been prompted more specifically by several recent developments which evidence a substantial market interest in the facilities and service which are the subject of the instant application. Among these are: (i) The California Public Utilities Commission's ongoing investigation into the need for new interstate pipeline capacity to and within California which, while not yet complete, has thus far resulted in substantial market support for, and regulatory interest in, the construction of new interstate pipeline capacity and new firm interstate transportation for service not only to the EOR market, but also to enhance service levels to existing California gas consumers; (ii) the continuing market viability of the Mojave project; and (iii) El Paso's continuing discussions and negotiations with EOR and other gas consumers in California regarding new transportation services.

El Paso states that it has executed agreements with several EOR users which provide for long-term firm transportation commitments on El Paso's system up to an aggregate maximum quantity of approximately 225,000 MMbtu per day. El Paso states it is also presently engaged in ongoing negotiations with additional potential

firm shippers in California, including EOR users, regarding future firm transportation arrangements, and anticipates that additional commitments for firm transportation service on Applicant's system would be secured in the near future.

Because the total transportation market to be served by El Paso is not yet clear due to the ongoing nature of its negotiations, El Paso's application presents illustrative engineering studies based on three (3) design alternatives: The 200 Case presents the minimum expenditures by El Paso for additional facilities only on the San Juan Mainline System necessary to transport and deliver 200 MMcf/d; the 400 Case presents a design alternative which would permit the initial transportation and delivery of 400 MMcf/d, expandable to 600 MMcf/d; and the 600 Case reflects the facilities necessary to permit El Paso to transport and delivery 600 MMcf/d. The facilities El Paso will actually construct will match the level of firm commitments, but not in excess of the 600 MMcf/d level. Each of the design alternatives incorporates compatible engineering design considerations relative to the construction of Mojave Pipeline Company's proposed interstate pipeline system extending from Topock, Arizona, to Kern County, California. El Paso estimates that the facility cost for each of the three (3) cases are $68,708,000, $143,670,000 and $201,035,000, respectively. El Paso seeks flexible authorization to construct and implement facilities necessary to provide its proposed service at the aggregate level ultimately secured through negotiations.

El Paso further states that it will perform the proposed firm transportation service under the provisions of its existing Rate Schedule T–3, contained in its FERC Gas Tariff, Original Volume No. 1–A, and consistent with the general terms and conditions contained in such tariff and applicable to this service. Use of the existing Rate Schedule T–3 rate structure involves rolling-in the incremental costs of the new construction with the existing rate base. El Paso states that its Rate Schedule T–3 includes a reservation charge, and also a one-part volumetric rate based on an assumed throughput of 95% of design capacity. El Paso states that its T–3 rate is cost-based and has prescribed maximum and minimum levels. In addition, El Paso states, its Rate Schedule T–3 has an established priority queue based on requests for future service that was compiled on a first come, first served basis.

El Paso states that rolled-in treatment is appropriate in this case because (i) with the additional looping Applicant can reduce the existing isolated instances of underutilized mainline capacity and thus provide additional firm service to Topock without adversely affecting service to existing customers [enhances efficiency]; and (ii) the additional throughput resulting would have a positive cost impact on existing customers. El Paso states that the new capacity would be available to those shippers in the firm queue and to any new shippers securing a position in such queue. El Paso states that it believes it would be able to accommodate the requirements of all potential firm shippers, irrespective of the position held in the queue.

El Paso states that the EOR customers provide a maximum assurance of constant throughput which is particularly valuable to El Paso's existing customers because an associated increase in the total system throughput redounds to the benefit of those customers. The application states that El Paso is cognizant that existing pipeline customers should not bear any of the present or future risk associated with recovery of the OEC facility costs. That risk, however minimal in this case, must rest on the pipeline and/or new shippers. El Paso states that it does not seek to avoid or evade the required assumption of this risk and is fully prepared to accept the responsibility for recovery (or non-recovery) of the capital and operational costs associated with the new facilities for which certificate authority is requested in this application.

With respect to the three (3) design alternatives, El Paso has included in its environmental assessment identification of those exceptions to the prior environmental report contained in the application filed November 8, 1985, as amended, in Docket No. CP86–197–000, *et al.* These exceptions do not, in the opinion of El Paso, constitute a major federal action which will necessitate another environmental impact statement.

El Paso has also requested, pursuant to § 157.103(f), conditional pregranted abandonment authority to abandon the services which are undertaken and/or the facilities which are constructed pursuant to the certificate authority requested herein.

Comment date: September 5, 1989, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capital Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear to be represented at the hearing.

G. Any person of the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 89-19774 Filed 8-22-89; 8:45 am]

BILLING CODE 6717-01-M

Idaho Operations Office

Intent To Negotiate Cooperative Agreement With Modell Development Corporation, Framingham, MA

AGENCY: Department of Energy.

ACTION: Intent to negotiate a cooperative agreement with the Modell Development Corporation, Framingham, MA.

SUMMARY: "Wet Oxidation System for Burning Waste and Low Grade Fuels" The U.S. Department of Energy (DOE), Idaho Operations Office, intends to negotiate, on a noncompetitive basis, a cooperative agreement for approximately $100,000 and six months duration with the Modell Development Corporation (Modec), Framingham, MA. This action is prompted by Public Law 93–577, the Federal Nonnuclear Energy Research and Development Act of 1974. The project will evaluate technology relative to supercritical wet oxidation of water borne waste to destroy the water and to generate energy for industrial use. The Modec work involves preparation of a research unit design, fabrication plan, and test plan with companion cost estimates and schedules. The project could proceed through additional phases involving proof concept, pilot system development, and testing the pilot system at an industrial site. Should the participant proceed through the additional phases the DOE cost of the proposed agreement could increase to approximately $1,500,000. The authority and justification for determination of authority and justification for determination of noncompetitive financial assistance is DOE Financial Assistance Rules 10 CFR Part 600.7(b)(2)(i); (A) The activity to be funded is necessary to the satisfactory completion of an activity presently being funded by DOE, and for which competition for support would have a significant adverse effect on completion of the activity; and (D) The applicant has exclusive domestic capability to perform the activity successfully, based upon unique equipment, proprietary data, technical expertise and proprietary designs.

The work at Modec meets the purpose of Public Law 95–577 and addresses a public need for decreasing the utilization of energy. Public response may be addressed to the contract specialist below.

CONTACT: U.S. Department of Energy, Idaho Operations Office, 785 DOE PLACE, Idaho Falls, Idaho 83402, Marshall C. Garr, Contract Specialist (208) 526–1536.

Dated: August 11, 1989.

J. Roger Gonzales,

Director, Contracts Management Division.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[PP 6G3341/T583; FRL 3634-4]

Chevron Chemical Co.; Renewal of a Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has renewed a temporary tolerance for residues of the herbicide 1-(carboethoxy)ethyl-5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate (lactofen) in or on the raw agricultural commodity cottonseed at 0.01 part per million (ppm) when applied post-directed. Use is limited to one post-directed application at a rate not to exceed 0.2 pound per acre applied after the cotton is at least 8 inches high, but not less than 90 days before harvest. Treated plants are not to be used for feed or forage.

DATE: This temporary tolerance expires April 11, 1991.

FOR FURTHER INFORMATION CONTACT: By mail: Larry Schnaubelt, Acting Product Manager (PM) 23, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Room 237, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703) 557–1830.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of August 19, 1987 (52 FR 31083), stating that a temporary tolerance had been established for residues of the herbicide 1-(carboethoxy)ethyl-5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate (lactofen) in or on the raw agricultural commodity cottonseed at 0.01 part per million (ppm) when applied post-directed. Use is limited to one post-directed application at a rate not to exceed 0.2 pound per acre applied after the cotton is at least 8 inches high, but not less than 90 days before harvest. Treated plants are not to be used for feed or forage. This tolerance is renewed in response to pesticide petition (PP) 6G3341, submitted by Chevron/Valent Chemical Co., 15049 San Pablo Ave., P.O. Box 4010, Richmond, CA 94804–0010.

The company has requested a 1-year renewal of a temporary tolerance for residues of the herbicide to permit the continued marketing of the above raw agricultural commodity when treated in accordance with the provisions of the experimental use permit 239–EUP–115, which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95–396, 92 Stat. 819; 7 U.S.C. 136). The scientific data reported and other relevant material were evaluated, and it was determined that a renewal of the temporary tolerance will protect the public health. Therefore, the temporary tolderance has been renewed on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active herbicide to be used must not exceed the quantity authorized by the experimental use permit.
2. Chevron/Valent Chemical Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires April 1, 1991. Residues not in excess of this amount remaining in or on the above raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance

requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Authority: 21 U.S.C. 346a(j).

Dated: August 7, 1989.

Herbert S. Harrison,

Acting Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 89-19821 Filed 8-22-89; 8:45 am]

BILLING CODE 6560-50-M

[OPP-30277B; FRL 3634-2]

Merck and Co., Inc.; Approval of Pesticide Product Registration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of an application submitted by MSD Division of Merck and Co., Inc., to conditionally register the pesticide product Zephyr 0.15 EC involving a changed use pattern pursuant to the provisions of section 3(c)(7) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: By mail: George LaRocca, Product Managet (PM) 15, Registration Division (H7505C), Office of Pesticide Programs, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 204, CM # 2, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA 22202, (703–557–2400).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of March 25, 1987 (52 FR 9537), which announced that MSD AGVET, Division of Merck and Co., Rahway, NJ 07065, had submitted an application to conditionally register the pesticide product Agrimec™ 0.15 EC an insecticide/miticide, containing the active ingredient avermectin B_1 [A mixture of avermectins containing >80% avermectin B_{1a} (5-0-demethyl avermectin A_{1a}) and <20% avermectin B_{1b} (5-0-demethyl-25-de(1-methylpropyl)-25-(1-methylethyl) avermectin A_{1a})] 2.0 percent; an active ingredient involving a changed use pattern of the product.

The application for "Zephyr 0.15 EC" formerly "Agrimec™ 0.15 EC" was approved on March 23, 1989, for restricted use, to include in its presently registered use, a new use to control mites on cotton. The product was assigned EPA Registration No. 618–97.

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that use of the pesticide during the conditional registration period will not cause unreasonable adverse effects; and that use of the pesticide is in the public interest.

The Agency has considered the available data on the risks associated with the proposed use of avermectin B_1 and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of avermectin B_1 during the period of conditional registration will not cause any unreasonable adverse effect on the environment, and that use of the pesticide is, in the public interest.

This registration has been issued on the condition that the following information is submitted by the listed dates:

Type of submission	Deadline for submission
1. Fish life cycle test (sec. 72–5).	October 1991.
2. Mesocosm aquatic study (sec. 72–7).	October 1991.
3. Simulated mammal field test (sec. 71–5).	October 1991.
4. Soil absorption/desorption (sec. 163–1).	June 1990.
5. The results of analysis of the remaining soil core samples for the field dissipation study previously submitted (sec. 164–1).	July 24, 1989.

Note: See 40 CFR 158.20(c) for explanation and availability of guidelines.

This conditional registration will automatically expire on March 31, 1992.

Consistent with section 3(c)(7)(C), the Agency has determined that this conditional registration is in the public interest. Use of this pesticide is of significance to the user community, and appropriate labeling, use directions, and other measures have been taken to ensure that use of the pesticide will not result in unreasonable adverse effects to man and the environment.

More detailed information on this conditional registration is contained in a Chemical Fact Sheet on avermectin B_1.

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from Registration Division (H7505C), Environmental Protection Agency, Registration Support and Emergency Response Branch, 401 M Street SW., Washington, DC 20460.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Program Management and Support Division (H7502C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 246, CM # 2, Arlington, VA 22202 (703–557–3262). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A–101), 401 M Street SW., Washington, DC 20460. Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136.

Dated: August 2, 1989.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests to the 23 States as listed below. Four crisis exemptions were initiated by various States, and one by the United States Department of Agriculture for the month of April. These exemptions, issued during the month of May, are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. Information on these restrictions is available from the contact persons in EPA listed below.

DATES: See each specific and crisis exemption for its effective date.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption for the name of the contact person. The following information applies to all contact persons: By mail: Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–1806).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Alabama Department of Agriculture and Industries for the use of permethrin on southern peas to control the insect cowpea curculio; May 22, 1989, to October 31, 1989. (Robert Forrest)

2. Arizona Commission of Agriculture and Horticulture for the use of acephate on citrus to control citrus thrips; May 17, 1989, to June 30, 1989. (Gene Asbury)

3. Arkansas State Plant Board for the use of imazethpyr (Pursuit) on southern peas to control puncture vines; May 22, 1989, to July 31, 1989. (Robert Forrest)

4. Arkansas State Plant Board for the use of sethoxydim on snap beans to control Johnsongrass; May 30, 1989, to July 31, 1989. (Susan Stanton)

5. Arkansas State Plant Board for the use of triclopyr on rice to control broadleaf weeds; May 15, 1989, to August 1, 1989. (Gene Asbury)

6. Arkansas State Plant Board for the use of metalaxyl on blueberries to control phytophthora root rot; May 1, 1989, to December 1, 1989. (Susan Stanton)

7. California Department of Agriculture for the use of azinphos-methyl on pomegranates to control filbert moths; May 9, 1989, to June 30, 1989. (Gene Asbury)

8. California Department of Food and Agriculture for the use of triadimefon on fresh market and processing tomatoes to control powdery mildew; May 5, 1989, to March 31, 1990. (Libby Pemberton)

9. California Department of Food and Agriculture for the use of fenamiphos on walnut trees to control nematodes; May 17, 1989, to June 15, 1989. (Libby Pemberton)

10. California Department of Food and Agriculture for the use of fenbutatin-oxide on mixed melons, watermelons and squash to control spider mites; May 22, 1989, to October 15, 1989. (Robert Forrest)

11. Colorado Department of Agriculture for the use of fenvalerate on small grains to control cutworms; May 11, 1989, to July 1, 1989. Colorado has initiated a crisis exemption for this use. (Libby Pemberton)

12. Colorado Department of Agriculture for the use of cypermethrin on dry bulb onions to control onion thrips; May 5, 1989, to August 15, 1989. (Gene Asbury)

13. Georgia Department of Agriculture for the use of permethrin on southern peas to control the insect cowpea curculio; May 22, 1989, to October 31, 1989. Georgia has initiated a crisis exemption for this use. (Robert Forrest)

14. Hawaii Department of Agriculture for the use of amdro on pineapples to control fire ants; May 22, 1989, to May 22, 1990. (Robert Forrest)

15. Idaho Department of Agriculture for the use of pendimethalin on dry bulb onions to control weeds; May 17, 1989, to May 31, 1989. (Jim Tompkins)

16. Idaho Department of Agriculture for the use of avermectin B_1 on pears to control spider mites; May 30, 1989, to September 1, 1989. (Libby Pemberton)

17. Illinois Department of Agriculture for the use of sethoxydim on snap beans to control Johnsongrass; May 22, 1989, to August 15, 1989. (Susan Stanton)

18. Louisiana Department of Agriculture and Forestry for the use of triclopyr on rice to control broadleaf weeds; May 15, 1989, to August 1, 1989. (Gene Asbury)

19. Michigan Department of Agriculture for the use of fenarimol on tart cherries to control cherry leaf spot and powdery mildew; May 30, 1989, to August 15, 1989. (Susan Stanton)

20. Michigan Department of Agriculture for the use of carboxin (Pro-Gro) on onion seeds to control onion smut diseases; May 30, 1989, to May 1, 1990. (Gene Asbury)

21. Michigan Department of Agriculture for the use of cypermethrin on dry bulb onions to control onion thrips; May 5, 1989, to August 30, 1989. (Gene Asbury)

22. Michigan Department of Agriculture for the use of pendimethalin on dry bulb onions to control specified weeds; May 3, 1989, to June 30, 1989. (Jim Tompkins)

23. Minnesota Department of Agriculture for the use of sethoxydim on snap beans to control wild proso millet; May 17, 1989, to August 31, 1989. (Susan Stanton)

24. Minnesota Department of Agriculture for the use of terbufos on rape and mustard seeds to control flea bettles; May 28, 1989, to June 31, 1989. (Gene Asbury)

25. Minnesota Department of Agriculture for the use of corboxin (Pro-Gro) on onion seedlings to control onion smut disease; May 1, 1989, to April 1, 1990. (Gene Asbury)

26. Minnesota Department of Agriculture for the use of pendimethalin on onions to control weeds; May 9, 1989, to June 30, 1989. (Jim Tompkins)

27. Mississippi Department of Agriculture and Commerce for the use of triclopyr on rice to control broadleaf weeds; May 15, 1989, to August 1, 1989. (Gene Asbury)

28. Montana Department of Agriculture for the use of clopyralid on peppermint and spearmint to control horseweed, salsify, Canada thistle and other weeds; May 1, 1989, to June 1, 1989. (Gene Asbury)

29. New York Department of Environmental Conservation for the use of pendimethalin on dry bulb onions to control specified weeds; May 3, 1989, to June 30, 1989. (Jim Tompkins)

30. North Dakota Department of Agriculture for the use of fenoxaprop-ethyl on hard red spring wheat to control foxtail; May 1, 1989, to July 15, 1989. (Libby Pemberton)

31. North Dakota Department of Agriculture for the use of sethoxydim on canola to control volunteer grains and grasses; May 17, 1989, to August 31, 1989. (Susan Stanton)

32. Oregon Department of Agriculture for the use of pendimethalin on onions grown on mineral soils to control weeds; May 9, 1989 to May 31, 1989. (Jim Tompkins)

33. Oregon Department of Agriculture for the use of sethoxydim on green peas to control annual ryegrass and barnyardgrass; May 1, 1989, to May 31, 1989. (Susan Stanton)

34. Oregon Department of Agriculture for the use of tridiphane on sweet corn to control wild proso millet; May 3, 1989, to July 20, 1989. (Robert Forrest)

35. Oregon Department of Agriculture for the use of pendimethalin on dry bulb onions to control specified weeds; May 3, 1989, to June 30, 1989. (Jim Tompkins)

36. Oregon Department of Agriculture for the use of fluazifop-butyl on mint to control quackgrass and green foxtail; May 5, 1989, to June 15, 1989. (Susan Stanton)

37. Oregon Department of Agriculture for the use of sethoxydim on snap beans to control wild proso millet; May 11, 1989, to July 10, 1989. (Susan Stanton)

38. Puerto Rico Department of Agriculture for the use of hydramethylnon (Amdro) on coffer to control fire ants; May 22, 1989, to February 28, 1990. (Robert Forrest)

39. South Dakota Department of Agriculture for the use of fenvalerate on winter wheat to control cutworms; May 11, 1989, to July 1, 1989. (Libby Pemberton)

40. South Dakota Department of Agriculture for the use of Harmony on oats to control broadleaf weeds; May 15, 1989, to June 30, 1989. (Robert Forrest)

41. Tennessee Department of Agriculture for the use of sethoxydim on snap beans to control Johnsongrass; May 22, 1989, to July 31, 1989. (Susan Stanton)

42. Utah Department of Agriculture for the use of cypermethrin on dry bulb onions to control onion thrips; May 5, 1989, to September 30, 1989. (Gene Asbury)

43. Virginia Department of Agriculture and Consumer Services for the use of clomazone on snap beans, cucumbers, and squash to control annual broadleaf weeds; May 22, 1989, to September 30, 1989. (Libby Pemberton)

44. Wisconsin Department of Agriculture, Trade, and Consumer Protection for the use of sethoxydim on snap beans to control wild proso millet, volunteer corn, and quackgrass; May 22, 1989, to August 31, 1989. (Susan Stanton)

45. Wisconsin Department of Agriculture, Trade, and Consumer Protection for the use of pendimethalin on dry bulk onions to control specified weeds; May 3, 1989, to June 30, 1989. (Jim Tompkins)

46. Wisconsin Department of Agriculture, Trade and Consumer Protection for the use of oxyfluorfen on horseradish to control broadleaf weeds; May 5, 1989, to June 30, 1989. A notice of Solicitation of public comment was published in the **Federal Register** of March 1, 1989 (54 FR 8594); no comments were received. Oxyfluorfen was referred to special review in January of 1980, because pesticide products containing oxyfluorfen as an active ingredient were shown to contain perchlorethylene (PCE), a liver carcinogen in B6C3F1 mice. A Special Review process was completed on June 30, 1982, and the decision was made to continue registration of the herbicide subject to certain restrictions (on PCE) pertaining to formulation of the product (47 FR 27118). (Gene Asbury)

Crisis exemptions were initiated by the:

1. Illinois Department of Agriculture on May 1, 1989, for the use of sethoxydim on peas to control volunteer wheat and rye. This program has ended. (Susan Stanton)

2. Minnesota Department of Agriculture on May 30, 1989, for the use of fenoxaprop-ethyl on wheat to control foxtail, wild proso millet, and wild oats. This program has ended. (Libby Pemberton)

3. Texas Department of Agriculture on May 12, 1989, for the use of chlorothalonil on mushrooms to control fungal diseases. Since it was anticipated that this program would be needed for more than 15 days, Texas has requested a specific exemption to continue it. The need for this program is expected to last until May 11, 1990. (Susan Stanton)

4. Texas Department of Agriculture on May 17, 1989, for the use of sodium chlorate on winter wheat to control weeds. This program has ended. (Susan Stanton)

6. United States Department of Agriculture on April 25, 1989, for the use of methyl bromide on chayote to control various plant pests. Since it was anticipated that this program would be needed for more than 15 days, USDA has requested a specific exemption to continue it. The need for this program is expected to last until April 24, 1992. (Libby Pemberton)

Authority: 7 U.S.C. 136.

Dated: August 7, 1989.

Douglas D. Campt,

Director, Office of Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

Comments Invited on Chicago Metropolitan Area Regional Public Safety Plan

August 15, 1989.

The Commission has received the public safety radio communications plan for the Chicago Metropolitan area (Region 54).

In accordance with the Commission's Report and Order in General Docket 87–112 implementing the Public Safety National Plan, parties are hereby given thirty days from the date of **Federal Register** publication of this public notice to file comments and fifteen days to reply to any comments filed. (See Report and Order, General Docket 87–112, 3 FCC Rcd 905 (1987), at paragraph 54.)

In accordance with the Commission's Memorandum Opinion and Order in General Docket 87–112, Region 54 consists of the following counties: Winnebago, McHenry, Cook, Kane, Kendall, Grundy, Boone, Lake, Dupage, De Kalb, Will, and Kankakee, Illinois; Kenosha, Milwaukee, Washington, Dodge, Walworth, Jefferson, Racine, Ozaukee, Waukesha, Dane, and Rock, Wisconsin; Lake, La Porte, Jasper, Starke, St. Joseph, Porter, Newton, Pulaski, Marshall, and Elkhart, Indiana; and Ottawa, Kent, Van Buren, Kalamazoo, Barry, Muskegon, Allegan, Berien, Cass, and St. Joseph, Michigan. General Docket 87–112, 3 FCC Rcd 2113 (1988).)

Comments should be clearly identified as submissions to General Docket 89–363, Chicago Metropolitan Area—Region 54, and commenters should send an original and five copies to the Secretary, Federal Communications Commission, Washington, DC 20554.

Questions regarding this public notice may be directed to Fred Thomas, Office of Engineering and Technology, (202) 653–8112, or Maureen Cesaitis, Private Radio Bureau, (202) 632–6497.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Emergency Food and Shelter Program Allocations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: On June 30, 1989, the President signed Public Law 101–45, the Dire Emergency Supplemental Appropriations and Transfers, Urgent Supplemental and Correcting Enrollment Errors Act of 1989, which made available an additional $12 million for the Emergency Food and Shelter Program. This notice announces allocations made by the Emergency Food and Shelter National Board to jurisdictions from that award. These funds are to be distributed to local private voluntary organizations and units of local government for the purpose of delivering emergency food and shelter to needy individuals in localities determined by the Board as being in high need.

These awards are in addition to the previous allocations listing (**Federal Register**, Vol. 54, No. 125, pp. 27705–27734, June 30, 1989) made under Public Law 100–404 for Phase VII (Fiscal Year 1989) of the Emergency Food and Shelter National Board Program. The program was authorized by Public Law 100–77, the Stewart B. McKinney Homeless Assistance Act.

DATE: The supplemental award to the National Board was made on July 28, 1989.

FOR FURTHER INFORMATION CONTACT: Francis X. McCarthy, Individual Assistance Division, Disaster Assistance Progams, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3652.

BEST COPY AVAILABLE

SUPPLEMENTARY INFORMATION:

Allocation Formula

The following jurisdictions that qualified for awards were chosen based on the original Phase VII criteria:

1. Most current 12-month national unemployment rates.
2. Jurisdictions with a minimum of 1,000 people unemployed.
3. Jurisdictions with 18,000+ unemployed and a 4.9% rate of unemployment.
4. Jurisdictions with 1,000 to 17,999 unemployed and a 7.5% rate of unemployment.
5. Jurisdictions with 1,000 or more unemployed and an 11% rate of poverty.

Note: Due to the urgency of this legislation, and the amount of funds involved for a national program, the National Board did not fund the State Set-Aside Committees with this appropriation. Also, unlike the original awards (under Pub. Law 100–404), no State minimum was established.

Dated: August 14, 1989.

Grant C. Peterson,

Associate Director, State and Local Programs and Support.

BILLING CODE 6718-02-M

[Docket: FEMA-REP-3-PA-2]

Radiological Emergency Response Plan; Pennsylvania

AGENCY: Federal Emergency Management Agency.

ACTION: Notice of receipt of plans.

SUMMARY: For continued operation of nuclear power plants, the Nuclear Regulatory Commission requires approved licensee and State and local governments' radiological emergency response plans. Since FEMA has the responsibility for reviewing the State and local governments' plans, the Commonwealth of Pennsylvania has submitted radiological emergency response plans to the FEMA Regional Office. These plans support nuclear power plants which impact on Pennsylvania and include the plans of Columbia and Luzerne Counties which are near the Pennsylvania Power and Light Company's Susquehanna Steam Electric Station, located in Luzerne County, Pennsylvania.

DATE PLANS RECEIVED: August 15, 1989.

FOR FURTHER INFORMATION CONTACT: Paul P. Giordano, Regional Director, FEMA Region III, Liberty Square Building, 105 S. 7th Street, Philadelphia, Pennsylvania 19106.

NOTICE: In support of the Federal requirement for emergency response plans, FEMA has established a Rule describing its procedures for review and approval of State and local governments' radiological emergency response plans. Pursuant to this FEMA Rule (44 CFR 350.8) "Review and Approval of State Radiological Emergency Plans and Preparedness," the Commonwealth of Pennsylvania Disaster Operations Plan, Annex E was received by the Federal Emergency Management Agency Region III Office.

Included are the plans for Columbia and Luzerne Counties and twenty-seven municipalities, which are fully or partially within the plume exposure pathway emergency planning zone of the nuclear plant. Also included are the emergency plans for nine schools and school districts, seven support counties, and thirteen counties that are partly or wholly within the ingestion pathway emergency planning zone.

Copies of the Plan are available for review at the FEMA Region III Office, or they will be made available upon request in accordance with the fee schedule for FEMA Freedom of Information Act requests, as set out in subpart C of 44 CFR part 5. There are 5760 pages in the document, reproduction fees are $.10 a page payable with the request for copy.

Comments on the Plan may be submitted in writing to Mr. Paul P. Giordano, Regional Director, at the above address within thirty days of this Federal Register Notice.

Paul P. Giordano,

Regional Director.

BILLING CODE 6718-20-M

FEDERAL MARITIME COMMISSION

Georgia Port Authority Terminal Agreement Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200254-001

Title: Georgia Ports Authority Terminal Agreement

Parties: Georgia Ports Authority Columbus Line

Synopsis: The Agreement revises paragraph 2 of the basic agreement (Agreement No. 224-200254) to provide that if the renewal option is exercised, the basic agreement will be amended and filed with the Federal Maritime Commission.

By Order of the Federal Maritime Commission.

Dated: August 18, 1989.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[Program Announcement Number 946]

Development of Environmental Short Courses for Health Professionals

Introduction

The Agency for Toxic Substances and Disease Registry (ATSDR) announces the availability of funds for a Cooperative Agreement with the National Association of County Health Officials (NACHO) in Fiscal Year 1989 for educating health professionals concerning the surveillance, diagnosis and treatment of persons exposed to hazardous substances.

Authority

This program is authorized under section 104(i)(14) and section 104(i)(15) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as amended (42 U.S.C. 9604(i)(14), (15)).

Eligible Applicant

This is not a formal request for applications. Assistance will be provided only to the National Association of County Health Officials (NACHO). NACHO is the only umbrella health organization that represents all local (city, county, town and township) political jurisdictions. Approximately 400 jurisdictions are represented. In addition, the organization serves 3,000 local health departments. A majority of these health departments are directed by a physician, the chief public health official of the locality. By working through its own membership, the NACHO Executive Committee, and United States Conference of Local Health Officers, Black Health Officials, and Town and Township members, NACHO has developed a unique knowledge and understanding of the needs and operations of all local health agencies. The members of NACHO have already gained an enormous wealth of experience in surveillance and educational activities dealing with hazardous substances. As an organization, NACHO has direct and familiar access to its own health membership of chief local public health officials and their affiliated networks. Therefore, NACHO has the capacity to meet the objectives of this agreement in a timely and efficient manner. No other applications are solicited or will be accepted.

Availability of Funds

A minimum of $200,000 will be available in Fiscal Year 1989. It is expected that the award will begin on or about September 30, 1989, for a 12-month budget period within an 18-month project period. Continuation awards within the project period are made on the basis of satisfactory progress and availability of funds.

Purpose

The purpose of this award is to develop and implement through instructional mechanisms a series of short courses to improve the knowledge and practice of county/city health professionals concerning the surveillance, screening and methods of diagnosis and treatment of injury or disease related to exposure to hazardous substances.

Program Requirements

The specific Cooperative Activities, Application Content and Evaluation Criteria are set forth in the Request for Application (RFA) Program Announcement.

EO 12372 Review

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

CFDA Number

The catalog of Federal Domestic Assistance Number is 13.161, Health

Programs for Toxic Substances and Disease Registry.

Application Submission and Deadline

NACHO must submit an original and two copies of application form PHS 5161–1 (Rev. 3/98) to Henry S. Cassell, III, Grants Management Officer, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NW., Room 300, Atlanta, Georgia 30305, on or before August 25, 1989. By formal agreement, the CDC Grants Office will act on behalf of and for ATSDR on this matter.

Where to Obtain Additional Information

If you are interested in obtaining additional information regarding this project, please refer to Announcement Number 946 and contact the following: Business: Harvey Rowe, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., Room 300, Mailstop E14, Atlanta, Georgia 30305, or by calling (404) 842–6797 or FTS 236–6797. Technical assistance may be obtained from Max Lum, Ed.D., Agency for Toxic Substances and Disease Registry, Office of External Affairs, (404) 488–4630 or FTS 236–4630.

Dated: August 17, 1989.

Walter R. Dowdle,

Acting Administrator, Agency for Toxic Substances and Disease Registry.

[FR Doc. 89–19817 Filed 8–22–89; 8:45 am]

BILLING CODE 4160-70-M

[Announcement No. 001]

Centers for Disease Control

Availability of Funds for Fiscal Year 1990 for Epidemiologic Research Studies of Acquired Immunodeficiency Symdrome (AIDS) and Human Immunodeficiency Virus (HIV) Infection

Introduction

The Centers for Disease Control (CDC) announces a program for competitive cooepative agreement and/or research project grant applications to conduct epidemiologic research studies of AIDS and HIV infection. These include studies of: the natural history of HIV infection in homosexual mnles and their male sex partners and natural history studies of HIV-infected transfusion recipients. The study of these research areas as they pertain to minority populations is encouraged because minorities constitute over 43% of all reported cases of AIDS.

Authority

These cooperative agreements and/or grants are authorized under sections 301(a), 311, and 317(k)(3) of the Public Health Service Act, as amended. Regulations are set forth in 42 CFR 52, entitled "Grants for Research Projects."

Eligible Applicants

Eligible applicants include nonprofit and for-profit organizations. Thus, universities, colleges, research institutions, hospitals, and other public and private organizations, State and local health departments and small, minority and/or women-owned businesses are eligible for these grants and/or cooperative agreements.

Availability of Funds

Approximately $1,700,000 will be available in fiscal year 1990 to fund approximately 6 awards. It is expected that the average award will be approximately $275,000, ranging from $90,000 to $500,000. It is expected that about 3 new and 3 competing renewal awards will be made and that awards will begin on or about November 1, 1989 and May 1, 1990. Awards are usually made for a 12-month budget period within a project period of up to 5 years. Funding estimates may vary and are subject to change. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds.

Purpose

The purpose of these awards is to help support researchers in the study of important HIV-related epidemiologic issues concerning risks of transmission, the natural history and trends of the disease in certain populations, and the development and evaluation of behavioral recommendations for reducing AIDS and HIV infection. Of special interest are programs that examine these research issues as they impact on minority populations.

Two research issues of programmatic interest to the health care community and to CDC for FY 1990 are listed below, and they are considered to be of significant importance in gaining a greater understanding of the epidemiology of AIDS and HIV infection. However, applications submitted by organizations that examine other important HIV-related epidemiologic research issues will also be accepted and considered for funding.

1. Prospective Epidemiologic Study of the Natural History of Transfusion-Associated HIV Infection.

Studies should be designed to identify a cohort of HIV-infected transfusion recipients and to perform periodic clinical evaluations of the participants. Preference will be given to studies of transfused children and to proposals in which a cohort of HIV-infected blood transfusion recipients has already been established and is currently being followed. Proposals should demonstrate capacity to evaluate all participants for HIV-related neurologic disease, and to assess the growth and development of pediatric participants. Laboratory studies should include blood cell counts and lymphocyte studies but other immunologic and virologic studies related to HIV infection will also be considered. Competing renewal awards for this study will be made on or about October 30, 1989.

2. Natural History Study of HIV Infection in Homosexual Partner-Pairs

Studies should be designed to enroll HIV seropositive and HIV seronegative homosexual men and their steady sex partners (partners-pairs) for prospective evaluation of the effects of behavioral and biologic factors on the transmission of HIV infection. Biologic studies should include immunologic and virologic analysis of blood and semen. Appropriate counseling and risk reduction education must be provided to subjects at risk for infection. Competing renewal awards for this study will be made on or about April 30, 1990.

Program Requirements

1. Research Project Grants

A research project grant is one in which substantial programmatic involvement by CDC is not anticipated by the recipient during the project period. Applicants for grants must demonstrate an ability to conduct the proposed research with minimal assistance, other than financial support, from CDC. This would include possessing sufficient resources for clinical, laboratory, and data management services and a level of scientific expertise to achieve the objectives described in their research proposal without substantial technical assistance from CDC.

2. Cooperative Agreements

A cooperative agreement implies that CDC will assist the collaborator in conducting the epidemiologic research of AIDS and HIV infection that is described in the Purpose section of this notice. The application should be presented in a manner that demonstrates the applicant's ability to address the research problem in a collaborative manner with CDC. In addition to the financial support provided, CDC will collaborate by: (1) Providing technical assistance in the design and conduct of the research; (2) providing technical guidance in the development of study protocols, consent forms, and questionnaires, including training and pretesting as necessary; (3) assisting in designing a data management system; (4) performing selected laboratory tests; (5) coordinating research activities among the different sites, including laboratories and consultants; and (6) participating in the analysis of research information and the presentation of research findings.

3. Determination of Which Instrument To Use

Applicants must specify the type of award for which they are applying, either grant or cooperative agreement. The funding agency will review the applications in accordance with the evaluation criteria. The CDC will determine before making each award whether the use of a grant or cooperative agreement is appropriate based upon the need for substantial Federal involvement in the project.

Evaluation Criteria

Applications will be reviewed and evaluated based on the evidence submitted which specifically describes the applicants' abilities to meet the following criteria:

1. The plans to develop and implement the study describing how study participants will be identified, enrolled, tested, and followed. (25 points)

2. The ability to enroll and follow an adequate number of eligible study participants to assure proper conduct of the study. The known or projected prevalence of HIV infection in the population to be studied will be an important area of consideration. (25 points)

3. The applicant's current activities in AIDS and HIV research and how they will be applied to achieving the objectives of the study. Letters of support from cooperating organizations should be included that demonstrate the nature and extent of such cooperation. (25 points)

4. The applicant's understanding of the research study objectives and its ability, willingness and/or need to cooperate in a study with CDC. (15 points)

5. The plan to protect the rights and confidentiality of all participants and ensure adequate participation. (15 points)

6. The size, qualifications, and time allocation of the proposed staff and the availability of facilities to be used during the research study. (15 points)

7. How the project will be administered to assure the proper management of the daily activities of the program. (10 points)

8. The proposed schedule for accomplishing the activities of the research, including time frames. (10 points)

9. The quality of an evaluation plan which specifies the methods and instruments to be used to evaluate the progress made in attaining research objectives. (10 points)

(A maximum of 150 points can be awarded.)

The budget will be reviewed to determine the extent to which it is reasonable, clearly justified, and consistent with the intended use of funds. Budget information should be specific to the purpose of each budget item, and all budget categories should be itemized.

Funding Priorities

Preference will be given to competing continuation applications over applications for projects not already receiving support under the program.

Other Requirements

1. Paperwork Reduction Act

The projects that will be funded through the cooperative agreement mechanism of this program that involve the collection of information from 10 or more individuals will be subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

2. Human Subjects

This program involves research on human subjects, therefore, all applicants must comply with Public Law 93–348 regarding the protection of human subjects. Assurances must be provided that demonstrate that the project or activity will be subject to initial and continuing review by an appropriate institutional review committee. The applicant will be responsible for providing evidence of this assurance in accordance with the appropriate guidelines and forms provided in the application kit.

3. HIV Program Review Panel

Recipients must comply with the requirement to establish an HIV Program Review Panel as defined in the document entitled, "CONTENT OF AIDS-RELATED WRITTEN MATERIALS, PICTORIALS, AUDIOVISUALS, QUESTIONNAIRES, SURVEY INSTRUMENTS, AND EDUCATIONAL SESSIONS (OCTOBER 1988)." (54 FR 10049, March 9, 1989)

E.O. 12372 Review

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance Number is 13.118, Acquired Immunodeficiency Syndrome (AIDS) Activity.

Application Submission and Deadline

A signed original and two copies of the application form PHS 5161–1 must be submitted to Candice Nowicki, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, N.E., Room 300, Atlanta, Georgia 30305, on or before September 22, 1989, for competing continuations of epidemiologic studies of the natural history of transfusion-associated HIV infection (F1), and February 1, 1990, for competing continuations of the natural history study of HIV infection in homosexual partner pairs (F2). Other applications submitted in response to this announcement may be submitted on or before either deadline date.

1. Deadline: Applications shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date, or

b. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

2. Late Applications: Applications which do not meet the criteria in 1. a. or b. above are considered late applications. Late applications will not be considered in the current competition and will be returned to the applicant.

Where To Obtain Additional Information

A complete program description, information on application procedures and an application package may be obtained from Carole J. Tully or Marsha D. Driggans, Grants Management Specialists, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Room 300, Atlanta, Georgia 30305, (404) 842–6575 or FTS 236–6575.

Please refer to Announcement Number 001 when requesting information and submitting any application on the Request for Application.

Technical assistance may be obtained from John Narkunas, AIDS Program, Center for Infectious Diseases, Centers for Disease Control, Atlanta, Georgia 30333, (404) 639–2030 or FTS 236–2030.

Dated: August 17, 1989.

Robert L. Foster,

Acting Director, Office of Program Support, Centers for Disease Control.

BILLING CODE 4160–18–M

[Program Announcement No. 922]

Development and Maintenance of a Human Immunodeficiency Virus (HIV)-Related Policy, Regulation and Legislation Tracking System for Rapid Communication To State and Local Health Agencies

Introduction

The Centers for Disease Control (CDC), announces the availability of FY 1989 funds for a cooperative agreement with the Association of State and Territorial Health Officials (ASTHO) to identify and track those new HIV-related developments and issues that affect State and Territorial health departments.

Authority

This program is authorized under the Public Health Service Act: Section 317(k)(3).

Eligible Applicants

Assistance will be provided only to the Association of State and Territorial Health Officials (ASTHO) for this project. ASTHO is the officially established organization representing the State Health Officers in all 50 States, the District of Columbia, and all U.S. Territories. As such it represents the officials from throughout the U.S. who have legal responsibility for protecting the health of U.S. citizens, including health threats such as human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) which results from HIV infection.

Because health threats such as HIV are not limited by geographic boundaries, ASTHO was formed to promote coordination of health efforts between the States and Territories and as an instrument to monitor and assess health issues which pose threats to the public health.

It is critical that the health officials of this country monitor not only the medical issues that HIV/AIDS presents to them, but also the economic, policy and legislative issues which it poses to them in protecting the public health of the nation. As such, ASTHO needs to establish and maintain a system to monitor State HIV/AIDS policy issues as they are evolving and to develop and maintain a communications network which will facilitate rapid information sharing with other State health officials who have addressed similar policy issues. In addition, ASTHO needs to establish and maintain a system which will assist State and local health officials in implementing and coordinating applicable national HIV/AIDS programs, policies and legislation.

It is critical that ASTHO conduct these services since they are the representatives of the persons who will have to implement and coordinate relevant programs, policies and legislation. They are also the only organization which can reasonably evaluate the potential impact of Federal HIV/AIDS policies and legislation since they are the officials who must assess the policy and legislation in terms of existing State laws and regulations.

ASTHO already has established mechanisms for communicating certain types of information to the States and to the political subdivisions of the States which carry out the nation's public health programs. No other applications will be solicited or accepted.

Availability of Funds

Approximately $60,000 is available in Fiscal Year 1989 to support this project. It is expected that the award will begin on or about September 29, 1989, and will be made for a 12-month budget period within a project period of up to 3 years. Funding estimates may vary and are subject to change. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds.

Purpose

The proposed cooperative agreement is intended to address the need to identify and track new HIV-related developments and issues and facilitate the rapid exchange of critical information at the State and local levels in order to implement effective HIV prevention programs.

Program Requirements

A. ASTHO's activities will include the following:

1. Identify State HIV/AIDS-related policy issues as they are evolving.

2. Develop a communications network to assist health officials in the HIV/AIDS-related policy decision making process.

3. Provide assistance and coordination in the implementaiton of national HIV/AIDS-related policies and legislation by State and local health officials.

4. Serve as liaison to State-affiliated organizations as well as organizations representing local health officials for timely distribution and dissemination of national HIV/AIDS policies information.

B. CDC's activities will include the following:

1. Provide technical advice in the development of systems to identify State HIV/AIDS policy issues.

2. Provide technical advice in the development of systems to facilitate critical HIV/AIDS policy information sharing among State and local health officials in the decision making process.

3. Provide information, legislative and policy determinations for rapid dissemination and/or coordination and implementation.

Evaluation Criteria

The application will be reviewed and evaluated on the following:

1. Extent to which the applicant understands the requirements, problems, objectives, complexities, and interactions required of this cooperative agreement;

2. Degree to which proposed objectives are clearly stated, realistic, measurable, time-phased, and related to the purpose of this project;

3. Degree to which the applicant provides evidence of an ability to carry out the proposed project and the extent to which the applicant institution documents demonstrates capability to achieve objectives similar to those of this project;

4. Extent to which professional personnel involved in this project are qualified, including evidence of past achievements appropriate to this project; and

5. Adequacy of plans for administering the project.

Executive Order 12372 Review

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance Number for this cooperative agreement is 13.118.

Application Submission and Deadline

The Association of State and Territorial Health Officials must submit an original and two copies of the application form PHS 5161–1 must be submitted to Candice Nowicki, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Room 300, Atlanta, Georgia 30305 on or before September 29, 1989.

Where to Obtain Additional Information

If you are interested in obtaining additional information regarding this project, please refer to Announcement Number 922 and contact the following:

Business:

Nealean Austin, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Room 300, Atlanta, Georgia 30305, Telephone: (404) 842–6575 or FTS 236–6575.

Technical:

Gil Hawkins, (A–43), Office of Deputy Director (HIV), Centers for Disease Control, Atlanta, Georgia 30333, Telephone: (404) 639–0911 or FTS 236–0911.

Dated: August 17, 1989.

Robert L. Foster,

Acting Director, Office of Program Support, Centers for Disease Control.

BILLING CODE 4160–18–M

Food and Drug Administration

[Docket No. 89N–0317]

Information on Developing and Testing a New Acellular Pertussis Vaccine; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of information and materials developed by FDA scientists that the agency believes may be useful in developing and testing a new acellular pertussis vaccine.

ADDRESSES: Submit written requests for single copies of information on developing and testing a new acellular pertussis vaccine to the Center for Biologics Evaluation and Research (HFB–680), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892. Requests should be identified with the docket number found in brackets in the heading of this document. Send two self-addressed adhesive labels to assist that office in processing your requests. The information is available for public examination in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Charles R. Manclark, Center for Biologics Evaluation and Research (HFB–680), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, 301–496–5564.

SUPPLEMENTARY INFORMATION: As part of continuing efforts to improve the safety and effectiveness of pertussis vaccine, FDA scientists have compiled information and scientific data that may be of significant value in the development of a new acellular pertussis vaccine. A new method has been developed for purifying an outer membrane protein that appears to serve as a protective antigen in animal models and is a candidate for inclusion in an acellular vaccine. FDA scientists have also developed monoclonal antibodies against this protein moiety that can be used in monitoring the purification of the antigen. FDA scientists have applied for patents on this purification method and these monoclonal antibodies. FDA intends to release information regarding the new purification process and to distribute the monoclonal antibodies to interested parties for use in monitoring the purification of large volumes of the antigen.

Dated: August 16, 1989.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

[Docket No. 89M–0321]

Bio-Rad Laboratories; Premarket Approval of Bio-Rad Cyclosporine by HPLC Test

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: Food and Drug Administration (FDA) is announcing its approval of the application by Bio-Rad Laboratories, Hercules, CA, for premarket approval, under the Medical Device Amendments of 1976, of the Bio-Rad Cyclosporine by HPLC Test. After reviewing the recommendation of the Clinical Chemistry and Clinical Toxicology Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of July 24, 1989, of the approval of the application.

DATES: Petitions for administrative review by September 22, 1989.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for adminsitrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kaiser Aziz, Center for Devices and Radiological Health (HFZ–440), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301–427–1096.

SUPPLEMENTARY INFORMATION: On January 6, 1989, Bio-Rad Laboratories, Hercules, CA 94547, submitted to CDRH an application for premarket approval of the Bio-Rad Cyclosporine by HPLC Test. The Bio-Rad Cyclosporine by HPLC Test is a cyclosporine assay by high performance liquid chromatography (HPLC) and is indicated for the quantitative measurement of cyclosporin A in whole blood as an aid in the management of renal transplant patients.

On May 15, 1989, the Clinical Chemistry and Clinical Toxicology Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On July 24, 1989, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Kaiser Aziz (HFZ–440), address above.

Opportunity for Administration Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative

BEST COPY AVAILABLE

practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through adminstrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before September 22, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554–555, 571 (21 U.S.C. 360e(d), 360j(h)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: August 16, 1989.

Walter E. Gundaker,

Acting Deputy Director, Center for Devices and Radiological Health.

[FR Doc. 89–19803 Filed 8–22–89; 8:45 am]

BILLING CODE 4160-01-M

Health Care Financing Administration

Privacy Act of 1974; Report of New System

AGENCY: Health Care Financing Administration (HCFA), Department of Health and Human Services (HHS).

ACTION: Notice of New System of Records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, we are proposing to establish a new system of records, "Home Health Quality Indicator System (HHQUIS)," HHS/HCFA/ORD No. 09–70–0046. We have provided background information about the proposed system in the "Supplementary Information" section below. Although the Privacy Act requires only that the "routine uses" portion of the system be published for comment, HCFA invites comments on all portions of this notice.

DATES: HCFA filed a new system report with the Chairman of the Committee on Government Operations of the House of Representatives, the Chairman of the Committee on Governmental Affairs of the Senate, and the Administrator, Office of information and Regulatory Affairs, Office of Management and Budget (OMB), on August 17, 1989. The new system of records, including routine uses, will become effective October 16, 1989 unless HCFA receives comments which would necessitate alterations to the system.

ADDRESS: The public should address comments to Richard A. DeMeo, HCFA Privacy Act Officer, Office of Budget and Administration, Health Care Financing Administration, Room G–M–1, East Low Rise, 6325 Security Boulevard, Baltimore, Maryland 21207. Comments received will be available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Tony Hausner, Division of Long-Term Care, Office of Research and Demonstrations, Health Care Financing Administration, Room 2F5, Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: 301–966–6662.

SUPPLEMENTARY INFORMATION: HCFA proposes to initiate a new system of records and to-collect data under the authority of section 207 of the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360) which mandates that the Secretary of Health and Human Services shall study long-term care services for Medicare beneficiaries, including home care.

The Privacy Act permits us to disclose information without consent of the individual for "routine uses"—that is, disclosure for purposes that are compatible with the purpose for which we collect the information. The proposed routine uses in the new system meet the compatibility criteria, since the information is collected for measuring the quality of Medicare home health services. We anticipate that disclosure under the routine uses will not result in any unwarranted adverse effects on personal privacy.

Dated: August 15, 1989

Louis B. Hays,

Acting Administrator, Health Care Financing Administration.

09–70–0046

SYSTEM NAME:

Home Health Quality Indicator System (HHQUIS).

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Health Care Financing Administration, 6325 Security Boulevard, Baltimore, Maryland 21207 (Contact system manager for location of Magnetic Computerized records). Contractor (see Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Medicare Beneficiaries.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains information concerning the patient's name, Health Insurance Claim number, medical diagnoses, surgical procedures, conditions, problems, functional status, living arrangement, utilization of services, outcomes of care.

AUTHORITY OF MAINTENANCE OF THE SYSTEM:

Section 207 of Pub. L. 100–360.

Purpose of the System:

To assess the quality of Medicare home health care. To determine the appropriate balance between outcome, process, and structural measures for quality assurance purposes. To develop outcome-based measures of home health care quality that are reliable and valid. To evaluate the differential impacts of various types of outcome measures on the data collection and administrative costs for HCFA and home health agencies. To determine how differences in patient outcomes are related to differences in patient characteristics, and how case mix differences can be recognized in outcome-based quality indicators.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

Disclosures may be made to:

1. A contractor for the purpose of collating, analyzing, aggregating or otherwise refining or processing records in this system or for developing, modifying and/or manipulating ADP software. Data would also be disclosed to contractors incidental to consultation, programming, operation, user assistance, or maintenance for an ADP or telecommunications system containing or supporting records in the system.

2. A congressional office from the record of an individual in response to an inquiry from the congresional office at the request of that individual.

3. The Department of Justice, to a court or other tribunal, or to another party before such a tribunal, when

a. HHS, or any component thereof; or

b. Any HHS employee in his or her official capacity; or

c. Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

d. The United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components;

is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or the party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

4. An individual or organization for a research, evaluation, or epidemiological project related to the prevention of disease or disability, or the restoration or maintenance of health if HCFA:

a. Determines that the use or disclosure does not violate legal limitations under which the record was provided, collected, or obtained.

b. Determines that the purpose for which the disclosure is to be made:

(1) Cannot be reasonably accomplished unless the record is provided in individually identifiable form;

(2) Is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that an additional exposure of the record might bring; and

(3) There is reasonable probability that the objective for the use would be accomplished.

c. Requires the information recipient to:

(1) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(2) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the project unless the recipient presents an adequate justification of a research or health nature for retaining such information, and

(3) Make no further use or disclosure of the record except:

(a) In emergency circumstances affecting the health or safety of any individual;

(b) For use in another research project, under these same conditions, and with written authorization of HCFA;

(c) For disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit; or

(d) When required by law.

d. Secure a written statement attesting to the recipient's understanding of and willingness to abide by these provisions.

Policies and Practices for Storing, Retrieving, Accessing, Retaining and Disposing of Records in the System:

Storage:

Paper and magnetic media.

Retrievability:

Records are retrieved by the Health Insurance Claim Number.

Safeguards:

a. Authorized Users: Only agency employees and contractor personnel whose duties require the use of information in the system. In addition, such agency employees and contractor personnel are advised that the information is confidential and of the criminal sanctions for unauthorized disclosure information.

b. Physical safeguards: Records are stored in locked files or secured areas. Computer terminals are in secured areas

c. Procedural safeguards: Employees who maintain records in the system are instructed to grant regular access only to authorized users. Data stored in computers are accessed through the use of passwords known only to authorized personnel.

Contractors who maintain records in this system are instructed to make no further disclosure of the records except as authorized by the system manager and permitted by the Privacy Act. Contracts related to this system contain Privacy Act language.

d. Implementation Guidelines: Safeguards implemented in accordance with all guidelines required by the Department of Health and Human Services. Safeguards for automated records have been established in accordance with the Department of HHS' automated Data Processing Manual, part 6, "ADP System Security."

Retention and Disposal:

Records are retained for 5 years after the last action on the record.

System Manager(s) and Address:

Director, ORD, Health Care Financing Administration, 2230 Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Notification Procedures:

Inquiries and requests for system records should be addressed to the system manager at the address above. The requestor must specify the Health Insurance Claim Number.

Record Access Procedures:

Same as notification procedure. Requestors should also reasonably specify the record contents being sought. (These procedures are in accordance with Department Regulations (45 CFR 5b.5(a)(2).)

Contesting Record Procedures:

Contact the system manager named above, and reasonably identify the record and specify the information to be contested. State the reason for contesting it (e.g., why it is inaccurate, irrelevant, incomplete or not current). (These procedures are in accordance with Department Regulations (45 CFR 5b.7).)

Records Source Categories:

HCFA obtains the identifying information in this system from the home health patient records of which some will be verified by beneficiaries. In addition to these patient records other information will be obtained from interview with the patients and caregivers.

Systems Exempted From Certain Provisions of the Act:

None.

BILLING CODE 4120-03-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-88-2037]

Submission of Proposed Information Collections to the Office of Management and Budget

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested pesons are invited to submit comment regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Officer of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755-6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collections of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: August 17, 1989.

David S. Cristy,

Deputy Director, Information Policy and Management Division.

Proposal: Public Housing—Life-Cycle Cost Analysis of Utility Combinations

Office: Public and Indian Housing

Description of the Need for the Information and Its Proposed Use: The Department will use the information collected to assure the selection of the most cost effective utilities, fuels, related mechanical equipment and methods of purchase for public housing projects.

Form Number: HUD-51994

Respondents: State or Local Governments and Non-profit Institutions

Frequency of Submission: On Occasion

Reporting Burden:

	Number of respondents	x	Frequency of response	x	Hours per response	=	Burden hours
HUD-51994	250		1		6		1,500
Recordkeeping	250		1		.25		62

Total Estimated Burden Hours: 1,562

Status: Extension

Contact: William Thorson, HUD (202) 755-6460 John Allison, OMB, (202) 395-6880

Date: August 17, 1989.

Proposal: Survey of Mortgage Lending Activity

Office: Housing

Description of the Need for the Information and Its Proposed Use: HUD-136 will be used to obtain information on the developments in the mortgage market. It will be used to monitor such developments and to provide statistical data to Federal, State, and non-governmental entities.

Form Number: HUD-136

Respondents: State or Local Governments, Businesses or Other For-Profit, and Federal Agencies or Employees

Frequency of Submission: Monthly

Reporting Burden:

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Allocation of Bureau of Indian Affairs Operations and Maintenance (O&M) Program Using a Formula Methodology

AGENCY: Office of Construction Management, Interior.

ACTION: Notice.

The Department of the Interior, Bureau of Indian Affairs, and Office of Construction Management, have established an allocation formula for Facilities Operations and Maintenance funding which allows for an equitable distribution process at educational and non-educational locations beginning with the 1990 fiscal year.

Following four regional tribal consultations, held in Arlington, VA; Minneapolis, MN; Clackamas, OR and Albuquerque, NM in August 1988, to present the proposed allocation formula (refer to **Federal Register**, Vol. 53, No. 149, Wednesday, August 3, 1988), the following issues were voiced by Tribal membership:

1. The formula should reflect needs rather than be limited by historical cost data;
2. Room use, rather than building use, should be considered in calculating utilization of space;
3. The definition of utilization should be redefined;
4. Building inventories should be reviewed for accuracy; and
5. Distance to service centers should be calculated and more credit given to remote locations.

In order to address the concerns received by the Tribes, the formula was revised to include room use, clarify the definition of utilization and determine the distance to the service centers. The revised formula appears as follows:

(1) Utilities + (2) Custodial + (3) Preventive Maintenance + (4) Unscheduled Maintenance + (5) Educational Efficiency (Utilization) + (6) Isolation + (7) Program support = (8) O&M budget at the local level.

The individual components are:

1. Utilities—The three year average of utility costs (obligations) at a location.
2. Custodial—Includes the material, supplies and labor for providing janitorial services to the location level summarized by the room and building use data.
3. Preventive Maintenance—Includes the materials, supplies, and labor required to perform scheduled work on the facility; its mechanical systems and utility systems which supply the facility; scheduled painting, and routine inspections of the facility.
4. Unscheduled Maintenance—Includes the materials, supplies, and labor required to perform the necessary minor repairs on facilities or utility systems generated either by a user request or breakdown of equipment.

The unscheduled maintenance was divided into two categories: (a) service calls, and (b) repairs.

5. Educational Efficiency—The effective use of space to achieve maximum efficiency of facilities funded through the Bureau's operation and maintenance program.
6. Isolation—The additional funds required to provide preventive maintenance services to a location because of its distance to the nearest equipment repair and supply center.
7. Program Support—The funds required to provide (a) particular services to users that cannot be identified to a building, and (b) the necessary personnel, materials and supplies to administer the Facilities Management Program. This includes the budgeting for monitoring, and evaluation of work accomplishments.

More specifically, at the Area level, program support includes: (a) fire protection; (b) major equipment purchase; (c) training; (d) personnel; (e) leave (sick & annual), and (f) travel, material, and supplies.

And, at the location/Agency level, program support includes: (a) personnel services; (b) leave (sick & annual); (c) contract monitoring; (d) communications; (e) site/central utilities; (f) protection/security services; (g) pest control, and (h) expendable equipment.

SUPPLEMENTARY INFORMATION: The Assistant Secretary, Bureau of Indian Affairs, was mandated by the Congress of the United States pursuant to Pub. L. 95-561, as amended under title 11 of the Education Amendments of 1978 (25 U.S.C. 2008 sec. 1128) to establish a formula for determining the minimum annual amount of funds necessary to sustain each Bureau or contract school. The Director, Office of Construction Management was also mandated in reports accompanying Appropriations Bills for FY 1986, FY 1987 and FY 1988 to develop an equitable Operations and Maintenance funding formula, which considers utilization for Bureau funded school facilities.

The funding formula, as mandated, will provide:

1. A means of identifying and justifying O&M needs for both educational and non-educational facilities;
2. A means for allocating resources in an equitable manner for educational facilities;
3. Greater efficiency by providing resources in relationship to the number of pupils, thereby reducing under-utilization of educational facilities;
4. A method for predicting future needs, fiscal year expenses, and funding resources for facilities programs; and
5. Assistance to Tribes wishing to contract by giving a clearer picture of the custodial and preventive maintenance work required to maintain facilities, mechanical systems and utilities in good operational condition and estimates for staff and funding required to do so.

The formula will serve as a basis for allocating funds on an Area and Agency-wide basis for Bureau funded facilities beginning on the first day of Fiscal Year 1990 (October 1, 1989).

FOR FURTHER INFORMATION CONTACT: Arthur M. Love, Jr., Director; Office of Construction Management, Department of the Interior, 18th & C Streets, NW, Mail Stop 2415, Washington, DC 20240, (202) 343-2403.

Charles E. Kay,

Assistant Secretary, Policy, Budget & Administration.

BILLING CODE 4310-RK-M

Fish and Wildlife Service

Availability of a Draft Recovery Plan for Canby's Dropwort for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service annouces the availability for public review of a draft recovery plan for Canby's dropwort. This plant occurs on public and private lands in the coastal plain of North Carolina, South Carolina, Georgia, and Maryland. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before

October 23, 1989 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Asheville Field Office, U.S. Fish and Wildlife Service, 100 Otis Street, Room 224, Asheville, North Carolina 28801. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Nora Murdock at the above address (704/259-0321; FTS 672-0321).

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, criteria for recognizing the recovery levels for downlisting or delisting them, and initial estimates of time and costs to implement the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires the development of recovery plans for listed species unless such a plan would not promote the conseravation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The primary species considered in this draft recovery plan is Canby's dropwort (*Oxypolis canbyi*). The area of emphasis for recovery actions is the coastal plain of North Carolina, South Carolina, Gerogia, and Maryland. Habitat protection and management are major objectives of this recovery plan.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f)

Dated: August 14, 1989.

Brian P. Cole,

Field Supervisor.

BILLING CODE 4310-55-M

Bureau of Land Management

[AZ040-09-4351-02]

Call for Nominations for the San Pedro Riparian National Conservation Area Advisory Committee

AGENCY: Bureau of Land Management, Interior.

ACTION: Call for Nominations—San Pedro Riparian National Conservation Area Advisory Committee.

SUMMARY: The purpose of this notice is to solicit public nominations to fill two positions whose terms expire this year on the Bureau of Land Management's San Pedro Riparian National Conservation Area Advisory Committee, which was established earlier this year, pursuant to section 104 of the Arizona-Idaho Conservation Act of 1988, Public Law 100-696.

The Committee is comprised of seven members. Under the Committee's staggered-term arrangement, the terms of two members of the Committee will expire on December 31, 1989. The current members may be reappointed, or new members may be appointed. However, the eligibility of current Committee members for reappointment may be affected by governing provisions in the Committee's Charter. The new terms will be for 3 years, ending December 31, 1992.

Appointments made by the Secretary of the Interior pursuant to this call will ensure continued representation of specific categories of interest on the Committee. Nominees must be persons with recognized backgrounds in the following disciplines: Environmental Education and Riparian Ecology.

The purpose of the Committee is to provide informed advice to the Bureau's Safford District Manager on the preparation and implementation of the comprehensive plan for the long-range management and protection of the San Pedro National Conservation Area, as required by section 103 of the Arizona-Idaho Conservation Act of 1988, Public Law 100-696.

Members will service without salary, but will be reimbursed for travel and per diem expenses at current rates for Government employees.

The Committee normally will meet at least twice annually. Additional meetings may be called by the District Manager or his designee in connection with special needs for advice.

Persons wishing to nominate individuals or to be nominated to serve on the Committee should contact the Safford District Manager at the address below and provide the names, addresses, professions, and other biographical data of qualified nominees.

DATE: All nominations should be received by September 25, 1989.

ADDRESS: Safford District, Bureau of Land Management, 425 E. 4th Street, Safford, Arizona 85546.

FOR FURTHER INFORMATION CONTACT: Cindy Alvarez, Planning and Environmental Coordinator, Safford District Office, Bureau of Land Management, 425 E. 4th Street, Safford, Arizona 85546. Telephone (602) 428-4040.

Dated: August 15, 1989.

Margaret Jensen,

Acting District Manager.

BILLING CODE 4310-32-M

[UT-040-09-4212-12; 4-62299]

Realty Action; Exchange of Surface and Mineral Interests in Public and Private Lands, Washington and Kane Counties, UT

AGENCY: Interior, Bureau of Land Management.

SUMMARY: The Bureau of Land Management is considering a proposal to dispose of the following described public lands by exchange under section 206 of the Federal Land Policy and Management Act of 1976, (43 USC 1716): Salt Lake Meridian, Utah, T. 42 S., R. 14 W., sec. 8 NE¼SE¼NE¼, W½SE¼NE¼, NE¼NW¼SE¼, W½NW¼SE¼, NE¼SE¼SW¼, W½SE¼SW¼; sec. 9, NE¼NW¼NW¼, W½NW¼NW¼; sec. 17, NW¼NW¼NW¼, E½SW¼NE¼, SW¼SW¼NE¼; sec. 18, lots 7, 11, 12, S½NE¼, SE¼, NE¼NE¼; containing 560 acres. In exchange for these lands, the United States will acquire lands of equal value from the State of Utah.

ADDRESSES: Requests for information can be sent to the Bureau of Land Management, Cedar City District, 176 East DL Sargent Drive, Cedar City, Utah 84720 (801/586-2401).

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to acquire non-public lands valuable for their public recreational resources, and to improve the land ownership patterns of the public lands. The public lands described above are segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or two years from date of publication of this notice, whichever occurs first.

Dated: August 15, 1989.

Gordon R. Staker,

District Manager.

[CA-940-09-4214-10; CA 391]

Cancellation of Withdrawal Application and Opening of Land; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, U.S. Department of Agriculture, has cancelled in its entirety their withdrawal application for public land to be developed as a roadside rest adjacent to California State Highway 299 within the Six Rivers National Forest. This notice terminates the segregation imposed by the Notice of Proposed Withdrawal published in the **Federal Register** on December 19, 1973 (8 FR 34824), correction published January 28, 1974 (39 FR 3576), and notice republished on May 4, 1978 (43 FR 19295), and opens the land to the operation of the U.S. mining laws. This land has been and continues to be open to mineral leasing and to Forest Service Management.

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337-TA-294]

Commission Decision Not To Review an Intitial Determination Terminating all Respondents on the Basis of a Consent Order; Issuance of Consent Order; Termination of Investigation

In the Matter of Certain Carrier Materials Bearing Ink Compositions To Be Used in a Dry Adhesive-Free Thermal Transfer Process and Signfaces Made by Such a Process.

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) (Order No. 6) issued by the presiding administrative law judge (ALJ) terminating the above-captioned investigation with respect to all respondents in the investigation on the basis of a consent order, thereby terminating the investigation.

ADDRESSES: Copies of the consent order, the ID, and all other nonconfidential documents filed in connection with this investigation are available for public inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202-252-1000.

FOR FURTHER INFORMATION CONTACT: Jean Jackson, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202-252-1104.

Hearing-impaired individuals are advised that tinformaiton about this matter can be obtained by contacting the Commission's TDD terminal, 202-252-1810.

SUPPLEMENTARY INFORMATION: On June 30, 1989, the presiding ALJ issued an ID granting the joint motion of compleinant Minnesota Mining and Manufacturing Corp. and respondents Signtech Inc., Acme Wiley Corp., Dualite Inc., Fairmont Sign Company, Graflex Inc., Harlan Laws Corp., McHenry Industries, Persona Inc., and Superior Electrical Advertising to terminate the investigation on the basis of a consent order.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and § 210.53 of the Commission's Interim Rules of Practice and Procedure (53 FR 33070, Aug. 29, 1988).

Issued: August 16, 1989.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-285]

Issuance of General Exclusion Order

In the matter of: Certain Chemiluminescent Compositions and Components Thereof and Methods of Using, and Products Incorporating, the Same.

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is given that the Commission has issued a general exclusion order in the above-captioned investigation. The order prohibits the unlicensed importation from any country of certain chemiluminescent compositions, components thereof, products incorporating the same, and certain packaging and literature pertaining to such articles.

FOR FURTHER INFORMATION CONTACT: William T. Kane, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202)-252-1116. Copies of the Commission's order, the nonconfidential version of the opinion issued therewith, and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 am to 5:15 pm) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202)–252–1000. Hearing-impaired individuals are advised that information on this matter may be obtained by contacting the Commission's TDD terminal on (202)-252-1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation upon the filing of a complaint on July 21, 1988, by American Cyanamid Company (Cyanamid), of Wayne, N.J. The complaint alleged violation of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), in the importation and sale of certain chemiluminescent compositions and components thereof by reason of infringement of three registered trademarks and various claims of seven U.S. patents. Respondents named in the notice of investigation were Societe Prolufab of Seresnes, France (Prolufab) and Mr. Luc Noel of Los Angeles, CA (53 FR 32476–77, August 25, 1988).

The notice of investigation was amended to conform to the August 1988 amendments to section 337 (53 FR 43276, October 26, 1988), and was also amended to include within the scope of the investigation products incorporating chemiluminescent compositions (54 FR 11822, March 22, 1989).

On January 6, 1989, the presiding administrative law judge (ALJ) issued an initial determination (ID) finding respondent Prolufab to be in default. The Commission determined not to review the ID, thereby allowing it to become the determination of the Commission (54 FR 6181, February 8, 1989). The ID provided that Prolufab had waived its right to appear in the investigation, to contest the allegations at issue, and to be served with documents. On March 14, 1989, the Commission determined not to review an ID terminating the investigation as to one of the two respondents—Luc Noel—on the basis of a consent order (54 FR 11822, March 22, 1989).

On March 22, 1989, the ALJ issued an ID granting complainant's motion for summary determination regarding violation of section 337. The ID found that respondent Prolufab had violated section 337 with regard to infringement of the following:

Claims 1–5 and 7–10 of U.S. Letters Patent 3,749,679;
Claims 1, 2, 4, 6, and 8 of U.S. Letters Patent 3,775,336;
Claims 1–6 of U.S. Letters Patent 3,888,786;
Claims 1, 4, and 5 of U.S. Letters Patent 4,313,843;
Claims 1, 2, 4, 6, and 7 of U.S. Letters Patent 3,729,426;
Claims 1 and 3 of U.S. Letters Patent 4,076,645;
Registered Trademark Number 925,341; and
Registered Trademark Number 1,141,455.

The Commission decided to review only that portion of the ID relating to contributory infringement of the two registered trademarks listed above, thereby allowing the ALJ's findings with regard to all other issues in the ID, including patent infringement, to become the determination of the Commission (54 FR 19250, May 4, 1989). The Commission invited submissions from the parties, government agencies, and the public on the issues of remedy, public interest, and bonding during the period of Presidential review. The Commission received comments from complainant, from the Commission investigative attorney, and from former respondent Luc Noel. No agency comments were received. Having considered these submissions, the Commission made its determination regarding the issue under review, remedy, public interest, and bonding.

The authority for this action is conferred by section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and by Commission interim rules 210.56 and 210.58 (53 FR 33071–72, Aug. 29, 1988).

Issued: August 17, 1989.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 89–19848 Filed 8–22–89; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 22–51]

Cotton Comber Waste

AGENCY: United States International Trade Commission.

ACTION: Institution of an investigation under section 22(d) of the Agricultural Adjustment Act (7 U.S.C. 624(d)) and scheduling of a hearing to be held in connection with the investigation.

SUMMARY: On July 25, 1989, the Commission received a letter from the President stating that the President had been advised by the Secretary of Agriculture, and that he agreed with the Secretary, "that there is reason to believe that the quota on cotton comber waste, wherever classified in the Harmonized Tariff Schedule of the United States, may need to be terminated or modified since the circumstances requiring the proclamation of such import quota restrictions have changed."

As directed by the President, the Commission has instituted an investigation under section 22(d) of the Agricultural Adjustment Act (7 U.S.C. 624(d)) to determine whether the quota on cotton comber waste, provided for in subheading 9904.30.50 of the Harmonized Tariff Schedule of the United States, should be terminated or modified, including globalizing country quota allocations, eliminating the staple length restrictions on cotton used to make cotton comber waste, or distinguishing between bleached and unbleached cotton comber waste, or whether the quota should otherwise be adjusted to take account of circumstances that have changed since the quota was proclaimed. Subheading 9904.30.50 includes two quota subcategories. Subcategory A establishes a "minimum quota" for certain cotton comber waste" and subcategory B establishes an "unreserved quota" for all quota-type cotton waste imports, including cotton comber waste, certain card strips lap waste, sliver waste, and roving waste. Because both subcategories include cotton comber waste, the Commission's investigation will examine imports entering under both subcategories.

The President asked that the Commission report its findings and recommendations at the earliest practicable date. The Commission anticipates submitting its report to the President on January 25, 1990.

For further information concerning the conduct of this investigation, hearing procedures and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E, and part 204 (19 CFR parts 201, 204).

EFFECTIVE DATE: July 25, 1989.

FOR FURTHER INFORMATION CONTACT: Valerie Newkirk (202–252–1190), Office of investigations, U.S. International Trade Commission, Mary Elizabeth Enfield (202–252–1455), Textiles, Leather Products, and Apparel Division, Office of Industries, or Rick Rhodes (202–252–1322), Agriculture, Fisheries, and Forest Products Division, Office of Industries, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–252–1000.

SUPPLEMENTARY INFORMATION:

Participation in the investigation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 202.11), not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service list.—Pursuant to section 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance. In accordance with § 201.16.(c) of the rules (19 CFR § 201.16(c)), each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on November 28, 1989, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on November 13, 1989. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 9:30 a.m. on November 16, 1989, at the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is November 20, 1989.

Testimony at the public hearing must be limited to a nonconfidential summary and analysis of material contained inprehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs. Post hearings briefs must not exceed ten (10) pages of textual material, double spaced, on stationary measuring 8½ × 11 inches, and must be submitted not later than the close of business on December 5, 1989. In addition, the presiding official may permit persons to file answers to requests made by the Commission at the hearing within a specified time. The Secretary will not accept for filing posthearing briefs or answers which do not comply with the provisions contained in this notice.

Written submissions.—As mentioned, parties to this investigation may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigation may submit a witten statement of information pertinent to the subject of the investigation on or before December 5, 1989.

A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business information will be available for public inspection during regular business hours (8)45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any information for which confidential treatment is desired shall be susbmitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

This notice is published pursuant to § 204.4 of the Commission's rules (19 CFR 204.4).

By order of the Commission.

Issued: August 18, 1989.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731–TA–238 (Final)]

12-Volt Motorcycle Batteries From Taiwan

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act), that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from Taiwan of 12-volt motorcycle batteries, provided for in subheading 8507.10.00 of the Harmonized Tariff Schedule of the United States (previously reported under items 683.01 and 683.05 of the Tariff Schedules of the United States), that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted this investigation effective April 18, 1989, following a preliminary determination by the Department of Commerce that imports of 12-volt motorcycle batteries from Taiwan were being sold at LTFV within the meaning of section 735 of the act (19 U.S.C. 1673d(a)). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of May 4, 1989 (54 FR 19253). The hearing was held in Washington, DC, on July 6, 1989, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on August 16, 1989. The views of the Commission are contained in USITC Publication 2213 (August 1989), entitled "12-Volt Motorcycle Batteries from Taiwan: Determination of the Commission in Investigation No. 731–TA–238 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

---

[1] The record is defined in § 207.2(h) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(h)).

By Order of the Commission:

Issued: August 17, 1989.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–55 (Sub-No. 320X)]

CSX Transportation Inc.; Abandonment of Railroad Line in Brunswick County, NC

Applicant has filed a notice of exemption under 49 CFR Part 1152 subpart F—Exempt Abandonments to abandon its 1.12-mile line of railroad between mileposts AC–248.20 and –249.32 at Navassa, in Brunswick County, NC.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years: (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant with the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under Oregon Short Line R. Co.—Abandonment—Goshen, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on September 22, 1989 (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by September 5, 1989.[3] Petitions for reconsideration and requests for public use conditions under 49 CFR 1152.28 must be filed by September 12, 1989, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Particia Vail, CSX Transportation, Inc., 500 Water Street, Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by August 28, 1989. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3219, Interest Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 275–7684. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: August 16, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 89–19710 Filed 8–22–89; 8:45 am]

BILLING CODE 7035-01-M

---

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines*, 5 I.C.C. 2d 377 (1989). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist., 4 I.C.C. 2d 164 (1987).*

[3] The Commission will accept a late-filed trail use statement so long as it retains jurisdiction to do so.

DEPARTMENT OF JUSTICE

Lodging of Settlement Agreement Pursuant to Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on August 14, 1989, a consent decree in *United States* v. *Springs Industries, Inc.*, Civil Action D:89 1900 8, was lodged with the United States District Court for the District of South Carolina. The complaint filed by the United States, pursuant to sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9606 and 9607, as amended, sought injunctive relief to require defendant to abate an imminent and substantial endangerment to public health or welfare or the environment from the actual or threatened release of hazardous substances at the Wamchem site, located in Beaufort County, South Carolina. The complaint also sought reimbursement for EPA's past response costs. The proposed consent decree requires the defendant to perform the Remedial Design and Remedial Action in accordance with EPA's Record of Decision, signed by the Regional Administrator of EPA Region IV on June 30, 1988, and reimburse the United States for past response costs.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Springs Industries, Inc.*, D.J. Ref. No. 90–11–2–265. The proposed consent decree may be examined at the Office of the United States Attorney, The Summerall Center, 19 Hagood Avenue, 10th Floor, Charleston, South Carolina and at the Region IV Office of the Environmental Protection Agency, 345 Courtland Street, NW., Atlanta, Georgia. A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Tenth and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed settlement agreement may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy please enclose a check in the amount of $3.20 (10 cents per page

reproduction costs), payable to the Treasurer of the United States.

Donald A. Carr,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 89–19840 Filed 8–22–89; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Air Act; United States v. Volkswagen of America, Inc.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on August 15, 1989, a proposed Consent Decree in *United States* v. *Volkswagen of America, Inc.* No. 89–1687, was lodged with the United States District Court for the Western District of Pennsylvania. The proposed Consent Decree arises from a civil action filed simultaneously pursuant to section 113(b) of the Clean Air Act ("the Act"), 42 U.S.C. 7413(b), seeking civil penalties and injunctive relief for emissions of volatile organic compounds ("VOCs") in violation of the Pennsylvania State Implementation Plan ("SIP") and the Act at Volkswagen's auto assembly and surface coating facility in New Stanton, Pennsylvania. The proposed Decree requires the company to pay a civil penalty of $600,000 for its past violations of the Act through July 1988. Volkswagen ceased operations at the New Stanton facility in July 1988.

The Department of Justice will receive for a period of thirty (30) days from the date of publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Volkswagen of America, Inc.*, DJ Ref No. 90–5–2–1–1238. The proposed Consent Decree may be examined at the Office of the United States Attorney, Western District of Pennsylvania, 633 U.S. Post Office and Courthouse, 7th Avenue and Grant Street, Pittsburgh, Pennsylvania, and at the Region III Office of the Environmental Protection Agency, 841 Chestnut Building, Philadelphia, Pennsylvania. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy please enclose a check in the amount of $.80 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Richard B. Stewart,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Pursuant to the National Cooperative Research Act of 1984—NAHB Research Foundation; National Cooperative Research Act of 1984; Smart House Project

Notice is hereby given that, pursuant to Section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the NAHB Research Foundation, Inc. ("NAHB") has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission on June 30, 1989 disclosing (1) the identities of two additional parties and five additional advisors to the Smart House Project,

Parties

Ducane Industries
Pioneer Electronics (USA) Inc.

Advisors

Florida Power & Light Company
Midwest Gas Company
National Rural Electric Cooperative Association
Public Service Company of Colorado
Southern Connecticut Gas Co.;

(2) the identities of four advisors that no longer are involved in the Smart House Project,

Advisors

Boston Edison Company
Detroit Edison Company
Hydro Quebec
US West; and

(3) the revision of the listing or name for one other party,

Party

Interior Piping Systems, Inc.

The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to single damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of current parties to the Smart House Project, and its general areas of planned activity, are given below.

The Smart House Project is a joint venture project that will be implemented in a series of stages by separate agreements at each stage. The following are current parties and have signed agreements to fund or otherwise participate in the first stage of the venture, which involves, among other things, organizational activities:

AMP, Incorporated
Apple Computer, Inc.
Arco Solar, Inc.
AT&T Technologies, Inc.
Bell Northern Research Ltd.
Bose Corporation
BRIntec Corporation
Broan Mfg. Co., Inc.
Burndy Corporation
Canada Wire & Cable Limited
Carrier Corporation
Challenger Electrical Equipment Corp.
Dicon System Ltd.
Ducane Industries
Dukane Corporation
E. I. duPont de Nemours & Company (Inc.)
Emerson Electric Co.
Federal Pioneer, Ltd.
Gas Research Institute
General Electric Company
Honeywell Corporation
Interior Piping Systems, Inc.
Johnson Controls
Kohler Company
Landis & Gyr Metering, Inc.
Lennox Industries Inc.
Molex Incorporated
Multiplex Technology, Inc.
NAHB Research Foundation, Inc.
North American Philips Consumer Electronics Corp., on its own behalf and on behalf of Signetics Corporation
Northern Telecom, Inc.
Onan Corporation
Pioneer Electronics (USA) Inc.
Robertshaw Controls Company
Schlage Lock Company
SCICON Systems Control, Inc.

Scott Instruments Corporation
Scovill Inc.
Shell Chemical Company (Division of Shell Oil Company)
Siemens Energy and Automation, Inc., Circuit Protection Division
Slater Electric, Inc.
Smart House Development Venture, Inc.
Smart House, L.P.
Sola Basic Industries, Inc.
Southwire Company
Square D Company
Whirlpool Corporation
The Wiremold Company

The following entities are serving as advisors to the venture:

AquipPetroli
Allegheny Power Service Corporation
American Electric Power Service Corp.
American Gas Association
Arkla, Inc.
Baltimore Gas & Electric Company
Bell Canada
Bell South Services
Columbia Gas Distribution Companies
Consolidated Natural Gas Company
Consumers Gas Company, Ltd.
Consumers Power Company
Copper Development Association Inc.
Delmarva Power & Light Company
Duke Power Company
Edison Electric Institute
Electric Power Research Institute
Florida Power & Light Company
Gas Research Institute
Home Builders Institute
Houston Lighting & Power Company
Illinois Consolidated Telephone Co.
International Conference of Building Officials
Kansas Gas & Electric Company
Lone Star Gas Company
Michigan Consolidated Gas Company
Midwest Gas Company
Minnesota Blue Flame Gas Asso.
National Association of Homes Builders
National Cable Television Association
National Joint Apprenticeship & Training Committee
National Rural Electric Cooperative Association
Northern Illinois Gas
Oklahoma Gas & Electric Company
Oklahoma Natural Gas Company
Ontario Hydro
Pacific Gas & Electric Company
Pacific Power & Light Company
Paragon Design Resource S.W., Ltd.
Portland General Electric Company
Potomac Electric Power Company
Professional Builder
Public Service Company of Colorado
Southern California Edison Company
Southern Connecticut Gas Co.
Southwest Gas
Southwestern Bell Telephone Company
Union Gas, Ltd.
U.S. Dept. of Housing & Urban Dev.
Virginia Electric and Power Company
Washington Gas Light Company
Wisconsin Electric Power Company

The Smart House Project will engage in activities the purpose of which will be to develop a coordinated home control and energy distribution system containing integral telecommunications and advanced safety features. The project is intended to design and develop a set of compatible products, including integrated power and signal cabling to tie home electrical products into a single power and communications network; communications-capable appliances, heating and cooling equipment, utility meters and home electrical and electronic products; electric power conditioning and conversion equipment; controllers and software to make logical decisions, issue control instructions, and regulate the distribution of energy, information and instructions throughout the network; monitoring and control devices to detect and neutralize malfunctions in energy distribution within the home; telephone and CATV interfaces to allow information to be passed to and from the home over telephone and CATV lines; and input and output devices with which users can control and receive information from the network and the devices attached to it.

On June 14, 1985 NAHB filed its original notification pursuant to section 6(a) of the Act. On september 13, 1985, January 9, 1986, April 28, 1986, July 30, 1986, December 16, 1986, April 8, 1987, June 30, 1987, August 25, 1987, December 4, 1987, February 22, 1988, April 5, 1988, and October 27, 1988, NAHB filed additional written notifications. The Department of Justice published notices in the **Federal Register** in response to these additional notifications on October 10, 1985 (50 FR 41428), on January 28, 1986 (51 FR 3520), on May 16, 1986 (51 FR 18049), on August 28, 1986 (51 FR 30724), on January 15, 1987 (52 FR 1673), on May 8, 1987 (52 FR 17490), on July 30, 1987 (52 FR 28494), on September 22, 1987 (52 FR 35596), on January 5, 1988 (53 FR 188), on March 21, 1988 (53 FR 9154), on May 3, 1988 (53 FR 15750) and on December 8, 1988 (53 FR 49614), respectively.

The principal business address of the Smart House Project is 400 Prince Georges Center Boulevard, Upper Marlboro, Maryland 20772—6731

BILLING CODE 4410-01-M

Notice Pursuant to the National Cooperative Research Act of 1984—Portland Cement Association

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), the Portland Cement Association ("PCA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission on July 20, 1989, disclosing that there has been a change in the membership of PCA. Specifically, Hercules Cement Company, RC Cement Co., Inc., River Cement Company, and Signal Mountain Cement Company joined PCA effective July 1, 1989, and should therefore be listed as members. In addition, Santee Portland Cement Corp. should be listed as a separate member. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Accordingly, at present the members of the PCA are those companies listed below:

United States

Aetna Cement Corporation
Alamo Cement Company
Alaska Basic Industries
Ash Grove Cement Company
Ash Grove Cement West, Inc.
Blue Circle Atlantic, Inc.
Blue Circle, Inc.
Blue Circle West Inc.
Calaveras Cement Company
CalMat Co.
Capitol Aggregates, Inc.
Continental Cement Company Inc.
Coplay Cement Company
Davenport Cement Company
Dragon Products Company
Dundee Cement Company
Glens Falls Cement Company, Inc.
Hawaiian Cement
Hercules Cement Company
Ideal Basic Industries, Inc.
Independent Cement Corporation
Lafarge Corporation
Lehigh Portland Cement Company
LoneStar-Falcon
Lone Star Industries, Inc.
Lone Star Northwest
Medusa Cement Corporation
Missouri Portland Cement Company
The Monarch Cement Company
National Cement Company, Inc.
National Cement Company of California, Inc.
Northwestern States Portland Cement Co.
Phoenix Cement Company
RC Cement Co., Inc.
Rinker Materials Corporation
River Cement Company
RMC Lonestar
Rochester Portland Cement Corporation
St. Marys Peerless Cement Company
St. Marys Wisconsin Inc.

Santee Portland Cement Corp.
Signal Mountain Cement Company
The South Dakota Cement Plant
Southwestern Portland Cement Company
Tarmac-LoneStar, Inc.
Tilbury Cement Company

Canada

Federal White Cement Ltd.
Ideal Cement Company Ltd.
Inland Cement Limited
Lafarge Canada Inc.
Lake Ontario Cement Limited
North Star Cement Limited
St. Lawrence Cement Inc.
St. Marys Cement Corporation
Tilbury Cement Limited

Mexico

Instituto Méxicano del Cemento y del Concreto (IMCYC)
Cementos Acapulco, S.A.
Cementos Apasco, S.A.
Cementos de Chihuahua, S.A.
Cementos Mexicanos, S.A.
Cementos Moctezuma, S.A.
Cooperativa de Cementos Cruz Azul
Cooperativa de Cementos Hidalgo

Affiliate Members

Cement and Concrete Promotion Council of Texas
Florida Concrete and Products Association
Mississippi Concrete Industries Association
North Central Cement Promotion Association
Northern California Cement Promotion Group
Northwest Concrete Promotion Group
Rocky Mountain Cement Promotion Council
South Central Cement Promotion Association
Southern California Cement Group

In addition, the following equipment suppliers are involved as "Participating Associates," together with PCA members, in the activities of the Manufacturing Process Subcommittee of PCA's General Technical Committee:

Baker-Dolomite (DBCA)
C–E Raymond
Claudius Peters, Inc.
F.L. Smidth and Company
Holderbank Consulting Ltd.
Humboldt Wedag Company
Magotteaux-Slegten Companies
Polysius Corp.
The Fuller Company
W.R. Grace & Company

On January 7, 1985, PCA filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on February 5, 1985, 509 FR 5015. On March 14, 1985, August 13, 1985, January 3, 1986, February 14, 1986, May 30, 1986, July 10, 1986, December 31, 1986, February 3, 1987, April 17, 1987, June 3, 1987, July 29, 1987, August 6, 1987, October 9, 1987, February 18, 1988, March 9, 1988, March 11, 1988, July 7, 1988, August 9, 1988, August 23, 1988, January 23, 1989, February 24, 1989, March 13, 1989, and May 25, 1989, PCA filed additional written notifications. The Department published notices in the **Federal Register** in response to these additional notifications on Apri 10, 1985 (50 FR 14175), September 16, 1985 (50 FR 37594), February 4, 1986 (51 FR 4440), March 12, 1986 (51 FR 8573), June 27, 1986 (51 FR 23479), August 14, 1986 (51 FR 29173), February 3, 1987 (52 FR 3356), March 4, 1987 (52 FR 6635), May 14, 1987 (52 FR 18295), July 10, 1987 (52 FR 28183), August 26, 1987 (52 FR 32185), November 17, 1987 (52 FR 43953), March 28, 1988 (53 FR 9999), August 4, 1988 (53 FR 29397), September 15, 1988 (53 FR 35935), September 28, 1988 (53 FR 37883), February 23, 1989 (54 FR 7894), March 20, 1989 (54 FR 11455), April 25, 1989 (54 FR 17835), and June 28, 1989 (54 FR 27220), respectively.

Joseph H. Widmar,
Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 89–70; Exemption Application No. D–7794 et al.]

Grant of Individual Exemptions; Bear Lumber Co., Inc./Bear Brothers, Inc., et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, DC. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addtion the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Bear Lumber Company, Inc./Bear Brothers, Inc., Second Amended and Restated Profit Sharing Plan (the Plan) Located in Montgomery, Alabama

[Prohibited Transaction Exemption 89–70; Exemption Application No. D–7794]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale for cash by the Plan of certain real property (the Real Property) to Bear Lumber Company, Inc., the Plan sponsor, for $415,000, provided that the price is no less than the fair market value of the Real Property on the date of sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on June 22, 1989 at 54 FR 26269.

FOR FURTHER INFORMATION CONTACT: Joseph L. Roberts III of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Frank W. Hilliard, D.D.S., M.S.D., Inc. Profit Sharing Plan and Trust (the Plan) located in Arlington, TX

[Prohibited Transaction Exemption 89–71; Exemption Application No. D–7821]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply, effective June 30, 1984, to the past and proposed lease by the individual account of Frank W. Hilliard, D.D.S., M.S.D. in the Plan of certain real property located in Arlington, Texas To Frank W. Hilliard, D.D.S., M.S.D., Inc., the sponsor of the Plan; provided that all terms of such transactions are at least as favorable to the Plan as those which the Plan could obtain in an arm's-length transaction with an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on June 22, 1989 at 54 FR 26270.

EFFECTIVE DATE: This exemption is effective as of June 30, 1984.

FOR FURTHER INFORMATION CONTACT: Ronald Willett of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

J. Lee Milligan, Inc. Profit Sharing Plan and Trust (the Plan) Located in Amarillo, Texas

[Prohibited Transaction Exemption 89–72; Exemption Application No. D–7836]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale for cash of certain real property (the Real Property) to J. Lee Milligan, Inc., the Plan sponsor, provided that the price paid for the Real Property be no less than the greater of the fair market value of the Real Property as of the date of sale, as determined by an independent and qualified appraiser, or the total outlay by the Plan in connection with its acquisition and retention of the Real Property to the date of sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on June 22, 1989 at 54 FR 26271.

FOR FURTHER INFORMATION CONTACT: Joseph L. Roberts III of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Eubanks & Eubanks, D.O., P.C. Pension and Profit Sharing Trust Fund (the Plan) Located in Troutdale, Oregon

[Prohibited Transaction Exemption 89–73; Exemption Application No. D–7897]

Exemption

The restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to a proposed cash sale by the separate accounts of Robert L. Eubanks and Theresa M. Eubanks (the Eubanks) in the Plan of certain land to the Eubanks, parties in interest with respect to the Plan, provided that the Plan receives the greater of $37,100 or the fair market value at the time of the sale.

Written Comments

The applicant submitted a written comment in which it informed the Department that it wished to corrct certain information published in the notice of proposed exemption. Accordingly, as corrected:

(a) As of December 31, 1988 the Plan had 16 participants.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on May 24, 1989 at 54 FR 22502.

FOR FURTHER INFORMATION CONTACT: Ekaterina A. Uzlyan of the Department at (202) 523–8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 18th day of August, 1989.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 89–19862 Filed 8–22–89; 8:45 am]

BILLING CODE 4510–29–M

[Application No. D–7684–7685 et al.]

Proposed Exemptions; Ophthalmic Associates, P.A. Employees' Pension Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the International Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N–5671, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–5507, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Ophthalmic Associates, P.A. Employees' Pension Plan (the Pension Plan) and Ophthalmic Associates, P.A. Employees' Money Purchase Pension Plan (the Money Purchase Pension Plan; collectively, the Plans) Located in Lansdale, PA

[Application Nos. D–7684 and D–7685, Respectively]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(b)(2) of the Act shall not apply to the transfer by the Pension Plan to the Money Purchase Pension Plan of a 50 percent tenant-in-common interest in certain improved real property (the Property) and cash, provided the terms of the transaction are at least as favorable to the Money Purchase Pension Plan as those obtainable in an arm's-length transaction with an unrelated party. In addition, the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the assumption, by the Money Purchase Pension Plan, of certain pre-existing loan, lease and sublease obligations of the Pension Plan with persons who are parties in interest with respect to both Plans, provided the terms of the transaction are at least as favorable to the Money Purchase Pension Plan as those obtainable in an arm's length transaction with an unrelated party.

Summary of Facts and Representations

1. Ophthalmic Associates, P.A. (Ophthalmic) is a professional association organized under the laws of the Commonwealth of Pennsylvania. Physicians affiliated with Ophthalmic are engaged in the medical practice of ophthamology in a two story office building located at 1000 N. Broad Street, Lansdale, Pennsylvania. Other occupants of the Property are Pearlstine, Salkin, Hardison and Robinson (Pearlstine-Salkin), a professional corporation of attorneys and CBS Optical (CBS Optical), an entity which is in the business of fitting and selling eyeglasses. Pearlstine-Salkin is legal counsel to Ophthalmic and provides legal services to employee benefit plans sponsored by Ophthalmic. As such, Pearlstine-Salkin is a party in interest with respect to the Ophthalmic Plans. CBS Optical is also a party in interest since it is exclusively owned by the trustees (the Trustees) of the Plans.

2. Ophthalmic sponsors the Pension Plan and the Money Purchase Pension Plan. The Pension Plan is a defined benefit plan with 21 participants and total assets of approximately $2,994,839 as of July 31, 1988. The Money Purchase Pension Plan is a defined contribution plan having 22 participants and total assets of approximately $1,566,315 as of July 31, 1988. The Plans share common participants but neither Plan is a party in interest with respect to the other. The Plans also share common trustees who are responsible for making investment decisions affecting the Plans. The Trustees of the Plans are Messrs. Paul L. Carmichael, Robert W. Connor, Louis W. Schwartz and Jonathan D. Belmont.

3. On June 25, 1982, the Department granted Prohibited Transaction Exemption (PTE) 82–103 at 47 FR 27645. PTE 82–103 permitted the Ophthalmic Pension Plan and the Pearlstine-Salkin Associates Employees Pension Plan (the Pearlstine Pension Plan)[1] to purchase 50 percent interests in the Property, as tenants in common, from Ophthalmic Investors Associates (Ophthalmic Investors), a partnership comprised of certain principals of Ophthalmic and Pearlstine-Salkin. The sales price for the Property was $900,000. This amount reflected the independently appraised value of the subject realty as of September 26, 1980. On July 1, 1982, the Ophthalmic Pension Plan and the Pearlstine Pension Plan each paid $100,000 in cash to Ophthalmic Investors as the initial downpayment on the Property. Both plans took the Property subject to an existing first mortgage in the original principal amount of $550,000 and an additional loan of $75,000 (the First Mortgage and Addendum) between Ophthalmic Investors and an unrelated party. The First Mortgage and the Addendum carried annual interest rates of 6¼ percent and 9½ percent, respectively. Such loans, which were secured by the Property, had a combined outstanding balance of $401,074 as of July 1, 1982. Although the Ophthalmic and Pearlstine Pension Plans were not required to assume the obligations of Ophthalmic Investors pursuant to the First Mortgage and the Addendum, they were required to make payments to satisfy the terms of the loan instruments. Both plans also entered into a second mortgage (the Second Mortgage) in the original principal amount of $298,926 with Ophthalmic Investors for the balance of the sales price which was to be repaid over a ten year period commencing July 1, 1982 and ending June 30, 1992 at an annual interest rate of 10⅛ percent. The Second Mortgage was also secured by the Property.

The applicants represent that the sale of the property by Ophthalmic Investors to the Ophthalmic Pension Plan and the Pearlstine Pension Plan was carried out in the manner and on the terms described in PTE 82–103. The applicants also represent that payments under the First Mortgage, Addendum and Second Mortgage have been timely made. As of July 31, 1988, the applicants state that the principal balances outstanding under the First Mortgage, the Addendum and the Second Mortgage were $76,326, $6,654 and $157,539, respectively, or $240,520 in the aggregate.

---

[1] The applicants represent that none of the plans described herein is a party in interest with respect to the other within the meaning of section 3(14) of the Act.

4. PTE 82–103 also permitted the leasing of the property (the Lease) by the plans to Pearlstine-Salkin Ophthalmic Associated Investors (PSO), a party in interest. The Lease is a triple-net lease providing for an initial term of ten years commencing July 1, 1982 and ending June 30, 1992. The Lease requires that rentals be based on the fair market rental value of the Property, as determined by an independent appraiser. It also stipulates that the Property be reappraised every three years in order that rental payments can be adjusted to reflect the fair market rental value of the Property. The Lease further states that adjusted rentals may not be less than the rentals received during the preceding Lease term.

In the event of a default, the plans may sell the Property to Ophthalmic Investors at the greater of its fair market value or the $900,000 original sales price. At the occurrence of the repurchase, the plans will be relieved of their outstanding mortgage obligations. The balance owed by the plans will then be credited against the purchase price.

The Lease is intended to amortize the Ophthalmic and Pearlstine Pension Plans' obligations under the First Mortgage, the Addendum and the Second Mortgage through the rental payments received such that the plans will own the Property free of any encumbrance at the termination of these obligations. PSO, in turn, subleases the Property (the Subleases) to Pearlstine-Salkin, Ophthalmic, and since July 1, 1984, to CBS Optical. The economic effect of the Sublease involving CBS Optical is such that Pearlstine-Salkin and Ophthalmic receive a credit for amounts actually paid by CBS Optical under their respective Subleases with PSO. If rentals are not paid by CBS Optical, Pearlstine–Salkin and Ophthalmic remain fully liable to PSO which, in turn, remains fully liable to the Ophthalmic and the Pearlstine Plans.

According to the applicants, all rental payments due under the Lease and Subleases have been timely paid and rental adjustments have been in compliance with Lease/Sublease terms. The applicants also represent that the rental payments received by PSO under its Subleases have not been greater than the rental payments PSO has paid the Ophthalmic and Pearlstine Plans under the Lease.

The transactions subject to PTE 82–103 are being monitored by the National Bank of Boyerton (the Bank) located in Boyerton, Pennsylvania. The Bank presently serves as the independent fiduciary on behalf of the Ophthalmic Pension Plan and the Pearlstine-Salkin Associates Profit Sharing and Salary Savings Plan and Trust (the Pearlstine 401(k)Plan) which replaced the Pearlstine Pension Plan in 1985.[2]

5. On October 12, 1987, the Board of Governors of Ophthalmic decided to terminate the Pension Plan effective October 31, 1987 because of benefit restrictions imposed by the Tax Reform Act of 1986. To effectuate the termination, the Trustees intend to discharge the obligations of the Pension Plan by giving Pension Plan participants the opportunity of: (a) Having their benefits paid through annuity contracts of one or more life insurance companies; (b) having their benefits distributed in a single sum settlement; or (c) electing to have their benefits transferred to the Money Purchase Pension Plan. Each participant deciding to have his or her benefits transferred to the Money Purchase Pension Plan will have a rollover account established in the name of such participant.[3]

6. The Trustees have obtained the nonbinding election to have the benefits of four Pension Plan participants transferred to the Money Purchase Pension Plan. The present value of the accrued benefits for these participants is $1,083,144. Accordingly, the Trustees request an administrative exemption to transfer, to the Money Purchase Pension Plan, certain assets of the Pension Plan equal to the value of the transferred benefits. Among the assets of the Pension Plan that are proposed for the direct transfer are the Pension Plan's 50 percent interest in the Property plus cash. The transfer will be a unilateral transaction wherein the Pension Plan will not receive any cash consideration from the Money Purchase Pension Plan. In addition, the Money Purchase Pension Plan will not be required to pay any real estate fees or commissions in connection therewith. Following the transfer, all participants in the Money Purchase Pension Plan will share in the appreciation, depreciation, income and loss attributable to the Property.

7. The Trustees also request an administrative exemption to permit the Money Purchase Pension Plan to assume the obligations of the Pension Plan under the First Mortgage, the Addendum and the Second Mortgage and the Pension Plan's obligations under the Lease and Subleases as set forth in PTE 82–103 and as described above. In other words, exemptive relief is requested to permit the Money Purchase Pension Plan to "stand in the shoes" of the Pension Plan. All other conditions and guarantees that are set forth in PTE 82–103 will remain in full force and effect. In this regard, the Trustees of the Ophthalmic Plans have obtained a novation from Pearlstine-Salkin, the trustees of the Pearlstine 401(k) Plan and the Bank consenting to the transfer and the assumption of the pre-existing transactions by the Money Purchase Pension Plan.

8. The Property was appraised by Mr. Ken L. Steigelman (Mr. Steigelman), C.C.I.M., S.I.O.R., S.R.S., an independent appraiser affiliated with Steigelman and Associates, Inc. Realtors of Line Lexington, Pennsylvania. In an appraisal report dated October 23, 1984, Mr. Steigelman valued the Property at $1,006,000 as of October 12, 1984. In an updated appraisal report dated February 11, 1988, Mr. Steigelman placed the fair market value of the Property at $1,177,000 as of February 9, 1988.

9. The value of the interest that will be transferred to the Money Purchase Pension Plan will reflect 50 percent of the fair market value of the Property less the Pension Plan's proportionate shares of the First Mortgage, the Addendum and the Second Mortgage. The remainder of the consideration will be transferred by the Pension Plan in cash. Thus, the total transferred benefit will equal $1,083,144.

10. The Bank will continue serving as the independent fiduciary for the Plans with respect to the proposed transfer of the Property as well as for those transactions approved by the Department in PTE 82–103. The Bank represents that it has over 100 years of fiduciary responsibility experience and that its staff administers over $117 million of trust assets. In particular, the Bank states that it is responsible in various capacities for approximately $15.5 million of employee benefit plan-related assets. The Bank also asserts that it understands and acknowledges its duties, responsibilities and liabilities in acting as a fiduciary under the Act.

The Bank states that it maintains a commercial relationship, in the form of a checking account with Pearlstine-Salkin but no such relationship exists between it and Ophthalmic. The Bank explains that the checking account represents 0.05 percent of its total deposits. The Bank further states that it does not share common officers or directors with either Pearlstine-Salkin or Ophthalmic.

The Bank believes that the transactions compare favorably to the terms of similar transactions that might take place between unrelated parties based upon its review of Mr. Steigelman's appraisal of the Property, the fact that rentals for the Property are at fair market value and will amortize all of the indebtedness and other expenses incurred by the Plans, the guaranteed repurchase of the Property by the original principals, the favorable location of the Property and its past history of investment appreciation. The Bank also believes the transactions are in the best interests of the Money Purchase Pension Plan and its participants and beneficiaries because, consistent with what has transpired to date, such transactions would be easy to monitor and should not create any administrative difficulties. In arriving at its opinion, the Bank asserts that it has examined the investment portfolio for the Money Purchase Pension Plan, considered the Plan's liquidity requirements and examined the diversification of the assets of the Money Purchase Pension Plan in light of the transactions. The Bank further represents that it believes the transactions comply with the investment objectives and policies of the Money Purchase Pension Plan. In undertaking its responsibilities as the independent fiduciary, the Bank represents that it has approved and will monitor rentals under the Lease and Subleases to ensure that no defaults have occurred and to protect the rights of the Money Purchase Pension Plan and its participants and beneficiaries.

11. In summary, the applicants represent that the proposed transactions will satisfy the criteria for an exemption under section 408(a) of the Act because: (a) The transfer is confined primarily to a single transaction in which a 50 percent tenant-in-common interest is being transferred by the Pension Plan to the Money Purchase Pension Plan; (b) the transfer will be a unilateral transaction wherein the Pension Plan will not receive any consideration from the Money Purchase Pension Plan; (c) the acquisition of the 50 percent interest in the Property by the Money Purchase Pension Plan will provide such plan with leasehold income and the benefits of investment appreciation; (d) the Money Purchase Pension Plan will not pay any real estate fees or commissions in connection with the transactions; and (e) as the independent fiduciary, the Bank approves of the transactions and it believes they are in the best interest of the Money Purchase Pension Plan and its participants and beneficiaries.

Margaret L. Lial, Inc. Defined Benefit Pension Plan (the Plan) Located in Sacramento, California

[Application No. D–7954]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale of certain real property (the Property) from the Plan to Edwin C. Lial and Margaret L. Lial (the Lial's), disqualified persons with respect to the Plan, provided the Plan receives the greater of $220,000 or fair market value for the Property at the time of sale.[4]

Summary of Facts and Representations

1. Margaret L. Lial, Inc. (the Employer) is a corporation engaged in the business of writing a series of mathematics textbooks. Edwin C. Lial and his wife, Margaret L. Lial, are the sole owners of the Employer. The Lial's are also the trustees of the Plan and are the only participants in the Plan. The Plan is a defined benefit plan which had total assets of approximately $1,614,704 in March of 1988.

2. The Property consists of approximately 1.6 acres of vacant land located in Sacramento, California. The Property is a specific portion (Lot 5) of a larger parcel of land owned by the Plan. The Plan acquired the larger parcel in September 1982 from an unrelated seller for a total purchase price of $100,000. The Plan gave the seller a promissory note, secured by a deed of trust on the larger parcel, in the amount of $62,500 and paid the remainder of the purchase price in cash. Payment of the note was completed in January 1986 and the larger parcel is currently not subject to any indebtedness. The portion of the $100,000 purchase price attributable to the Property is $32,852. The remainder of the larger parcel also is vacant land and will be retained by the Plan. The total cost to the Plan of acquiring and holding the Property since the time of purchase has been $106,415, including interest payments on the $62,500 promissory note (allocable to the Property), property taxes and allocable development costs relating to streets, water lines and other improvements.

3. The Plan obtained an appraisal on the Property from Brian P. Roche (Roche) of the American Pacific Appraisal Company of Sacramento. The applicant represents that Roche is independent of the Employer and of the Plan. Roche describes the Property as vacant industrial land (in the Del Paso Heights area of Sacramento) and believes that the highest and best use of the Property would be light industrial development, with some degree of office space. Utilizing the market data approach to value, Roche estimated the fair market value of the Property to be approximately $220,000 as of December 16, 1988. In determining this amount, Roche made an adjustment for a required 25-foot setback and related developer's cost.

4. Since the assets of the Plan are currently invested completely in real estate, a sale of a portion of such real property will provide the Plan with greater liquidity. Also, the Property has produced no income for the Plan. The applicant represents that the Plan has attempted unsuccessfully to sell all or a portion of the real estate held by the Plan at the market value of the land. Accordingly, the Plan now proposes to sell the Property to the Lial's. The Lial's will pay no less than fair market value for the Property at the time of sale, based on an updated independent appraisal. The taxes on the Property will

---

[2] The current application for Ophthalmic states that the Pearlstine Pension Plan was terminated and replaced with the Pearlstine 401(k) Plan in 1985. In a separate exemption application (D–6178 and D–6179), Pearlstine-Salkin sought relief similar to what is being requested in this notice of proposed exemption. That earlier exemption application was withdrawn by Pearlstine-Salkin in September 1985. No exemptive relief is being proposed herein for the transaction involving the Pearlstine 401(k) Plan and the Pearlstine Pension Plan.

[3] The applicants state that the termination of the Pension Plan will result in a reversion of assets to Ophthalmic. The applicants also assert that such asset reversion will comply with the "Implementation Guidelines on Asset Reversions" (the Guidelines) that were issued jointly by the Department, the Department of the Treasury and the Pension Benefit Guaranty Corporation in a news release dated May 23, 1984. In accordance with current law, when an employer terminates a defined benefit pension plan, it may not recover any surplus assets until it has fully vested all participants' benefits and has purchased and distributed annuity contracts to protect participants against the risk that their accrued benefits may be jeopardized by future market fluctuations. The applicants assert that the Pension Plan participants have become 100 percent vested and that annuity contracts will be purchased and distributed to participants electing not to transfer their benefits to the Money Purchase Pension Plan or to take a lump sum cash distribution. Further, the applicants state that the Pension Plan's actuary has confirmed that the amount of assets reverting to Ophthalmic complies with the Guidelines.

[4] Because the Lial's are the sole shareholders of the Employer and the only participants in the Plan, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3–3(b). However, there is jurisdiction under Title II of the Act under section 4975 of the Code.

be prorated as of the time of sale. The transaction will be entirely for cash, and the Plan will pay no fees or commissions in regard to the sale.

5. In summary, the applicant represents that the proposed transaction will satisfy the statutory criteria of section 4975(c)(2) of the Code because: (1) The Lial's will pay no less than fair market value for the Property at the time of sale; (2) the fair market value will be established by an independent appraisal of the Property; (3) the transaction will be entirely for cash; and (4) the sale of the Property will enhance the diversification and liquidity of the assets of the Plan.

Notice to Interested Persons: Because the Lial's are the applicants and the only participants in the Plan, it has been determined that there is no need to distribute the notice of pendency to interested persons. Comments and requests for a hearing must be received by the Department within 30 days of the date of publication of this notice of proposed exemption.

FOR FURTHER INFORMATION CONTACT: Paul Kelty of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

Clark, Partington, Hart & Hart Employee Profit Sharing Plan and Trust (the Plan) Located in Pensacola, Florida

[Application No. D-8003]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (1) the proposed loan (the Loan) of $60,000 by the Plan to Clark, Partington, Hart & Hart, P.A. (the Employer), a party in interest with respect to the Plan; and (2) the joint and several guarantees (the Guarantees) of the proposed Loan by eight principals of the Employer, each a party in interest with respect to the Plan, provided that the terms and conditions of the Loan and the Guarantees are not less favorable to the Plan than those obtainable in an arm's-length transaction with unrelated parties.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 35 participants. As of January 31, 1989, the Plan had net assets of approximately $1,830,000. Messrs. William H. Clark, Donald H. Partington, Robert D. Hart, Jr., and Harry B. Stackhouse serve as the trustees (the Trustees) of the Plan, and are also officers, directors, shareholders, and employees of the Employer. The Trustees constitute the investment and administrative committee for the Plan which is responsible for making decisions regarding Plan investments. The Employer is a Florida professional association engaged in the practice of law.

2. The amount of the proposed Loan represents approximately 3.28 percent of the assets of the Plan. The proceeds of the Loan will be used by the Employer to purchase office equipment, furniture, and fixtures for its existing offices. The Loan will be made at no expense to the Plan and will be represented by a promissory note having a 15 year term and payable in 180 monthly installments of principal and interest with interest adjusted annually on the unpaid balance at 1.5 percent above the prime rate charged by the Citizens and Peoples National Bank of Pensacola, Florida, on the date of execution of the Loan and on each anniversary date thereafter. The Loan will be secured by a perfected first security interest agreement in which the Employer conveys to the Plan a first security interest in specified office equipment, furniture, and fixtures that are unencumbered and owned by the Employer (the Collateral). All Collateral will be insured against fire and other hazards with the Plan named as beneficiary of insurance policies purchased by the Employer. The Collateral was appraised by Mr. Joel D. Gonia, Senior Personal Property Staff Appraiser of Allied Appraisal Associates, Inc., Gulf Breeze, Florida. Mr. Gonia affirms his lack of interest in the Collateral and his independence of the parties involved in the proposed transactions. His appraisal, rendered in accordance with standards established by the American Society of Appraisers, determined on June 4, 1989, that the fair liquidation value of the Collateral is $121,375 (in excess of 200 percent of the Loan), an amount which would be realized from a public auction conducted under duress.

3. The Loan will be jointly and severally guaranteed by Messrs. William H. Clark, Donald H. Partington, Robert D. Hart, Jr., W. Christopher Hart, Dennis K. Larry, William E. Bond, Jr., Harry B. Stackhouse, and Robert L. Stone (collectively, the Guarantors), all of whom are principals of the Employer. Each of the Guarantors has a net worth and annual income substantially in excess of the amount of the proposed Loan.

4. The Citizens and Peoples National Bank (the Bank), located in Pensacola, Florida, has been appointed to serve as independent fiduciary for the Plan with respect to the Loan. There is a *de minimis* banking relationship between the Employer and the Bank, consisting of deposits and loans. Deposits by the Employer are less than .0002 percent of the total deposits with the Bank and loans to the employer are less than .007 percent of the total loan portfolio of the Bank. None of the proceeds from the proposed Loan will be used by the Employer to pay off any indebtedness it owes the Bank. On July 3, 1989, the Employer paid in full the prior loan for $40,000 that it had obtained from the Plan under Prohibited Transaction Exemption 84-157, published October 12, 1984 at 49 FR 40116.

The Bank has examined the terms and conditions of the Loan, including the personal Guarantees, the security agreement with the appraisal of the Collateral, and the latest financial statement of the Plan to determine that the Loan is in the best interests of the Plan and its participants and beneficiaries. The Bank considered the entire investment portfolio of the Plan, including the diversification of its investments, when making its determination as to the worthiness to the Plan of the proposed Loan. The Bank also represents that it would make an identical loan to the Employer at a lesser rate of interest.

5. The Bank, as independent fiduciary, has the irrevocable power and authority to monitor and enforce all the terms and conditions of the Loan. This includes making demand for timely payments, requiring appropriate annual adjustments of the interest rate, accelerating demand for payment in full of unpaid principal and accrued interest due upon default, and commencing litigation or other appropriate action against the Employer or Guarantors upon default by the Employer. Also, the Bank has the power and authority to require the Employer to pledge additional Collateral to ensure that at all times the Collateral remains at or exceeds 200 percent of the balance owing on the Loan and to require the Employer to maintain fire and hazard insurance on the Collateral with the Plan as named beneficiary of the insurance policies.

6. In summary, the applicant represents that the proposed Loan and Guarantees will satisfy the statutory criteria of section 408(a) of the Act because (a) the Loan will be secured by a perfected first security agreement in insured collateral which will at all times during the term of the Loan have a liquidation value of not less than 200 percent of the outstanding balance of the Loan; (b) the Bank, a qualified and independent person, will serve as the fiduciary of the Plan with regard to the Loan and the Guarantees, and in that capacity has determined that the Loan is in the best interests of the Plan and its participants and beneficiaries; (c) the Bank will monitor the Loan for its entire term and will enforce performance of the obligations of the Employer and Guarantors under the applicable documents; and (d) the Loan will be made at no expense to the Plan and will be jointly and severally guaranteed by eight principals of the Employer.

FOR FURTHER INFORMATION CONTACT: Mr. C.E. Beaver of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 18th day of August, 1989.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

LEGAL SERVICES CORPORATION

Grant Award to D.C. Students in Court for the Expansion and Development of a Law School Civil Clinical Program

AGENCY: Legal Services Corporation.

ACTION: Announcement of a grant award.

SUMMARY: The Legal Services Corporation (LSC) hereby announces its intention to award a grant to D.C. Students in Court through the 1989-90 Law School Civil Clinical Program. The purpose of this grant is to assist LSC-eligible clients with their civil legal cases. Pursuant to the Corporation's announcement of funding availability in Volume 54, No. 90, pages 20454 and 20455 of the **Federal Register** of May 11, 1989, a total of $1,080,766 will be awarded to nineteen applicants for funding, including D.C. Students in Court. Announcement of the grant awards to the other applicants was published in the August 15, 1989 issue of the **Federal Register**.

This one-year grant is awarded pursuant to authority conferred by sections 1006(a)(1)(B) and 1006(a)(3) of the Legal Services Corporation Act of 1974, as amended. This public notice is issued pursuant to section 1007(f) of this Act, with a request for comments and recommendations within a period of thirty (30) days from the date of publication of this notice. The grant award will not become effective and grant funds will not be distributed prior to expiration of this thirty-day period.

DATE: All comments and recommendations must be received by the Office of Field Services of the Legal Services Corporation on or before September 24, 1989.

FOR FURTHER INFORMATION CONTACT: Charles T. Moses, III, Associate Director, or Victoria O'Brien, Counsel to the Director, Legal Services Corporation, Office of Field Services, 400 Virginia Ave., SW., Washington, DC 20024-2751, telephone number: (202) 863-1837.

SUPPLEMENTARY INFORMATION: This grant is issued to support the provision of legal services to eligible clients by law students from a consortium of five Washington, D.C. law schools. By funding the development and expansion of the D.C. Students in Court clinical program, the Corporation educates law students to the legal problems of poor persons. This clinical experience encourages future lawyers to become interested in the provision of legal services to poor persons, acting either as legal aid attorneys or through *pro bono* or reduced fee efforts as members of the private bar.

Dated: August 17, 1989.

Ellen J. Smead,

Acting Director, Office of Field Services.

[FR Doc. 89-19860 Filed 8-22-89; 8:45 am]

BILLING CODE 7050-1-M

NUCLEAR REGULATORY COMMISSION

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from July 31, 1989 through August 11, 1989. The last biweekly notice was published on August 9, 1989 (54 FR 32704).

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC The filing of requests for hearing and petitions for leave to intervene is discussed below.

By September 22, 1989 the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Boston Edison Company, Docket No. 50-293, Pilgrim Nuclear Power Station, Plymouth County, Massachusetts

Date of amendment request: July 31, 1989

Description of amendment request: The proposed amendment would delete the onsite and offsite organization charts and specify general requirements in place of the deleted charts. The proposed change affects Section 6.0, "Administrative Control" of the Pilgrim Technical Specifications. The proposed change is submitted in accordance with the guidance provided in the NRC Generic Letter (GL) 88-06 dated March 22, 1988.

Basis for proposed no signficant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee addressed the above three standards in the amendment application. In regard to the three standards, the licensee provided the following analysis.

(1) Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The changes proposed to remove corporate and plant organization charts from the Technical Specifications do not involve a significant increase in the probability or consequences of an accident previously evaluated. As stated in NRC Generic Letter 88-06, the requirements necessary for safe operation of the plant have been retained in the Technical Specifications; the changes do not eliminate or alter the functions previously reviewed; and the changes do not affect plant operation and design or create a new accident mode. The changes proposed were modeled after Enclosure 2 to NRC Generic Letter No. 88-06 in conformance with Commission requirements.

(2) Use of the modified specification would not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed amendment does not create the possibility of a new or different kind of accident than previously evaluated because the proposed change is administrative in nature and no physical alterations of plant configuration or changes to setpoints or operating parameters are proposed.

(3) Use of the modified specification would not involve a significant reduction in a margin of safety.

The proposed amendment does not involve a significant reduction in a margin of safety because Boston Edison, through its quality assurance programs, its commitment to maintain only qualified personnel in positions of responsibility, and other required controls, assures that safety functions will be performed at a high level of competence. Therefore, removal of the organization charts from the Technical Specifications will not affect the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination analysis. Based upon this review, the staff agrees with the licensee's analysis. Therefore, based on its review, the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room location: Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360

Attorney for licensee: W. S. Stowe, Esq., Boston Edison Company, 800 Boylston Street, 36th Floor, Boston, Massachusetts 02199

NRC Project Director: Richard H. Wessman

Consolidated Edison Company of New York, Docket Nos. 50-003 and 50-247, Indian Point Nuclear Generating Unit Nos. 1 and 2, Westchester County, New York

Date of amendments request: July 25, 1989

Description of amendments request: The proposed amendments would revise the "Indian Point Station Units 1 and 2 Physical Security Plan" to (1) redefine several vital areas of Indian Point 2 as Type I rather than Type II and vice versa, (2) make several changes for clarification and standardization of terminology, (3) remove several items from the list of vital equipment but not actually remove the equipment from vital areas, and (4) remove the City Water Tank from the list of vital equipment and delete its vital area.

Basis for proposed no significant hazards consideration determination: The licensee provided the following analysis of the proposed changes:

The Commission has provided guidance concerning the application of the standards for determining whether "significant hazards considerations" exist by providing certain examples at 51 FR 7744 (March 6, 1986). Example (i) of 51 FR 7744 which applies to editorial changes, states:

"(i) a purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature."

Although the example cited in 51 FR 7744 refers specifically to proposed change to technical specifications, it is understood that the intent of the guidance is that it apply to license amendment changes, in general, including Physical Security Plan changes such as proposed herein. With the exception of the proposed change to delete the City Water Tank from Table 3.2, the changes to the Physical Security Plan proposed in this application are shown not to involve a significant hazards consideration by reason of the guidance in example (i) above since they amount to merely administrative changes such that there are no functional alternatives being made. Note that the level of security afforded Type I and Type II vital areas at Indian Point is identical and this policy will not change without another amendment request. Likewise, the deletion of items, other than the City Water Tank, from the list of vital equipment will not alter their physical location within vital areas.

Concerning the remaining proposed change, the Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The proposed amendments have been evaluated below and determined not to involve a Significant Hazards Consideration.

(1) Do the proposed changes involve a significant increase in the probability or consequences of an accident previously evaluated?

No. The City Water Tank is utilized for normal plant operation and may be used as a backup to safety equipment cooling. Its damage or destruction would not cause or increase the probability or consequences of an accident since safety-related vital equipment would not be affected by such

BEST COPY AVAILABLE

sabotage and would, therefore, remain operable. Therefore, since sabotage in a non-vital area can be assumed to be successful but safety-related equipment in vital areas is assumed to operate as required, the deletion of this item from the list of vital equipment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Do the proposed changes create the possibility of a new or different kind of accident from any accident previously evaluated?

No. Deletion of this item from the vital equipment list implies that we must assume its inoperability in the event of successful sabotage. Such inoperability, caused by damage or destruction, would be serious enough to cause reactor shutdown as required by Technical Specifications but would not result in any previously unanalyzed accident. Overall plant design is such that adequate safety-related equipment and cooling to that equipment exists to bring the plant to a safe shutdown and assure that escalation of an accident beyond the damage to this non-vital piece of equipment would not occur. Successful sabotage of the item deleted from the list of vital equipment with this proposed revision would, therefore, not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) Do the proposed changes involve a significant reduction in the margin of safety?

No. Deletion of this item from the vital equipment list and its subsequent inoperability or destruction due to successful sabotage could yield a forced plant shutdown as required by Technical Specifications. The other consequences of such sabotage would be the elimination of certain backup systems which are not required or relied upon for accident prevention or mitigation purposes. This effect would not be a significant one since the functionally equivalent safety-related vital equipment would not be adversely affected. Therefore, the overall margin of safety would not be significantly reduced.

The staff agrees with the licensee's analysis. Therefore, based on the above, the staff proposes that the proposed amendment will not involve a Significant Hazards Consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003

NRC Project Director: Robert A. Capra

Duquesne Light Company, Docket No. 50-412, Beaver Valley Power Station, Unit No. 2, Shippingport, Pennsylvania

Date of amendment request: July 27, 1989

Description of amendment request: The proposed amendment would revise Section 4.7.12 of the Technical Specifications to relax the surveillance frequency of failed snubbers resulting from isolated damage events that cannot be related generically to other snubbers. Specifically, the proposed changes would eliminate the requirement to reduce the surveillance intervals for cases that result from isolated damage. In addition, another change would permit either satisfactory functional test result, or applied remedy be the basis to declare snubbers as operable for the purpose of establishing the next inspection interval. Both these changes have been implemented in the Unit 1 Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists in accordance with 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazard consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The proposed changes do not involve any changes to plant hardware or operating procedures. All snubbers and related components will continue to be visually and functionally inspected in accordance with the current specifications, and hence the overall operability of the snubbers are not affected. Thus the answers to the first 2 criteria are negative. None of the previous safety analyses are affected, and no safety assumptions need to be changed. Thus the answer to criterion (3) is also negative. The staff therefore proposes to determine that the requested amendment involves no significant hazards considerations.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Florida Power and Light Company, et al., Docket Nos. 50-335 and 50-389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of amendment requests: July 28, 1989

Description of amendment requests: These proposed amendments would revise Technical Specifications Sections 3.7 for both units to clarify testing requirements for the main feedwater line isolation valves and the main steam line isolation valves (MSIVs).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee provided the following discussion regarding the above three criteria:

Criterion 1

Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The bases for Technical Specifications 3.7.1.5 for Units 1 and 2 and Technical Specification 3.7.1.6 for Unit 2, state that the main steam isolation valves and main feedwater isolation valves are maintained in the closed position to ensure that the consequences of an excess steam demand event are limited. With the main steam line isolation valves and the main feedwater line isolation valves maintained closed the functional design bases under accident conditions are met by prohibiting the blowdown of both steam generators and ensuring that all main feedwater flow is stopped. Therefore, the potential for excessive cooldown of the reactor coolant system, and the accompanying return to power from subcritical conditions, are reduced by the proposed license amendment.

Adding the statement regarding the inapplicability of Technical Specification 3.0.4 to the Unit 1 MSIV specification is administrative in nature, and brings the Unit 1 specification into agreement with the Combustion Engineering (CE) Standard Technical Specifications. Changing modes with the MSIVs closed does not involve any increase in accident probability or consequences because these valves will already be in their required accident position.

Criterion 2

Use of the modified specification would not create the possibility of a new or different kind of accident from any accident previously evaluated.

Maintaining the main steam isolation valves and main feedwater isolation valves closed in Modes 2 through 4 does not create a new or different kind of accident from any previously established. Overpressurization of the main steam lines when the main steam line isolation valves are closed is prevented by the safety valves on the main steam lines. The availability of feedwater to the steam generators is ensured by the operability requirements for the auxiliary feedwater system.

Allowing Unit 1 to change modes while both main steam line isolation valves are closed is in accordance with the CE Standard Technical Specifications, and will not create the potential for a new or different kind of accident or event.

Criterion 3

Use of the modified specification would not involve a significant reduction in a margin of safety.

By maintaining the main steam line and main feedwater isolation valves in a closed position, the potential consequences of a steam line break event are minimized, and the margins of safety provided in the accident analyses of record are increased.

Based upon the above, we have determined that the amendment request does not (1) involve a significant increase in the probability or consequences or an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any previously evaluated, or (3) involve a significant reduction in a margin of safety, and therefore does not involve a significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the proposed changes to the TS involve no significant hazards considerations.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036

NRC Project Director: Herbert N. Berkow

Florida Power and Light Company, et al., Docket No. 50-389, St. Lucie Plant, Unit No. 2, St. Lucie County, Florida

Date of amendment request: July 26, 1989

Description of amendment request: This amendment revises Action f. of Technical Specification 3.8.1.1. to make it consistent with the Emergency Diesel Generator testing action requirements.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee provided the following discussion regarding the above three criteria:

Criterion 1

Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The probability of an accident previously evaluated in the Updated Final Safety Analysis Report (UFSAR) has not been affected as the proposed change is administrative in nature, and is intended to restore consistency in testing requirements for the emergency diesel generators when one offsite power source is inoperable. No parameters which affect the probabilities of occurrence of any accident are affected by this change.

The consequences of an accident previously evaluated in the UFSAR have not been increased as the proposed surveillance requirements will not adversely affect the operation or operability of the diesels or any other safety related equipment.

The probability of a malfunction of equipment important to safety has not changed since reducing the test frequency of the diesel generators and modifying the starting requirements to be consistent with the manufacturer's recommendations are intended to enhance diesel reliability by minimizing severe test conditions which can lead to premature failures.

Criterion 2

Use of the modified specification would not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change is administrative in nature and is intended to restore consistency between ACTION statements relative to the starting of emergency diesel generators when one offsite power source is inoperable. The net effect of this change is to reduce the diesel generator testing frequency and starting requirements such that there is still a high degree of assurance that they would operate, if called upon, when one offsite circuit is inoperable, and has no impact on actual accident analysis.

The possibility of a malfunction of equipment important to safety of a different type than any analyzed in the UFSAR has not been increased in that the proposed license amendment incorporates the starting and testing requirements recommended by Generic Letter 84-15. The intent of the change is to enhance the reliability of the emergency diesel generators by adherence to manufacturer recommendations regarding engine prelube and warmup.

Criterion 3

Use of the modified specification would not involve a significant reduction in a margin of safety.

The proposed change restores consistency between action statements in St. Lucie Unit 2 Technical Specification 3/4.8.1.1, reducing the frequency of diesel engine starts and diesel engine fast, cold starts while providing a high degree of assurance that they would operate, if called upon, when one offsite power circuit is inoperable. The reduction of diesel generator testing frequency should increase the reliability of the diesel generators because the diesel engines will be properly conditioned before startup and the number of starts decreased to reduce wear.

Based upon the above, we have determined that the amendment request does not (1) involve a significant increase in the probability or consequences or an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any previously evaluated, or (3) involve a significant reduction in a margin of safety, and therefore does not involve a significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the proposed changes to the TS involve no significant hazards considerations.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036

NRC Project Director: Herbert N. Berkow

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: June 28, 1989

Description of amendment request: The proposed amendment would revise License Condition 2.C(14), Emergency Response Capabilities, Attachment 5, Item 3. Item 3 of Attachment 5 to the license specifies the schedule for implementation of modifications (installations or upgrade) for neutron flux monitoring consistent with the guidance of Regulatory Guide 1.97, Revision 2 or the NRC Staff's Safety Evaluation Report (SER) of the BWR Owners Group (BWROG) Licensing Topical Report (NEDO-31558, Position on NRC Regulatory Guide 1.97, Revision 3, Requirements for Post-Accident Neutron Monitoring System). The current schedule, as established by Amendment No. 28 to the license, states that modifications, if required shall be completed before restart from the next refueling outage starting after 10 months from the date of receipt of the NRC Staff SER on NEDO-31558, but no later than January 1, 1991 unless otherwise notified in writing by the NRC staff.

The proposed change would modify the implementation schedule to state that modifications, if required, shall be completed before restart from the next refueling outage starting after 18 months from the date of receipt of the NRC Staff SER on NEDO-31558. The licensee's submittal indicates that the reason for the proposed change is that an 18-month period is required from initial specification release to completed installation of the neutron monitoring system (NMS).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee provided an analysis that addressed the above three standards in the amendment application.

1. No significant increase in the probability or the consequences of an accident previously evaluated results from this proposed change because:

There is no change in system design or operation. The license condition currently requires upgrade of NMS during the third refueling outage. This proposed change will allow operation with the currently installed NMS which has been found to comply with all criteria proposed in the BWROG letter. This system is required to provide neutron flux indication and is not postulated to initiate any accidents. The NMS is used to verify reactor shutdown as part of the Emergency Operating Procedures (EOPs). The use of neutron monitoring in the EOPs is conservative in that, if it is not available, actions are specified which will lead to safe shutdown without the system. The requirements of RG 1.97 concerning neutron monitoring are additions to the existing system abilities. Therefore, delay in upgrade to RG 1.97 requirements will not significantly increase the probability of an accident and would not lead to an increase in the consequences of an accident as defined in the safety analysis because of the conservative EOP actions.

2. This proposed change will not create the possibility of a new or different kind of accident than any previously evaluated because:

The current system has been evaluated using alternate criteria proposed in NEDO-31558 and found acceptable for continued operation. This change does not involve any changes to design or operation. In addition, the neutron monitoring system is not postulated as the initiator of any accidents. Therefore, no new or different accidents are created.

3. This proposed change does not involve a significant reduction in the margin of safety because:

Design, function, and operation of the existing NMS remain the same. There is no specific "margin of safety" associated with this system as used in RG 1.97 other than to assure reactor shutdown following a transient or accident. EOP actions are conservative with respect to the use of the NMS for verification that the reactor is shutdown. When not available during an accident or transient scenario, actions are specified which will lead to safe reactor shutdown. Because these actions lead to a safe plant condition (reactor shutdown), the margin of safety is not reduced. In addition, this request does not result in a reduction to the margin of safety as defined in the bases of the RBS Technical Specifications.

Because the present RBS design meets all criteria provided in the BWROG License Topical Report, NEDO-31558, which was submitted to the NRC April 1, 1988, as supported by the plant-specific evaluation attached [to the June 28, 1989 submittal], extension of the implementation date for a NMS meeting RG 1.97 guidance is justified. This proposed extension allows the NRC to complete their evaluation of the report, which provides an alternative design as allowed by the current license condition to comply with the RG 1.97 requirements. In addition, GSU will be able to better plan its resource utilization to address the NMS pursuant RG 1.97 after the Staff's SER is received.

The NRC staff has reviewed the licensee's no significant hazards consideration determination. Based on the review and the above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Attorney for licensee: Troy B. Conner, Jr., Esq., Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Frederick J. Hebdon

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment request: October 13, 1987

Description of amendment request: The proposed amendment would revise Technical Specification (TS) Table 3.2-B, "Instrumentation That Initiates or Controls the Core and Containment Cooling Systems." The revision of TS Table 3.2-B would reflect the Containment High Pressure trip level setting to be greater than 2 psig, rather than the current setting of greater than 1 psig but less than 2 psig. Additionally, the remarks section of TS Table 3.2-B would be revised to state "Prevents inadvertent operation of containment spray during normal operation," rather than during "...accident condition". These revisions are necessary to resolve an inconsistency between the DAEC Final Safety Analysis Report (FSAR) and the DAEC TS.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has provided an analysis of no significant hazards consideration in its request for a license amendment. The licensee has concluded that the TS change does not involve a significant increase in the probability or consequences of an accident previously evaluated because this change to the TS would resolve an inconsistency in the instrument setpoint dealing with the control of the containment spray system at primary containment pressures below 2 psig. The resolution of the inconsistency would not increase the probability or consequences of an accident previously evaluated.

The licensee has concluded that the TS change would not create the possibility of a new or different kind of accident because this change would resolve an inconsistency in the TS to reflect an accident that has previously been evaluated in the FSAR. Therefore, no possibility of a new or different kind of accident would be created by the TS modification.

Finally, the licensee has concluded that the TS change would not involve a significant reduction in the margin of safety because the proposal would not change the original margin of safety.

The staff has reviewed the licensee's evaluation of the proposed changes and agrees with the licensee's conclusion. Therefore, the staff proposes to determine that the proposed change to the Technical Specifications does not involve a significant hazards consideration.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S.E., Cedar Rapids, Iowa 52401.

Attorney for licensee: Jack Newman, Esquire, Kathleen H. Shea, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036.

NRC Project Director: John N. Hannon.

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: June 1, 1989

Description of amendment request: The proposed amendment would revise Technical Specification Table 4.6.2g, Instrumentation That Initiates Control Rod Withdrawal Block - Surveillance Requirement and Table 4.6.2g Note (g) to delete surveillance requirements that are either inapplicable or cannot be performed due to instrument design limitations. The proposed changes will (1) remove the surveillance requirement to calibrate the Detector Not In Startup Position control rod block instruments associated with the Source Range Monitoring (SRM) and the Intermediate Range Monitoring (IRM) instrument channels, (2) remove the surveillance requirement to calibrate the SRM and the IRM Instrument Inoperative control rod block instrument channels, (3) remove the surveillance requirement to perform sensor checks on the SRM and the IRM control rod withdrawal block instrumentation and (4) revise Note (g) to Table 4.6.2g to reflect the changes made to the table and the deletion of the requirement to calibrate SRM and IRM rod block instrumentation prior to shutdown.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety. The staff has reviewed the licensee's submittal and concludes:

1. The operation of Nine Mile Point Unit 1 in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated because the deleted surveillance requirements will not have an adverse effect upon the ability of the Control Rod Block circuitry to perform its intended safety function.

The SRM and IRM systems provide multi-channel monitoring of the core thermal neutron flux during startup and low power operation. In addition, the SRM and IRM systems will initiate a rod withdrawal block for high neutron flux or channel malfunction conditions. Both the SRM and the IRM systems provide Detector Not In Startup Position, Inoperative and Upscale trip signals to the control rod withdrawal block circuitry and the IRM system provides a Downscale trip signal.

The SRM and the IRM Detector Not in Startup Position instrument channels initiate a control rod block to ensure that control rods are not withdrawn unless the appropriate detectors are properly positioned and capable of providing the operator and the circuitry with neutron flux information. The licensee has indicated that the design of these instrument channels does not allow the output of the detector to be varied in response to a variable test signal. Therefore, since the trip is either on or off in response to the detector position switch, it cannot be calibrated. The proposed change to delete the requirement to calibrate this function will not affect the ability of the rod block to function as required, since the performance of the associated functional tests at the existing Technical Specification required frequency verifies operability of the rod block function. Also, preventive maintenance realignment of the detector retraction mechanism limit switches each refueling outage ensures proper detector and position switch alignment.

An SRM and IRM instrument channel inoperative rod block is initiated on low detector voltage, electronics drawer internal module unplugged, or the channel mode switch not in the Operate position. Since none of these inputs require calibration, the proposed change to delete the surveillance requirement to calibrate the instrument channel Inoperative function will not affect their ability to initiate a rod block when required. Additionally, the functional tests on the instrument channels at the existing Technical Specification required frequency ensures operability of the rod block function.

The rod block instrument channels are digital/bistable channels and their output signal is either present or absent depending upon the state of the sensor. Because the conditions that generate an output signal (high neutron flux or channel malfunction) are received only when the event is present, a qualitative determination of acceptable operability by observation or comparison with other independent sensors measuring the same variable (i.e., a sensor check) is not possible. Therefore, the proposed change to delete the sensor check requirement for the SRM and IRM instrument channels will not affect the ability of the channels to perform as required.

A control rod withdrawal block functions to prevent control rod withdrawal only. Therefore, the change to delete the requirement to calibrate the SRM and IRM rod withdrawal block instrument channels prior to shutdown (rod insertion) does not affect the ability of these channels to perform as required.

A proposed administrative change to Note (g) of Table 4.6.2g reflects the above proposed changes to Table 4.6.2g.

In summary, the proposed changes do not affect the analyses of abnormal operational transients or design basis accidents as presented in Section XV of the Final Safety Analysis Report. The proposed changes do not change the design or operation of the detector or instrumentation and, therefore, do not increase the probability or consequences of any accident previously evaluated.

2. The operation of Nine Mile Point Unit 1, in accordance with the proposed amendment, will not create the possibility of a new or different kind of accident from any accident previously evaluated since the proposed changes do not alter the design or operation of the detector or instrumentation systems.

3. The operation of Nine Mile Point Unit 1, in accordance with the proposed amendment, will not involve a significant reduction in a margin of safety because, as discussed previously, the deleted surveillance requirements are unnecessary and do not affect the ability of the Control Room Block circuitry to function as required.

Specifically, the SRM and the IRM Detector Not In Startup Position rod block instrument channel calibrations required by the existing Technical Specification are being deleted because the design of the instrumentation does not facilitate calibration. The performance of functional tests on the instrument channels and preventive maintenance checks of the detector limit switches presently required by the Technical Specifications adequately ensures instrument operability and alignment, respectively. Calibration of the SRM and the IRM instrument channel inoperative rod block required by the existing Technical Specification is not necessary because the channel inputs do not require calibration.

The sensor checks required by the Technical Specifications are not applicable because sensor checks cannot be performed on the digital/bistable outputs from the SRM and IRM sensors that initiate control rod blocks (detector not in startup position, inoperative, upscale and downscale).

The requirement to calibrate Control Rod Withdrawal instrumentation prior to shutdown (control rod insertion) is not necessary since control rod withdrawal blocks are only applicable for rod withdrawal.

Based upon the above, the staff proposes that the amendment will not involve a significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006.

NRC Project Director: Robert A. Capra

Philadelphia Electric Company, Docket No. 50-352, Limerick Generating Station, Unit 1, Montgomery County, Pennsylvania

Date of amendment request: July 11, 1989

Description of amendment request: The proposed amendment would revise the Technical Specifications (TS) in response to NRC Generic Letter (GL) 88-06 "Removal of Organization Charts from Technical Specification Administrative Control Requirements" to: (1) remove the onsite and offsite organizational charts from TS Section 6.2.1 and 6.2.2, respectively and (2) make certain miscellaneous administrative changes in Section 6 of the TSs (Administrative Control) related to revisions to the corporate organization.

GL 88-06 encourages licensees to propose changes to their TS to remove organizational charts from TS and replace them with descriptions of the organizational structure and characteristics which are important to safety. The proposed changes concern the Administrative Controls in Section 6.0, and do not affect any Limiting Conditions for Operation or Surveillance Requirements. The proposed changes in this amendment request are grouped into two categories, Category A and Category B. Category 'A' proposed changes involve removing the onsite and offsite organizational charts from TS Sections 6.2.1 and 6.2.2, respectively. These proposed changes are consistent with the guidance provided in GL 88-06. Category 'B' proposed changes are five miscellaneous administrative changes. These proposed changes are to: (1) revise paragraphs in Sections 6.2 and 6.5 to reflect the new organization under the Executive Vice President-Nuclear, (2) revise paragraph 6.5.2.1 to indicate that the Nuclear Review Board (NRB) reports to and advises the Executive Vice President-Nuclear, (3) revise paragraph 6.5.2.9.C to indicate that NRB audit reports shall be forwarded to the Corporate Officer(s) responsible for the areas audited, (4) revise paragraphs 6.2.3.2 and 6.2.3.4 to reflect title changes and the deletion of the corporate Independent Safety Engineering Group and (5) revise paragraph 6.14.2 to reflect the groups responsible for technical review of the Offsite Dose Calculation Manual.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has provided an analysis of the no significant hazards consideration in its request for a license amendment for each of the proposed changes discussed previously. The Staff has reviewed the licensee's analysis of the proposed amendment against the three standards in 10 CFR 50.92 and finds that:

A. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

Removing the organization charts from TS does not affect plant operation. The proposed changes do not increase or decrease the qualification, experience or training requirements of onsite or offsite Limerick Generating Station (LGS) personnel. The LGS Quality Assurance Program contains detailed organization charts and associated descriptions of responsibilities. Appendix B to 10 CFR 50 and 10 CFR 50.54(a)(3) govern changes to the organizations described in the QA Program. In accordance with the requirements of 10 CFR 50.34(b)(6) the applicant's organizational structure is included in the LGS Final Safety Analysis Report, Chapter 13. As required by 10 CFR 50.71(e), the licensee submits annual updates to the FSAR.

The administrative changes involving a position title change, creation of an advisory board, distribution of audit reports, ISEG composition, and elimination of unnecessary review details, do not involve the design or operation of plant hardware or systems. Accidents analyzed remain unaffected by these changes.

B. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

Removing the organization charts from TS does not affect plant operation. The proposed changes do not increase or decrease the qualification, experience or training requirements of onsite or offsite Limerick Generating Station (LGS) personnel. The LGS Quality Assurance Program contains detailed organization charts and associated descriptions of responsibilities. Appendix B to 10 CFR 50 and 10 CFR 50.54(a)(3) govern changes to the organizations described in the QA Program. In accordance with the requirements of 10 CFR 50.34(b)(6) the applicant's organizational structure is included in the LGS Final Safety Analysis Report, Chapter 13. As required by 10 CFR 50.71(e), the licensee submits annual updates to the FSAR.

The administrative changes involving a position title change, creation of an advisory board, distribution of audit reports, ISE&G composition, and elimination of unnecessary review details, do not involve the design or operation of plant hardware or systems. No new modes of operation, changes to setpoints or changes in operating parameters result from this change.

C. The proposed changes do not involve a significant reduction in a margin of safety.

The removal of the organization charts from TS is accompanied by the addition of requirements for the Limerick organizational structure which are needed to maintain the essential aspects of the material being removed. This will permit the implementation of organizational changes without prior NRC approval provided the change meets these added organizational structure requirements. Consequently, enhancements to the organizational structure, as well as minor administrative changes such as position title revisions, can be implemented promptly upon identification of the need

for the change thereby creating a positive impact on safety.

The administrative changes involving a position title change, creation of an advisory board, distribution of audit reports, ISEG composition, and elimination of unnecessary review details, do not involve the design or operation of plant hardware or systems. No new modes of operation, changes to setpoints or changes in operating parameters result from this change.

The staff has reviewed the licensee's submittal and significant hazards analysis and concurs with the licensee's determination as to whether the proposed amendment involves no significant hazards consideration. Therefore, the Staff proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Attorney for licensee: Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Walter R. Butler

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Dockets Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Units Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: July 11, 1989

Description of amendment request: These amendments would remove the organization charts from the technical Specifications to the FSAR in response to the guidance set forth in the NRC staff's Generic Letter 88-06 "Removal of Organization Charts from Technical Specification Administrative Control Requirements." Several administrative changes involving changes in position titles and reporting relationships are also proposed. These proposed changes to the organization charts and the administrative changes have been grouped as Category A and Category B changes, respectively in the licensee's application.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The licensee has provided a discussion of the proposed changes as they relate to these standards; the discussion is presented below. The licensee has arranged these changes into two categories. The licensee's discussion of each of these categories is presented separately as follows.

Standard 1

The proposed Category 'A' changes do not involve a significant increase in the probability or consequences of any accident previously evaluated.

Removing the organization charts from the Technical Specifications and replacing them with more general language does not affect plant operation. The proposed changes do not increase or decrease the qualification, experience or training requirements of onsite or offsite nuclear personnel. Additionally, the proposed changes do not affect the shift crew composition or the facility management positions requiring an NRC license.

The Peach Bottom Quality Assurance Plan contains detailed organization charts and associated description of individual and group responsibilities as they apply to the operation and support of the Peach Bottom facility. Appendix B to 10 CFR 50 and 10 CFR 50.54(a)(3) govern changes to the organization as described in the Quality Assurance Plan. 10 CFR 50.34(b)(6) requires that the organizational structure also be included in the Final Safety Analysis Report. Section 13 of the Updated Final Safety Analysis Report provides a description of the organization and detailed organization charts. As required by 10 CFR 50.71(e), this information must be maintained and updated annually. Based on this review, it is concluded that the proposed Category 'A' changes do not involve a significant increase in the probability or consequences of any accident previously evaluated.

Standard 2

The proposed Category 'A' changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes are administrative in nature, and do not involve any physical alterations of plant configurations or changes to setpoints, or operating parameters. It is therefore concluded that removing the organization charts from the Technical Specifications does not create the possibility of a new or different kind of accident from any previously evaluated.

Standard 3

The proposed Category 'A' changes do not result in a significant reduction in the margin of safety.

Removing the organization charts from the Technical Specifications enhances the margin of safety by permitting an organizational change without NRC approval provided that the objectives of proposed paragraph 6.2.1 are met, thereby allowing a more timely response to situations where the appropriate action is a prompt organizational change. Safety is further enhanced by providing clear and concise definitions of responsibility for the Shift Supervisor, Plant Manager and Vice President, Peach Bottom Atomic Power Station. Further, the proposed changes include additional administrative controls which capture the essential aspects of the material being removed such that the associated requirements will continue to be met. Based on this review, it is concluded that the proposed Category 'A' changes do not result in a significant reduction in the margin of safety, but improve the margin of safety.

Standard 1

The proposed Category 'B' miscellaneous changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

Replacing the technical Engineer with the Engineer-Systems on the PORC will not decrease the effectiveness of the PORC. As required by proposed specification 6.2.2.g, either the Superintendent-Technical or the Engineer-Systems will hold a Senior Reactor Operator license, thereby ensuring the level of plant operations expertise of the PORC.

Sufficient corporate management involvement in nuclear plant safety will be maintained with the elimination of the direct reporting requirement of the NRB to the Office of the Chief Executive. The Office of the Chief Executive will be made aware of NRB activities by the Nuclear Committee of the Board through the Board of Directors and by the Executive Vice President-Nuclear.

Designating Corporate Officer(s) responsible for the areas audited instead of the Executive Vice President-Nuclear as the recipient(s) of NRB audit reports is a more appropriate initial level of review. The Corporate Officers have a closer proximity to the sources of problems and therefore can take prompt corrective actions. If NRB audit findings are not satisfactorily addressed by the Corporate Officer(s), the NRB may inform the Executive Vice President-Nuclear through its normal communication channel as defined in Specification 6.5.2.9.

Section 14 of the PBAPS UFSAR has been reviewed to determine the effect of the proposed administrative changes on previously evaluated accidents. It is concluded that the accident analyses in Section 14 of the UFSAR are not affected by the proposed miscellaneous changes. For this reason, as well as the reasons presented above, it is concluded that these changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

Standard 2

The proposed Category 'B' miscellaneous changes do not create the possibility of a new or different kind of accident from any previously evaluated.

The implementation of these miscellaneous changes will not affect the interpretation or intent of the specifications they involve (6.5.1.2, 6.5.2.9 and 6.5.2.10.c). These changes are purely administrative and do not involve any hardware changes or plant modifications. Therefore, these changes will not create the possibility of a new or different kind of accident from any previously evaluated.

Standard 3

The proposed Category 'B' miscellaneous changes do not involve a significant reduction in a margin of safety.

The administrative nature of these changes will not impact plant systems or operation. For this reason, as well as the reasons presented in the Safety Assessment and in response to item 1 above, it is concluded that these changes will not involve any reduction in a margin of safety.

The staff has reviewed the license's no significant hazards consideration determination for the Category A and B changes discussed above and agrees with the licensee's analysis. Accordingly, the Commission has proposed to determine that the above changes do not involve a significant hazards consideration.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126

Attorney for Licensee: Troy B. Conner, Jr., 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Walter R. Butler

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Dockets Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Units Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: July 19, 1989

Description of amendment request: The proposed amendments would eliminate the requirement for use of the Rod Sequence Control System (RSCS) and would decrease the power level setpoint above which the Rod Worth Minimizer (RWM) would no longer be required to be used from the existing 25% power level requirement at both units to a new 10% power level setpoint. The licensee states that these proposed amendments are based on and are consistent with the NRC Safety Evaluation Report issued to J. S. Charnley on December 27, 1987, which approved Amendment 17 of General Electric Topical Report NEDE-24011-P-A, "General Electric Standard Application for Reactor Fuel".

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The licensee has provided a discussion of the proposed changes as they relate to these standards; the discussion is presented below.

Standard 1: The proposed revisions do not involve a significant increase in the probability or consequences of an accident previously evaluated.

Deleting the RSCS and changing the low power set point on the RWM has no effect on the probability of equipment malfunction in other systems or within the RWM.

The probability of occurrence of an accident is not affected by this change. The probability of an RDA is dependent only on the control rod drive system and mechanisms themselves, and not in any way on the RSCS or RWM.

The consequences of an RDA as evaluated in the PBAPS UFSAR will not be affected by this modification. An extensive probabilistic study was performed by the NRC staff (letter and enclosure from B. C. Rusche, NRR, to R. Fraley, ACRS, dated June 1, 1978, "Generic Item IIA-2 Control Rod Drop Accident (BWRs)"). This study indicated that there was not a need for the RSCS. Furthermore, improved methodologies in the RDA analysis methods (e.g. BNL-NUREG 28109, "Thermal-Hydraulic Effects on Center Rod Drop Accidents in a Boiling Water Reactor," October 1980) indicated that the peak fuel enthalpies resulting from an RDA are significantly lower than previously determined by less refined methodologies.

The RSCS duplicates the function of the RWM. So long as the RWM is operable, the RSCS is not needed since the RWM prevents control rod pattern error. In the event the RWM is out of service, after the withdrawal of the first 12 control rods, the proposed Technical Specifications require that control rod withdrawal movement and compliance with the prescribed control rod pattern be verified by a second licensed operator or technically qualified member of the station technical staff. The verification process is controlled procedurally to ensure a high quality, independent review of control rod movement. In addition, to further minimize control rod movement at low power with the RWM out of service, the proposed Technical Specifications will permit only one plant start-up per calendar year with the RWM out of service prior to or during the withdrawal of the first twelve control rods. All the above taken together demonstrate consistency and applicability to those conclusions reached in the referenced NRC SER, and substantiate the conclusion that there will be no increase in the consequences of an RDA as evaluated in the FSAR as a result of eliminating the RSCS.

There will also be no increase in the consequences of an RDA as evaluated in the UFSAR due to lowering the RWM set point from 25% to 10%. The effects of an RDA are more severe at low power levels and are less severe as power level increases. Although the original calculations for the RDA were performed at 10% power, the NRC required that the generic BWR Technical Specifications be written to require operation of the RWM below 25% power in order to ensure conservatism. However, GE continued to perform the RDA analyses at and below 10% power because these produced more conservative analytical results. More refined calculations by BNL (BNL-NUREG 28109, "Thermal-Hydraulic Effects on Center Rod Drop Accidents in a Boiling Water Reactor," October 1980) have shown that even with the maximum single control rod position error, and most multiple control rod error patterns, the peak fuel rod enthalpy reached during an RDA from these control rod patterns would not exceed the NRC limit of 280 cal/gm for RDAs above 10% power, confirming the original GE analyses. Hence, lowering the RWM set point from 25% to 10% will not result in an increase in the consequences of an RDA as evaluated in the UFSAR. The previously referenced NRC SER has concluded this RWM set point reduction to be acceptable.

Standard 2: The proposed revisions do not create the possibility of a new or different kind of accident from any accident previously evaluated.

Operation of the RSCS and RWM cannot cause or prevent an accident. They function to minimize the consequences of an RDA. The RDA is already evaluated in the UFSAR, and the effect of this proposed change on the analyses is discussed in Item 1 above.

Elimination of the RSCS and lowering the RWM set point will have no impact on the operation of any other systems, and hence would not contribute to a malfunction in any other equipment nor create the possibility for an accident to occur which has not already been evaluated.

Standard 3: The proposed revisions do not involve a significant reduction in a margin of safety.

Elimination of the RSCS will not lower the margin of safety for the reasons discussed in Item 1 above and summarized below:

a) An extensive NRC study has determined that the possibility of an RDA resulting in unacceptable consequences is so low as to negate the requirement for the RSCS.

b) Recent calculations have determined that the consequences of an RDA are acceptable above 10% power.

c) The RSCS is redundant in function to the RWM. Eliminating the RSCS does not eliminate the control rod pattern monitoring function performed by the RWM.

d) To ensure that the RWM will be in service when required, the proposed RWM Technical Specification will be revised to allow only one startup per calendar year with the RWM out of service prior to or during the withdrawal of the first twelve control rods. If the RWM is out of service below 10% power, control rod movement and compliance with prescribed control rod patterns will be

verified by a second licensed operator or technically qualified member of the station technical staff. This situation is controlled by station procedure which specifically requires the following:

- Plant Management approval is required in order for the operator to bypass the inoperable RWM.
- A second operator or technically qualified staff member, with no other duties, is required to verify the first operator's actions while the first operator performs rod movements.
- The startup and the shutdown sequences with their respective signoff sheets provide for verification by the second operator after each rod movement step is completed by the first operator.
- The startup and shutdown sequences follow the same control rod patterns that the RWM enforces if it were not bypassed.

There is no significant reduction in the margin of safety resulting from lowering the RWM set point from 25% to 10% because calculations by GE and BNL have shown that even with the maximum single control rod position error, and most multiple error patterns, the peak fuel rod enthalpy during an RDA from these patterns would not exceed the NRC limit (280 cal/gm) above 10% power.

In summary, GE has provided technical justification for the proposed changes in the Topical Report NEDE-24011-P-A and associated references which justify the acceptability of the proposed changes.

The NRC has reviewed and accepted the GE analysis and provided guidelines for licensees wanting to make the changes proposed in NEDE-24011-P-A and approved in the NRC SER issued December 27, 1987 to J.S. Charnley of General Electric.

The proposed changes are consistent with those approved in the NRC SER and the guidelines set forth therein. Therefore, there is no significant reduction in a margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission has proposed to determine that the above changes do not involve a significant hazards consideration.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126

Attorney for Licensee: Troy B. Conner, Jr., 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Walter R. Butler

Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego, New York

Date of amendment request: May 31, 1989 and amplified by letter dated July 7, 1989

Description of amendment request: The proposed amendment would modify the core spray (CS) pump flow rate test requirements to make the wording more consistent with the wording of the flow rate test requirements of other pumps in the Emergency Core Cooling System. Presently, the CS pump test requirement in Specification 4.5.A.1.b states that the "Core Spray shall deliver at least 4625 gpm against a system head corresponding to a total pump developed head of greater than or equal to 113 psig." The amendment would change this to read that the "Core Spray pumps shall deliver at least 4625 gpm against a system head corresponding to a reactor vessel pressure of greater than or equal to 113 psi above primary containment pressure."

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed amendment against the standards provided above and has made the following determination:

Operation of the James A. FitzPatrick Nuclear Power Plant in accordance with the proposed amendment would not involve a significant hazards consideration as stated in 10 CFR 50.92, since it would not:

1. involve significant increase in the probability or consequences of an accident previously evaluated. The intent of the proposed change is to clarify and correct the Technical Specifications. The change is purely administrative in nature. There are no setpoint changes, safety limit changes, or changes to limiting conditions for operation. The proposed change assures that the core spray system is tested in accordance with the assumptions contained in the existing accident analyses. This change has no impact on plant safety operations. The change will have no impact on previously evaluated accidents.

2. create the possibility of a new or different kind of accident from those previously evaluated. The proposed change is purely administrative in nature and is intended to clarify and improve the quality of the Technical Specification. The change cannot create the possiblity of a new or different kind of accident.

3. involve a significant reduction in the margin of safety. The proposed change corrects an error which currently exists in the Technical Specifications. The change is administrative in nature and will clarify the specifications. This change does not contain any setpoint or safety limit changes regarding isolation or alarms. The proposed change does not affect the environmental monitoring program. This change does not negatively affect the plant's safety systems and does not reduce any safety margins.

The staff has reviewed the licensee's no significant hazards consideration determination. Based on the review and the above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Robert A. Capra

Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: July 9, 1987

Description of amendment request: The licensee proposes to modify the Salem Unit 1 and Unit 2 Technical Specifications by:

1. Changing the channel description format for item 7.a of Table 3.3-3, Loss of Voltage, to specify that the total number of channels is 1 per bus.

2. For Item 7.b of Table 3.3-3, Sustained Degraded Voltage, changing the Total Number of Channels, Channels to Trip and Minimum Channels Operable to 3 per bus, 2 per bus and 3 per bus, respectively.

3. For Item 7.b of Table 3.3-4, Sustained Degraded Voltage, changing the Trip Setpoint to greater than or equal to 91.6 percent of bus voltage for less than or equal to 13 seconds and changing the Allowable Values to greater than or equal to 91 percent of bus voltage for less than or equal to 15 seconds.

Basis for proposed no significant hazards consideration determination:

Item 1, Table 3.3-3 Item 7.a

This item is being revised to be consistent with the channel description format used for other items in this Table. This is an editorial change only. No modification is being made to the primary undervoltage protection system.

Item 2, Table 3.3-3 Item 7.b

The second level undervoltage protection system has been redesigned

The change from 3 to 1 per bus is a

prior to withdrawal of any rods in

Pennsylvania Avenue, NW.,

as a result of an event which occurred at Salem Unit No. 2 on August 26, 1988. Immediately following a reactor trip with safety injection, the Unit 2 vital buses began flip-flopping between the No. 21 and 22 Station Power Transformers (SPT) (preferred source of power) until they eventually separated from the offsite power system. The previous design provided for the transfer of a vital bus to the alternate SPT whenever the secondary voltage for its designated SPT dropped below 91 percent of rated bus voltage for greater than 10 seconds. This function was controlled by 2 relays on each vital bus. These relays were positioned such that they monitor the secondary voltage of each of the SPT (1 per SPT). In addition to initiating the transfer function these relays provided a transfer permissive signal such that a vital bus could not be transferred unless the alternate SPT has an acceptable secondary voltage. A separate relay monitored vital bus voltage and provided an input to each of the three Safeguards Equipment Controllers (SEC) such that, for a sustained degraded voltage (less than 91 percent for greater than 13 seconds) condition on 2 out of 3 vital buses, all vital buses were separated from the offsite source and sequenced onto the emergency source.

As redesigned, the transfer function was eliminated. The existing transfer relays were replaced with relays of similar design but with improved setpoint drift characteristics. These new relays (1 per bus) were connected to operate in parallel with the previous vital bus degraded voltage relay. The previous vital bus degraded voltage relay was also replaced with an upgraded relay. The interface with the SEC was then reconfigured from its previous 2 out of 3 bus design to a 2 out of 3 relay per bus design. A failure analysis has been completed by the licensee for each component in the system and demonstrates that no single failure will result in the creation of an unanalyzed condition. The new configuration: (1) eliminates the possibility of vital bus flip-flopping, (2) provides for the separation of the vital buses from the preferred source on an individual basis only, and (3) satisfies General Design Criterion 17 relative to maintaining the connection between the offsite source and the onsite distribution system.

Item 3, Table 3.3-4 Item 7.b
